Visually, the proposed dwellings at the site would be characteristic of other housing in the locality, including scale and massing, with careful choice of materials, which would ensure that the new dwellings blend well into their surroundings. Each dwelling is to be set within substantial grounds, assisting in creating a low-density development. Substantial planting as part of the scheme would help to provide a soft transition between the urban form and the rural setting beyond. It is therefore considered that the new housing would be in-keeping with their surroundings. The site would be seen in the

context of the surrounding development, with the backdrop of vegetation, which would reduce the visual appearance of the site on the surrounding landscape.

Based on the assessment in the LVIA the scheme complies with the other part of NDP Policy H4 in that the proposal would conserve and enhance the NL.

JUSTIFICATION FOR DEVELOPMENT WITHIN THE NATIONAL LANDSCAPE

The whole of Budleigh Salterton, including the application site is within the East Devon NL. There are no sites in the Town capable of delivering market and affordable housing of anywhere near the scale required to address identified needs. Therefore, any development seeking to meet the housing needs of the town would have to be located on greenfield site adjoining the BUAB and would, by definition, be within the NL.

An Affordable Housing Statement submitted with the application identifies an acute affordable housing need for both East Devon – with 5,939 households on the housing register as of 1 October 2024 – and Budleigh Salterton – 76 households on Devon Homes Choice seeking affordable housing in Budleigh with 25 in priority bands A, B and C. Analysis of waiting times and bid levels for affordable housing in Budleigh, together with higher house prices in Budleigh compared to other locations in the District, demonstrates there is an ‘exceptional need’ for the provision of new affordable homes at Budleigh within the NL. On the basis of the emerging affordable housing policy requirements the site would provide 12 new affordable homes which would make a modest but nonetheless important contribution to this deficit.

If sites within the NL were excluded from allocation in the emerging local plan not only would overall housing numbers fall short of the required figures, but future development would also be disproportionately located across the district and would not meet local need at those settlements within the NL.

WainHomes fully endorses the Council for acknowledging the need to allocate sites within the NL.

ACORN PROPERTY GROUP REPRESENTATIONS ON THE EAST DEVON LOCAL PLAN (2020 – 2042) REGULATION 19 CONSULTATION DRAFT (MARCH 2025) BY BELL CORNWELL LLP

1 INTRODUCTION Acorn Property Group is a very well-established, locally based housing developer and land promoter with interests across the district. Acorn Property Group has helped to facilitate new homes, affordable housing and other uses in the area. They are an independent development and regeneration specialist that has, successfully created a range of residential-led refurbishment and new build schemes. Specifically, Acorn Property Group has interests in land at Hillhead, Colyton, which is an allocated site in the Emerging Local Plan which is suitable for residential development. Given the nature of their long-standing delivery of housing in the district, Acorn Property Group is an important local stakeholder within interests in the proposals in the East Devon Local Plan for future development in the district. Against this background, Bell Cornwell LLP has reviewed the policies and information set out in the East Devon Local Plan (2020 -2042) Regulation 19 Consultation Draft and makes the following representations.

CHAPTER 5. DEVELOPMENT IN THE TOWNS AND VILLAGES

Strategic Policy SD09: Development Allocations at Colyton Acorn Property Group supports the development allocations for Colyton listed in Strategic Policy SD09 and identified on the Policies Map, particularly Land at Hillhead (site reference Coly_02) for which they have existing land interests. Acorn is the housing developer who will build out the site and deliver the housing specified. The inclusion of Coly_02 for residential-led development is clearly supported as it represents a logical approach to development and growth to the south of Colyton (in an un-designated landscape) noting the constraints that exist elsewhere in the settlement. The specific policy allocating Coly_02 states; “Land at Hillhead (Coly_02) This site, to the west of Colyton, is allocated for 49 new homes. In order to ensure no adverse effect on the integrity of the Beer

Quarry and Caves SAC and bat activities, suitable avoidance or mitigation measures will need to be identified and implemented. Approach roads to this site are narrow, largely ACORN PROPERTY GROUP REPRESENTATIONS ON THE EAST DEVON LOCAL PLAN (2020 – 2042) REGULATION 19 CONSULTATION DRAFT (MARCH 2025) BY BELL CORNWELL LLP 2 single width, and as such highway improvements may be needed with potential rerouting needed through the site.” On these technical points we would ask it to be noted that:

- Appropriate ecological mitigation will be provided to ensure no adverse effect on the integrity of the Beer Quarry and Caves SAC will occur.
- Whilst noting highway improvements are suggested within the policy, studies undertaken by the applicant confirm that the site is entirely deliverable from a highways perspective. DCC Highway comments in the site assessment work undertaken by the Council confirms that appropriate access can be delivered to the site. As such, the allocation of the site for residential development is sound and supported by appropriate officer assessment in the submitted evidence base.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD09

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This site is adjacent to the pre-school nursery and youth centre, long established by Colyton Parish Council as the only central site for a new Primary School as the current school is land-locked and cannot expand further. With 72 new houses being built in Colyton, where are the children going to be educated? DCC have agreed this site should be retained for a Primary School when they have the funding (I can provide the evidence after the consultation has closed).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Another site has been offered to EDDC in the Green Wedge above Courtney Drive in the Old Orchard. It could accommodate at least 60 houses .

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: It's taking away Colyton's ability to prepare for future generations. There's nowhere else for a Primary School to be built. It was earmarked by the Parish Council more than 20 years ago for a new Primary School. Now that the CeramTec site has gone with 72 new houses being built, where else can one be built?

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I think this is vital for Colyton and its future generations.

Full name: Alison Mary Stenning

Proposal:

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD09

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.:

1. Area of Great Landscape Value protected by the NPPF
2. Great Crested Newts breed in the attenuation pond in the field across from Clay Lane. Building and development work would harm them and their habitats which are protected by law.
3. Foraging ground of Grey Long-eared bats on the Red List of Endangered Species. There are only around 1000 of these mammals in the whole of the UK with a maternity roost just over 1000 metres away in Colyford. Radiotracked and registered over the past few years, they then fly down Burnards Field Road.
4. Beer Quarry and Caves SAC and bat activities over this field include foraging and the provision of connectivity between designated roosts for both the Lesser Horseshoe Bat and the Greater Horseshoe Bat, as well as the Key Lesser Horseshoe Bat Sustenance Zone (the area which includes critical foraging and commuting habitat for the bats). The Key Lesser Horseshoe Bat roost at Coles Mill is around 1,075 metres away, whilst the roost at Alaska Farm, Colyford is around 1,200 metres from the site. Colyton Rest House in the cemetery at the end of Burnards Field Road is a suspected mating site of Greater Horseshoe bats.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy

or paragraph. Please be as precise as possible.: This is an unsuitable site to develop for obvious reasons and cannot be modified to make it legally compliant.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

- 1.No consideration of the inevitable Ecological damage.
2. 20 houses were built at Seaway Head as a Rural Exception Site for Social Housing for local people and it is a blot on the landscape above the 200 foot contour specified by the Government Inspector not to be built above to preserve the setting of the historic town of Colyton and its conservation area in the late 1980s and which 92% of residents voted for in agreeing with the Colyton Parish Neighbourhood Plan (the other 8% were from Colyford who have since formed their own Parish Council) . There is no street lighting in this development and neither could there be in the proposed development because of the bats.
3. It's an unsustainable development on the skyline and can be viewed from across the Axe Valley and the Coly Valley, both in the East Devon National Landscape (AONB).
4. Lack of employment opportunities in Colyton will result in commuters. It would destroy Love Lane and Fair View Lane (Colyford) as commuters seek access to the A3150.
5. It's isolated from the town centre at the top of a very steep and narrow hill so residents would use cars. Colyton already has a traffic problem due to the medieval layout of its roads.
6. Lack of basic infrastructure - Primary School placement shortages and tiny GP practice.
7. Accessible only from single track lanes which run with surface water. Clay Lane is little more than a footpath whose banks keep collapsing.
- 8.High risk of flooding due to clay soil and too far from River Coly to drain surface water.
9. Blind bend at junction of Old Sidmouth Road and Hillhead which cannot be improved upon.
9. The properties at Burnards Field Road to the northwest of the site are at a considerable lower level and are at risk from flooding. The gardens already flood regularly and there are privacy and security concerns.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: This is an unacceptable site for development.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Mainly environmental protection and infrastructure planning. Another site has been offered to EDDC in the Green Wedge above Courtney Drive in the Old Orchard which is closer to the town centre, the river, sewage works and the main road B3161 without building above the 200 foot contour or destroying wildlife habitats. It could accommodate at least 60 houses and would not be visible from afar. It would constitute a natural development of Courtney Drive and would not stick out like a sore thumb.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am determined the proposed development is unlawful.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

2;COLY2 ,Its location, despite being within the Colyton parish boarder ,will have the most impact on COLYFORD village. The quickest way to the main road(A3052) Tesco and the proposed other outlets in Seaton is along 2 narrow lanes down one of which walk 1000 Colyton grammar school children twice a day. The residential sections of the Fairview lane and Gully shute are narrow and would become dangerous if this crazy proposal ever came to fruition. It would also have a visual impact across the Axe valley as the site is at the top of a hill and would make it the highest built up area in the whole valley. Concentrate on relocation the Colyton primary school and use its footprint to build houses,which ,I believe, is Colyton parish council's wish.

Full name: Sasha Haines

Organisation (where relevant): Colyton Parish Council

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD09

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

2.6 Site Coly 02a and 02b does not comply with modest and sensitively planned development to meet the needs of the local community. The site is too big for Colyton's needs, there is no evidence to support it's size, particularly as there are currently 72 houses being built on the old CeramTec factory site. The sites are also insensitive to Colyton's valley setting in that it extends over the historic 200ft contour line and up to the skyline.

2.7 The sites do not bring better facilities, Colyton needs a new Primary School and updated sewage facility. No mention of these is in the proposed plan. Where is the East Devon water cycle survey?

2.8 There is no plan to expand community facilities such as the Primary School, nor the infrastructure such as a desperately needed update to the sewage system.

2.10 The plan makes no measures for job creation or help with a resilient economy. There are no jobs to support this number of houses, making this site unsustainable. Site Coly 06a This is the only viable site for a new Primary School. Devon County Council supports this. To build on it would go against 2.7 and 2.8 in that it would prevent better facilities for Colyton. Colyton cannot support the proposed number of houses without a new Primary School. The plan does not comply. Site Coly 02a and 02. 3.2 These sites are not in a sustainable location. There are no jobs, supermarkets, dentists or Secondary Schools in Colyton these will necessitate more cars and more travelling. This will increase pressure on local roads which are already inadequate. Also the Primary School is too small to take the projected increase in children from these sites, as well as

the sewage system already being inadequate. These sites do not fulfil the criteria laid down in the Local Plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: We feel it is necessary to remain informed.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD10

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The proposed developments at Lymptstone - GH/ED/72a (42 dwellings) and GH/ED/73 (42 dwellings) in SD-10. The Sustainability Appraisal and Habitats Regulations Assessment are not based on accurate, up-to-date information on water quality risks. The assessments are vague and there is no reference to relevant local and national data and reports on water quality in the 'Evidence Library'.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Consider both local evidence and national reports and guidance on water quality. For example, the Lymptstone Water Quality Group can provide evidence on the sensitivity of the Wotton Brook catchment and Exe Estuary. We are not trying to stop development but to ensure that decisions and controls are based on accurate information.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: There has been no consideration of water quality/pollution risks associated with the proposed developments in Lymptstone (ED10) and at Courtlands Cross (ED01); they are not consistent with national policy and NPPF requirements on pollution prevention; and

they do not address local priorities. The sites are in highly sensitive catchments, the water courses flow to the Exe Estuary, a 'European site', SPA, SSSI, and Ramsar site, and the combined sewer system is already overloaded, causing high numbers of overflows into the Exe Estuary. There is now considerable evidence available that developments of this scale cause water pollution if not controlled - due to an increased volume of surface water runoff contaminated with hydrocarbons, heavy metals, and microplastics.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove GH/ED/72a (42 dwellings), GH/ED/73 (42 dwellings) since the risk of water pollution from developments of this scale is too high given the sensitivity of the catchment and the Exe Estuary. For any developments of this scale, highlight the sensitivity of the catchment, and require surface water treatment (e.g., filtration, bio-retention, and constructed wetlands) in addition to flood attenuation.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The fact that development of this scale is being proposed close to the Exe Estuary indicates that there has been inadequate cooperation with Natural England, the Environment Agency, South West Water, and local community groups on both environmental protection and infrastructure planning.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To provide evidence from our catchment-based water quality project in Lymington on the Exe Estuary, and our review of regulatory requirements and best practice standards.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD10

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

[Summerfield Planning on behalf of 3West Group Ltd] 3West Group support Strategic Policy SD10 and specifically the proposed allocation of the Land north west of Strawberry Hill, Lympstone (GH/ED/73).

An outline planning application for the site for up to 42 dwellings (application reference: 24/0301/MOUT) received resolution to grant planning permission at the EDDC planning committee held on the 19.11.2024.

The planning application site location plan is attached for reference.

The planning decision is pending agreement of a Section 106 Legal Agreement which at the time of writing is at an advanced stage with a planning decision expected to be issued during April 2025.

A reserved matters planning application has been prepared and is awaiting submission.

As a result of the comprehensive programme of work undertaken in support of the planning submission and approval of the planning application by EDDC, the site is proven to be deliverable.

We can confirm that construction work is forecast to commence during 2025 (subject to the timely grant of reserved matters planning) and therefore the site is able to make a valuable contribution to EDDC's 5 year housing land supply.

We fully support the inclusion of the Land north west of Strawberry Hill, Lymptone (GH/ED/73) in the Regulation 19 plan as housing allocations.

The site remains a very good candidate for allocation in the emerging Local Plan, and this is supported by the technical work and masterplan's prepared to support the planning application.

Due to the imminent grant of Outline planning permission, we are able to demonstrate the deliverability of both sites to meet the Local Plan objectives. Furthermore, the site is able to make a meaningful contribution to EDDC's 5-year housing land supply.

We trust our comments will be fully taken on board and the allocation of the site is confirmed.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To be available at the hearing session to provide further clarification or respond to any site specific queries from the Inspector or third parties.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD10

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We support the allocation of Mr and Mrs Parks' land at GH/ED/72a - Land at Meeting Lane for housing. The site is available and suitable for housing development. However, the Local Plan Review preferred options consultation which ran between November 2022 - January 2023 identified a much larger area of land at Meeting Lane, Lypstone (LP_GHED/72) as a preferred choice site allocation for 131 new homes and 0.52 hectare of employment land as illustrated on the plan extract below. This followed an assessment by the Council of all potential development sites within Lypstone which concluded in respect of all the land at Meeting Lane (GH/ED/72) that it is, "Well related to settlement and limited sensitivities. Good pedestrian access. Whilst in the existing coastal preservation area very limited views to the sea". Then in September 2024, in a report to the Strategic Planning Committee the entire allocation was proposed to be deleted with the following explanation, Whilst the west field is slightly contained within a 'bowl' with a ridge to north, the east field is open and more exposed. Views of site generally show an undeveloped, wooded skyline, but lightly settled on SW edge where there are existing dwellings. Within Coastal Preservation Area. Overall, a high/medium landscape sensitivity to new development". The following month however, in a report to the Strategic Planning Committee of 29 October 2024, it was recommended that the southern part of the western field only should be allocated, with an explanation as follows: "If whole site is not suitable for allocation, could a smaller part be allocated? Yes – potential to allocate the south western part of the site for development, adjacent to existing dwellings and better contained within the existing landform than the rest of the site. Around 1.5 hectares is potentially suitable for around 42 dwellings (indicated on map below) but need to consider impact on Nutwell Park to west including Grade II* Nutwell Court, and the location within the Coastal Preservation Area". Consequently,

the Reg 19 version of the plan only proposes a part of Mr and Mrs Parks' land which is available for development despite the Council's most recent assessment (in September 2024) only identifying the eastern field as "open and more exposed". There has been no explanation as to why the whole of the western field would not be suitable for allocation. Indeed, the western field currently contains two existing very large, modern agricultural barns adjacent to its eastern boundary which is its highest point. A residential development across the whole of the western field would be far less prominent within the landscape than these existing barns. Given that the currently proposed level of housing at Lypstone is, as has been identified above, significantly below the levels at some of the other Local Centres and even either lower or not dissimilar to the scale of housing proposed at many of the lower tier Service Villages, we consider that there is an opportunity to correct this anomaly by allocating more land at Meeting Lane, including at least the whole of the western field which the Council's own evidence appears to support. As evidenced by the findings of the Council's own assessment, the development of the whole of the western field would not adversely affect the objectives of the Coastal Preservation Area policy and would be capable of respecting the setting of the adjacent Nutwell Park. We object to the omission of the wider western field as a proposed allocation because it makes Strategic Policy SD10: Development allocations at Lypstone neither Positively Prepared nor Justified.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

However, this soundness issues could be remedied by extending the GH/ED/72a - Land at Meeting Lane allocated site to include the whole of the same field. The allocation of the whole of the western field would enable an increase in the number of dwellings within the allocation, which we suggest should be increased to in excess of 60 dwellings. Mr and Mrs Parks have been working with a local SME housebuilder and have undertaken technical and planning preparatory work which has confirmed the deliverability of the western field to provide homes that are in keeping with the surrounding area, provides connectivity to footpaths and bus stops and provide open space for people's wellbeing. We can also confirm that all of the land originally identified by the Council at the preferred options stage remains available and deliverable for development.

[Effectively a call for sites entry putting forward their site in Lympstone - Submitted on behalf of client regarding land to the rear of Dawlish Park Terrace, Lympstone, EX8 5AA. Sites ls13l1n.]

Consultation Response to the East Devon Local Plan 2020-2042 (Regulation 19 Consultation) - Site Reference: ls13l1n, Land to the Rear of Dawlish Park Terrace, Courtlands Lane, Lympstone, EX8 5AA, plus additional Land Title DN752646

1.0 Background Representations

1.0.1 I write to you on behalf of the owners of Land Titles DN752646, DN473230, and DN499527, regarding the opportunity to give Representation as part of the Regulation 19 Consultation to the Local Plan 2020-2042. Part of the land which I write to you about was submitted as part of the Call for Sites in February 2021. The site that was submitted included 2 Title Numbers: DN473230 and DN499527. An email receipt from the Local Plan process was generated on 5th February 2021 at 11.34, reference ls13l1n.

1.0.2 In the Site Selection Report for Lympstone, it is noted that reference is not made to the above-mentioned site, ref ls13l1n, that was put forward. In principle, the land that was submitted can deliver 5+ dwellings. The land has mains water, foul drainage, power, and telecommunications available, and can achieve good access.

1.0.3 Since the time of the Call for Sites, neighbouring land has also become available. Land Title DN752646 is now offered for inclusion in the Local Plan.

1.0.4 The land is part of an existing urban block at the southern end of Lymptstone, and is one of the closest sites that was put forward in the context of the largest private employer in the village, Lymptstone Manor. The site is well connected to transport hubs.

2.0 Representations to the Consultation of the Local Plan

2.0.1 It is noted that the Preferred Site allocations for Lymptstone largely include sites that complete existing urban blocks, and that site Lymp_01 offers no greater capacity for development than that offered at the rear of Dawlish Park Terrace.

2.0.2 With regard to landscape value, historic environment, ecology, and flood risk, the land presented by my clients is suitable for development.

2.0.3 Lymptstone is a highly desirable location for allocation given the number of available services, and in particular, the availability of good transport and cycle routes. Key employment and leisure facilities can be accessed via the public transport and cycle connections. Within the village, there are employment opportunities, the largest private employment opportunity being 3 Lymptstone Manor. To cater for employment opportunity and staff demands, close to Lymptstone Manor, it would be desirable to see existing brown field sites within walking and cycle distance of the Manor promoted in the Local Plan. My clients' site is the closest site to this significant employer.

2.0.4 The total area of the site now being put forward, including Title Number DN752646, could now achieve additional dwellings. The site is brownfield, and therefore should be a priority for development opportunity.

2.0.5 There is nothing about the character of the site which would compromise its ability to deliver housing, and given that existing housing surrounds the site, there would be no contextual adversity created by development of the land being put forward.

2.0.6 Given the need for diverse housing options, this site should be considered for allocation. The allocation and development of this site would improve the amenity of the land, which at present, is empty, previously developed land, and does not contribute to amenity value at present.

3.0 Summary

3.0.1 Attached are the 3 Land Titles relevant to the single block of land, which has been previously developed, and which is now empty, and which should be allocated for having development.

3.0.2 The attached Title Numbers DN473230, DN499527, and DN752646, show the names of the owners who seek allocation.

3.0.3 The Site is capable of development with no adverse impact, and sits in close proximity to the most significant private employer within the settlement, making it a desirable and sustainable site for allocation.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD10

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

There are 3 sites allocated ,including one in Woodbury Parish (GH/ED/72a) on which Lympstone Parish Council was barred from making representations at the Strategic Planning Committee of East Devon District Council when this allocation was considered. The site is on rising ground on the approach to the village, in the Coastal Preservation Area and adjacent to the listed Nutwell Park. The three sites add up to 92 houses which together with the site at Courtlands Cross give a total of 192 houses . This far exceeds the stated aim of Policy SP01 of development for Local Centres 'that meets local needs and those in the immediate surroundings.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Omit site GH/ED/72a from the allocations

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

There are three sites allocated including one in Woodbury Parish (GH/ED/72a) on which the Parish Council was barred from making any representations. The three sites add up to 92 houses which together with the site at Courtlands Cross give a total of 192 houses . This far exceeds the stated aim of Policy SP01 for development for Local Centres 'that meets local needs and those of the immediate surroundings) Sidmouth a Main Centre has site allocations for 157 dwellings and Budleigh Salterton only 35(this was increased from an original estimate of 25 for the site) These allocations are both less than for the village of Lymptone . The allocations are not in accord with the Spatial Strategy . The inspectors report on the current Local Plan relating to Sidmouth,Seaton and Budleigh stated that 'The Plan's strategy risks (such) coastal towns becoming the preserve of affluent residents which cannot be healthy or sustainable. This is even more the case in this plan. This relates back to my comments for SP01

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Omit site GH/ED/72a and find additional sites in Sidmouth and particularly Budleigh Salterton

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I want to make sure I do as much as I can to ensure an appropriate level of development for Lympstone

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD10

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Not compliant with the following:

Policy 23 - Infrastructure Delivery: This policy outlines the requirement for necessary infrastructure, including wastewater management systems, to be in place to support new developments. It ensures that housing growth is aligned with the capacity of existing or planned infrastructure to prevent overloading of systems.

Policy OL09: Control of pollution Permission will not be granted for development which would result in pollution that cannot be adequately mitigated. This will include: A. Pollution of the environment by gas or particulates, including: smell, fumes, dust, grit, smoke and soot; B. Pollution of surface or underground waters, for example by untreated sewage, including discharges to:

1. Rivers, other watercourses, water bodies and wetlands;
2. Water gathering grounds including water catchment areas, aquifers and groundwater protection areas;
3. Harbours, estuaries or the sea;”

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove SDO1, SD10 and SD11 development from the Local Plan. South West Water demonstrably cannot be trusted to address the issues and even if they try, Ofwat processes meant that such improvements cannot be completed within 8 years. To allow development of these locations prior to infrastructure expansion is to knowingly enable, create, and add to sewage pollution of local rivers, sea and streams.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The sewage situation is so out of control it's actively harming local people and the natural environment. Allowing more development before this is fixed is completely unacceptable.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The policy does not take into account the already acknowledged failure of the sewage network infrastructure and overwhelmed treatment capacity of the Maer Lane sewage treatment works. The policy does not even refer to the many issues that all acknowledge. EDDC have issued notice of a "civil emergency" and a "vote of no confidence in SWW" because of the nationally publicised sewage infrastructure failures across Exmouth from 2019 to 2025. To not even acknowledge this issue, despite EDDCs clear knowledge of the problems is highly irresponsible.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: EDDC has completely failed to act upon feedback given by local people and parish councils.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Mark Robert Moffat

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD10

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The developments around Lypmstone at least do not appear to be sustainable. There is a lot of development already underway in Exmouth and Lypmstone with little regard as to whether the infrastructure can support it. Secondary schools are close to or beyond capacity and no plans for how additional health care would be provided are apparent. The majority of the traffic originating in the area passes through the Sandygate roundabout, which is at 84% capacity already. Already, during the main commuter times, it can easily take half an hour to travel the four and a half miles between Lypmstone and the Sandygate roundabout. If the intention behind the new Dinan way bypass is to increase the flow of traffic onto the A376, then this will only make the situation worse. The proposed developments Exmo_23, Lypm_01, Lypm_07, GH/ED/72A and GH/ED/73 also demonstrate a lack of awareness of the local infrastructure. Although Lypmstone does have a small railway station, the railway runs alongside the river Exe estuary, so any new development has to take place to the East of the station, outside the current built up area boundary and at considerable distance. In this situation, it is highly unlikely that the occupants of any new development would use rail travel to any significant extent. Due to being bounded by the estuary on the western side, all traffic entering and leaving Lypmstone must use or cross the A376. Increasing the size of Lypmstone village by such a large proportion, with no possibility for alternative routes of entry or exit can do nothing but increase congestion both within the village and on the A376 itself. Sites GH/ED/72a and GH/ED/73 are both situated within the Coastal Preservation Area. Allowing development there goes against EDDC's own policies and has the potential of damaging a site of international importance for wildlife. The inclusion of GH/ED 72a is vexing for Lypmstone as, although it is immediately adjacent to and will negatively impact Lypmstone village, putting pressure on local facilities, it is actually within the neighbouring parish of Woodbury. It was very noticeable that, although Lypmstone parish councillors and our representatives on EDDC were prevented from speaking on it at the strategic meeting, Woodbury

councillors were allowed to not only speak on this site, but also to speak about one of the sites within Lympstone and not even adjacent to their own parish.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Lymp_07 is within

Lympstone yet has been included within the allocation for Exmouth. No good reason appears to have been given for this and the impression given is that over time, there will be a coalescence, resulting in the loss of Lympstone as a separate entity. This is a very large development in relation to the size of Lympstone. It has the potential to increase the flooding risk, being upstream of the village and situated on a clay subsoil. If development were to take place here, extensive attenuation measures should be in place. With the exception of Lymp_01, all of the proposed sites within and adjacent to Lympstone are more than 800m from existing key services and will result in increased car use. With the A376 being so congested already and only likely to get worse, sites should have been allocated in locations with at least the potential to increase infrastructure to meet the growing need.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD10

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

GH/ED/72a and GH/ED/73 should be located in a different site which is not in the coastal preservation area as seem on map 5a of the local plan and part of the pebblebed heath. These would fragment and isolate habitats and destroy wildlife corridors, contrary to paragraph 13.23. of the local plan. The wildlife corridors in these sites in particular take wildlife from the Exe estuary at Lypstone up to the pebblebed heath and common. These sites will be detrimental to irreplaceable habitats, veteran trees and species rich in hedgerows across the site contrary to paragraph 13.9 Both sites are upstream of the worldreknowned Exe estuary mudflats and the loss of infiltration in an area which regularly floods will then flow from these sites down into those mudflats destroying habitat. This is in conflict with policy AR01B.

