Subject: Lympstone planning

Categories: Reg.18 consultation

As a resident of Lympstone I would strongly object to the 500 houses planned for the village. The plans will have a major impact on the health and the wellbeing of the residents of the village. The services are already stretched without putting further pressure on the school, surgery, roads, flooding, sewage and the potential for flooding is already too high without building 500 houses causing more pressure through the village as it has no where else to go. Also the pressure on the environment of the river would be put under great strain. The village and the surrounding area would be changed for ever. Changing an area of outstanding beauty forever.

Please consider my observations
