**Categories:** Reg.18 consultation

Hello EDDC

I am writing to raise a strong objection to the inclusion of the sites to the North East of Exmouth (Exmo\_04a, Lymp\_09, Lymp\_10, Lymp\_14) in the Local Plan which I feel are not sustainable or suitable due to a lack of infrastructure and services and the negative impact they will cause on the environment. These sites are also a contradiction to your own Climate Emergency Strategy which states you will resist developments in locations which would lead to occupants and users of the development to be reliant on private vehicles. These sites will quite obviously generate more, not less private vehicle usage.

I believe there are far better options such as building a new community in the area north of Hill Barton and sites closer to Exmouth town centre.

Best regards  
Claire O'Neill