Both these sites would increase the need for car travel and increase congestion on the A376. Lypstone as a small village has been targeted for housing using the excuse that it has a railway station. In truth, the majority of journeys to work, school and weekly shop is done by car. The increase in traffic congestion is in conflict with paragraph 11.2.

Lypstone being on the River exe only has one direction out and exclusively onto the A376. The access lanes already flood regularly making the village inaccessible. These sites in particular will exacerbate the flooding and access issues. The access to the A376 would be at Harefield cross which has already experienced 2 serious accidents this month alone. The A376 is at capacity and building along this road is not sustainable.

The decision to include 72a is a controversial one for the parish of Lypstone. It is in Woodbury parish and the detriment it will bring to Lypstone village by putting pressure

on already full services and infrastructure such as school, doctor, parking, flooding etc is against policy 0L05 and even worse, lymptone parish council and our EDDC councillors were banned from speaking at the strategic meeting for these sites.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove site GH/ED/72a and GH/ED/73 from the local plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Peter Strouts

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD10

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The two developments for 42 houses are nearly a mile from the centre of the village, meaning they are not served by the local rail service or the cycle path, nor convenient for the school, shops etc. This is against a net zero policy, as it would increase car use. They are located off very narrow country lanes, where visibility is very poor. There is no doubt that any access would be unsafe. I cycle my children every day to school along these roads, these developments would end my ability to do this. Pushing myself and more residents to have to use the car, a net zero target is laughable with this.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove these allocations for development. Certainly both 42 house developments must be axed.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Lymptone proposals are not sustainable developments and therefore not sound. They are in areas of poor access, Harefield cross onto the A376 is unsafe to use by car, Meeting Lane has a blind corner and already two large logistics buildings that block the road for one time when they are being accessed. The resident who lives in this field is young and yet drives to the primary school from here. There is not sufficient parking at the local primary school so they all park on Greenhill Avenue's pavements, making it

unsafe for children to actually walk to school. These developments will worsen the amount of car use in the village.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove the proposed developments, especially the two 42 house sites on Meeting Lane and Strawberry Hill.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: It is making Lympstone unsafe for residents who rely on these roads to cycle to school and increasing car use. Why not put the houses in another village, where the effect is less pronounced?

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: As these development plans in Lympstone are not acceptable.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD10

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

GH/ED/72A and 73 lie in a coastal protection zone which is a sensitive landscape from a character and visual impact perspective and adjacent to pebble bed heaths. Policy OL03 states no development in Coastal Protection areas so this feels at odd with that. It is also adjacent to the Exe estuary RAMSAR.

The sites also include veteran trees and species that are important for nature conservation in the hedges, contravening other EDDC policy.

Impact these designations and fragment habitats and wildlife corridors. Contravening paragraph 13.23. These connect protected estuary wildlife with pebblebed heaths. We are in a catastrophic situation in the UK with habitat loss and biodiversity decline and these type of blanket changes have severe impacts that are widespread.

In addition, these roads experience regular flooding and can be impassable after a storm event, further development would exacerbate this.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I suggest that GH/ED/72A and 73 and LYM 07 be removed from the Local plan area designations.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Land South of Underhill Close The site within the respondents' ownership is shown on the Lymptone Inset Map forming part of the Reg. 19 Consultation. It lies to the west of Housing allocation site Lympt_01 between that site and the railway embankment. In the previous Reg.18 Local Plan Consultation map it was shown as Lympt_16 and shaded in blue (referred to in the key as 'Planning Permission Granted') and within the settlement boundary of Lymptone. (See below). Over 50% of the land is hard surfaced tarmac which was laid out as a car park during local works by a statutory undertaker.

In a site selection report to the Council's Strategic Planning Committee of September 3rd 2024 it was stated that the respondents' site LYMP_16 (0.3ha) was not identified as a potential housing site in the Housing and Economic Land Availability Assessment (HELAA) on the grounds that it fell below the size threshold. However the introduction to the HELAA states that the criteria for inclusion is a minimum size of 0.15ha with capacity for 5 dwellings. The respondents' site should therefore be properly considered as a housing site with potential for delivery of 5 dwellings. The adjacent Lympt_01 site was described in the same report as follows: "Fairly level garden and field adjacent to Lymptone. Site adjacent to Coastal Preservation Area and features multiple small parcels of land with some garden areas. Mature trees across site, mature hedgerows throughout. Nevertheless, small scale site with existing dwellings around provide a built context, and overall, low landscape sensitivity to new development." The aerial photograph from that report is reproduced below. The respondents' site containing the car park is in the bottom left hand corner.

The previous owners of the respondents' site made representations to the Regulation 18. consultation in January 1993 (Copy attached) supporting the designation and

settlement boundary and making the case for the suitability of Lymp_16 for housing development in the same manner and density as Lymp_1. This latter point was not given adequate consideration or weight. On the regulation 19. Consultation inset to the Policies map, without any prior consultation, justification or explanation, a new and illogical rectangular inset has been drawn around the respondents' site, excluding it from the settlement boundary. On this plan it has been colour coded green as part of the 'Green Wedge' between Lymptstone and Exmouth but is otherwise unmarked. The previous colour coding acknowledging it as land with 'planning permission granted' does not appear. The circumstances of the site are that it benefits from planning permission for redevelopment (Granted on appeal on two occasions) and has been acknowledged by successive Planning Inspectors as capable of development with a negligible impact on the Green Wedge and Landscape Quality, to be in a sustainable location, and to read as infill which would relate very well to surrounding housing. In the decision on the first appeal (1st March 2022) APP/U1105/W/21/3282445 The Inspector wrote: "The development would read as infill and would relate very well to surrounding housing, falling inside a notional building line across this southern extent of the village." " .. the scheme performs well against the sustainability objectives set out within the Framework." "...the site would be suitable for the proposal, having regard to the development plan's approach to the location of housing."

As it meets the relevant criteria the site has been submitted for inclusion on the Council's register of brownfield land.

In the Interim the LPA has also, in advance of any formal acceptance of the Lymp_1 allocation, already granted planning permission for two detached dwellings on the westernmost part of that site. In a report of October 2024 in making that decision the Council considered a report containing the following statement: (Officer's report to the planning committee of 23rd October 2024 recommending that permission for two detached dwellings be granted on part of the LYMP_01 site.) "Overall, whilst there is some conflict with the adopted local plan, it is considered that due to the sustainable location of the site, the need for new housing, and the resolution to promote the site as a preferred allocation in the emerging local plan, the principle of development of this site is acceptable. The proposed dwellings are considered to be acceptable in terms of layout, scale and appearance and would not result in any significant harm to the character and appearance of the area or the Green Wedge designation to justify refusal of the application. The proposal is accompanied by detailed landscaping proposals which include maintaining the southern hedgerow at an appropriate height along with additional planting which would help to soften the impact of the development in localised and wider views." The report contained no comment from the Council's

Landscape Officer and went on to suggest that the previous grant of planning permission at appeal on the respondents' site (Lymp_16) demonstrates that development can be accommodated within the green wedge and outside the settlement boundary without harm. It should be further noted that the means of access to the two house development in question uses Underhill Close, rather than that from Underhill Crescent envisaged in the Lymp_1 allocation.

The respondents object to the unsound approach to housing allocation in the Regulation 19. Consultation which does not meaningfully address the requirements of the NPPF and emerging Government Policy, or take an appropriate approach to the sustainable delivery of housing.

- The Respondents object to the failure of the Regulation 19. version of the plan to give full and proper consideration to the deliverability of the projected housing land allocations therein in the context of the statutory requirement to provide BNG uplift in the context of development proposals.
- The respondents object to the over-reliance on agricultural and other open land to provide future housing sites whilst demonstrably failing to identify and promote the development of more sustainable brownfield land. In particular there has been a failure by the LPA meet its statutory duty to maintain and publish annually a register of Brownfield land. (This has not been done since 2021).
- The respondents consider the LPAs approach should show greater to support housing delivery on smaller brownfield sites, including Lymp_16 which, are demonstrably deliverable, sustainable, accessible and ready for development, as part of their Housing Land Identification.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

The respondents object in the strongest possible terms to the illogical, unjustified and arbitrary change to the settlement boundary line resulting in the exclusion of site Lymp_16 from the Lympstone boundary. This line should revert to the position on the regulation 18 map.

Chapter 5, Development in the Towns and Villages" POLICY SD01 and SD10
(development proposals off Meeting Lane, Lymptstone.

- I do not believe this policy is sound. The infrastructure does not exist to support these developments and they risk damaging important wildlife habitat (particularly for bats) and negatively impacting flood risk due to run off from increased hardstanding.

GH/ED/72a and GH/ED/73 should be located in a different site. This site sits within the coastal protection area and is also adjacent to the pebblebed heath. The little cation of these sites would cause fragmentation to and the isolation of habitats. Wildlife corridors are an important element for wildlife and their destruction is contrary to paragraph 13.23 of the local plan. Wildlife corridors around these sites offer important routes for wildlife to travel between the Exe estuary at Lymptstone up to the pebblebed heath and the common. They are irreplaceable habitats containing veteran trees and mature, species rich hedgerows across the site contrary to paragraph 13.9.

Both sites are upstream of the world renowned RAMSAR Exe estuary mudflats which would result in the loss of filtration in an area which regularly floods. Damaging run-off would then flow from these sites down into the mudflats and this would be destructive to this world renowned RAMSAR habitat. This is in conflict with policy AR01B.

The allocation of both these sites in the local plan is contrary to strategy OLO3 which states development will not be allowed in Coastal Preservation areas.

The Exe RAMSAR area around the village of Lympstone is visited by tourists and ornithologists from all over the world and it is vitally important that they are protected longterm.

Congestion of the already overused A376 would be increased by the additional traffic.

Lympstone is a small village and although it has a train station the majority of journeys to work, school and weekly shop are done by road. The increase in traffic congestion is in conflict with paragraph 11.2.

This development is unsustainable, and residents would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6.

Lympstone has only one direction out by road, via the A376. The access lanes already flood regularly and can make the village inaccessible. These sites in these locations will exacerbate these flooding and access issues.

The decision to include 72a is controversial since it is far from the village of Woodbury despite being in Woodbury parish. In practice residents would need to cross the A376 and navigate several miles of lanes to reach Woodbury services, so residents would inevitably put additional pressure on already full services and infrastructure such as school, doctor, parking, flooding etc. This is against policy OL05.

Site LYMP_07

LYMP_07 is upstream of Lympstone on the main rainwater catchment area of Wotton Brook. The subsoil here is of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Lympstone Village. This is in conflict with POLICY ARO1B.

LYMP_07 has been assigned in the local plan in contravention of strategy OLO3 which states development will not be allowed in Coastal Preservation areas.

The Exe area around the village of Lympstone is a world renowned RAMSAR site on the Exe estuary which is visited by tourists and ornithologists from all over the world.

To develop LYMP_07 would isolate and fragment habitats, destroying vital wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. These areas include veteran trees and species rich hedgerows and runs contrary to PARAGRAPH 13.9.

LYMP_07 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development which would require residents to travel. People would need to travel far further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too steep and too far from a town centre for people to allow most people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

The use of Exmouth facilities and services would lead to coalescence of Lympstone and Exmouth, contrary to POLICY OL05 of the local Plan. The Village of Lympstone and town of Exmouth have fought hard over decades to protect both settlements from coalescence.

Chapter ‘ Our outstanding landscape’

The following sites LYMP_07, GH/ED/72a and GH/ED/73 have been assigned in the local plan contrary to strategy OLO3 which states development will not be allowed in Coastal Preservation areas.

The Exe estuary is an important ecological site with rare and protected species.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Compliance with the National Planning Policy Framework (NPPF, revised 12 December 2024) The plan does not enable the delivery of sustainable development in accordance with the NPPF, specifically paragraph 8, which defines three interdependent and mutually supportive objectives - economic, social and environmental. 8 a) an economic objective - “to help build a strong, responsive and competitive economy, by ensuring that sufficient land of the right types is available in the right places and at the right time to support growth, innovation and improved productivity; and by identifying and coordinating the provision of infrastructure;” The plan does not identify sufficient land of the right type in the right place, nor does it identify or coordinate the provision of infrastructure. All the development in Lympstone is proposed to be located on agricultural land, which will impact the local economy. No new transport connections or infrastructure improvements sufficient to support the increase in population are planned. b) a social objective – to support strong, vibrant and healthy communities, by ensuring that a sufficient number and range of homes can be provided to meet the needs of present and future generations; and by fostering well-designed, beautiful and safe places, with accessible services and open spaces that reflect current and future needs and support communities’ health, social and cultural well-being; and The Plan does not meet the social objective of ensuring a range of homes to meet needs.

Lympstone parish requires 2-3 bedroom starter homes, ‘affordable’ for a young family on an average Devon salary, so that youngsters growing up in the area can remain here; as well as bungalows which meet the downsizing needs of our older population. The planning applications we have seen to date do not meet this housing requirement (3 bungalows are offered at GH/ED/72a). Services are at capacity, Lympstone’s GP surgery is full, ECC secondary school in Exmouth is full, therefore secondary school students will have to travel to Exeter. The A376 is the only A road between Exeter and Exmouth.

No new bus or road routes to Exeter are planned, nor any upgrade to carriage stock on the ALRUG railway line. c) an environmental objective – to protect and enhance our natural, built and historic environment; including making effective use of land, improving biodiversity, using natural resources prudently, minimising waste and pollution, and mitigating and adapting to climate change, including moving to a low carbon economy.” Biodiversity net gain improvements are not able to be fully met on development sites in Lympstone due to the high existing biodiversity value of the land. Waste and pollution will increase as there is no evidence of water quality risk assessments for any of the sites - despite water pollution being a critical issue in Lympstone which is located on the Exe Estuary, a SSSI and RAMSAR site. Water quality here in Lympstone is intrinsically linked to flood risk, biodiversity, human health, and the local economy (tourism and shellfish business in Lympstone).

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

3West Group support Strategic Policy SD10 and specifically the proposed allocation of the Land at Gilbrook, Woodbury (Wood_10).

An outline planning application for up to 60 dwellings (application reference: 23/2166/MOUT) received resolution to grant planning permission, at the EDDC planning committee, held on the 19.11.2024.

The planning application site location plan is attached for reference.

The planning decision is pending agreement of a Section 106 Legal Agreement which at the time of writing is at an advanced stage with a planning decision expected to be issued during April 2025.

A reserved matters planning application has been prepared and is awaiting submission. As a result of the comprehensive programme of work undertaken in support of the planning submission and approval of the planning application by EDDC, the site is proven to be deliverable.

We can confirm that construction work is forecast to commence during 2026 (subject to the timely grant of reserved matters planning) and therefore the site is able to make a valuable contribution to EDDC's 5 year housing land supply.

The site remains a very good candidate for allocation in the emerging Local Plan, and this is supported by the technical work and masterplan's prepared to support the planning application.

Due to the imminent grant of Outline planning permission, we are able to demonstrate the deliverability of both sites to meet the Local Plan objectives. Furthermore, the site is able to make a meaningful contribution to EDDC's 5-year housing land supply.

We trust our comments will be fully taken on board and the allocation of the site is confirmed.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Proposed Allocations in 'Local Centres' The proposed distribution of residential allocations across the five Local Centers are set out below:

[table mentioned can be seen in the attached PDF]

In the context of the other four settlements within the 'Local Centre' category, Woodbury is set to provide a much higher contribution of dwellings. The provision of 216 dwellings in Woodbury is more closely aligned to some of the expected delivery within some 'Main Centres', a higher category within the settlement hierarchy, notably Sidmouth which is expected to provide 172 dwellings, and Seaton which has a respective figure of 284 dwellings. www.carneysweeney.co.uk Whilst this can be explained to an extent by certain settlements having landscape and topographical constraints that limit the amount of growth, it provides an indication that Woodbury is among the most sustainable settlements within East Devon that can accommodate and deliver the development that is needed, where it is needed. We support the spatial strategy that seeks to accommodate development in Woodbury to meet local needs and those in the immediate surroundings.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Introduction This representation is submitted in response to the East Devon Local Plan 2020-2040 Regulation 19 Consultation, on behalf of our clients, Jackson-Stops. Our clients are the advisors to the owners of land at Globe Hill, Woodbury, which is shaded in red on the Site Location Plan enclosed at Appendix 1. Whilst the site has not been identified as a potential allocation in the Draft Local Plan, the site lies adjacent to the west of Draft Allocation Wood_06. This representation should be read in conjunction with the following supporting drawings:

- Sketch Plan Previous consultation on the emerging Local Plan has taken place between January and March 2021, November 2022 to January 2023, and more recently between May and June 2024. During each of these consultation periods, additional housing sites have been submitted, assessed and since been proposed in this Regulation 19 Local Plan consultation. The site subject to this representation has not previously been promoted through the Local Plan process. Rather, our client's focus has been promoting the site subject to Draft Allocation Wood_06 which has been positively reviewed by Officers and Members of the Strategic Planning Committee, culminating in its draft allocation. Given the positive response to Wood_06, our clients wish to propose their adjacent land as suitable for development and deliverable within the plan period. The land can be brought forward at an early stage within the plan period to meet the objectives of Woodbury to support development "that meets local needs and those in the immediate surroundings". Significantly, Wood_06 was considered acceptable to be chosen as a draft allocation due to its proximity to shops and facilities in the settlement centre, as well as a primary school. Furthermore, the site was seen to have limited ecological and landscape impact. The same can be said for the site subject to this representation. www.carneysweeney.co.uk Policy Context for Plan-Making Provisions

for plan-making are set out within the NPPF and NPPG. Plan makers are required to take account of the following points when preparing their Local Plan: Under the transitional arrangements of the December 2024 NPPF, the new Local Plan will be considered under the provisions of the December 2023 NPPF. National Planning Policy Framework (December 2023) Paragraph 31 states that “The preparation and review of all policies should be underpinned by relevant and up-to-date evidence. This should be ... focussed tightly on supporting and justifying the policies concerned and take account of relevant market signals.” Paragraph 35 identifies the tests of soundness as being: a) Positively prepared: As a minimum, seeking to meet the area’s objectively assessed needs and informed by agreements with other authorities so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with sustainable development. b) Justified: An appropriate strategy based on taking account of reasonable alternatives and proportionate evidence. c) Effective: Deliverable, based on effective joint working on cross-boundary strategic matters, evidenced in a Statement of Common Ground. d) Consistent with national policy. Site Location The site is located at the western extent of the village of Woodbury, lying adjacent to the proposed allocation referenced Wood_06. The draft allocated site, Wood_06, also benefits from a resolution to grant planning permission, subject to the completion of a S.106 Agreement. It is therefore anticipated that Wood_06 will be developed in the short term, within the first 5 years of the Local Plan period. The site subject to this representation can be accessed directly from Wood_06 and is therefore an achievable and deliverable development site that can contribute to meeting housing needs in the short term.

www.carneysweeney.co.uk The site can accommodate circa 21 residential dwellings and a large area of open space providing informal recreational opportunities. This level of development is consistent with the level of growth envisaged in Local Centres. Woodbury itself is a prime settlement, capable of accommodating residential growth. It is stated in the Role and Function of Settlements Report, published by East Devon District Council, that Woodbury is one of 15 villages that “offer a range of accessible services and facilities to meet the day-to-day needs of their residents and nearby rural areas, with reasonable public transport”. The Report also found that Woodbury plays an important local role in the provision of employment and community facilities. The sustainability credentials of Woodbury are such that the Regulation 19 Draft Local Plan identifies the settlement as a ‘Local Centre’, meaning it is required to support development to meet the needs of the village and its wider network in the immediate surroundings. With this collated evidence, the Council seeks to allocate five sites in Woodbury, totaling around 216 new dwellings throughout the plan period.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Allocate the site put forward by Jackson-Stops in addition to Wood_06

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD11

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: As we have set out above, we still consider the proposed housing provision is too low and the opportunity to bring sites forward that maximise the opportunity to deliver housing earlier in the Plan period should be further considered. As the Regulation 18 and 19 site selection processes have identified there is significant capacity at for a range of smaller sites to come forward across the identified settlements that can benefit from existing infrastructure and accessibility. Land north of Castle Lane, Woodbury (previously Wood_24)

Our client's site at Castle Lane, Woodbury represents such an opportunity which regrettably was not given proper consideration during the site selection process, largely because of the unduly negative and inaccurate site assessment. We firmly believe that the site was not given proper consideration. A number of previous representations have been made to the Council, including by the landowner Simon Stokes on the 26th June 2024 [in response to the further draft local plan consultation], planning agent David Seaton on the 11th January 2023 [responding to the Regulation 18 Consultation], planning agent Nicole Stacey on the 13th January 2022 [sent in light of Strategic Planning Committee meetings], and Simon Stokes, on the 27th September 2022 [sent in light of Strategic Planning Committee meetings].

These previous comments have each raised concerns regarding the site assessment exercise that the Council have undertaken, however, whilst some matters raised have been 'noted', they do not appear to have been taken into account in the site selection

report for Woodbury (SAL-048), dated February 2025. This report concludes that the site was not allocated due to the high/medium landscape sensitivity and other more preferable sites at Woodbury. This is strongly disagreed with, as set out below. The Site Selection report for Woodbury continues to repeat DCC Highway comments that have since been rebutted, stating that the site is “relatively remote” and “without the ability to link to the footway along Castle Lane”. Whilst the report includes a note regarding an opportunity for a link to Webbers Meadow, as has previously been promoted, the assertion of being relatively remote has not been addressed. The site clearly cannot be considered remote given it is surrounded by existing development to the north, west and south and is within easy walking distances to a range of services and facilities including the primary school (as shown in photo 1). We would also like to clarify that the link to Webbers Meadow can be readily implemented due to the landowner retaining full rights for vehicular and pedestrian access to this land (from the land north of Castle Lane). In respect of landscape, the report continues to describe the site as having only a limited context of built form provided by modern dwellings adjoining the western edge and low-density dwellings along north east of the site. This completely ignores the substantial holiday park to the south and downplays the presence of the existing adjacent land uses. This is a fundamental flaw in the site’s assessment and ignores its immediate context and overall relationship with existing development. It certainly is not accurate to describe the site (as the site selection report does) as a ‘promontory’ location, as it does not project beyond existing built form, for the reasons set out above. The landscape assessment also alleges there are “long distance views to the Grade I listed church and Exe Estuary”. As clarified in the previous representations, only the very top of the church tower can be seen from only a very small part of the higher (eastern) part of the site, not the church building itself. From the majority of the site, the church is not visible. You will note from the indicative layout previously submitted with the representations made on the 26th June 2024, that this eastern land could be delivered as open space. Therefore, this relationship is not considered to rule out the development potential of the site and could be easily addressed through a sensitively designed scheme. This landscape and heritage context could certainly not on the basis of the above be considered to have the high/medium landscape sensitivity that the report claims and would be more appropriately described as low. This is a critical matter because this inaccurate description of landscape sensitivity was directly specifically and solely identified as the reason for not allocating the site. On correction of this error the site becomes a clear opportunity to accommodate modest growth at Woodbury and removes any reason for not allocating the site. It is unfortunate then that the above landscape assessment errors have also been carried forward into the Sustainability Appraisal. In particular, the landscape impact of the site is considered to have a ‘major negative effect in contributing towards the achievement of the landscape objective’. If the assessment had been applied correctly this clearly would not have been the case and the site would have scored as a minor negative or negligible effect.

