<p>The Submission Version Draft NP states at Paragraph 24 (Chapter 1):</p> <p><i>“Whenever new buildings are being constructed, public and private, the aim should be to build them fit to last throughout the 21st Century, with sustainable features wherever possible. Consideration needs to be given to such matters as high energy efficiency, through solar or biomass heating, sound insulation of walls and lofts, double glazing of windows, and the provision of water harvesting, which enables rain to be collected for washing and sanitary purposes, with a separate clean water supply for drinking.”</i></p> <p>Additionally, paragraph 25 (chapter 1) states:</p> <p><i>“When new built development is being planned, serious attention needs to be given to making it energy-efficient. Solar panels on appropriate roofs and water harvesting are important features for all new development.”</i></p> <p>Bourne Leisure recognises the in-principle value that water harvesting and solar panels would have to the District, however it may not be relevant or feasible <i>“for all new built development”</i> to have to provide such sustainability measures (paragraph 25).”.</p>
