Subject: Consultation on village plans - Dunkerswell

Dear Sirs

We note that in the village plan, Dunkerswell has not been included. However, we note that Dunkerswell is one of the largest villages in East Devon and also has the benefit of having the employment site at the airfield situated on its doorstep. Given this fact, we feel that Dunkerswell ought to be included within the village plan due to the uniqueness of it, being one of the largest villages and also having employment site on its doorstep. Surely one of the main factors is sustainability and Dunkerswell has this as it has an employment site so surely this is a village that should be grown due to having residents being able to work and live in the same village. We also feel that there should be more larger exclusive houses built in this area to aid the diversity of having mixes in Dunkerswell, again to aid the growth and sustainability of the village.

We trust that you will be able to consider these points as part of your overall considerations.

Kind regards

Robert Stone MRICS FAAV