Similarly, it is considered that even a minor negative effect regarding heritage inaccurately describes the minimal visual relationship with the listed church, and negligible would be a more accurate reflection of impact. In respect of landscape, the report continues to describe the site as having only a limited context of built form provided by modern dwellings adjoining the western edge and low-density dwellings along north east of the site. This completely ignores the substantial holiday park to the south and downplays the presence of the existing adjacent land uses. This is a fundamental flaw in the site's assessment and ignores its immediate context and overall relationship with existing development. It certainly is not accurate to describe the site (as the site selection report does) as a 'promontory' location, as it does not project beyond existing built form, for the reasons set out above. The landscape assessment also alleges there are "long distance views to the Grade I listed church and Exe Estuary". As clarified in the previous representations, only the very top of the church tower can be seen from only a very small part of the higher (eastern) part of the site, not the church building itself. From the majority of the site, the church is not visible. You will note from the indicative layout previously submitted with the representations made on the 26th June 2024, that this eastern land could be delivered as open space. Therefore, this relationship is not considered to rule out the development potential of the site and could be easily addressed through a sensitively designed scheme. This landscape and heritage context could certainly not on the basis of the above be considered to have the high/medium landscape sensitivity that the report claims and would be more appropriately described as low. This is a critical matter because this inaccurate description of landscape sensitivity was directly specifically and solely identified as the reason for not allocating the site. On correction of this error the site becomes a clear opportunity to accommodate modest growth at Woodbury and removes any reason for not allocating the site. It is unfortunate then that the above landscape assessment errors have also been carried forward into the Sustainability Appraisal. In particular, the landscape impact of the site is considered to have a 'major negative effect in contributing towards the achievement of the landscape objective'. If the assessment had been applied correctly this clearly would not have been the case and the site would have scored as a minor negative or negligible effect. Similarly, it is considered that even a minor negative effect regarding heritage inaccurately describes the minimal visual relationship with the listed church, and negligible would be a more accurate reflection of impact. The 'smaller' nature of this site (with capacity to deliver 40 to 45 dwellings), combined with strong existing infrastructure links to the adjacent site to the west, and a landowner who is actively promoting the site for development, will mean this site can come forward quickly. This will support the effectiveness of the Plan, being a site that will be delivered early in the Plan period. This will create resilience for the Plan strategy and provides the Council with flexibility to support the delivery of larger sites like the proposed new settlement. It is also important to note that to date there have been no written objections regarding the site in the earlier emerging local plan consultations.

This is a clear positive which further supports allocation of the site. Paragraph 36 of the NPPF (2024) sets out the tests for soundness, which the plan must pass at examination. By allocating this site, it will make a meaningful contribution to housing in Woodbury, and assist the Council in meeting their duty for the Local Plan to be positively prepared, helping to meet the area's objectively assessed need.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We believe further growth at the identified settlements should be provided for through the allocation of further sites. This will underpin the Plan's strategy to ensure sufficient housing growth in the town throughout the Plan period, including at an early stage. The site at Castle Lane in Woodbury (Wood_24) is unconstrained and there are no impediments to its delivery and as such it can make an important contribution to the Plan. Policy SD11 should therefore be modified to include land north of Castel Lane, Woodbury (Wood_24) at as an allocation.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD11

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Woodbury is a relatively small community and major development on the proposed scale (365 houses) is excessive. There are insufficient local facilities (1 small village shop, 1 primary school) to support this many new inhabitants so huge increase in the number of cars on the roads would result. Especially as the local buses are even less frequent than previously. Also the utilities infrastructure would need significant investment to cope, it is unlikely that this would happen.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Fewer houses would reduce the pressure on utilities and transport infrastructure. Or significant investment.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD11

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Not compliant with the following:

Policy 23 - Infrastructure Delivery: This policy outlines the requirement for necessary infrastructure, including wastewater management systems, to be in place to support new developments. It ensures that housing growth is aligned with the capacity of existing or planned infrastructure to prevent overloading of systems.

Policy OL09: Control of pollution Permission will not be granted for development which would result in pollution that cannot be adequately mitigated. This will include: A. Pollution of the environment by gas or particulates, including: smell, fumes, dust, grit, smoke and soot; B. Pollution of surface or underground waters, for example by untreated sewage, including discharges to:

1. Rivers, other watercourses, water bodies and wetlands;
2. Water gathering grounds including water catchment areas, aquifers and groundwater protection areas;
3. Harbours, estuaries or the sea;”

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove SDO1, SD10 and SD11 development from the Local Plan. South West Water demonstrably cannot be trusted to address the issues and even if they try, Ofwat processes meant that such improvements cannot be completed within 8 years. To allow development of these locations prior to infrastructure expansion is to knowingly enable, create, and add to sewage pollution of local rivers, sea and streams.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The sewage situation is so out of control it's actively harming local people and the natural environment. Allowing more development before this is fixed is completely unacceptable.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The policy does not take into account the already acknowledged failure of the sewage network infrastructure and overwhelmed treatment capacity of the Maer Lane sewage treatment works. The policy does not even refer to the many issues that all acknowledge. EDDC have issued notice of a "civil emergency" and a "vote of no confidence in SWW" because of the nationally publicised sewage infrastructure failures across Exmouth from 2019 to 2025. To not even acknowledge this issue, despite EDDCs clear knowledge of the problems is highly irresponsible.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: EDDC has completely failed to act upon feedback given by local people and parish councils.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Wood_09: This site allocation proposal has potential to harm the settings of grade II Oakhayes House, the grade I Church of St Swithun and an open green space that contributes to the character and appearance of the Woodbury Conservation Area. We acknowledge that there is now a resolution to grant outline consent, and we welcome parameters within the policy that respond to both the church and conservation area. However, we consider that development should also seek to conserve the setting of Oakhayes House, consistent with the site selection report and policies in the NPPF.

Wood_10: This site allocation has potential to harm the settings of grade II listed Gilbrook House to the north and Higher Venmore to the southwest. The policy should include provisions to conserve the settings of these heritage assets, consistent with the site selection report and policies in the NPPF.

Wood_16: Given that this site is also adjacent to the Conservation Area, should it contain the same provision as sites Wood_09 and Wood_10?

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Wood_09:

“Development should include public open space and Green Infrastructure links (including the areas of flood zone 3) through the site to provide opportunities for the

public to appreciate a key local landmark (Grade I listed Parish Church of St Swithun) and to conserve the setting of grade II Oakhayes House and the character and appearance of Woodbury Conservation Area.”

Wood_10: “The design and layout of development should reflect the key characteristics of Woodbury Conservation Area to the north and incorporate landscaping buffers to conserve the settings of grade II listed Gilbrook House and Higher Venmore.”

Wood_16: “The design and layout of development should reflect the key characteristics of Woodbury Conservation Area to the north.”

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD12

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We object to draft Policy SD12 in its current form on the basis that insufficient allocations are included. As per our response to draft Policy SP02, the housing requirement should be increased and further allocations included within the plan, including at sustainable settlements such as Broadhembury. Broadhembury hosts the following which provide day-to-day services and facilities:

- Shop / convenience store
 - Post office
 - Primary school
 - Pub
 - Village hall
 - Children's play area
- As a result, Broadhembury is an entirely appropriate location for additional growth beyond that proposed. We specifically consider that the Land south of The Vicarage, Broadhembury (Brhe_07) should be included in the plan as an allocation to help support a potential increase in the overall housing requirement. The site has been assessed by the Council as part of the emerging local plan, and specifically through the HELAA process but was rejected in earlier stages of the draft local plan and not included as a preferred allocation in the Regulation 19 draft.

However, the site is available for development and therefore able to contribute given the increasing need for more land to be identified. The site benefits from access from Dukes Square, providing onward links into the village. The site falls within flood zone 1, and there are no environmental designations or constraints to development. our view Broadhembury is a sustainable location capable of accommodating a slightly higher level of growth than that already proposed through Brhe_09. Indeed, a second allocation in the village would provide more certainty in terms of delivery and market choice. Broadhembury, covered by draft Policy SD12, is a sustainable location capable of accommodating a second allocation in the village, and in our view the land south of The Vicarage (Brhe_07) should be included as an allocation to help accommodate a proportion of this growth.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Given their interest in Bhre_07 Board should be able to make their case.

Thank you for the invitation to respond to the Regulation 19 consultation on the draft Local Plan. The regulation requires that the consultation response is restricted to certain specific questions and we have addressed these below under the three objections. At the end of this submission we have also suggested alternative courses of action which we believe would satisfy the public good in a more effective way. This document contains eight pages and should be considered in its entirety. It forms an E mail attachment to localplan@eastdevon.gov.uk and will be served in hard copy by post to EDDC, Blackdown House, Border Rd., Honiton, EX14 1EJ. It will also be published on our web site: @broadhembury-pc.gov.uk Broadhembury Parish Council opposes the inclusion of site Brhe-09 for the development of ten houses in the draft Local Plan. [located at grid ref: ST 10039 04705. Lat long: 50.83485, - 3.27889].

Our opposition is for the following specific reasons:

- the plan as proposed constitutes ‘major development’
- the development on site Brhe-09 will cause harm to the character and appearance of the Conservation Area
- you have not exercised your duty to further the purposes of designation of the Blackdown Hills National Landscape in your site selection process

Major development

1.1 The National Planning Policy Framework states that; 'when considering applications for development within National Landscapes, permission should be refused for major development.... other than it can be demonstrated that the development is in the public interest....' [NPPF/ Dec '24/190]

1.2 Whether a proposal constitutes 'major development' is a matter for you, taking into account its 'nature, scale and setting and whether it could have significant adverse impact on the purposes for which the area has been designated or defined...' [NPPF/Dec'24/footnote :67].

1.3 You have argued [Q:23 /EDDC/ Major Development in National Landscapes/ Feb '25] in response to your own question: 'major development?' , your answer is: 'no, the location of the site is outside of the BHNL [Blackdown Hills National Landscape] and on the edge of the settlement.....' and in answer to Q:22: 'the scale of the development would be around 10% of the current number of dwellings in the main village'

1.4 It is our belief that that these arguments are inconsistent with national policy and not justified. We acknowledge that the site is not within the National Landscape but nevertheless you have proceeded to evaluate it based on faulty evidence of what constitutes major. The conclusion reached to allocate housing on site Brhe-09 over other alternatives is based on inadequate analysis and inconsistent judgements which are not robust

1.5 Our reasons are: the definition of ‘major’ is normally considered to be ten or more houses and a site greater than 0.5 hectares. The site is for ten houses and the plot is 0.8 hectares.

1.6 Notwithstanding these points your estimation that ‘the scale of the development would be around 10% of the current number of dwellings in the main village’ is misleading. To arrive at 10% requires a denominator of 100 houses. This is only possible if houses are included outside the proposed Built Up Area Boundary and the extant Conservation Area. In fact it is only possible if houses are included outside the area within which housing would be permitted under the Villages Plan for reasons of sustainability. In a complementary document [Settlement Boundaries Evidence paper 22 Nov 2024 SPC map p 21] you have specifically excluded some houses because they are ‘not built- core settlement’ but you have then included them to justify adding to the built core to make this case. This is inconsistent and misleading.

1.7 We believe that a justifiable figure constitutes 30%-35%, which using your own criterion would rule out development. We therefore believe it should be ruled out by virtue of scale. We address location and scale of development and the effects on the special qualities of the Protected Landscape under different sections below.

1.8 The decision to reinstate the Built Up Area Boundary is not contested in principle but the proposal to redraw it specifically to include the site to which we are opposed is unjustified. It follows no discernible land feature, opportunistically dissecting an open field which you propose elsewhere to demark by a hedge. Its sole purpose is to remove the site from ‘open countryside’ policies and therefore make the development conditions and criteria a lower hurdle for building.

Broadhembury Conservation Area

2 Broadhembury Conservation area was designated before 1974 and reappraised in 1999 by EDDC. It comprises 36 individual Listed Buildings. The statutory list refers to Broadhembury as: ‘an outstanding unspoilt estate village of thatched houses’ and the

appraisal states: ‘there is little doubt that it has few equals within East Devon, indeed within the county as a whole...’ [para 11.1/ EDDC Appraisal 1999].

2.1 The character and appearance of the Conservation Area is predominantly linear, a wide street with street-fronted thatched cob cottages. The overall effect is; ‘unusually complete and timeless’ in which the ‘curving alignment of frontages provides a strong sense of enclosure and an intricate and varying sequence of views...’. [ref ditto]. Other characteristics include its rural character, its loose structure with views out to the surrounding countryside between buildings, the extent to which the surrounding countryside extends into the village, views to the church from the wider landscape and its homogenous character due to it being an estate village

2.2 Given the identified character and appearance of the village as stated in the Conservation Area Appraisal, development of site Brhe-09 comprising 10 dwellings would not conserve the valued characteristics of the village. It is unlikely that ten houses on a plot of 0.8 hectares could replicate the character and form of village as described in the Conservation Area Appraisal and Village Design statement (2010). The Conservation Area is only 7.2 hectares to which an incongruous addition of 0.8 hectares will be added on a slope rising towards the Conservation Area.

2.3 In fact the nature of development proposed states: ‘predominantly two storey, possibly some 2.5 and 3.0 storey where appropriate...’ [EDDC Topic Paper SAL-048, Major development in National Landscapes / Feb ‘25/8.1 criterion 5] would be incongruous by nature and inappropriate in setting.

2.4 We submit that the allocation of development on site Brhe-09 would be in conflict with Policy OL 02 National Landscapes, Policy OL04 Areas of Strategic Visual Importance and Policy HE03 Conservation Areas. Other site options within the village would in our view give rise to less harm. (see 5.0 Alternatives below). We also believe that it conflicts so extensively with EDDC’s Heritage Strategy 2019-2031 that the reasons are too extensive to elaborate in this submission

4 The Blackdown Hills National Landscape

4.1 The Levelling-up and Regeneration Act (2023) [LURA] imposes a duty on ‘relevant authorities’ to ‘seek to further the purposes of a protected landscape’ in all actions which may ‘impact or have an influence on the purpose of’ the BHNL. The primary purpose is to ‘conserve and enhance natural beauty’. This duty applies to functions outside of a Protected Landscape which may have an effect on land within the Protected Landscape. (usually referred to as ‘the setting’) as set out in para 12.8 of the Local Plan.

4.2 Guidance for ‘relevant authorities’ (which includes us as a Parish Council as well as you a District Council) poses the question: ‘could the measures contribute to the conservation and enhancement of the protected landscape’s wildlife, ecological value and quality, geological and physiological features, water environment, cultural heritage, dark skies, tranquillity, ...and landscape character for which the area was designated...’[Guidance for relevant authorities ..etc 16 Dec 2024)/ DEFRA]

4.3 Your legal duty to ‘seek to further’ these aspects of the Protected Landscape in respect of the site proposed is addressed by your answers to questions 8-23 section 8.1 of SAL 048 Major Development in National Landscapes Reg 19 version Feb 25. In response to Q19 (is there a significant impact on the purposes for which the area has been defined?) you have answered; ‘no’.

4.3 We are advised that the assessments which have led to the identification of and allocation of site Brhe-09 do not adequately explore the special qualities of the BHNL, and the expression of special qualities at the local level. The evidence relied upon in the assessment [East Devon Local Plan 2020-2042 Site Selection Report Broadhembury Feb 2025] and the judgements reached therefore lack robustness. The Site Selection report does not specifically address how each site would further the superordinate purpose of the BHNL ie: to conserve and enhance its special qualities. It is our view

therefore that the assessment you have undertaken does not therefore meet the test of ‘reasonable and proportionate consideration’. You will know that the Natural England guidance that you quote in support of criteria 12-17 of your document [reference above] is out of date. The plan is in our view not legally compliant. We would remind you that ‘seeking to further’ something is a much more stringent test in law than simply ‘having regard to’ something as previously required under the CRow Act (2000)

4.4 Any assessment of effects on ‘natural beauty’ requires an understanding of the special qualities of the landscape as set out in the Blackdown Hills Management Plan in this instance. Your Authority along with the Somerset unitary Authority and Devon County Council and others have delegated the production of the Management plan to the Management Partnership of the Blackdown Hills National Landscape on which you are represented. You will know that the extant plan (2019-24) has had its life extended temporarily by DEFRA, and that a revised plan is in the final stages of consultation. The draft has been approved by all relevant authorities and will be published before the Local Plan is ‘made’ so we would urge you to use this as the source document. Failing this we would encourage you to reference the detailed statement of intent dated 1989 by the Countryside Commission.

Reasonable Alternatives

5.0 Notwithstanding the points above we are mindful of the pressures for both affordable and commercial housing and that the opportunities in East Devon are limited by the high proportion of land which is Protected Landscape. It is clearly in the public interest to find sites for development.

5.1 We have offered and supported a more suitable alternative site close to the village of Broadhembury. This is an Exception site to the West of the village [Planning Application ref 23/2538/OUT, also referred to as site Brhe-04]. It will have less impact on the Protected Landscape and Conservation Area, provide more affordable housing as a proportion of the whole (four in six rather than two in ten) and we have had significant discussions with the landowner about the ways in which the purposes of the Protected Landscape could be enhanced. It also meets the need identified in our most recent housing survey. You have indicated in discussion that you are ‘minded to approve’ the outline application and we would encourage you to make the decision without further delay so that identified housing needs can be met.

5.2 You have dismissed sites BRHE- 05 and 07 as ‘within the setting of the Grade 1 Listed church and development would have a significant impact’ [page 476/ Sustainability Appraisal report Feb 25]. Furthermore you have dismissed sites Brhe- 04,05 and 07 because: [they]...’ lie within the National Landscape so any development is considered to have significant adverse effect...’. You argue that ‘the other sites (presumably Brhe- 04 and 09) are close to but do not directly impact upon the Grade II Listed buildings...’ [ref ditto].

5.3 Clearly this is true of Brhe-04 but is not the case of Brhe-09. To amalgamate the two sites in one impact assessment is inconsistent. We would submit that your site assessment process is faulty and has not been conducted with a view to ‘making the plan more sustainable by identifying the plan’s significant effects and ways of minimising its negative effects ‘ [ditto para 1.2] because there are perfectly viable alternatives. Our advice is that sites Brhe 05, 07 and 09 all effect the setting of Listed Buildings, including the church in identical ways by virtue of proximity (they are all within similar distances), setting (on ground which affords views of the church) and nature (the design and style of habitation would be inconsistent with and equally close to or within the Conservation Area).

5.4 More generally some of your existing policies make it difficult to comply with recent legislation. For example your policy to group housing within approx. less than 1 km from services rules out many adjacent hamlets and villages within or even close to the National Landscape where development could be proposed. The NPPF (Dec 24./para 83) states: ‘where there are groups of smaller settlements, developments in one village may support services in villages nearby.’

5.5 We think that a reassessment of EDDC policy in line with NPPF could release other potential sites. We have previously made this and other points to you in our written submissions (eg: Nov 24, submission to EDDC Strategic Planning Cttee)

Process

6.0 As permitted under the regulations in law which determine consultation at this stage we wish to be informed when the Local Plan is formally submitted to the Planning Inspectorate and when the Enquiry takes place. We give notice that we shall be submitting a technical paper to the Enquiry and will be represented if the Sec of State holds sessions in public.

Conclusion

7.0 We do not believe that the plan has been positively prepared, nor are the proposals justified or consistent with national policy and legislation and are therefore unsound. There are more viable smaller-scale options which would have local support, further the purposes of the National Landscape and protect the Conservation Area from harm. The points made in this submission are consistent with those in our letters to you dated 20th Jan 2023 and Jan 21 but unacknowledged.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD13

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: [To be read with entry linked to Laura Polley (Greenslade Taylor Hunt) including uploads of Highway and Transport Review, Landscape and Visual Baseline, and Illustrative Framework Plan.] This representation is submitted on behalf of our clients, Summerfield Homes Ltd in connection with the Regulation 19 Local Plan Consultation. Summerfield Homes are a local housebuilder who have an Option Agreement to develop the land at Green Lane, Chardstock. Summerfield Homes submit this letter in support of the allocation, subject to modifications, of land within Chardstock (CHAR_04a) contained within policy SD13 of the East Devon Local Plan 2020 to 2042 which was published in February 2025. Strategic Policy SP01 identifies Chardstock as one of the Service Villages and will allow for limited development of the settlement. Strategic Policy SD13 proposes to allocate Land off Green Lane, Chardstock (Char_04a) for around 30 dwellings. The policy requires landscaping to include provision of appropriate boundary screening in respect of long-distance views to and from the Blackdown Hills National Landscape area. The policy encourages opportunities to provide a connection for residents to Public Right of Way (PRoW) Chardstock Footpath 30. The Illustrative Framework Plan which accompanies this submission shows access from The Half Moon Road to the south of the site with attenuation features and landscaping around the site entrance. Higher development densities are proposed on the southern part of the site with densities decreasing towards the northern extent of the site. The plan incorporates public open spaces throughout the site and green breaks distributed throughout the development. The northern part of the site could be used for strategic landscaping, open space and Biodiversity Net Gain (BNG), although the final layout is still to be confirmed. Summerfield Homes strongly support the allocation of Char_04a for the development of around 30 homes, subject to modification to include

additional land. It is recommended that the policy is amended to include the adjoining field parcel to the north, over which Summerfield Homes also has an Option. Despite the geographical extension of the policy to include northern land parcel, Summerfield Homes Ltd proposes to maintain the proposed number of dwellings at around 30. The inclusion of additional land will allow for a lower density of development, more in-keeping with local and landscape character, and the provision of enhanced landscaping and public open spaces. The additional land would also allow for a connection into Green Lane to be considered as encouraged by the emerging policy. This letter is accompanied by an illustrative framework plan which shows how the site could be developed to provide around 30 homes over the wider site area. The masterplan is landscape led and has formed following extensive studies and advice from landscape experts. The plans are at an early stage but nonetheless demonstrate how the allocation could be developed, resulting in a higher quality development and without resulting in undue landscape harm. The submitted landscape visual baseline assesses the key visual receptors and highlights recommendations to mitigate any landscape impact. The assessment confirms that, due to the site being outside of any national or regional designations, and being free from prominent landscape features, it would be deemed suitable for accommodating development, providing that mitigation measures are incorporated to assimilate the development within the surrounding area. The visual baseline assessment summarises that, whilst the site could be glimpsed from some higher value receptors, along PRoW and Bridleway routes contained within the Blackdown Hills National Landscape area to the west, the area is intersected by areas of existing tree and hedgerow planting forming part of the field boundaries and lane edges throughout the surrounding context. The development of the site would be viewed in the context of the existing village, with the built form making up the wider village prominent in the foreground of the glimpse views towards the site. The proposals look to add small areas of development to the northern field. This would be seen as negligible in the context of the Char_04a proposed allocation of the site, with the mitigation proposals being effective in ensuring the development is sufficiently landscaped to assimilate into the surrounding context. The emerging illustrative layout seeks to introduce low - medium density residential development within the site area. Illustrative proposals show site boundaries are being reinforced with planting, both to increase biodiversity value and to soften views onto the site. The site would benefit from the introduction and reinforcement of north-south green infrastructure breaks, assisting in layering the landscape as the development moves to a higher elevation, helping to mitigate wider views, and assimilate the development within the landscape. As required by Strategic Policy SD13, the initial layout shows a development of around 30 dwellings with extensive landscape planting and a connection into Chardstock Footpath 30. This landscaping and connection into Chardstock Footpath 30 could be made possible through the inclusion of the additional land. The submission is also accompanied by a highways technical note prepared by SLR which further supports the allocation of the

site for the development of around 30 homes. The document confirms that the site is within an accessible location with various local services and facilities within walking and cycling distance of the site, including a school and a shop. Chardstock therefore represents a sustainable location for the development of new homes. The proposed access plan demonstrates that vehicle access to the site can be achieved with an acceptable geometry including visibility splays in line with the speed limit.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Summerfield Homes strongly support the allocation of land at Green Lane, Chardstock and emerging policy SD13 for the development of in the region of 30 dwellings subject to the recommended modification. Summerfield Homes propose to include the adjoining land to the north of the emerging allocation, to enable the development of a higher quality scheme, with housing densities more in-keeping with local character, and enhanced public open spaces, landscaping and habitat creation as shown on the accompanying framework plan. The northern field has not been included in the emerging policy due to the Council's concerns over the potential adverse landscape impact. This has now been reviewed in detail and disproven through this representation, the accompanying plan and the landscape baseline assessment. Therefore, Summerfield Homes recommends this modification to policy SD13 to facilitate the delivery of a high-quality, in-keeping, and locally informed development that reinforces its sense of place whilst securing a more efficient use of land. This modification will ensure the soundness of this emerging policy.

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Submitted to enable Summerfield Homes to present their case at a hearing in support of the allocation of the land over which they have an Option Agreement to develop and to share with the Inspector the work they have instructed in relation to landscaping, highways and drainage.

