Subject: Please dont relax restrictions at Hill Barton and Greendale business parks

As a 16 year resident at Farringdon Cross, may I please ask that you empathise with individuals like myself, and once and for all preserve what is left of our fragile residential livelihood by countering proposals being mooted by local businessmen to continue enjoying ongoing expansion of the local business parks. Already we at Farringdon cross hear low frequency nocturnal noises every night, suffer increased visual nocturnal light pollution, suffer compromised air quality and put up with vast increases in industrial traffic/Juggernaughts, and associated noises;

All our properties are blighted and we feel like our neighboring farmland is being swallowed up by the behemoth of industrialisation. I humbly request that development on our neighboring business parks be capped before the very last of our reduced quality of living.....is finally robbed. We had a rural residential community here long before opportunistic landowners decided to revolutionise the landscape for the overriding driver of making vast fortunes without consulting or even conferring with neighbouring residents. Unfortunately what I have witnessed in the last decades has been industrialisation by stealth, and unfortunately one begins to think that you might as well live in Marsh Barton trading estate!!

Very best wishes.

Will
