Subject: Baxters farm Musbury

Regarding the proposed development plan for Baxters Farm Musbury.

We would like to make the following comments

This is a chance to provide, a mixture of affordable and social housing , providing a need for local people. These should be of a mixed design , using local materials and fitting into Musbury. What is not needed are second and holiday homes.

It would be good to see, “eco friendly” homes fitted with solar panels

We would like to see a footpath through to the village hall, linking it in to the village and plenty of green spaces , with a village green, outside the village hall, The present orchard being retained as a community orchard.

Extra car parking could also be provided for the village hall, addressing the problem of parking in the village