If the files uploaded need to be in the public forum in order to be discussed as part of the hearing then please contact us to discuss.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD13

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: This does not consider the lack of infrastructure in the village or the detrimental effect on the elderly population. It equates to a 14% increase in population which cannot be supported by a village of this size.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The assigned area is green fields which would be lost forever alongside the wildlife which inhabits the area. England is already one of the most severely nature depleted in the world with only 53% of its biodiversity remaining.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The road into the village is too narrow to accommodate more traffic. Following such a development the additional vehicles using the fragile road system would make living in the village intolerable. The village is only able to sustain the shop due to the support of the villager both practically and financially. If they withdraw their support or the Post Office no longer has a counter there the shop will need to close.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: There is an empty public house that is rapidly deteriorating, it would make far more sense to develop this land. There is also some derelict industrial units that could similarly be used if further land was required.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Such a population increase would make the road into the village unusable for local people to walk along. This includes many dog walkers and parents taking their children to school.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

[Summerfield Planning on behalf of 3WestGroup] The representation is accompanied by a copy of the Regulation 16 Consultation response and objection to the Clyst St Mary and Sowton (Bishops Clyst) Neighbourhood Plan (Modification Proposal) (hereafter the "Neighbourhood Plan"). That representation is provided Appendix A and should be read in conjunction with this submission. The response to the Regulation 16 Consultation demonstrates that the proposed allocation of Strategic Environmental Assessment (SEA) Option 3 (sites Sowt03 and Sowt11), as proposed by Policy BisC12 'Land East of Clyst St Mary' in the draft Neighbourhood Plan, is fundamentally flawed and completely unsupported by evidence. This includes evidence prepared by the Parish Council's specialist consultant and appointed consultants AECOM. That evidence demonstrates that SEA Option 4 (sites Sowt03 and Sowt09) is the appropriate strategy for development at Clyst St Mary. Any other conclusion ignores the available evidence, and no credible or reasonable explanation or justification has been provided to support an alternative strategy. The rationale for the allocation of sites SEA Option 3 was predicated on a misplaced belief that suitable access cannot be provided to site Sowt09 (land at Bishops Court Lane) and that the delivery of a proposed link road between the A3052 and Bishops Court Lane will be provided as an integral part of proposed allocation site BisC12. It should be noted that the consideration of the current planning application for site Sowt09 (Application Reference: 23/1948/FUL) has confirmed that the Local Highway Authority Devon County Council (LHA) does not agree with the Parish Council's conclusion regarding the highway impacts of the development of that site. In fact, there are no reasons to object to the development of the site on highway grounds. It has also been confirmed at both the Regulation 14 and Regulation 16 stages of the preparation

of the Neighbourhood Plan that the LHA does not support the link road proposed as part of site BisC12. The LHA response to the Regulation 16 Consultation is provided in Appendix B to this representation. This response confirms that the LHA does not support the provision of the proposed link road due to the potential for unacceptable road safety risks, with the link inadvertently creating a vehicular route for through traffic between the A3052 and A30 Exeter Airport junction. This may lead to significant volumes of traffic attempting to turn right from the A3052 into the proposed allocation. The LHA go on to advise that the likely increase in traffic flows should the vehicular link to Bishops Court Lane be provided (and the likely use of the road by traffic accessing the business park and ‘rat running’) could raise material concerns regarding the suitability and safety of the access’s operation on the A3052. National policy and guidance confirm that neighbourhood plans must be underpinned by evidence that supports and justifies their policies. The inclusion of site BisC12 in the Neighbourhood Plan, without supporting evidence and/or justification, means that it has not been prepared in a manner that aligns with national planning policy. Therefore, the Basic Conditions have not been met. While this is a matter that 3West considers should be assessed and scrutinised in detail through the Independent Examination of the Neighbourhood Plan, it is also highly relevant to the emerging Local Plan. 3West objection to Strategic Policy SD14 The issues outlined above (and in Appendix A) are relevant to the Regulation 19 consultation because Strategic Policy SD14 of the emerging Local Plan defers responsibility for meeting the identified need for future residential development at Clyst St Mary to the Neighbourhood Plan. It should be noted that Strategic Policy SD14 is the only residential allocation related policy that proposes to defer responsibility for meeting future needs to a neighbourhood plan. Given that the Neighbourhood Plan in question has not been yet progressed to Independent Examination (and there is no indication at this stage that it will be found to accord with the Basic Conditions and other requirements and progress to Referendum and then be approved at Referendum and Made) this approach is considered to be inappropriate. It is clear that limited weight should be afforded to the emerging Neighbourhood Plan at this stage. It is self-evident that in the event that the Neighbourhood Plan does not progress to being Made (which to confirm 3West consider there are clear reasons why in its current form it should not do so) then Clyst St Mary will be left without any provision for planned growth to meet needs for new homes, including affordable housing. No explanation or justification is provided in the emerging Local Plan for why this approach is considered to be an appropriate approach to strategic planning. Furthermore, if Strategic Policy SD14 were to be retained in its current form, it would effectively be endorsing the proposed allocation of a site that (for the reasons explained above and further in Appendix A) is not supported by evidence and is therefore unjustified. The proposed allocation is also very unlikely to be deliverable due to the lack of support from the LHA for the proposed link road, which forms an integral part of the justification for the allocation. The objection from the LHA and its clear implications for deliverability of development at

Clyst St Mary should not simply be ignored by the emerging Local Plan process. It is also relevant that the support in the emerging Local Plan for the Neighbourhood Plan's proposed allocation at Clyst St Mary runs a significant risk of undermining the strategy set out in Strategic Policies SP01 'Spatial Strategy' and SP02 'Levels of Future Housing Development' of the emerging Local Plan. These policies set both the level of new development required to address housing needs and the distribution of that development across the district. Strategic Policy SP01 recognises the importance and need for 'limited development' at the identified Service Villages, including Clyst St Mary. This supports the emerging Local Plan's Objective 11, which seeks to support villages and protect and enhance the facilities and services they offer. The emerging Local Plan confirms that the identified Service Villages are those settlements with good local facilities, providing essential services and infrastructure for their immediate rural areas, and supporting more localised, sustainable development. This approach accords with the National Planning Policy Framework (Paragraph 83), which advocates the promotion of sustainable development in rural areas by locating housing where it will enhance or maintain the vitality of rural communities. It specifically states that planning policies should identify opportunities for villages to grow and thrive. The doubts about the deliverability of the Neighbourhood Plan's proposed allocation at Clyst St Mary must call into question whether the emerging Local Plan's spatial strategy, as it relates to that particular settlement and with it the provision of sufficient homes across district, is deliverable. A failure to deliver this element of the strategy will mean that the identified need for new homes, including affordable homes, would not be met at Clyst St Mary. Accordingly, 3West considers that the emerging Local Plan fails the tests of soundness on the basis that, with the inclusion of Strategic Policy SD14, it is not justified, effective, or consistent with national policy. Proposed allocation of Site Sowt_09 (Land at Bishops Court Lane) For the reasons outlined above 3West considers that Strategic Policy SD14 should be replaced with a policy that allocates sufficient land to accommodate at least 72 dwellings on sites at Clyst St Mary that are supported by evidence, including site assessments and site selection evidence prepared by EDDC and for the purposes of preparing the Neighbourhood Plan. Alternatively, the emerging Local Plan should include a further allocation at Clyst St Mary to ensure that the 'minimum' requirement for 72 new homes over the plan period will be met. Either approach will ensure that new homes to meet identified needs are delivered in a settlement which is in a highly sustainable location with excellent links to the strategic highway network and the city of Exeter to the west. It should be noted that separate representations made on behalf of 3West by consultants Savills have raised significant issues regarding the proposed approach to the progress of the emerging Local Plan and whether it can even proceed under the transitional arrangements. These representations highlight that the proposed level of housing proposed exceeds the suggested minimum requirement by less than one dwelling per annum. Whilst this representation does not repeat the other submission made on behalf of 3West, the fact that EDDC have not allocated additional

sites over and above the perceived minimum requirement supports a proposition that (in the event that the Local Plan does indeed proceed as proposed) additional sites are allocated for the development of new homes in the most sustainable locations, including Clyst St Mary. As Appendix A confirms, the available evidence indicates that the most appropriate locations for future development at Clyst St Mary are those set out in SEA Option 4 (sites Sowt03 and Sowt09). Specifically, this was confirmed through a review of the following documents which are discussed in detail in Appendix A: ? Site Options Assessment Bishops Clyst Parish Council – prepared by consultants AECOM published on the Parish Council’s website here: <https://www.bishopsclyst.org.uk/wp-content/uploads/2022/05/220510-Bishops-Clyst-Site-Options-and-Assessment-Final-Report.pdf> ? Site Residential Selection Process Report June 2022 – published on the Parish Council’s website here: <https://www.bishopsclyst.org.uk/wp-content/uploads/2022/06/Bishops-Clyst- Site-Residential-Selection-Process-Report-9Jun22.pdf> ? Site Consultation Report September 2022 – published on the Parish Council’s website here: <https://www.bishopsclyst.org.uk/wp-content/uploads/2022/10/CSMSNP-Site-Consultation- Report-September22.pdf> ? Strategic Environmental Assessment for the Clyst St Mary and Sowton Neighbourhood Plan (SEA) – prepared by consultants AECOM published on the Parish Council’s website here: https://bishopsclyst.org.uk/wp-content/uploads/2024/11/241113-Clyst-St-Mary-and- Sowton-NP_SEA-Environmental-Report_v3.0.pdf It should also be noted that site Sowt_09 was identified as preferred option by EDDC in the emerging Local Plan at the Regulation 18 stage. This is confirmed at Page 96 of the following document: <https://eastdevon.gov.uk/planning/planning-policy/emerging-local-plan-2020-2042/draft-local-plan- consultation-nov-2022-to-jan-2023/> The ongoing process of the determination of the current full planning application for the site (Application Reference: 23/1948/FUL) has confirmed that site Sowt09 is deliverable and that there are no technical reasons why the site could not be developed. This includes confirmation from the Lead Local Flood Authority that the principles of the drainage strategy for the site are acceptable (with the inclusion of an appropriately worded condition) and from the LHA that they have no objections on highway grounds. The Site Location Plan for site Sowt_09 accompanies this submission. A full set of technical reports and consultation responses are available on the planning application file and copies can be provided on request. Conclusion This representation is made on behalf of 3West Group in response to the Regulation 19 Consultation on the East Devon Local Plan 2020 to 2042. For the reasons outlined above, 3West object to Strategic Policy SD14. The policy’s deferral of responsibility for allocations to meet the identified need for new housing to the emerging and uncompleted Neighbourhood Plan (and with it the endorsement of a flawed approach to plan making and in particular site selection) means that this element of the emerging Local Plan is considered to fail the tests of soundness.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

3West considers that to address this issue Strategic Policy SD14 as currently drafted should be removed from the emerging Local Plan and replaced with a policy that allocates sufficient land to accommodate at least 72 dwellings on sites at Clyst St Mary that are supported by evidence. Alternatively, the emerging Local Plan should include a further allocation at Clyst St Mary to ensure that the 'requirement for 72 new homes over the plan period will be met. As the available evidence, including site assessments and SEA and the ongoing determination of planning application reference 23/1948/FUL, have demonstrated that site Sowt09 (land at Bishops Court Lane) is deliverable and that there are no technical reasons why the site could not be developed. Accordingly, 3West recommend that Sowt_09 is allocated for future development

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To discuss the issues raised in the representation with the Inspector and Local Planning Authority and to provide further clarification and/or respond to any site specific queries from the Inspector, Local Planning Authority or third parties.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD14

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: As background and context for this submission, CSL have an interest in the site at Sidmouth Road, being the southern part of the Proposed Area for Development under Policy BisC12 – land east of Clyst St Mary - in the Submission Version of the Neighbourhood Plan for Bishops Clyst Parish. As such, CSL supports this site at BisC12 in the Neighbourhood Plan, as shown on Map 9 for residential development to provide a mix of housing. I support this policy so far as it seeks to accommodate “at least 72 dwellings” in Clyst St Mary. That this states that this is a minimum requirement as regards the number of dwellings and that this will need to come forward specifically in the village of Clyst St Mary is important. As noted above, the Neighbourhood Plan for Clyst St Mary is well advanced, being at the Submission Version stage, and the site at Sidmouth Road referred to as BisC12 in the Neighbourhood Plan has been included in all previous iterations of the plan, it would appear to be sensible and logical to include this site as an allocation in the East Devon Local Plan. On this basis, the Local Plan would reflect the wishes of the local Clyst St Mary community, and the two plans would be consistent with one another.

A date of 2030 is suggested for development to come forward through the Neighbourhood Plan process – given the advanced nature of the Neighbourhood Plan and willingness of CSL to progress a planning application for this site, this date could be changed to 2028.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Support for Policy SD16 and the findings of the background evidence reports SAL-001, SAL-002, SAL- 003 and SAL- 004 and SAL-015 Site selection report for East Budleigh. The site has been identified as suitable, available, achievable in the HELAA; in a suitable location; not already allocated in a ‘made’ Neighbourhood Plan; and not already have planning permission. However as the development would constitute ‘major’ development (as defined by the local authority according to the NPPF) in a National Landscape, to justify the “exceptional circumstances” for allocation the Policy to be sound should also stress the need to ensure affordable housing is provided to meet the identified needs of the village. Given the sensitivity of the site it is welcome the policy recognises a high quality development scheme is required it is suggested a masterplan is provided by the developer prior to planning permission being granted to enable consultation on a preferred locally distinctive and high quality design with the Parish Council and residents to ensure planting and open space provision is located to minimise the impact on the landscape, Syon House and to protect the amenity of the occupiers of adjoining residential properties on Frogmore Road. This in accordance with Strategic Policy DS01 of the Local Plan

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: A high-quality and locally distinctive development scheme is required for this prominent site noting its location in the East Devon National Landscape area and proximity of the Syon House as

a non-designated heritage asset. Crossing provision over the B3178 should be provided for pedestrians and overhead wires across the site should be relocated underground. New and existing planting and open space should minimise the impact on the landscape, Syon House and protect the amenity of the occupiers of adjoining residential properties on Frogmore Road. Prior to planning permission being submitted it is expected the developers will provide a masterplan for consultation to the Parish Council and residents (particularly the immediate neighbouring properties,) to allow input into the design for the site. The provision of affordable housing to meet the identified needs of the village will be required.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD16

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The proposed East Budleigh Site is outside of the Built-up Area Boundary in the Neighbourhood Plan (Made and Approved) contrary to SP03, SP05 and SP06. The proposed development needs to be only affordable housing but there are minimal employment opportunities, ie, a volunteer-run community shop, a volunteer-run pub, a church and a school so this is not a sustainable development contrary to SP01. The current infrastructure, ie, pedestrian, cycling and vehicular access, is inadequate in and around East Budleigh and this proposed development will exacerbate the problems close to the Lower Otter Nature Reserve contrary to SP07. East Budleigh and the River Otter estuary are within a National Landscape. The proposed site is adjacent to the Lower Otter Nature Reserve which is nationally important, is still developing and is designated a site of Special Scientific Interest (SSSI) - the site development will not enhance the NL and is contrary to OL02, PB01 and PB02 and will fail to meet PB05. The proposed development will impact the scenic quality of the district and the view to the iconic Syon House contrary to OL04.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proposed East Budleigh site (Ebud_01) is within the new settlement boundary shown in this proposed plan, hence meeting SP03, SP05 and SP06, however it is outside the Built-up Area Boundary in the Neighbourhood Plan for East Budleigh with Bicton (Made and Approved). The proposed site is on farmland and near Flood Risk 2/3 areas.

The proposed development (Ebud_01) needs to be only affordable housing but there are minimal employment opportunities, ie, a volunteer-run community shop, a volunteer-

run pub, a church and a school so this is not a sustainable development contrary to SP01.

The current infrastructure, ie, pedestrian, cycling and vehicular access, is inadequate in and around East Budleigh and this proposed development will exacerbate the problems as Frogmore Road is a very narrow road close to the Lower Otter Nature Reserve contrary to SP07. Access to the main village will require crossing the busy B3178.

East Budleigh and the River Otter estuary are within a National Landscape. The proposed site is adjacent to the Lower Otter Nature Reserve which is nationally important, is still developing and is designated a site of Special Scientific Interest (SSSI) - the site development will not enhance the NL and is contrary to OL02, PB01 and PB02 and will fail to meet PB05.

The proposed development will impact the scenic quality of the district and the view to the iconic Syon House contrary to OL04.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: If the proposed site (Ebud_01) is developed it should be only affordable housing or small units suitable for first time buyers. A safe crossing method including pedestrian paths from the site to the main village must be provided.

An alternative location is proposed as per the attached diagram - this site, on the B3178 behind Collins Park, potentially would provide safer access onto the B3178. There is an existing footpath from the B3178 adjacent to this alternative location that gives safer access to Middletown Road and to the village facilities. This part of the B3178 is relatively flat and would provide better access to the B3178 than from Frogmore Road from the proposed East Budleigh site (Ebud_01).

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

EAST DEVON LOCAL PLAN SD 16: Allocation of new housing to East Budleigh li to Policies Map East Budleigh's quota of 22 houses should not be in Frogmore Road because of location, planning history and preferable alternative(s). Reasons

1. A 2014 outline application for 18 houses on a site fmcluding area Ebud 01 proposed for the 22 homes) was withdrawn, after objections, and replaced by a 2016 outline application for 5 houses on part of the site south-east of Ebud 01. Despite 47 public objections, detailed planning approval was obtained in 2021 on the basis of reduced scale and lack of impact on existing residents. A further application was made in 2022 for a single house, which has been built between the existing houses and the proposed 5,e of which has been built

2. Objections that continued to apply to the 5 (now 6) houses were, and remain- a. the danger of significantly increased traffic into a narrow =al road much used by pedestrians accessing the public footpath to the river and cyclists (mute 52), b. the proximity to Flood risk areas 2 and 3 c. the eastwards spread of the Village boundary into an AONB (National Landscape area) towards the Otter Valley (now also home to a nature reserve).

3. The effect of putting 28 houses on the area, where an application for 18 was withdrawn, greatly increases the above objections. In addition, the gardens and back of existing houses would be overlooked by houses on the slope up to Syon House. Crucially, the allocation of 22 houses to East Budleigh is tied to facilities in the Village (school, shop, pub etc). It is better that the residents of the 22 houses should have access to these facilities without having to cross the main mad. It also avoids all the extra traffic having to negotiate the difficult crossing by the Rolle Arms.

4. An alternative site, I believe called Collins Park as shown on the accompanying plan, can easily accommodate the area of Ebud 01, leaving free the footpath across the site

for access into the Village (which could be connected to the path across the road by a pedestrian crossing). Also access to the flat section of the main road can be direct, avoiding existing congestion at the Rolle Arms crossroads (and access onto the main road below the brow of the hill, if Ebud01 were to be connected there). Unlike Ebud 01, the site is level and construction access is better. Extending the 30mph limit north beyond Salem Chapel would give extra safety. Other ways (Rolle Arms?) of distributing the 22 houses mandated by the District may be identified and it seems right for the Village to decide where they are to be placed. The settlement boundary should be amended to reflect the choice.

5. Obviously the views of the landowner and tenant of Collins Park (who either way lose a field but EB_01 seems to have been more used, for young cattle) are key but we trust the interests of the Frogmore residents and the residents around Collins Park and elsewhere in the Village will also be given appropriate weight. Nimby allegations may be raised but they are a two-edged sword and the residents at the west end of Frogmore Road already face a 50% increase in adjacent housing.

6. Finally, further housing density within around 500 metres of the Otter Valley and its new nature reserve is problematic in itself. New developments within 10 kilometres are reported to have adverse effects on sensitive nature locations.

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Alexander Munday of Kitchener Land and Planning (KLP) on behalf of Mr Lillie and Mrs Blundell.

This Representation is made, on behalf of Mr Lillie and Mrs Blundell who are the landowners of the site , in response to the Regulation 19 Publication Draft of the East Devon Local Plan Review 2020-2042.

Overall, we fully support the inclusion of the site known as Land West of Oaklands (Wood_01), that has been included in the Draft Plan and is proposed for allocation of around 14 dwellings.

The site remains a very good candidate for allocation in the emerging Local Plan Review, and this is supported by the technical work and masterplan prepared to support the ongoing promotion.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

These representations have however highlighted a number of concerns and some objections to draft policies in the plan and have set out within these representations where we consider changes are required in order to ensure the soundness of the plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We trust our comments should be fully taken on board and changes to the Draft Plan made as a result.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Alexander Munday of Kitchener Land and Planning (KLP) on behalf of Mr Lillie and Mrs Blundell - Landowners of Wood_01

We support Strategic Policy SD17 and specifically the proposed allocation of the Land West of Oaklands (WOOD-01).

The proposed allocation states:

Land west of Oaklands (Wood_01) The site is allocated for around 14 dwellings. Suitable provision must be made for pedestrians to safely cross from the site across the A376 to enable easy access to facilities in the settlement, along with pedestrian/cycle links to Wood_28 adjacent to the south east.

Exton is a sustainable location for future development. The village is very well connected to Exeter on the basis of both its proximity and public transport links. This includes the presence of a railway station in the village and regular bus services. The railway station in particular provides direct connections into Exeter with journey times of only 30 minutes. These public transport services provide residents with good connections to Exeter and the range of regional employment, retail and leisure facilities on offer as a result.

In addition, Exton hosts the following which provide day-to-day services and facilities:

- Shop / convenience store
- Pub
- Village hall
- Children's play area

As a result, Exton is an entirely appropriate location for future growth, and we support the Council's commitment to direct a proportion of the required growth to the village.

We specifically support the proposed allocation Land West of Oaklands (WOOD-01) for the development of around 14 residential dwellings. We also support the policy wording that provision must be made for pedestrians to safely cross the A376 to enable easy access to facilities, along with a pedestrian link to WOOD_28 adjoining WOOD_01 to the south east.

The development of the site can provide much needed housing to help meet local housing needs, as well as helping to sustain the vitality and viability of the existing services and facilities in the village.

We agree that the development of the site should explore appropriate pedestrian and cycle access and that this may require some highway improvements. Such improvements can be reviewed further as part of an emerging masterplan for the site.

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

We support Strategic Policy SD17 and specifically the proposed allocation of the Land north and east of Exton Farm (Wood_28).

The proposed allocation states:

Land north and east of Exton Farm (Wood_28)

The site is allocated for around 39 dwellings. Development will need to provide safe and suitable pedestrian and cycle access along Mill Lane south to the existing pedestrian crossing at the A376/Station Road junction, to enable easy access to facilities in the settlement. This pedestrian crossing should be upgraded to accommodate cyclists, to enable access to the Exe Estuary Trail via Station Road. Development should provide pedestrian/cycle links to Wood_01 adjacent to north west. Development should include tree planting on the southern field to reflect their historic presence; and retain the hedgerow that dissects the site, as far as practically possible. Development should address the existing flooding issues along Mill Lane.

Firstly, Exton is a sustainable location for future development. The village is very well connected to Exeter on the basis of both its proximity and public transport links. This includes the presence of a railway station in the village and regular bus services. The railway station in particular provides direct connections into Exeter with journey times of only 30 minutes. These public transport services provide residents with good connections to Exeter and the range of regional employment, retail and leisure facilities on offer as a result.

In addition, Exton hosts the following which provide day-to-day services and facilities:

- Shop / convenience store

- Pub

- Village hall

- Children's play area

As a result, Exton is an entirely appropriate location for future growth, and we support the Council's commitment to direct a proportion of the required growth to the village.

We specifically support the proposed allocation of Land north and east of Exton Farm (Wood_28) for the development of 39 residential dwellings.

The development of the site can provide much needed market and affordable housing to help meet local housing needs, as well as helping to sustain the vitality and viability of the existing services and facilities in the village.

We agree that the development of the site should explore appropriate pedestrian and cycle access and that this may require some highway improvements. We also agree that development should address the existing flooding issues along Mill Lane. Such work relating to highways and flood risk will be reviewed further as part of an emerging masterplan for the site.

The site is also capable of accommodating the necessary tree planting as requested by draft Policy Wood_28), and would in any case look to retain trees / hedgerows as far as possible to maximise biodiversity net gains.

Overall, the land north and east of Exton Farm remains a strong candidate for allocation in the emerging Local Plan Review. The site is available and very much capable of accommodating the 39 new homes proposed in draft Policy Wood_28, including a policy compliant level of affordable housing.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: It is important that 3West Group is present to participate in the hearing session for Policy SD17 owing to their interest in the Land north and east of Exton Farm (Wood_28). It is important that they are given the opportunity to make their case in relation to this policy.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD17

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Don't really understand the question but my comments below, on the proposed development may indicate an answer.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Re Land adjoining Mill Lane Exton. (Wood 01 & Wood 028). This land is a flood plane for higher land containing housing & farms. Mill Lane often floods at its lower levels. Mill Lane is a single track road with only one passing place (which is not maintained & is often used for parking of vans delivering or belonging to contractors). There is no pedestrian foot path. I live in a property off Mill Lane & I often have to reverse into peoples drives to allow other vehicles to pass.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Over Development for reasons given above.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Greatly reduce the number of proposed properties . Mill lane would need to be widened to two lanes or additional passing places added, plus a foot path for pedestrian safety. No idea what can be done about flooding as this sometimes also comes from an overflowing stream.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD17

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: Firstly I live at Oaklands. The land to the west I have no problem with as long as a footpath is included which will make crossing the road easier. The A376 is becoming a very dangerous road to cross . I have seen a big increase in traffic in the 14 years I have lived here. With all the new houses being built along Dinah Way in Exmouth the A376 will probably have to cope with more traffic. Can I please ask that the buildings are not too close to the boundary to respect our privacy.

