

### **East Devon Local Plan - Schedule of Local Plan Land Allocations – April 2015**

The table below identifies all sites that were allocated for development in the draft of the Local Plan, as subjected to oral hearing sessions in February and March 2014 and/or that are subject to proposed changes by the Council in April 2015, for:

1. Residential Use;
2. Employment Use
3. Mixed Use (typically including for one, other or both of the above and other uses).

The table notes any current planning applications for sites or recent permissions granted and also provides commentary on sites, including where recent development has occurred or is expected. The purple highlighted rows in the table identify sites where there is a policy change from the draft presented to oral hearing sessions at February/March 2014 to the new draft of April 2015, and it shows, therefore

- Proposed new allocations.
- Proposed deleted allocations.
- Allocations otherwise proposed to be changed.

It should be noted that site survey work that has been undertaken in preparation of this table, in April 2015, has resulted in a limited number of cases where minor plan amendments could be appropriate to update references to reflect current circumstances. These are noted in the schedule.

The sites listed in the table below should be cross-referenced to the Local Plan Proposals Map – Pre-Submission Consultation draft 2012 and specifically the West End and the town inset maps that form part of the Proposals Map, these can be viewed at:

<http://eastdevon.gov.uk/planning/planning-policy/emerging-plans-and-policies/the-new-local-plan/publication-and-submission-of-the-local-plan/plan-publication/>

The above maps should also be read alongside the proposed changes to the plan text, see:

<http://eastdevon.gov.uk/media/1035794/local-plan-tracked-changes-consultation-apr-2015.pdf>

In the proposed changes we show maps of significant policy boundary changes – but we do not show cases where allocations are proposed for deletion on account of recent permissions being granted or where site are now actually developed or being developed.
