**Subject:** Village Plan Strategy 7

Dear sir.

Strategy 7 of the East Devon Local Plan.

I totally agree with the inspector's decision that Greendale industrial estate has now reached its full potential. This industrial estate should not be allowed to expand into the countryside anymore and the (Development in the countryside) must not be removed from the policy.

If Greendale was allowed to be expanded most of the tree planting that has been done to try and screen it will be lost.

Two areas of screening have already been removed and buildings put in its place (Without planning consent) As there is not one single tree within this large industrial estate we need the existing planting to remain in place. There have been numerous problems with the owners at the site and their build first and then apply for retrospective.

planning later. To say that they have no consideration for the residents of the village is an understatement but their contempt for planning and for the planning department is very well documented.

Best regards  
Mr David Rose