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Not specifically opposed to this development but I am very concerned about the flooding aspect. I recently had a problem after a very heavy downpour. Mill Lane is very narrow with sharp bends & no passing places or pavement. We also enjoy a variety of local wildlife which should be considered with any new development

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Since the cycle path has been extended to Woodbury along Mill Lane there is a problem with cyclists exiting the path

from Woodbury at high speed without checking Mill Lane. Maybe a stop sign & lines would help this situation.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Please refer to answers given previously

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Please refer to previous answers.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: It would be good if the train could stop at Exton Station every 30 minutes without it being requested.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Exton is an area where the housing is quite expensive & therefore I suspect none of this development will be suitable for social housing. The council will still need to fulfil this need to comply with the duty to co-operate.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Land north and east of Exton Farm (Wood_28) - This policy contains the wording: 'Development should address the existing flooding issues along Mill Lane.' The word 'address' offers no clarity on what is expected from developers. Preferable wording would be: "Development proposals should first avoid the area of flood risk. Where this is not possible with full justification, development must mitigate the flood risks". However, we recognise that this doesn't seem to go beyond the requirements of the NPPF and therefore does not add much value. Either specific requirements should be set out, or this sentence is not needed.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Wood_28: The proposed site allocation is located immediately to the east of the farmstead associated with grade II* listed Exton Farmhouse and forms the remaining rural/agricultural setting to this heritage asset (nb. It appears likely that remaining vernacular farm buildings may be considered curtilage listed). Development of the whole site would sever much of the remaining link and would therefore harm the significance that Exton Farmhouse derives from its setting. We note that rising land to the northeast of the farmstead also enjoys views over the Exe Estuary and towards The Belvedere tower (grade II*) at Powderham. As a minimum we would expect development to seek to conserve and enhance the setting of the designated heritage asset through careful consideration of layout, design, building height and landscaping. It may be possible to mitigate impacts by restricting development to the southern part of the site and retaining the northern section as green open space with visual links to the historic farmstead.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Wood_28: We request a more detailed HIA including assessment of the potential for development to impact on the remaining rural setting of grade II* Exton Farmhouse, including views into and out of the historic farmstead from rising land to the northeast, and proposed mitigation measures. This should inform a concept plan to evidence whether the proposed site capacity can be achieved without unacceptable harm to this highly

graded heritage asset. The site boundary, capacity and/or policy wording should then be adjusted to reflect this evidence.

Strategic Policy SD17: Development allocations at Exton Land north and east of Exton Farm (Wood_28) with the site allocated for around 39 dwellings. The housing development boundary has a section that falls within the explosive Vulnerable Building Distance (VBD) statutory safeguarding zone with the outer extent defined by a purple line on the statutory safeguarding plan. Within this zone all inhabited buildings need to be deemed as being ‘non vulnerable’ structures. This means they should be of robust design and construction so that should an explosion occur at the MOD explosives storage facilities, buildings nearby will not sustain damage that could cause critical injury to the occupants. Developments and land use that directly support large gatherings of people outside can also be of relevance to the management of explosives safeguarding requirements for this zone. The MOD would wish to review and should be consulted on any development within the statutory safeguarding zones surrounding CTCRM Lympstone. MOD recommend that any more detailed policies for these sites include wording which indicates that development should be designed to ensure that it would have no impact on the operation or capability of defence sites or assets.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We write on behalf of South West Strategic Developments Limited (SWSD) in relation to the East Devon Local Plan Regulation 19 consultation, specifically regarding Land adjacent to Beechwood, Feniton, which is identified as an allocation (ref. Feni_08). SWSD has an agreement with the landowners of this site to promote it for residential development. Previous representations have been made regarding this development site including to the East Devon Call for Sites and Local Plan Issues and Options Consultation in 2021, and the site has been considered by the Council as part of the Housing and Economic Land Availability Assessment (HELAA). It is important to stress from the outset that we support and welcome the site's (ref. Feni_08) inclusion in the emerging spatial strategy as an allocation to meet the identified housing need in East Devon. Notwithstanding, we have been instructed by SWSD to prepare and submit these representations to the East Devon Local Plan Regulation 19 consultation. Our submission provides comments on the local plan spatial strategy and key specific policies (including Strategic Policy SD18, which relates specifically to this site), as well as setting out that the site is available and deliverable, and confirming that the site should continue to be allocated for residential development. This representation is consistent with the previous submissions made to the Council, and should be considered alongside these, as it does not seek to repeat the points previously made in detail. It should also be noted that SWSD has appointed a technical team who is in the process of preparing detailed evidence to underpin an Illustrative Site Plan for the development proposals, which includes transport, drainage, ecology, landscape, trees, heritage, ground conditions and urban design matters. An Illustrative Site Plan has been prepared, which outlines that up to 60 dwellings could be delivered within the allocated land parcel alongside significant levels of public open space (including areas for ecological enhancement), children's play area, an

attenuation feature, and trees and hedgerow planting. This Illustrative Site Plan is enclosed with this letter at Appendix 1.

A request for pre-application advice is currently with the Council and it is anticipated that an outline planning application, with all matters reserved except for access, will be submitted by May 2025. Accordingly, once the Local Plan Examination begins, a planning application will be before the Council, which will demonstrate the site's deliverability to the Planning Inspectorate to underpin the allocation of this land.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Strategic Policy SD18 sets out the development allocations at Feniton. This states the following: “The sites/areas listed below, as identified on the Policies Map, are allocated for development at Feniton. Land adjacent to Beechwood (Feni_08) Land adjacent to Beechwoods is allocated for around 60 dwellings. Careful designed and implemented boundary treatment on the eastern side of the site will be required to form a soft edge to the countryside beyond.”

We support this policy approach, as well as the specific criteria and requirements set out within the policy. The proposed Illustrative Site Plan for the site has carefully considered the constraints and opportunities for the site. It demonstrates how a scheme of 60 residential dwellings (including open market and affordable housing) can be delivered alongside carefully designed and substantial boundary treatment on the eastern side of the site to form a soft edge with the countryside beyond. In addition, public open space and children’s play area (including areas for ecological enhancement) will in effect deliver areas of publicly accessible space for existing and future residents to enjoy, an attenuation feature, trees and hedgerow planting, and other infrastructure. This has been informed by technical work including highways, ecology, landscape, heritage and drainage, all of which underpin the Illustrative Site Plan design. We, therefore, consider this to be an optimal solution for the delivery of housing at Feniton that would see a multitude of benefits being realised without harm being caused.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Introduction

1.1 The following report is submitted to support the allocation of the land at Westlades Feniton, for future residential development.

1.2 Westlades is 1.79 Ha (4.4 acres) of land on the north east edge of Feniton, in a location that does not suffer with surface water flooding. There is scope to redevelop the entire site, but the most suitable and proposed redline would be to allocate a smaller option of the rear garden infilling between the main house and the village boundary. This would be 0.52 Ha (1.3 acres) and thus qualify as a small site option.

1.3 Under the NPPF EDDC need to allocate at least 10% of their new housing as small site options, to give choice to SME developers (these sites need to be under 1 Ha (2.47 acres)). There seems to be a shortage of small sites being allocated in the current Local Plan Reg 19 being taken forward and this would be an excellent choice to include.

1.4 The whole site was assessed as suitable at the Reg 18 stage of the plan, so my clients took no further action to promote their land. EDDC assessment stated the land had no over-arching constraints. Like most sites some offsite footpaths and cycle links would be required, but that is the norm for most new sites. Mention was made about the mature trees on site and them supporting nature (like most trees do). None of these trees would be removed or altered to allocate this site. Access can come off the current driveway into the site or a new access cut through the bank.

1.5 Analysis by EDDC indicated that the land was worthy of serious consideration at the Reg 18 stage. It would appear there are no real constraints to allocation.

1.6 The site was determined to be in a suitable location for further development in the village and it was accepted that the site could be allocated for residential development, flagging that there were some mature trees on the boundary (that would not be touched if the site is developed).

1.7 These Reps are made to help explain to EDDC why this is a good and suitable location to be allocated and why the site needs to be re-included as a small site option for new homes in the village.

1.8 The considerations raised by EDDC have been looked at in detail by me and a team of consultants and none of the issues raised would in any way prohibit development of this site.

1.9 This report thus highlights the opportunity this field provides and if allocated, could be built out within the next 5 years, providing new family homes in Feniton.

1.10 EDDC need to allocate at least 10% of the new housing allocations as small site options, this site of 0.52 hectares is an excellent choice.

2. Site and Surrounding Area

2.1 The site is a residential property in large grounds known as DN438097 on the land registry. The site is on the north eastern side of the village, close to facilities.

2.2 The combined area of the whole site is 1.79 hectares gross in size, currently set to pasture and garden, around the two residential homes on site. The property is surrounded by hedges and trees on most of its boundaries.

2.3 It is being suggested that 0.52 hectares of the fields are allocated for development in the western portion for development (see attached plan)

2.4 The fields slope very gently, which would not restrict or prevent development in any way. The gentle nature of the slopes will help with natural drainage.

2.5 The site is accessed from one main point, off Station road at present. This access point could be widened to allow for further development. Or if desired a new access point could be cut through the bank, avoiding the large trees, visibility splays have been checked and this would appear to work if considered more appropriate.

2.6 The site does have a range of large trees mainly on the boundary. None of these would be touched at all if the site was developed. There are no mature trees within the site that would be impacted upon for the 0.52 hectare part of the site suggested for allocation. Thus again, none of the mature trees whatsoever will be touched in any way to facilitate development, for land being proposed to be allocated.

2.7 To the west of the site the surrounding area is residential with a range of amenities including a pub, local shop and primary school. There is also play space for children and a local youth club close by, also a train station making the site sustainable.

2.8 The surrounding area to the north is open space, to the east is a church, hair dressers and bowling club, making this is sensible location to allocate for new homes.

3. Suitability Assessment

3.1 Flooding - The site lies in Flood Zone 1. The whole of Feniton is a critical drainage area, but this site is not prone to flooding and a new scheme to alleviate the issue is being constructed. The Feniton Flood Alleviation scheme is due to be completed in 2025.

3.2 Biodiversity – The site is not within a SAC or SPA or SSSI.

3.3 Access – The site has 1 point of access, at this stage, this can be widened for the new residential development. Or a new proposed access point can be facilitated, visibility splays have been checked. The site is only 250m from the primary school.

3.4 Air Quality – The site is not near to an AQMA but we should encourage cycling, walking and bus use where possible. The site is well served by buses, with a bus stop close by, making it extremely sustainable in transport terms. The train station is only 500m away again making this a suitable location.

3.5 European sites – No immediate risks.

3.6 SSSI – None within or adjacent to the site.

3.7 Ancient Woodland – None within or adjacent to the site.

3.8 Priority habitats – Hedges surround the site and some mature trees, but none will be impacted if the site is allocated for housing.

3.9 Other habitats/features – None.

3.10 Protected Species – Bats likely to be present due to hedges and trees.

3.11 Heritage & Archaeology – No listed buildings nearby.

3.12 Landscape – No issues.

3.13 Minerals – No issues.

3.14 There are mature trees on the boundary and some within the site, but none would be impacted upon if the site is allocated for development.

3.15 Climate change – The site is located close to bus stops and a train station. Also, the village itself has a good range of amenities making it a sustainable location for a

small allocation. This development will help ensure the village and the school stay viable in the future.

3.16 The site is serviced to the boundary meaning that there are service utilities in the road outside including, electricity, water, telecoms, connecting to sewers and gas are close-by. This is a key point as this helps make the land viable to be allocated and come forward as a project.

4. Planning History and other Consultants Overview

4.1 The site has had 2 live applications the last 25 years.

4.2 There was an application for conversion of outbuildings to residential use, this was approved on 20th September 2001. <https://planning.eastdevon.gov.uk/online-applications/caseDetails.do?caseType=Application&keyVal=ZZZZAVGHXT00>

4.3 There was an application for a new replacement conservatory was approved on 14th May 2021. <https://planning.eastdevon.gov.uk/online-applications/caseDetails.do?caseType=Application&keyVal=QRIF6MGHLRY00>

4.4 A landscape architect has appraised the site and it is fine for development.

4.5 A drainage engineer has assessed the geology and a sustainable urban drainage design would be acceptable for this site.

4.6 An ecologist has assessed the site, which has confirmed no issues.

4.7 An arboriculturist has reviewed the site and confirmed the site can be developed with no harm to the mature trees on the site.

4.8 A highways consultant has reviewed the site and checked access for suitability and if a new access was to be cut, that the visibility works.

4.9 A utility engineer has reviewed the site. Various searches of the utility infrastructure have been done and all exist in or close to the site, making it a serviced site, helping ensure viability and suitability for allocation.

5. Conclusion

5.1 There is a large demand for new housing in the local area, due to its proximity to good transport links and the village's good selection of amenities; and this site is ideally suited for allocation and future development.

5.2 This is a suitably sized site for Feniton and is by far the best option for a small site for the village. It will not be overbearing for the village, whilst not being too small as to not make any difference. It would appear it is the right size for the village with a proposed 0.52 hectares for allocation.

5.3 It is clear the current Reg 19 does not allow for enough housing, nor does it allow for enough housing in Feniton, nor does it allow for enough small sites, which it has to under the NPPF, on all counts this site should be allocated.

5.4 This site is readily suitable, available, and achievable within the shortest time frame of within the next 5 years.

5.5 There is no doubt this is by far the best option for housing in the village on all grounds, including planning merit. It is disappointing it has been overlooked from the Reg 18 stage to the next Reg 19 stage and these Reps should help to explain why this site needs to be re-included.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Two sites are proposed to be allocated for housing – Land at Burlands Mead (Feni_05) for around 42 dwellings, and Land adjacent to Beechwood (Feni_08) for around 60 dwellings. These two allocations together total 102 dwellings against a minimum (80%) requirement for 127 dwellings. Planning permission was resolved to be granted on 25th February, 2025 for the Burlands Mead site (application ref. 23/0296/MFUL) for 35 dwellings, so under-delivering by 7 dwellings against the above draft allocation. Assuming that Feni_08 delivers 60 dwellings (which is to be confirmed), these two draft allocations will deliver 95 dwellings, being a shortfall of 32 dwellings against the minimum requirement in Policy SD18 and a shortfall of 64 dwellings against the minimum Standard Method requirement of 159 dwellings. The southern part of promoted Site Feni_11, east of Colestocks Road, Sherwood Cross, Feniton being promoted by Taylor Wimpey should be allocated for up to 86 dwellings to ensure that the minimum local housing requirement for this Service Village is exceeded in a planned way, thereby delivering the sustainable development of the settlement in the plan period. This is a sustainable site which can deliver a number of additional benefits including affordable housing and flood alleviation.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Introduction and Site Summary

1.1 This response has been prepared by Turley on behalf of Bloor Homes Exeter [‘Bloor Homes’], to provide representations to East Devon District Council [‘the Council’], in relation to the East Devon Local Plan [‘EDLP’] Regulation 19 consultation March 2025.

1.2 Bloor Homes have an interest in land off Ottery Road, Feniton. A site-specific location plan is provided at Appendix 1 of this representation, which confirms the extent of Bloor Home’s land interest. A summary of the site is provided below.

1.3 The site within the control of Bloor Homes to promote and develop. Bloor Homes are an experienced national house builder with a proven track record of high-quality design, with the delivery of homes across a range of site scales.

1.4 We previously responded on behalf of Bloor Homes the Call for Sites consultation undertaken between April and May 2022 and the Regulation 18 Consultation in January 2023.

1.5 On behalf of Bloor Homes, Turley submitted an outline planning application for 85 homes, a community eco-hut and associated infrastructure to the Council in March 2025 (ref. 25/0509/MOUT). The application is live and currently under consideration. The proposed masterplan is provided at Appendix 2 of these representations. Land off Ottery Road, Feniton

1.6 The site is located to the west of Ottery Road and extends to approximately 5.43 hectares. It lies to the south west of Feniton. The extent of the site is shown below.

Figure 1.1: Land off Ottery Road Site Location 4 Site Promotion History

1.7 The site has been assessed during the preparation of the Local Plan with reference numbers FENI_04 and FENI_14. Our previous representations to the Regulation 18

consultation provided responses to the key conclusions from the Council's Sustainability Appraisal [SA] and HELAA Site Assessment. In summary:

- The Council's previous HELAA Site Assessment (that was published with the Regulation 18 consultation) concluded the site is available and suitable, but the panel concluded that the site is probably unachievable for housing due to minerals constraints, subject to MRA. A Mineral Resource Assessment (submitted in support of the representations) demonstrated that the site could come forward and the mineral safeguarding objections can be addressed.
- The SA concluded that Feni_04, is of some landscape prominence. However, the HELAA Site Assessment report concludes that residential development at the Site would not have an unacceptable impact with regards to landscape. Initial technical feasibility work was submitted with the representations to demonstrate that the site has the potential to have a sensitive design with regards to heritage and landscape.

Accessibility and Site Constraints

1.8 The site is in a sustainable location. To the north and east of the site lies residential development and the site will form a natural extension to the existing town.

1.9 The site is very well located with respect to Feniton railway station, which lies immediately to the North and at a distance of only circa 100m at its nearest point. The existing Feniton railway station provides frequent connections to London Waterloo and Exeter St Davids. This provides excellent opportunities for making journeys by public transport to other higher order settlements for work, education nor other purposes.

1.10 The village of Feniton is also served by existing bus services which provide public transport connections to other nearby towns and villages, including Whimple, Sidmouth and Honiton, giving access to various other services and facilities. The nearest bus stop is just 100m north of the Site, located to the south of the railway station.

1.11 Existing facilities and services within Feniton are located to the East of the site, and accessible on foot via a railway bridge at Station Road.

1.12 The Council's HELAA Site Assessment (that supported the Regulation 18 consultation) confirmed the site is within 1,600 metres of 4 or more different local facilities and within 1,600 metres of a train station or bus route with an hourly or better service.

1.13 With regards to flood risk, the site is located in flood zone 1. It is therefore at the lowest risk of flooding – in this respect, it meets the Council's spatial strategy of avoiding development in areas of flood risk. As such, the Proposal Site can provide a significant contribution to housing delivery while avoiding risks associate with flooding.

1.14 The site is not located with an AONB (where the East Devon AONB otherwise covers large parts of the District), or any other designated landscape. 5 Deliverability

1.15 The draft Local Plan needs to allocate enough housing sites that can be brought forward at a sufficient rate.

1.16 The site is available now and within the control of Bloor Homes to promote and develop. As set out above, Bloor Homes are an experienced developer with a proven track record of high-quality design, and delivery of a range of site scales. As such, importantly there are no land ownership impediments to developing the site and this is a site that is capable of being brought forward for development quickly.

1.17 Detailed technical work that accompanies the live outline planning application (particularly in regards to minerals, highways/access, drainage, and landscape/heritage) demonstrates the mineral safeguarding objections can be addressed, a sensitive design with regards to landscape and heritage and a safe access can be achieved. Unique Benefits

1.18 The allocation of the site will also provide unique benefits:

- Delivery of new market and affordable housing - This development provides the opportunity to meet identified local housing needs, with proposals including up to 85 homes with affordable housing in line with policy, and properly taking account of site constraints.
- Delivering local flood mitigation - The scheme will safeguarded land for part of the Council's Flood Alleviation Scheme, diverting flood water from Feniton to the stream to the south of the village.
- High quality landscaping and POS creation: the landscape-led layout will be designed to include new areas of publicly accessible open spaces.
- Designed to achieve a biodiversity net gain - The scheme has the potential to provide rich planting to enhance ecology, create new habitats and deliver a biodiversity net-gain for the site.
- Community Eco-Hut – the proposal has responded to previous public consultation and includes a community eco-hut. Site Summary

1.19 Bloor Homes have an interest in land off Ottery Road, Feniton. A live outline planning application for 85 homes at the site is currently being considered by the Council. We consider the site should be identified for housing development when:

- The site is available and capable of early delivery and is of a scale that can come forward quickly, being promoted by Bloor Homes, a house builder with an enviable track record of delivery;
- Detailed technical work that accompanies the outline application shows that the site can come forward where key considerations (such as mineral safeguarding, heritage and landscape) can be addressed; 6

- Land off Ottery Road provides site-specific location benefits which can aid and promote sustainability, including the delivery of new market and affordable housing, delivering local flood mitigation and publicly accessible open spaces. Strategic Policy SD18: Development allocations at Feniton

2.13 There is clear potential for more development to be accommodated at Feniton to meet local needs and support village vitality, where the plan for East Devon could and should be doing more to deliver elevated levels of new housing, including much needed affordable housing.

2.14 The delivery of just 109 homes over the 15 years of the plan period at Feniton (as housing trajectory at Appendix 2 of HOU-001) will unlikely be sufficient to meet local needs across the same period and is not a proportionate response to the role and function of Feniton as a local centre within East Devon.

2.15 The Council has within the plan acknowledged that further land (located within designated landscapes, including the National Landscape) will need to be released for residential development. Feniton is not located with an Area of Outstanding Natural Beauty (where the East Devon AONB otherwise covers large parts of the District), or any other designated landscape. It therefore represents an opportunity for the Council to deliver sustainable development on unconstrained land.

2.16 The evidence that supports the plan has shown that development on greenfield sites at and around the town of Feniton is necessary and justified in order to meet needs arising in the District during the plan period.

2.17 At Feniton the draft plan has chosen to allocate two sites for new housing at the town (representing a total of 102 homes, at a capacity of 42 and 60 homes respectively). A range of other sites have been discounted as being unsuitable, or less preferable, than those that have been selected.

2.18 The excluded sites include land being promoted by Bloor Homes to the west of the settlement (off Ottery Road), comprising FENI_04 and FENI_14. The Sustainability Appraisal [CSD-003] that forms part of the evidence base states the site is rejected due to adverse effect on the listed building to the south and adverse landscape impact; there are other, more preferable, sites at Feniton and this site in addition would not be consistent with the spatial strategy; and loss of best and most versatile agricultural land (Grade 2).

2.19 As set above, a live outline planning application for 85 homes at the site is currently being considered by the Council. Considering the concerns raised in the Council's Sustainability Appraisal above, it worth noting that the detailed technical work accompanies the planning application demonstrates:

- **Heritage:** An Archaeological and Heritage Assessment prepared by EDP accompanies the application. It assesses the impact on the Listed Building. The only designated asset that would receive any adverse effects by the proposed development of the site is the Grade II listed building Sweethams. The site forms an element of the agricultural setting of the 17th Century cottage and, as such, makes some limited contribution to its significance by allowing it to be best appreciated within its original rural context. However, it is considered that only the southern portion of the site is considered to be sensitive in this regard. 11 The Illustrative Layout accompanying the application illustrates how mitigation has been incorporated into the design to successfully reduce the potential adverse impact of the Proposed Development on the setting of Sweethams through the retention of the southern portion of site as open space, as well as implementation of tree planting and garden landscaping at the southern edge of the built development. This landscaping not only filters any views of the development from the asset, but also maintains a rural landscape immediately north of the asset. As such, when mitigated, there is predicted to be no harm to the significance of Sweethams.

- **Landscape:** A Landscape and Visual Appraisal [LVA] prepared by EDP accompanies the application. The report concludes that, whilst the proposals would result in adverse effects on the site-wide landscape character and close-range views from the site's surroundings, this is inevitable when developing a green field site, but it would read as part of Feniton and would not be incongruous with the existing local context of residential built form. The proposed development is considered to accord with local planning policy and would sensitively and appropriately integrate existing landscape features into the proposed layout. The proposed landscape strategy would enhance existing vegetation and would provide a new, well-vegetated settlement edge that softens the transition towards the countryside in the west and filters views of the settlement. Indeed, given the allocation of many sites in sensitive landscape areas, including AONBs in the plan, the development of this site is sequentially preferable from a landscape sensitivity and impact perspective.

- **Agricultural Land:** A desktop review of the site shows it as Grade 2 Agricultural Land. It is noted that proposed allocation FENI_08 (Land adjacent to Beechwood) is Grade 1 Agricultural Land. The proposed allocation of FENI_05 (Land at Burlands Mead) is also Grade 2 Agricultural Land. Given the proposed allocations have either the same or improved agricultural land classifications than the proposal site, it is unclear why this has been raised as a reason to reject the site from allocation.

2.20 In summary, it is not clear why Land off Ottery Road (FENI_14) has not been considered suitable for residential development when:

- Feniton is clearly a sustainable location for growth, with the rail station a significant asset in respect of sustainable travel. The village of Fenton should be classified as a Local Centre, as opposed to a Service Village.

- Detailed technical work that accompanies the outline application shows that the site can come forward where key considerations (such as heritage and landscape) can be addressed.
- The site is available and capable of early delivery and is of a scale that can come forward quickly, being promoted by Bloor Homes, a house builder with an enviable track record of delivery; 12
- Land off Ottery Road provides site-specific location benefits which can aid and promote sustainability, including the delivery of new market and affordable housing, delivering local flood mitigation and publicly accessible open spaces.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Feniton can just about cope as it is, but to have more houses, more people, more things on the road, would mean much more damage to roads etc. School can't cope nor the doctors. You'd be putting our lives in peril in more ways than one. Wake up people. Surely you aren't that blind or evil. No more pushing at the moment we a healthy village. Any more cars, lorries, busses would harm our fresh air. We want to live, not be killed off by bullies like you lot. Stop now.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: No more building or transport coming to our village. We're big enough and over spilling as it is.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Helen Beaven

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: As I am not a planning lawyer, I cannot comment on legal specifics. However, there appear to have been irregularities in the development of the local plan so far as Feniton is concerned.

