Dear Sir/Madam

I am writing to object to the removal of “strategy 7 of the East Devon Plan (Development in the country side) must not be removed from the policy”.

Whilst development brings employment to the area which is not always a bad outcome. I think we have now fulfilled its full potential with the ever growing trading estates and new homes. We have heavy goods vehicles and vans in large numbers on lanes never meant for such heavy traffic this is causing damage to the kerb sides, making potholes even larger! This causing danger for cycles and motorcycle’s and causing traffic hold ups when the Lorries meet the buses or other tractors or Lorries.

I would also like to comment on my disapproval of the retrospective planning that appears to be taking place if I started to do alterations without planning I am sure I would be in breach of the law and would not get away with it.

I would like to know how these green field sites are being allowed to be built on?

Yours Sincerely

J.M. Winsor
