**Subject:** Baxters Farm Musbury Proposed Development

We were unable to attend the residents meeting but wish to express our views about the proposed development in Musbury.

We very much support a modest development of additional housing, particularly affordable housing.

We would also like to see a community orchard.

The idea of keeping the development in line with what is already there to preserve and enhance the site sounds just right.

We are completely opposed to a small permanent travellers site , why don't they join the housing register like everyone else has to if they wish to be permanently housed?