I am aware that in previous consultations, there were many representations submitted, including a petition signed by large numbers of residents, which were not taken into consideration because they were not submitted via Common Place. As a result, the views of Feniton residents were ignored as they were not passed on to the Strategic Planning Committee.

As comments were invited, it seems very undemocratic that they should then be disregarded. The use of the Common Place system is not helpful as it is difficult to use, as well as being time-consuming, which is a further deterrent to public engagement in a system which is inviting them.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: N/A

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Because a large number of houses has been allocated to Feniton – way more than the 13 houses which were identified as being needed in the village. When this discrepancy was identified, the Chairman of the Strategic Planning Committee instructed that the policies be re-written to justify such a large increase in development in Feniton. The policies do not now match what is needed or what is appropriate. The proposed development is huge for a village of this size.

The Otry_20 site has come to the table relatively late in the process and there is therefore a concern that EDDC has not had time to consider the impacts of this development as thoroughly as necessary. This site would have a huge impact on the Feniton village, but proper consultation with the Feniton Parish Council has not been possible because the site technically lies within Ottery Parish – for whom it would really have no impact at all. The size of the Otry_20 site is absolutely disproportionate for a village the size of Feniton, but the biggest issue is the roads which the inevitable heavy traffic would have to use. There are two single track railway bridges, one with a blind bend, to navigate, also a section of sunken road which is prone to landslips and all of the access roads have largely single track and already dangerous for pedestrians with passing cars, never mind heavy lorries. Therefore the road access is wholly unsuitable for such a site.

Also, because there were some very significant reasons why the super enquiry in 2014 rejected the various planning proposals on the table then and these reasons have not gone away – if anything there are more:

- There is a station in Feniton, but the vast majority of people still need to use cars to access work and other facilities and the road infrastructure will not accommodate significant amounts of extra traffic. With the main road in and out of the village closed for 3 weeks recently, the queues of traffic attempting to make their way in and out via the old village led to frequent traffic jams. Increased volumes of traffic will only make this more common.

- There is no room in the school.
- The local doctors (and dentists for that matter) have no further capacity.
- Feniton floods on a regular basis. Although the flood alleviation scheme is coming towards fruition, this will not stop the flooding – it will just direct the volume of water away from housing. The area where it will gather is the main road in and out of the village, which often becomes impassable and this will only become a more frequent occurrence (leading to travel issues again). A lot of the water flooding Feniton is run-off from local fields. If the fields are covered over with housing, the run-off will be even more. Other developers have sought to suggest that they will tackle this issue as part of their development, but have not then done so. Unfortunately, there appears to be no enforcement to ensure that developers actually deliver the conditions of their planning approval. Even where some measures have been installed, they have been incorrectly/poorly installed and do nothing to help the situation.
- The sewage network does not operate correctly and cannot cope with the outflow storm water. SWW often visit the village with tankers. They frequently discharge raw sewage into a gulley behind some of the houses leading out of the village (this is obvious because of the items seen floating down there). It is well documented that raw sewage flows into roads and homes. Residents in some of the developments, at times of high levels, have to stop flushing their toilets and ask their neighbours not to do so either for fear that it will back up and overflow out of their toilets. SWW responses have been woefully inadequate. Therefore, additional housing needing to discharge their waste into this network is completely untenable.
- This Local Plan has disregarded the evidence and planning history which clearly shows that development in Feniton is not sustainable. The plan does not allow for any further development of the current infrastructure, so the problems outlined above will only be exacerbated.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To ensure that the

Local Plan is sustainable and better reflects the Tier 4 status of Feniton and until the issues outlined in 4 (b) have been addressed:

- Removal of Feni_08 from the Local Plan, or to at least reduce the number of houses included.
- Removal of Otry_20 from the Local Plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: (This would be more appropriate for the Feniton Parish Council.)

Full name: Fiona Broadbent

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Flooding:

- It's well documented that Feniton regularly floods.
- It would appear that East Devon District Council (EDDC) has not considered the historic evidence of flooding, including raw sewage.
- More development equals more flooding.
- With previous developers, promises of flood risk alleviation measures have not transpired.

- The Flood Alleviation Scheme (FAS) has only been designed for the current number of homes in Feniton. It will only divert flood water around the eastern side of the village, leading to increased flooding at Pattersons Cross, the main access route to the village, from the A30.
- In times of heavy rain, Pattersons Cross already becomes impassable, (without the additional flood water from the FAS).
- Despite millions of public money being spent on it, currently there is no evidence of the FAS's efficiency.

References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy
AR01 – C

Sewage:

- It's a well known fact that there is an unresolved capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding.
- It's well documented that roads and homes often flood with raw sewage.

References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy
AR01 – C

Lack of Sustainability:

- At the 2014 Super Enquiry, the Planning Inspector determined, with EDDC agreeing, that Feniton was not a sustainable location for further development.
- Nothing, apart from the untested Flood Alleviation Scheme (FAS), has changed within the village to address the issues raised in said Super Inquiry.
- Lack of adequate public transport.
- All of the roads into Feniton are narrow with pinch points, unlit and unsuitable for heavy traffic.
- Feniton has recently had an insight to the ramifications of increased traffic when the Ottery Road/Green Lane junction was closed for the FAS works. At times delays getting in and out of the village were extensive.
- When Pattersons Cross floods, (as is expected during heavy rain as a result of the FAS), all vehicles will have to access the village and surrounding areas via Feniton Old Village, or via the network of lanes and villages leading from A373 and M5. These lanes are highly unsuitable and unsafe for heavy traffic.
- Feniton Primary School is at capacity and in great need of a building upgrade.
- Local GP services are at capacity.

- There has been a disregard of evidence and planning history indicating that this scale of development in Feniton is unsustainable. The proposals for Feniton are not consistent with the local plan's stated vision and strategy and by extension with national policy.

- The only infrastructure noted in the draft local plan is for 1060m new water mains to be laid by 2035.

References: Infrastructure Delivery Plan – Utl-1 Sustainability Appraisal Objectives 4, 5, 9, 10 and 13. Chapter 3 – 3.38, 3.39, 3.40, 3.44, 3.45

Disproportionate allocation of houses compared to local need:

- Funded by EDDC, Devon Communities Together (DCT) identified a local need for only 13 dwellings up to the year 2027.

- The number of houses planned for Feniton in the draft plan is disproportionate and doesn't align to the DCT survey, funded by EDDC.

- When the Strategic Planning Committee realized the number of houses allocated for Feniton were far greater than local need, the Chairman instructed the Officer to rewrite the Strategic Policy SP01 in the Regulation 19 version, in order to justify the increased development proposed for Feniton. There is now a mismatch between vision and strategy.

- Proposed development in Feniton is not ‘limited’ but huge for a tier 4 village.

References: Chapter 3 – 3.4 Hierarchy of Settlements Chapter 5 – Strategic Policy SD18 – Development actions at Feniton. Strategic Policy SP01 – C, D, E.

- Feni_08 is also accessed via Broad Lane which has very similar issues to Green Lane.
- Access to Feni_08 would I understand be via Silverton Rise / Vineton Place, this is currently a “shared space”, the road surface is “sets” and there are no pavements, vehicular access would need to negotiate the parked cars on Silverton Rise to exit on to Broad Road. This would incur restricted vision as there are vehicles parked near the entrance to Broad Road.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: If the whole draft local plan is rejected, the whole of East Devon, including Feniton could be imposed with far greater development than has been suggested. Therefore suggestions for this section are:

To ensure a sustainable plan, better reflect the Tier 4 status of Feniton and realign the Strategy and Vision, until adequate infrastructure and mitigation has been put into place:

- Removal of Feni_08 from the draft local plan, or at least a reduction in the number of houses allocated for Feni_08.
- Removal of Otry_20 from the draft local plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: It is unclear as to whether the draft local plan has been developed in a legally compliant way regarding Feniton. Without personal legal knowledge and as a member of the public, I do not feel qualified to make comment on this section.

- However, there was a petition signed by 500+ residents which was not taken into consideration as it was not submitted via Common Place. These important views were not reported by EDDC to the Strategic Planning Committee, effectively ignoring the views of Fenitonians. Not everyone is able to or understands the internet and the Commonplace systems is complex to use. This is discriminatory.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Flooding:

- It's well documented that Feniton regularly floods. It would appear that East Devon District Council (EDDC) has not considered the historic evidence of flooding, including raw sewage.

- The Flood Alleviation Scheme (FAS) has only been designed for the current number of homes in Feniton and there is no evidence that it will work effectively. It will only divert flood water around the eastern side of the village, leading to increased flooding at Pattersons Cross, the main access route to the village, from the A30. With an increase in building this will only get worse. Developers promise their own flood alleviation schemes, but this village knows only too well how empty these are. The development at Acland Park to name one example.

References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy
AR01 – C

Sewage:

- It is well known that there is not enough capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding.
- It's well documented that roads and homes often flood with raw sewage.
- It is unacceptable that people have raw sewage coming up into their bathrooms and onto their gardens.

References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy
AR01 – C

Lack of Sustainability:

- At the 2014 Super Enquiry, the Planning Inspector determined, with EDDC agreeing, that Feniton was not a sustainable location for further development. Nothing, apart from the untested Flood Alleviation Scheme (FAS), has changed within the village to address the issues raised in said Super Inquiry.
- In fact, a lot of areas mentioned have got worse. The fact that Feniton has a train station seems to be sighted a lot. However, the service has got worse since the Super Enquiry with the service being reduced to 2 hourly. This is not a service you can rely on to commute. Everyone will use their cars!
- All of the roads into Feniton are narrow with pinch points unsuitable for heavy traffic. This was highlighted during recent road closures during the FAS works, it was virtually impossible to get out of the village at times if a bus and tractor happened to meet.
- When Pattersons Cross floods, (as is expected during heavy rain as a result of the FAS), all vehicles will have to access the village and surrounding areas via Feniton Old Village, or via the network of lanes and villages leading from A373 and M5. These lanes are highly unsuitable and unsafe for heavy traffic.
- Feniton Primary School is at capacity as it Kings School in Ottery
- Local GP services are at capacity.

- There has been a disregard of evidence and planning history indicating that this scale of development in Feniton is unsustainable. The proposals for Feniton are not consistent with the local plan's stated vision and strategy and by extension with national policy.
- The only infrastructure noted in the draft local plan is for 1060m new water mains to be laid by 2035.

References: Infrastructure Delivery Plan – Utl-1 Sustainability Appraisal Objectives 4, 5, 9, 10 and 13. Chapter 3 – 3.38, 3.39, 3.40, 3.44, 3.45

Disproportionate allocation of houses compared to local need:

- Funded by EDDC, Devon Communities Together (DCT) identified a local need for only 13 dwellings up to the year 2027.
- The number of houses planned for Feniton in the draft plan is disproportionate and doesn't align to the DCT survey, funded by EDDC.

- When the Strategic Planning Committee realized the number of houses allocated for Feniton were far greater than local need, the Chairman instructed the Officer to rewrite the Strategic Policy SP01 in the Regulation 19 version, in order to justify the increased development proposed for Feniton. There is now a mismatch between vision and strategy.
- Proposed development in Feniton is not 'limited' but huge for a tier 4 village. 102 dwellings is a far greater number than the 13 mentioned above. Feniton will no longer be a village but a town with no facilities or infrastructure leading to a very poor quality of life for all of its residents

References: Chapter 3 – 3.4 Hierarchy of Settlements Chapter 5 – Strategic Policy SD18 – Development actions at Feniton. Strategic Policy SP01 – C, D, E.

Employment site Otry_20:

- Site Otry_20 is an unsafe location. The entrance to the site is off Green Lane, a mostly single-track road, some parts not wide enough for a car to pass a pedestrian without said pedestrian leaning back into the hedge. It is unlit, has pinch points, blind bends, distinct lack of pavements and two areas of single-track road passing over the rail line bridges, one with a blind bend. There is a part that is an ancient sunken portion subject to rock falls, blocking the lane. There is a video that can be viewed on Youtube -

<https://www.youtube.com/watch?v=6q7DQ6mpgh4> detailing some of the issues with Green Lane. The blind bends on either end of this lane are especially dangerous.

- Feni_08 is also accessed via Broad Lane which has very similar issues to Green Lane.

- Site Otry_20 was brought forward for consideration after the Regulation 18 draft consultation. It could be viewed that EDDC has not had sufficient time to consider all the evidence effectively.

- The size of Otry_20 does not align with EDDC's Spatial Strategy and is totally disproportionate to the scale of Tier 4 Feniton.

- It has a disproportionate allocation for industrial, warehousing and distribution than employment sites allocated for the Principal Centre Tier 1 Exmouth, in Tier 2 Axminster and Tier 3 Ottery and Seaton.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of over 100 houses and 4.6 acres of land for industry, distribution and research is not based on any evidence of the need for these in this location. The Vision of the plan states in paragraph 2.6 that “ Rural East Devon will retain its outstanding charm and character with modest and sensitively planned development to meet the needs of local communities”. Spatial Strategy in SP01 says that “new development will be directed toward the most sustainable locations....allowing limited development at the service villages” (which includes Feniton).

Policy SP01 was deliberately changed (retrospectively) between the Regulation 18 consultation draft and the Regulation 19 plan following a further meeting (and subsequent debate) of the Council’s Strategic Planning Committee in November 2024 when it was realised that, in allocating 102 houses at Feniton, the plan was not following its own stated spatial strategy of “modest development to meet local needs”. The original Regulation 18 draft policy for the Service Villages mirrored the plan Vision and was only changed retrospectively when it was pointed out to the Committee that it had no evidence of the local needs in Feniton, and it was debated whether the plan might be found to be unsound by the Inspector because of this inconsistency. So instead of either finding the “evidence” of local need, or alternatively reducing the proposed housing allocation the Committee simply amended the wording of its previously agreed spatial strategy. This represents a blatant contrivance and deliberate action to make the previously agreed strategy now “fit” the subsequent allocation and seems like malpractice. This is all recorded and available on YouTube. The Parish Council does in fact have a local housing needs survey, funded by the District Council which was carried out independently by Devon Communities Together in 2022, which found a need for 13 dwellings over the following 5 years. Projecting that forward

indicates a local need of some 44 houses over the rest of the plan period - not 102. The Plan has clearly not been “evidence led” and therefore has to be unsound.

The employment land allocation of 4.64 hectares was not assessed at the time of the Regulation 18 consultation draft of the plan - that version at the time stated that "employment land.. will be identified...in the Tier 3 and 4 settlements on mixed use sites, to provide small scale jobs and workspaces for new and existing residents....and to reduce the need to commute to work". This 4.64 site (Otry20) was submitted by the landowner fairly late in the plan process. It is hugely out of scale with the village and its needs, and its existing infrastructure. It allocates more land in Tier Feniton for B2 industrial, B8 distribution and E(g)(ii) research and (iii) other industrial uses than that allocated to Tier 1 Exmouth, Tier 2 Axminster and Tiers 3 Seaton and Ottery St Mary, whose allocations are tiny by comparison. In addition there was inadequate consultation on this allocation at the Regulation 18 stage. Feniton Parish Council was prevented by the Committee from commenting on this site because a quirk of history puts this land within Ottery St Mary's boundary rather than Feniton's. The allocation of this site is at out of step with the plan's strategy in terms of size, location, and relativity. Irrespective of this mismatch with stated policy, access to this site is via a narrow country lane which contains two narrow humpbacked bridges (where vehicles cannot pass each other), has no footways and is in open countryside.

There is a well known and documented history of flooding in Feniton. A new flood alleviation scheme is shortly to be finished but has been constructed to deal with only the number of CURRENT houses in the village, and is as yet untested. The allocation of over 100 further houses has the potential to overwhelm this project before it has even been tested. It is well known that sewage is currently discharged into the stream near this location and at times of heavy rain, foul sewer water runs openly across people's private land. Plenty of evidence exists to show the extent of, and damage caused, by flooding.

Additionally, the village school is (and has been for some time) at full capacity. There is no room for expansion. Extra car journeys are already necessary for parents to take children to school in other towns or villages.

Public transport is poor - although there is a railway station, this has been promoted erroneously as “sustainable”, but in practice an average of only 6 people per train embark or disembark as train services are infrequent because the line is only single

track. Prices are high and trains really only allow people who work in the very centre of Exeter to get the train directly to their work, consequently most households commute to work by car.

The settlement boundary of Feniton in the cases of Feni_08 and Otry_20 has been changed without any debate in the village and is therefore undemocratic.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Site Feni_08 should be removed for now to enable a review of the flood alleviation scheme to take place, and for a proper assessment of local need to take place. Any amended allocation should only be added back in if an evidence based local need assessment supports its inclusion.

Site Otry_20 should be removed “as is” in terms of size and scale. to enable proper debate within the village so that local people and the parish council can make proper representations about the site, (in terms of size , scale and location)and not continue to be excluded from this.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Miles Butler

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of 102 houses and 4.6 acres of land for industry, distribution and research is not based on any evidence of the need for these in this location.

The Vision of the plan states in paragraph 2.6 that “Rural East Devon will retain its outstanding charm and character with modest and sensitively planned development to meet the needs of local communities”.

The Spatial Strategy in SP01 goes on to say that “new development will be directed toward the most sustainable locations...allowing limited development at the service villages” (which include Feniton).

Policy SP01 was deliberately changed between the Regulation 18 consultation draft and the Regulation 19 plan following a debate in the Strategic Planning Committee when it was realised that in allocating 102 houses at Feniton the plan was not following its stated spatial strategy of modest development to meet local needs. The original Regulation 18 draft policy for the Service Villages echoed the plan Vision and was only changed when the Committee realised it had no evidence of the local needs in Feniton and debated whether the plan would be found to be unsound by the Inspector. Instead of finding the evidence or reducing the proposed allocation it simply amended the wording of its spatial strategy. This was a blatant contrivance (the evidence is all on the YouTube recording of the Committee).

The Parish Council does have a local housing needs survey, funded by the District Council and independently undertaken by Devon Communities Together. In 2002 it found a need in the village for 13 dwellings over the following 5 years. Projecting that forward, it would indicate a local need for 44 houses over the remainder of the plan period, not 102. The plan has not been evidence led in this instance and is therefore unsound.

The 4.64 hectare employment allocation in Feniton was not assessed at the time of the Regulation 18 consultation draft of the plan. That version of the plan stated that “...employment land ...will be identified...in the Tier 3 and Tier 4 settlements on mixed use sites, to provide small scale jobs and workspaces for new and existing residents, to improve settlement self-containment, and to reduce the need to commute to work”.

The 4.64 hectare Otry-20 site was brought forward by the landowner late in the plan process. There was inadequate local consultation on the site at the Regulation 18 stage. It is completely out of scale with the village and its needs. It represents more land to be allocated in Tier 4 Feniton for B2 industrial, B8 distribution and E(g) (ii) research and (iii) other industrial uses than is allocated in the plan for the Principal Centre Tier 1 Exmouth, Tier 2 Axminster and Tier 3 Ottery and Seaton. The employment allocations in all other Tier 4 settlements are tiny by comparison.

The allocation is completely out of step with the plan’s strategy and makes no sense. Regardless of this policy failure, the site itself is a baffling choice for industrial/distribution uses being accessed off a very narrow country lane with no footways, between two humped railway bridges and in open countryside.

Given the well known flooding history of the village, the as yet incomplete and untested flood alleviation scheme, known surcharging of the foul sewer system, a village school at capacity and incapable of expansion, poor public transport and already very high levels of car use, development of the scale envisaged in Feniton is unsustainable and premature.

The Settlement Boundary of Feniton in the case of both Feni_08 and Otry_20 has been altered to include these sites without any debate with the village about the sense of these extensions. This seems arbitrary and undemocratic.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Striking out housing site Feni-08 Beechwood (a much smaller land area phased at the end of the plan period and following a long term review of the efficacy of the current flood alleviation scheme might be feasible if local demand could be demonstrated).

Striking out of employment site Otry-20 (a much smaller employment site, proportionate to the scale of the village might be feasible in a location with much better access. In reality that probably means toward the A30. Again the flood alleviation scheme needs to be tested as it is quite probable that it will result in downstream flooding of Ottery Road toward the A30, making Feniton an unsustainable location for such uses.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Because the District Council has so far been impervious to the genuine, real world problems experienced in Feniton and has not corrected its mis-application of its own spatial strategy as far as Feniton is concerned. I feel that a direct approach to the Inspector is the only way to have these issues raised unless the version of the plan submitted for examination is amended.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Feni_05 (Land at Burlands Mead) and Feni_08 (Land adjacent to Beechwood) - Whilst I welcome this level of increased housing provision over the 17-year timescale of the plan (and no more than this): The existing sewerage is already critically inadequate. (This is widely documented by residents, including in written responses to EDDC in many recent development proposals, and by the Parish Council.) The inadequate sewerage should be a show-stopper to further housing until rectified, due to its severe impact on quality of life and potentially health.

Otry_20 (Land to the south east of Bridge Cottages) - Whilst I welcome the local employment this site would bring to Feniton over the 17-year timescale of the plan:

- The site is totally outsized for a village location.
- The site entrance location is poor, being on a narrow lane without footpath.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Feni_05/Feni_08
Sewerage: Revise the 'East Devon Local Plan 2020-2042: Infrastructure Delivery Plan', to

include an additional Utilities Project to upgrade sewerage in Feniton. (cf the existing UTI-1 for new water mains). This to be Priority 1 infrastructure (ref Infrastructure Development Plan para 2.1), namely ‘fundamental to the delivery of the vision, objectives and policies of the Local Plan’, and should thus precede implementation of Feni_05/Feni_08.

Otry_20 (Land to the south east of Bridge Cottages) Size: Reduce the permitted area of development from 4.64 hectares to 1 hectare. Traffic management: No goods vehicles associated with the site to be permitted through Feniton old village. Achievable via weight (and perhaps width) restrictions on both Green Lane east of the site and Broad Lane. Pedestrians/cycles: A new and good quality pedestrian/cycle path from Green Lane to Ottery Road is essential for safe access. Via Greenacres Close or the adjacent strip of land, and Burlands Mead. Implementation of both measures essential before development.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wish to make comments regarding the development sites proposed for Feniton in the local Plan

I do not believe that any further land should be allocated for housing in Feniton due to the lack of infrastructure i.e. adequate access roads, school places in the primary school and at the King's School and medical services. All these services are already overwhelmed and further development is being proposed in Ottery and West Hill. The flood prevention scheme currently under construction has not yet been proven and was in any event only designed for the housing already built.

It would appear that there is a possibility of a development at Colestocks Road being foisted on the village if EDDC loses the pending court case. If this goes ahead there should be no question of any further housing being built in Feniton at all. Reports of sewage problems at the Burlands should raise an enormous red flag in relation to any development on that side of the village.

I wholly disapprove of the commercial site being proposed on the grounds of traffic that would be generated on totally unsuitable roads especially as one of the access roads is designed to flood in future.

As regards the country's need for housing I deeply believe that there is no real need for any further housing to buy as anyone in a financial position to buy can always find a house. The need is for genuinely affordable rented housing which none of the developers interested in Feniton are prepared to provide. Lack of jobs and public transport make Feniton unsuitable for this type of housing which is better placed in towns where people can walk to services and employment.

Full name: Terry Collins

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: In relation to Feniton, it's unclear as to whether the draft plan has been developed in a legally compliant way. Without personal legal knowledge and as a member of the public, I do not feel qualified to make comment on this section.

- However, in previous consultations, emails, comments and a petition signed by 500+ residents was not taken into consideration as it was not submitted via Common Place.
- These vital public comments were not reported by EDDC to the Strategic Planning Committee, effectively ignoring the views of Fenitonians.
- EDDC's preferred method of commenting is the Common Place System. It is complex and extremely time consuming, effectively deterring Jo Public from 'Having Your Say' and making their opinions known. This is discriminatory and undemocratic, and contravenes British Values.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

- It's well documented that Feniton regularly floods.
- It would appear that East Devon District Council (EDDC) has not considered the historic evidence of flooding, including raw sewage.
- More development equals more flooding.
- With previous developers, promises of flood risk alleviation measures have not transpired.
- The Flood Alleviation Scheme (FAS) has only been designed for the current number of homes in Feniton. It will only divert flood water around the eastern side of the village, leading to increased flooding at Pattersons Cross, the main access route to the village, from the A30.
- In times of heavy rain, Pattersons Cross already becomes impassable, (without the additional flood water from the FAS).
- Despite millions of public money being spent on it, currently there is no evidence of the FAS's efficiency.

Sewage:

- It's a well known fact that there is an unresolved capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding.
- It's well documented that roads and homes often flood with raw sewage.

Lack of Sustainability:

- At the 2014 Super Enquiry, the Planning Inspector determined, with EDDC agreeing, that Feniton was not a sustainable location for further development.
- Nothing, apart from the untested Flood Alleviation Scheme (FAS), has changed within the village to address the issues raised in said Super Inquiry.
- Lack of adequate public transport. Few buses and unreliable and expensive rail service
- All of the roads into Feniton are narrow with pinch points, unlit and unsuitable for heavy traffic.
- The small lanes around the village are inadequate to cope with the amount of extra traffic these developments will create.

Feniton has recently had an insight to the ramifications of increased traffic when the Ottery Road/Green Lane junction was closed for the FAS works. At times delays getting in and out of the village were extensive.

- When Pattersons Cross floods, (as is expected during heavy rain as a result of the FAS), all vehicles will have to access the village and surrounding areas via Feniton Old Village, or via the network of lanes and villages leading from A373 and M5. These lanes are highly unsuitable and unsafe for heavy traffic.
- Feniton Primary School is at capacity and in great need of a building upgrade. Where are the children to be educated, surrounding schools are also near capacity.
- The NHS hub in Ottery St Mary is struggling to meet the needs of the visiting population of its surrounding villages, including Feniton.
- There has been a disregard of evidence and planning history indicating that this scale of development in Feniton is unsustainable. The proposals for Feniton are not consistent with the local plan's stated vision and strategy and by extension with national policy.
- The only infrastructure noted in the draft local plan is for 1060m new water mains to be laid by 2035.

Disproportionate allocation of houses compared to local need:

- Funded by EDDC, Devon Communities Together (DCT) identified a local need for only 13 dwellings up to the year 2027.
- The number of houses planned for Feniton in the draft plan is disproportionate and doesn't align to the DCT survey, funded by EDDC.
- When the Strategic Planning Committee realized the number of houses allocated for Feniton were far greater than local need, the Chairman instructed the Officer to rewrite the Strategic Policy SP01 in the Regulation 19 version, in order to justify the increased development proposed for Feniton. There is now a mismatch between vision and strategy.
- Proposed development in Feniton is not 'limited' but huge for a tier 4 village.

Employment site Otry_20:

- Site Otry_20 is an unsafe location. The entrance to the site is off Green Lane, a mostly single track road, some parts not wide enough for a car to pass a pedestrian without said pedestrian leaning back into the hedge. It is unlit, has pinch points, blind bends, distinct lack of pavements and two single track, over the rail line bridges, one with a blind bend. There is a part that is an ancient sunken portion subject to rock falls, blocking the lane. The blind bends on either end of this lane are especially dangerous.

- The land is sustainable farmland which is much needed.
- Feni_08 is also accessed via Broad Lane which has very similar issues to Green Lane.
- Site Otry_20 was brought forward for consideration after the Regulation 18 draft consultation. It could be viewed that EDDC has not had sufficient time to consider all the evidence effectively.
- The size of Otry_20 does not align with EDDC's Spatial Strategy and is totally disproportionate to the scale of Tier 4 Feniton.
- It has a disproportionate allocation for industrial, warehousing and distribution than employment sites allocated for the Principle Centre Tier 1 Exmouth, in Tier 2 Axminster and Tier 3 Ottery and Seaton.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To ensure a sustainable plan, better reflect the Tier 4 status of Feniton and realign the Strategy and Vision, until adequate infrastructure and mitigation has been put into place:

- Removal of Feni_08 from the draft local plan, or at least a reduction in the number of houses allocated for Feni_08.

- Removal of Otry_20 from the draft local plan.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I'm not a lawyer so it's difficult to say, but it feels like local people's wishes are being completely ignored. Surely the point of a consultation is to actually listen and act on what you're told? A petition signed by 500 residents of Feniton and Payhembury wasn't even passed to East Devon District Council. The Common Place system makes it difficult for local citizens to have a say.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: There needs to be an easier way for people to respond to the consultation. So many people don't even know about the plans as they don't seem to have been well publicised. If you're not on social media, you wouldn't know there's anything even happening.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proportion of new land set aside for homes and business use in Feniton and Payhembury is ludicrous.

When it comes to Payhembury, the plans seem to have completely missed the fact that 10 new homes are already in the process of being built in this tiny village and several have been built over recent years. We've done our part! The village is already growing by around 10%. The school is oversubscribed. The secondary school is oversubscribed.

The roads are narrow. There isn't enough parking, so cars regularly block the roads. Fields flood. Roads flood to the point where they're often impassable. Many of the roads don't have footpaths next to them so it's already dangerous for people walking without adding extra traffic to the mix.

The plans for Feniton are horrific. Mass building that would completely destroy the surrounding landscape and the very feel of the village. This isn't a city suburb, it's a rural village. If people want to live in a town or suburb, they move to them.

There also just isn't the infrastructure. Feniton floods every single year. Raw sewage leaks into gardens and roads. The flood alleviation scheme underway is only designed to support the existing number of homes and won't solve the issue of the roads flooding. The school is oversubscribed. The secondary school is oversubscribed. (Lots of children are unable to get into King's anymore, despite being in the catchment.) The local GPs are oversubscribed. The roads are very narrow, unlit and there are few passing places. There would be absolute chaos with more people driving in and out every day.

The land set aside in both Payhembury and Feniton is prime agricultural land. The world is extremely unstable right now. There is every chance we are going to need the ability to grow more of our own food here in the UK. (We currently produce less than half of what our population needs to survive.) The focus should be on brownfield sites before building on our fields.

There also just isn't the local need or demand for these new homes, as shown by the Devon Communities Together survey. The Local Plan is presumably to alleviate pressure on other areas, but that shouldn't be to the detriment of people who already live here.

The plan seems determined to destroy everything that is special about living in a rural area. Meanwhile, former office buildings and shops around Exeter are lying empty or only partially used. These could be turned into homes.

Please, please, please, consider the actual evidence, the local viewpoints and the reality and reconsider the Local Plan. Visit Payhembury and Feniton when they're battling with flooding. Talk to people.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Realign the Local Plan with the vision and strategy and local demand, by significantly reducing the number of homes planned for rural areas such as Feniton and Payhembury. Focus on brownfield sites and bringing empty buildings back into use. Protect village life and agricultural fields.

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: N/A. I don't have any information on this.

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: N/A. I don't have any information on this.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Brian Evans

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: This form contravenes the EDDC policy of Equality Diversity and Inclusion, and the Equality Act 2010. It is not legal to discriminate against any particular population sector. This form discriminates against several, including those not computer literate or lacking suitable equipment. It is clear that this process of presenting comments, as applied to Feniton, has been created in a legalistic and highly bureaucratic way. This makes it difficult and daunting for many people to make their comments known. This is obviously discriminatory and undemocratic. In addition, a petition signed by more than five hundred residents (more than 25% of the population) has not been taken into consideration, as it was not submitted via the CommonPlace software, and the Strategic Planning Committee did not report the petition to EDDC, which consequently does not take these comments into account. It is therefore not democratic.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Correct the errors identified in 3(b) above

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: (1) Completing such a complicated and legalistic form is difficult, time consuming and daunting to many. This makes it discriminatory.

(2) Feniton is known to suffer frequent serious flooding, by both storm water and sewerage; the new Flood Alleviation Scheme is designed to reduce flooding under present conditions, and does not take further development into account, nor the more extreme events forecast due to climate change.

References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy
AR01 – C

Lack of Sustainability:

- EDDC agreed with the Planning Inspector at the 2014 Super Enquiry that Feniton was not a sustainable location for further development, and nothing apart from the untested Flood Alleviation Scheme has changed within the village to address the issues raised in that Super Inquiry.
- The only effective public transport is the railway, with trains running at two-hour intervals throughout much of the time.
- All of the roads into Feniton are narrow with pinch points, are unlit and unsuitable for heavy traffic.
- Feniton has recently had some experience of increased traffic when the Ottery Road/Green Lane junction was closed for the FAS works. At times delays getting in and out of the village were considerable, and walking in the area became significantly more dangerous.

- When Pattesons Cross floods, (as is expected during heavy rain as a result of the FAS), all vehicles will have to access the village and surrounding areas via Feniton Old Village, or via the network of lanes and villages leading from A373 and M5. These lanes are quite unsuitable and unsafe for heavy traffic. All these roads are also much used by pedestrians.
- Feniton Primary School is at capacity and in great need of a building upgrade.
- Local GP services are at capacity.
- By proposing the current development plan, EDDC is disregarding not only much evidence of unsustainability, it is disregarding its own policy as stated in the Local Plan. It is also therefore also inconsistent with the national Plan.
- The only infrastructure noted in the draft local plan is for 1060m new water mains to be laid by 2035.

References: Infrastructure Delivery Plan – Utl-1 Sustainability Appraisal Objectives 4, 5, 9, 10 and 13. Chapter 3 – 3.38, 3.39, 3.40, 3.44, 3.45

Disproportionate allocation of houses for a Tier 4 community:

- Devon Communities Together (DCT) - funded by EDDC - identified a local need for only 13 dwellings up to the year 2027. The number of houses planned for Feniton in the draft plan is disproportionate and does not align to the DCT survey.
- The Strategic Policy SP01 in the Regulation 19 version was belatedly rewritten in order to justify the increased development proposed for Feniton. There is now a mismatch between vision and strategy.
- Proposed development in Feniton is not 'limited' as stated, but massively out of proportion for the size of community, especially when compared with development plans for other communities in the area.

References: Chapter 3 – 3.4 Hierarchy of Settlements Chapter 5 – Strategic Policy SD18 – Development actions at Feniton. Strategic Policy SP01 – C, D, E.

Employment site Otry_20:

- Site Otry_20 is an unsafe location, mainly due to poor and dangerous access. The entrance to the site is off Green Lane - a mostly single-track road, widely used by pedestrians. It is unlit, with several blind rises and bends, no pavements (or space for them) and two single-track bridges. The blind junctions at either end of this lane are dangerous, even for small vehicles.
- Feni_08 is also accessed via Broad Lane, which has very similar issues to Green Lane.
- Site Otry_20 was presented after the Regulation 18 draft consultation, giving EDDC insufficient time to properly consider the evidence.

- The size of Otry_20 does not align with EDDC's Spatial Strategy and in area is completely disproportionate to the scale of Feniton, which is Tier 4. The allocation for industrial, warehousing and distribution is also quite disproportionate when compared with similar sites allocated for the Principle Centre Tier 1 Exmouth, Tier 2 Axminster, and Tiers 3 Ottery and Seaton.

References: Chapter 2 The Vision – 2.10, Objective 1, Objective 2, Objective 9, Objective 10 Chapter 3 The Spatial Strategy SP01- C, D, E Service Villages 5.11 – SD18 – Otry_20

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: If the new draft Local Plan is to be sustainable, as stated by EDDC, Feni_08 should be removed, or drastically reduced at a minimum, and Otry_20 should be altogether removed, as its negative impacts will far exceed any potential positive effect.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: James Forbes

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: No response has been given to the comments made by a large number of Feniton residents and Feniton Parish Council, during the Regulation 18 consultation stage, concerning the sites selected in Feniton for housing development. It, therefore, appears that these comments have not been conscientiously taken into account when including these sites in the Regulation 19 draft Local Plan.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The comments made by Feniton residents and Feniton Parish Council should be responded to in a manner that makes it clear that they have been conscientiously and fairly considered by the Strategic Planning Committee. Alternatively, the number of houses allocated to Feniton in draft Local Plan should be substantially reduced.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Feniton is not a sustainable location for the number of houses allocated to it in the draft Local Plan. The roads and pavements are inadequate, there continues to be problems with its drainage, public transport is infrequent, there are limited local employment opportunities, the local school is over capacity, the nearest GP practice is over subscribed and NHS dental services are inadequate. This all accords with the conclusions of the Planning Inspector at the Super Inquiry in 2014 that Feniton was not a suitable location for sustainable development.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The number of houses allocated to Feniton in the Local Plan should be substantially reduced to a number that it can sustainably support.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The site Otry_20 was introduced late in the Regulation 18 stage of the Local Plan consultation process, giving Feniton residence and Feniton Parish Council limited time to comment. The comments that were made were not discussed at the Strategic Planning Committee meeting and Feniton Parish Council was not allowed to express its views at this meeting. Thus, the process by which this site was selected for inclusion in the Local Plan does not appear to have been fair. In addition, the site does not comply with the relevant East Devon District Council employment development policies, SE02 and SE03.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: This site should be removed from the Local Plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The site does not comply with the relevant East Devon District Council employment development policies SE02 and SE03.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: I don't have the knowledge to answer the above.

But I understand Residents of Feniton were not taken into consideration as Common Place was not used.

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: EDDCs preferred use of Common Place is very confusing and as a member of the public I wish to

comment but find this impossible to do so. I consider this is not right to make me unable to comment by this method.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

- It's well documented that Feniton regularly floods.
- It would appear that East Devon District Council (EDDC) has not considered the historic evidence of flooding, including raw sewage.

- More development equals more flooding.
- With previous developers, promises of flood risk alleviation measures have not transpired.
- The Flood Alleviation Scheme (FAS) has only been designed for the current number of homes in Feniton. It will only divert flood water around the eastern side of the village, leading to increased flooding at Pattersons Cross, the main access route to the village, from the A30.
- In times of heavy rain, Pattersons Cross already becomes impassable, (without the additional flood water from the FAS).
- Despite millions of public money being spent on it, currently there is no evidence of the FAS's efficiency.
- Volume of traffic in our narrow single track roads is unsustainable

Sewage:

- It's a well known fact that there is an unresolved capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding.

- It's well documented that roads and homes often flood with raw sewage.

Lack of Sustainability:

- At the 2014 Super Enquiry, the Planning Inspector determined, with EDDC agreeing, that Feniton was not a sustainable location for further development.
- Nothing, apart from the untested Flood Alleviation Scheme (FAS), has changed within the village to address the issues raised in said Super Inquiry.
- Lack of adequate public transport.
- All of the roads into Feniton are narrow with pinch points, unlit and unsuitable for heavy traffic.
- Feniton has recently had an insight to the ramifications of increased traffic when the Ottery Road/Green Lane junction was closed for the FAS works. At times delays getting in and out of the village were extensive.
- When Pattersons Cross floods, (as is expected during heavy rain as a result of the FAS), all vehicles will have to access the village and surrounding areas via Feniton

Old Village, or via the network of lanes and villages leading from A373 and M5. These lanes are highly unsuitable and unsafe for heavy traffic.

- Feniton Primary School is at capacity and in great need of a building upgrade.
- Local GP services are at capacity.
- There has been a disregard of evidence and planning history indicating that this scale of development in Feniton is unsustainable. The proposals for Feniton are not consistent with the local plan's stated vision and strategy and by extension with national policy.
- The only infrastructure noted in the draft local plan is for 1060m new water mains to be laid by 2035.

Disproportionate allocation of houses compared to local need:

- Funded by EDDC, Devon Communities Together (DCT) identified a local need for only 13 dwellings up to the year 2027.
- The number of houses planned for Feniton in the draft plan is disproportionate and doesn't align to the DCT survey, funded by EDDC.

- When the Strategic Planning Committee realized the number of houses allocated for Feniton were far greater than local need, the Chairman instructed the Officer to rewrite the Strategic Policy SP01 in the Regulation 19 version, in order to justify the increased development proposed for Feniton. There is now a mismatch between vision and strategy.
- Proposed development in Feniton is not 'limited' but huge for a tier 4 village.

References: Chapter 3 – 3.4 Hierarchy of Settlements Chapter 5 – Strategic Policy SD18 – Development actions at Feniton. Strategic Policy SP01 – C, D, E.

Employment site Otry_20:

- Site Otry_20 is an unsafe location. The entrance to the site is off Green Lane, a mostly single track road, some parts not wide enough for a car to pass a pedestrian without said pedestrian leaning back into the hedge. It is unlit, has pinch points, blind bends, distinct lack of pavements and two single track, over the rail line bridges, one with a blind bend. There is a part that is an ancient sunken portion subject to rock falls, blocking the lane. There is a video that can be viewed on Youtube -

<https://www.youtube.com/watch?v=6q7DQ6mpgh4> detailing some of the issues with Green Lane. The blind bends on either end of this lane are especially dangerous.

- Feni_08 is also accessed via Broad Lane which has very similar issues to Green Lane.

- Site Otry_20 was brought forward for consideration after the Regulation 18 draft consultation. It could be viewed that EDDC has not had sufficient time

- to consider all the evidence effectively.

- The size of Otry_20 does not align with EDDC's Spatial Strategy and is totally disproportionate to the scale of Tier 4 Feniton.

- It has a disproportionate allocation for industrial, warehousing and distribution than employment sites allocated for the Principle Centre Tier 1 Exmouth, in Tier 2 Axminster and Tier 3 Ottery and Seaton.

References: Chapter 2 The Vision – 2.10, Objective 1, Objective 2, Objective 9, Objective 10 Chapter 3 The Spatial Strategy SP01- C, D, E Service Villages 5.11 – SD18 – Otry_20

4 (c). Please set out the modification(s) you consider necessary to make this part of the East Devon Local Plan sound, in respect of any soundness matters you have identified at 5(b) above. You will need to say why each modification will make this part of the East Devon Local Plan sound. It will be helpful if you are able to put forward your suggested

revised wording for the relevant policy or paragraph. Please be as precise as possible.
(Continue on a separate sheet if necessary)

If the whole draft local plan is rejected, the whole of East Devon, including Feniton could be imposed with far greater development than has been suggested. Therefore suggestions for this section are:

To ensure a sustainable plan, better reflect the Tier 4 status of Feniton and realign the Strategy and Vision, until adequate infrastructure and mitigation has been put into place:

- Removal of Feni_08 from the draft local plan, or at least a reduction in the number of houses allocated for Feni_08.
- Removal of Otry_20 from the draft local plan.

With all the pressure from the Government to do away with Farming in the UK I will do my utmost to protect our family farm.

I have worked our land in Feniton for some 70 years, along with three generations before me. We have a huge population in the UK who need food, farmers produce food. The most important thing is food security in these uncertain times with Europe and beyond

To lose one of the best fields to housing is so detrimental due to the lack of understanding that the village is accessed along narrow roads, the whole area of East Devon suffers overloaded schools, medical services, sewerage, water run off as many others comment on each development that is proposed.

Feniton is not the place for new housing. The site beyond the Sports Field should be completed and that be the end of it.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Mavis Hall

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.:

- In previous consultations, emails, comments and a petition signed by 500+ residents was not taken into consideration as it was not submitted via Common Place.
- These vital public comments were not reported by EDDC to the Strategic Planning Committee, effectively ignoring the views of Fenitonians.
- EDDC's preferred method of commenting is the Common Place System. It is complex and extremely time consuming, effectively deterring Jo Public from 'Having Your Say' and making their opinions known. This is discriminatory and undemocratic, and contravenes British Values.
- Not everyone has, or can access this form thus making the process undemocratic.

- I object strongly to these developments particularly the way the undemocratic decision is being made. Residents and the local councillors should play a significant role in the decision process.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Flooding:

- It's well documented that Feniton regularly floods.
- It would appear that East Devon District Council (EDDC) has not considered the historic evidence of flooding, including raw sewage.
- More development equals more flooding.
- With previous developers, promises of flood risk alleviation measures have not transpired.
- The Flood Alleviation Scheme (FAS) has only been designed for the current number of homes in Feniton. It will only divert flood water around the eastern side of the village, leading to increased flooding at Pattersons Cross, the main access route to the village, from the A30.

- In times of heavy rain, Pattersons Cross already becomes impassable, (without the additional flood water from the FAS).
- The FAS work being undertaken at present is untested and it is uncertain that it will be sufficient to cope with the water and drainage for at least a further 100 houses.

Sewage:

- It's a well known fact that there is an unresolved capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding.
- It's well documented that roads and homes often flood with raw sewage.

Lack of Sustainability:

- At the 2014 Super Enquiry, the Planning Inspector determined, with EDDC agreeing, that Feniton was not a sustainable location for further development.
- Nothing, apart from the untested Flood Alleviation Scheme (FAS), has changed within the village to address the issues raised in said Super Inquiry.

- Lack of adequate public transport. Few buses and unreliable and expensive rail service
- All of the roads into Feniton are narrow with pinch points, unlit and unsuitable for heavy traffic.
- The small lanes around the village are inadequate to cope with the amount of extra traffic these developments will create.

Feniton has recently had an insight to the ramifications of increased traffic when the Ottery Road/Green Lane junction was closed for the FAS works. At times delays getting in and out of the village were extensive.

- When Pattersons Cross floods, (as is expected during heavy rain as a result of the FAS), all vehicles will have to access the village and surrounding areas via Feniton Old Village, or via the network of lanes and villages leading from A373 and M5. These lanes are highly unsuitable and unsafe for heavy traffic.
- Feniton Primary School is at capacity and in great need of a building upgrade. Where are the children to be educated, surrounding schools are also near capacity.
- The NHS hub in Ottery St Mary is struggling to meet the needs of the existing population of its surrounding villages, including Feniton.

- There has been a disregard of evidence and planning history indicating that this scale of development in Feniton is unsustainable. The proposals for Feniton are not consistent with the local plan's stated vision and strategy and by extension with national policy.

- The only infrastructure noted in the draft local plan is for 1060m new water mains to be laid by 2035.

Disproportionate allocation of houses compared to local need:

- Funded by EDDC, Devon Communities Together (DCT) identified a local need for only 13 dwellings up to the year 2027.

- The number of houses planned for Feniton in the draft plan is disproportionate and doesn't align to the DCT survey, funded by EDDC.

- When the Strategic Planning Committee realized the number of houses allocated for Feniton were far greater than local need, the Chairman instructed the Officer to rewrite the Strategic Policy SP01 in the Regulation 19 version, in order to justify the increased development proposed for Feniton. There is now a mismatch between vision and strategy.

- Proposed development in Feniton is not 'limited' but huge for a tier 4 village.

- There is a downturn in the construction industry, the availability of building materials is in question, unless imported, there is also a shortage of skilled labour. Acland Park is not finished due to issues with the building company leading to vandalism, rats and dumping of waste-this is something that needs to be avoided in other developments.

Employment site Otry_20:

- Site Otry_20 is an unsafe location. The entrance to the site is off Green Lane, a mostly single track road, some parts not wide enough for a car to pass a pedestrian without said pedestrian leaning back into the hedge. It is unlit, has pinch points, blind bends, distinct lack of pavements and two single track, over the rail line bridges, one with a blind bend. There is a part that is an ancient sunken portion subject to rock falls, blocking the lane. The blind bends on either end of this lane are especially dangerous.
- The land is sustainable farmland which is much needed.
- Feni_08 is also accessed via Broad Lane which has very similar issues to Green Lane.
- Site Otry_20 was brought forward for consideration after the Regulation 18 draft consultation. It could be viewed that EDDC has not had sufficient time to consider all the evidence effectively.

- The size of Otry_20 does not align with EDDC's Spatial Strategy and is totally disproportionate to the scale of Tier 4 Feniton.
- It has a disproportionate allocation for industrial, warehousing and distribution than employment sites allocated for the Principle Centre Tier 1 Exmouth, in Tier 2 Axminster and Tier 3 Ottery and Seaton.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

- Removal of Feni_08 from the draft local plan
- Removal of Otry_20 from the draft local plan.

Full name: Anissia Halwyn

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: My comments relate to Strategic Policy SD18: Development allocations at Feniton and cover the following issues: -

- Surface water flooding – Feniton is vulnerable to significant surface water flooding, which is generated due to a combination of run off from poorly managed agricultural fields and the existing expanse of non-permeable tarmac and concrete within the village. Surface water flood risk has not been made viewable on the interactive map. Whilst works are taking place to alleviate some of this pressure, the scheme has not been completed nor monitored yet so it is unclear how effective it will be. The flood scheme has presumably also been designed with capacity to alleviate flooding based on the current village extent and therefore the current maximum potential surface water volumes, potentially incorporating climate change projections. Adding to the urban creep of the village onto greenfield sites would inevitably increase surface water runoff. This would especially be the case where there is a disproportionate increase of residential area such as at Beechwood (Feni_08), which would convert well-managed, permeable farmland into a large expanse of tarmac and concrete. This has the potential to increase flood risk within the village. Instead of building on permeable green areas and farmland, we should be aiming to conserve and sustainably manage these areas to improve surface permeability.

- Traffic – Residential and industrial development will lead to an increased volume of traffic in the village, which is only accessible via small country roads. Access to Feni_08 and Otry_20 is via a narrow, single laned road with two humpback bridges (with blindspots due to steep gradients) – these sites would not be safely accessible on the existing roads, especially when considering the significant increase in traffic. Increased

congestion on many of the roads around Feniton, including Ottery Road, will be inevitable due to them being narrow country roads. This will also make the roads become even more unsafe to cycle and walk on. In TR01 it states that “New development (specifically including where land is allocated for development) should facilitate access to high quality public transport through its location, layout..... development should be aligned with Devon County Council’s Bus Services Improvement Plan ” – Feniton currently only has one infrequent bus service to Sidmouth and none to Exeter, and is not considered for improvements within DCC’s BSIP. In addition, the rail service to Exeter/Waterloo is two hourly and cancellations/delays are commonplace due to problems posed by the single line between Pinhoe and Axminster. Travelling by car is therefore, unfortunately, the default option for the majority of residents in Feniton, as options are limited otherwise. As a result of the flood alleviation scheme, Kier have stated that there will be an increased risk of flooding of the road out of Feniton at Patteson’s Cross. Ottery Road was recently closed for works, which led to chaos as large volumes of traffic were diverted onto the (even) smaller roads towards old Feniton and Talaton, causing significant congestion. It is almost certain that this issue will re-occur in the future due to flooding at Patteson’s Cross –increased volumes of traffic would significantly exacerbate the problem.

- Travelling by foot/cycle – In TR01, it states that “Development which would result in the loss or reduce the convenience or attractiveness of an existing or proposed footpath, cycleway or bridleway, will not be permitted unless an acceptable alternative route is provided.” In the draft LCWIP, the Otter Trail linking Feniton with Sidmouth was proposed to be an on-road route. Roads around Feniton are already not the safest (due to the points above), especially for children cycling to secondary school in Ottery, but increased traffic due to the developments would most definitely compromise the safety and ultimate useability of the on-road Otter Trail. The site opposite Bridge Cottages (Otry_20) is adjacent to one of the only footpaths in the village, which is a large orchard – very beautiful all year around and excellent for wildlife spotting. The industrial development will significantly reduce the attractiveness of this right of way.

- Biodiversity – Being in a rural location, Feniton is a hotspot for wildlife. This is evident in the surrounding fields – it is commonplace to see deer, foxes, birds of prey and many more species making use of the available green space and agricultural fields surrounding the village. The proposed developments would reduce this available (supporting) habitat, with the proposed development at Beechwood and Bridge Cottages in particular having high potential to cut off valuable habitat corridors between the surrounding countryside and remaining green spaces in the village. The statement under the Beechwood development, that “Careful designed and implemented boundary treatment on the eastern side of the site will be required to form a soft edge to the countryside beyond” will do nothing to mitigate this significant issue and should be considered a greenwashing exercise.

- In the Biodiversity and Geodiversity chapter, it states in para 13.39 “Trees, woodlands, and hedges are vital for enhancing landscapes, providing wildlife habitats, supporting sustainable drainage, sequestering carbon, and improving public health.”. The site at Otry_20 is an orchard, which is not only likely to contribute to habitat connectivity, but also contributes to landscape character due to the region’s important history of hosting extensive orchards.
- Infrastructure – Feniton does not have adequate infrastructure to support further development. I have already mentioned factors such as the state of the roads and the railway, but an additional factor is the small size of the school, which is working at full capacity and would not be able to accommodate an increase in numbers.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The proposals to develop on greenfield sites within Feniton do not align with the following policies:

- Policy TR03: Travel plans, transport statements and transport assessments
Where development is likely to generate significant amounts of vehicle movements, planning permission will not be granted unless they are supported by a transport statement or transport assessment, and subsequent travel plan, that identifies measures to secure new sustainable travel arrangements, taking into account: A. The scale of the development; and B. The availability of public transport, walking and cycling opportunities; and C. Proximity to environmental designations; and D. Cumulative impacts of other development in the area; and E. Whether there are particular types of impacts that require further evaluation.
- TR01 p3 Walking, wheeling, cycling and public transport should be the natural first choice for short local journeys, or as part of a longer journey. Walking and cycling routes must be prioritised in new development (specifically including where land is

allocated for development) – such routes should be coherent, direct, safe, comfortable and attractive.

New development (specifically including where land is allocated for development) should facilitate access to high quality public transport through its location, layout, and, where necessary, contributions to public transport services and/or facilities (for example, bus services, bus stops, bus priority measures, rail infrastructure). In particular, development should be aligned with Devon County Council's Bus Services Improvement Plan

Development which would result in the loss or reduce the convenience or attractiveness of an existing or proposed footpath, cycleway or bridleway, will not be permitted unless an acceptable alternative route is provided.

- Policy PB08: Tree, hedges and woodland on development sites Retention of existing trees and hedges Where trees are present on a development site proposals will need to be designed, and schemes implemented, in a manner that retain good quality and healthy woodland, trees and hedgerows. This is to specifically include protection of : ancient woodland; ancient and veteran trees; those with visual amenity value; those that support wildlife (such as some appropriate U category trees as part current BS 5837111) or provide habitat connectivity; those which positively contribute to local landscape character, the historic environment or the significance of a heritage asset and its setting; and rare or unusual species of trees. These protected assets will need to be incorporated into the overall design and landscape scheme, within public spaces where possible

- Policy AR01: Flooding

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The proposal to develop opposite Bridge Cottages is within the Ottery ward, despite clearly being in Feniton. I am concerned that objections to any

future development from Feniton Parish Council and residents will not be adequately considered, due to the boundary issue. Any development at this location has the potential to negatively impact residents in Feniton, due to the conversion of a biodiverse orchard to industrial buildings, impact on the adjacent public right of way and impacts on traffic volumes due to the poor connectivity via sustainable transport between Feniton and Ottery and surrounding villages.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: will halwyn

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I am concerned that the drainage and flooding issues in the village are not sufficiently considered which will cause damage to existing properties.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

The topography of new feniton as a whole is a shallow bowl, without natural drainage and relatively little drop for sewerage and drains. This has caused problems with surface water and sewage in the village. There is currently a scheme in place to try to reduce this for the worst affected properties. It seems concerning that edcc is keen to push ahead with development before the effects and effectiveness of this scheme can be observed. Kier have stated that it will likely increase flooding in other areas i.e. roads in and out of the village. I feel it is somewhat cynical to try to push development through before any further issues can be observed. Fenitons flooding and sewage issues were recently mentioned in parliament, with effluence flowing into the ditches in peoples gardens; this is not a system with spare capacity. In the case of feni-08, there have historically been issues with flooding into adjacent land from runoff when this field was poorly managed. Sewerage and drainage on green lane properties is old, and unable to deal with further input. For both feni-08 and otry-20; Green lane is a rural lane which forms the pedestrian, cycle and horse connection between the new and old village, and allows access to two footpaths. This lane should be preserved and enhanced as a community amenity, for active transport and recreation. The lane includes two humpback bridges and does not have pavement. Increased traffic on this lane will result in danger to inhabitants who are using it for active transport i.e. school runs, exercise,

commuting, and thus encourage further unnecessary car usage. There is a plan to link feniton to ottery through a cycle route along the old railway line which joins to green lane, and so it should be planned to form part of a wider safe-cycle network in devon, rather than encouraging further car obstruction these rural lanes.

In the case of all development in feniton; it is optimistic to think the railway will absorb all traffic; it is used by a minority of residents, and reliability needs to be improved. Feniton has almost no bus service. Therefore in feniton and surrounding villages it must be assumed that many journeys will be completed by road. This leads to the risk that the villages in this area become cut off from surrounding green space, and active transport to surrounding villages due to the increased risks in the lanes.

Amenities; GP service are in ottery (poor access by car) and are oversubscribed.

I feel that the proposed developments in feniton contradict the objectives set out in the vision. I do also feel that there should be a principle of proportional development of any settlement, to allow the effects to be seen, rather than the glut of proposals that seem to be targeting feniton in a short time should be taken.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Removal of feni-08 and otry-20. Green lane to be included as part of a wider safe active travel network.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: I feel that the glut of proposals before the effects of the flood scheme can be measured is cynical.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I would like to participate.

Full name: Linda Hamilton

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: Without personal legal knowledge and as a member of the public, I do not feel qualified to make comment on this section.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Otry_20: I consider that the allocation of employment land at Otry_20 is wholly inappropriate, given that the site is located off Green Lane, a very narrow single-track lane with two humpback railway bridges, severely impeding vehicular visibility. No footpaths are present and the creation and operation of an employment site in this location would place pedestrians in extreme danger; this is a lane used by numerous families to walk their children between home and the village primary school, and for secondary school children to walk to and from their bus stop to Kings School on Ottery Road. It is also used by many dog walkers in Feniton, who walk along Green Lane as part of a loop around the village. Green Lane is of significant amenity value to villagers. In addition to this, the narrow blind bend on Ottery Road between the A30 and the turn into Green Lane in Feniton is extremely dangerous; the addition of numerous large industrial vehicles using this road would lead to very dangerous conditions for pedestrians and cyclists (who often move between Feniton and Escot estate) and would make conditions for all road users extremely difficult. There are already numerous near-misses at the junction of Green Lane due to poor visibility and backed-up vehicles. The road between the A30 and Green Lane is regularly flooded after rainfall (and this will be exacerbated once the flood defence scheme is operational as more water will flow over Ottery Rd). When this occurs, large vehicles would be forced to travel through Fenny Bridges, along single track Green Lane and over the railway Bridges, or to access the site via Payhembury from the north and over the level crossing in Feniton, both of which would be wholly unacceptable. There is no reason for employment land to be allocated in this location – Feniton is not close to commercial centres where large articulated

vehicles would need to move to and from. It would simply be bringing large vehicles into an inappropriate area to destroy the amenity value of that area for residents. The recent flood scheme in the village has resulted in increased vehicular movements on Green Lane (due to location of site compound), with multiple construction vehicles and deliveries and movement of aggregate and concrete. The result of this has been chaos on the lane, with traffic stopped and reversing, children, pedestrians and cyclists being put in danger. This simply cannot be allowed to be the permanent situation. Pg 37 of the draft Local Plan states: E(g)(i) Office use - to be primarily located in the town centres of tier 1 and 2 settlements and the proposed new community. Office use will be permitted on site allocations as an ancillary part of other business uses. E(g)(ii) Research and Development and (iii) industrial use (which can be carried out in any residential area without causing detriment to the amenity of the area)- will be met through employment site allocations, alongside larger housing developments as allocations and as windfall development. I have no doubt whatsoever that the allocation of employment land at Otry_20 would be of significant detriment to the amenity of the area and thus this allocation is contrary to the Strategic Policy SP04: Employment provision and distribution strategy The size of Otry_20 does not align with EDDC's Spatial Strategy and is totally disproportionate to the scale of Tier 4 Feniton. It has a disproportionate allocation for industrial, warehousing and distribution than employment sites allocated for the Principle Centre Tier 1 Exmouth, in Tier 2 Axminster and Tier 3 Ottery and Seaton. Similarly, any vehicular access to the proposed housing allocation Feni_08 from Green Lane, would be totally inappropriate, for the reasons given above with respect to this single-track lane. Green Lane is simply not of sufficient size for additional traffic volumes, and given the railway bridges present on it, cannot be widened to be appropriately sized. Furthermore, Broad Rd at the other side of Feni_08 is a single track road which leads past the primary school. The quantum of housing proposed for this site needs to be reconsidered in light of these constraints. References: Chapter 2 The Vision – 2.10, Objective 1, Objective 2, Objective 9, Objective 10 Chapter 3 The Spatial Strategy SP01- C, D, E Service Villages 5.11 – SD18 – Otry_20 Flooding:

- It's well documented that Feniton regularly floods.
- It would appear that East Devon District Council (EDDC) has not considered the historic evidence of flooding, including raw sewage.
- More development equals more flooding.
- With previous developers, promises of flood risk alleviation measures have not transpired.
- The Flood Alleviation Scheme (FAS) has only been designed for the current number of homes in Feniton. It will only divert flood water around the eastern side of the village,

leading to increased flooding at Pattersons Cross, the main access route to the village, from the A30.

- In times of heavy rain, Pattersons Cross already becomes impassable, (without the additional flood water from the FAS).
- Despite millions of public money being spent on it, currently there is no evidence of the FAS's efficiency. References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy AR01 – C Disproportionate allocation of houses compared to local need:
- Funded by EDDC, Devon Communities Together (DCT) identified a local need for only 13 dwellings up to the year 2027.
- The number of houses planned for Feniton in the draft plan is disproportionate and doesn't align to the DCT survey, funded by EDDC.
- When the Strategic Planning Committee realized the number of houses allocated for Feniton were far greater than local need, the Chairman instructed the Officer to rewrite the Strategic Policy SP01 in the Regulation 19 version, in order to justify the increased development proposed for Feniton. There is now a mismatch between vision and strategy.
- Proposed development in Feniton is not 'limited' but huge for a tier 4 village. References: Chapter 3 – 3.4 Hierarchy of Settlements Chapter 5 – Strategic Policy SD18 – Development actions at Feniton. Strategic Policy SP01 – C, D, E. Sewage:
- It's a well known fact that there is an unresolved capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding.
- It's well documented that roads and homes often flood with raw sewage. References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy AR01 – C Lack of Sustainability: At the 2014 Super Enquiry, the Planning Inspector determined, with EDDC agreeing, that Feniton was not a sustainable location for further development.
- Nothing, apart from the untested Flood Alleviation Scheme (FAS), has changed within the village to address the issues raised in said Super Inquiry.
- Lack of adequate public transport.
- All of the roads into Feniton are narrow with pinch points, unlit and unsuitable for heavy traffic.
- Feniton has recently had an insight to the ramifications of increased traffic when the Ottery Road/Green Lane junction was closed for the FAS works. At times delays getting in and out of the village were extensive.

- When Pattersons Cross floods, (as is expected during heavy rain as a result of the FAS), all vehicles will have to access the village and surrounding areas via Feniton Old Village, or via the network of lanes and villages leading from A373 and M5. These lanes are highly unsuitable and unsafe for heavy traffic.
- Feniton Primary School is at capacity and in great need of a building upgrade.
- Local GP services are at capacity.
- There has been a disregard of evidence and planning history indicating that this scale of development in Feniton is unsustainable. The proposals for Feniton are not consistent with the local plan's stated vision and strategy and by extension with national policy.
- The only infrastructure noted in the draft local plan is for 1060m new water mains to be laid by 2035. References: Infrastructure Delivery Plan – Utl-1 Sustainability Appraisal Objectives 4, 5, 9, 10 and 13. Chapter 3 – 3.38, 3.39, 3.40, 3.44, 3.45

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

- Removal of Feni_08 from the draft local plan, or at least a reduction in the number of houses allocated for Feni_08.
- Removal of Otry_20 from the draft local plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Jennifer Harper

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: "I suggest this plan is not legal because using an online portal discriminates against the elderly who tend not to be computer savvy. This does not provide the right level of community involvement in an area where 37% of the population are aged over 60. Many of these residents would not have downloaded the East Devon App meaning their awareness of any local plan was already extremely unlikely and, if made aware, their options to respond are far too complicated and difficult to navigate. When looking at the plan on your website - although you show numerous comments of reply - there is no easy way to see which parts of the plan these replies relate to which also means you are not communicating the facts sufficiently enough to meet due diligence. I also believe the Sidmouth_31 part of the plan is not legal because you detail this development as one which "could be developed" which is a highly ambiguous statement lacking vital detail. You have not explained why previous rejections for this plot being developed have suddenly been overturned when nothing has changed, simply stating that you could be "squaring off the built edge". This "built edge" dates back to housing built in the 1960s when regulations were different and the issues you should be considering are current environmental problems of building on today's National Landscape. The same issues that have resulted in you blocking many other developments within the National Landscape apply to this site and you have given no sound argument as to why they are being ignored. You also mention access concerns without offering any explanation of how these could be satisfactorily resolved - making this part of your plan very weak, lacking detail and not fit for progression."

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy

or paragraph. Please be as precise as possible.: All residents should receive details of this plan by mail along with the option to respond by letter to ensure all opinions get voiced. The field on Burscombe Lane (Sidmouth-31) should be removed from the plan and and other sites (of which there are many) which fall outside of the National Landscape should be considered instead.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: "To develop Sidmouth-31 (Land east of Burscombe Lane / west of Windsor Mead) you are choosing to ignore other much more suitable areas to build which have easier access and more cost effective development potential, that are outside of our precious National Landscape where building should only ever be considered as a last resort. Here are the main reasons why this site should continue to be rejected for development

Access - Access via Burscombe Lane has been refused for previous developments as this lane is very narrow allowing only single car access. The road is prone to subsidence and extremely dangerous to exit onto Sidford High Street with several blind spots also causing issues when turning into Burscombe Lane. Farm vehicles, tractors and trailers frequently cause disruption in Burscombe Lane which usually means that cars have to mount the pavement to pass in the narrow parts of this road. Obviously this is not ideal and dangerous practise. You mention Windsor Mead as an alternative entry route but this is also a very narrow road with the same problems of its junction onto Sidford High Street being very dangerous to navigate. Currently any entry route from Windsor Mead would have to be positioned on land which is private property as the existing houses completely block the perimeter of the field. If requiring compulsory purchase to access this land substantial cost gets added to the project along with considerable disruption to a small cul-de-sac.

Wildlife - Within this field there are bats, owls, dormice and many species of birds. The field is recognised as being part of the hunting zone for bats from Beer Quarry Caves and these should be protected. RSPB voice concerns about the reducing numbers of many bird species and removing this vibrant piece of countryside will make this situation even worse. Badgers are also a protected species and there are many families of badgers in this area. The area is ringed by Devon Hedges which also carry environmental protection orders.

Transport - Other potential sites in Sidmouth fall within easy access to public transport. Sidmouth_31 is a long walk to a bus stop where buses run twice a day meaning all house occupants would need cars adding to the pollution and traffic concerns mentioned.

Infrastructure - Schooling, and public health services are all over stretched and if new houses get built there must be a commitment agreed and in place to ensure additional services can be provided. Our local sewerage plant is extremely dated and unlikely to be able to cope with additional properties. We already see the pollution caused by sewerage spills on our coastline and, until steps have been taken to prevent this - extra building should not be allowed.

Drainage - there is a vast amount of water sent down the hill from Core Hill Woods - so much so that Burscombe lane becomes a river in heavy rainfall. The field of Sidmouth_31 is like a bog in the winter months acting as vital drainage for this water and - if built on - would potentially cause flooding wherever the water gets diverted to or on land beyond the development. NB A video can be supplied of water running down Burscombe lane to demonstrate this point.

Noise Pollution. You mention that the view might not be affected by this build (which I disagree with) but it is also important to consider noise pollution. Currently - all you can hear when standing in this field is birdsong. New housing comes with the required new technology of things like Heat Pumps which emit quite loud humming noises (like air conditioning units). This is another reason to avoid building on National Landscapes.

View - the existing houses at Windsor Mead and Corefields are over 50 years old and have well established screening of trees and hedgerows making them barely visible from higher up. They are also at the lowest point of the valley. New houses would be very noticeable and have a significant impact on a view much admired by people walking to East Hill Strips and Core Hill Woods.

Cost Effectiveness - The strongest message regarding new housing is the need for it to be affordable - but this plot offers the least cost effective solution. Any building on National Landscapes comes with substantial restrictions and these required planning restrictions of single storey dwellings, suitable choice of building materials, and rigid

rules about positioning of reflective surfaces etc add substantial cost to any building project at Sidmouth_31. This is another reason why other sites should be prioritised instead of this one."

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: It is impossible to answer yes because I do not know who else you are cooperating with. I know that Highways have not even been consulted yet - who I firmly believe will reject the proposal. What other departments will be consulted and will they include environmental groups such as National Landscapes and CPRE (The Countryside Charity).

It will be helpful if you are able to put forward your suggested revised wording for the relevant policy

or paragraph. Please be as precise as possible.: All residents should receive details of this plan by mail along with the option to respond by letter to ensure all opinions get voiced. The field on Burscombe Lane (Sidmouth-31) should be removed from the plan and and other sites (of which there are many) which fall outside of the National Landscape should be considered instead.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: To develop Sidmouth-31 (Land east of Burscombe Lane / west of Windsor Mead) you are choosing to ignore other much more suitable areas to build which have easier access and more cost effective development potential, that are outside of our precious National Landscape where building should only ever be considered as a last resort. Here are the main reasons why this site should continue to be rejected for development

Access - Access via Burscombe Lane has been refused for previous developments as this lane is very narrow allowing only single car access. The road is prone to subsidence and extremely dangerous to exit onto Sidford High Street with several blind spots also causing issues when turning into Burscombe Lane. Farm vehicles, tractors and trailers frequently cause disruption in Burscombe Lane which usually means that cars have to mount the pavement to pass in the narrow parts of this road. Obviously this is not ideal and dangerous practise. You mention Windsor Mead as an alternative entry route but this is also a very narrow road with the same problems of its junction onto Sidford High Street being very dangerous to navigate. Currently any entry route from Windsor Mead would have to be positioned on land which is private property as the existing houses completely block the perimeter of the field. If requiring compulsory purchase to access this land substantial cost gets added to the project along with considerable disruption to a small cul-de-sac.

Wildlife - Within this field there are bats, owls, dormice and many species of birds. The field is recognised as being part of the hunting zone for bats from Beer Quarry Caves and these should be protected. RSPB voice concerns about the reducing numbers of many bird species and removing this vibrant piece of countryside will make this situation even worse. Badgers are also a protected species and there are many families of badgers in this area. The area is ringed by Devon Hedges which also carry environmental protection orders.

Transport - Other potential sites in Sidmouth fall within easy access to public transport. Sidmouth_31 is a long walk to a bus stop where buses run twice a day meaning all house occupants would need cars adding to the pollution and traffic concerns mentioned.

Infrastructure - Schooling, and public health services are all over stretched and if new houses get built there must be a commitment agreed and in place to ensure additional services can be provided. Our local sewerage plant is extremely dated and unlikely to be able to cope with additional properties. We already see the pollution caused by sewerage spills on our coastline and, until steps have been taken to prevent this - extra building should not be allowed.

Drainage - there is a vast amount of water sent down the hill from Core Hill Woods - so much so that Burscombe lane becomes a river in heavy rainfall. The field of Sidmouth_31 is like a bog in the winter months acting as vital drainage for this water and - if built on - would potentially cause flooding wherever the water gets diverted to or on land beyond the development. NB A video can be supplied of water running down Burscombe lane to demonstrate this point.

Noise Pollution. You mention that the view might not be affected by this build (which I disagree with) but it is also important to consider noise pollution. Currently - all you can hear when standing in this field is birdsong. New housing comes with the required new technology of things like Heat Pumps which emit quite loud humming noises (like air conditioning units). This is another reason to avoid building on National Landscapes.

View - the existing houses at Windsor Mead and Corefields are over 50 years old and have well established screening of trees and hedgerows making them barely visible from higher up. They are also at the lowest point of the valley. New houses would be very noticeable and have a significant impact on a view much admired by people walking to East Hill Strips and Core Hill Woods.

Cost Effectiveness - The strongest message regarding new housing is the need for it to be affordable - but this plot offers the least cost effective solution. Any building on National Landscapes comes with substantial restrictions and these required planning restrictions of single storey dwellings, suitable choice of building materials, and rigid

rules about positioning of reflective surfaces etc add substantial cost to any building project at Sidmouth_31. This is another reason why other sites should be prioritised instead of this one.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: It is impossible to answer yes because I do not know who else you are cooperating with. I know that Highways have not even been consulted yet - who I firmly believe will reject the proposal. What other departments will be consulted and will they include environmental groups such as National Landscapes and CPRE (The Countryside Charity)

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Emma Hayes

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: In relation to Feniton, it's unclear as to whether the draft local plan has been developed in a legally compliant way. Without personal legal knowledge and as a member of the public, I do not feel qualified to make comment on this section.

- However, in previous consultations, emails, comments and a petition signed by 500+ residents was not taken into consideration as it was not submitted via Common Place.
- These vital public comments were not reported by EDDC to the Strategic Planning Committee, effectively ignoring the views of Fenitonians.
- EDDC's preferred method of commenting is the Common Place System. It is complex and extremely time consuming, effectively deterring Jo Public from 'Having Your Say' and making their opinions known. This is discriminatory and undemocratic, and contravenes British Values.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Flooding:

- It is well documented that Feniton regularly floods.
- It would appear that East Devon District Council (EDDC) has not considered the historic evidence of flooding, including raw sewage which appears to be an increasing incidence, with individuals experiencing roads and gardens impacted during heavy rain.
- More development equals more flooding.
- With previous developers, promises of flood risk alleviation measures have not transpired.
- The Flood Alleviation Scheme (FAS) has only been designed for the current number of homes in Feniton. It will only divert flood water around the eastern side of the village, leading to increased flooding at Pattersons Cross, the main access route to the village, from the A30.
- In times of heavy rain, Pattersons Cross already becomes impassable, (without the additional flood water from the FAS).
- The bridge before the A30 at the other end (past Fenny Bridges) also floods very badly and increasingly frequently, and other roads are more like unmetalled roads as they are in such a state of disrepair due to erosion and potholes with increasing amounts of traffic.

- Despite millions of public money being spent on it, currently there is no evidence of the FAS's efficiency.

References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy
AR01 – C

Sewage:

- It's a well known fact that there is an unresolved capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding.
- It's well documented that roads and homes often flood with raw sewage.

References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy
AR01 – C

Lack of Sustainability:

- At the 2014 Super Enquiry, the Planning Inspector determined, with EDDC agreeing, that Feniton was not a sustainable location for further development.
- Nothing, apart from the untested Flood Alleviation Scheme (FAS), has changed within the village to address the issues raised in said Super Inquiry.
- Lack of adequate public transport.
- All of the roads into Feniton are narrow with pinch points, unlit and unsuitable for heavy traffic.
- Feniton has recently had an insight to the ramifications of increased traffic when the Ottery Road/Green Lane junction was closed for the FAS works. At times delays getting in and out of the village were extensive. I live in the old village and the road was constantly backed up, the school bus was so late that I was taking the children to school and at times it took over 40minutes due to heavy plant not being able to pass and multiple cars on the road from Fenny Bridges backed up to Feniton. The road was dangerously overpopulated with cars, lorries, farm machinery etc. with no traffic system or adequate passing places and huge disruption day and night.
- When Pattersons Cross floods, (as is expected during heavy rain as a result of the FAS), all vehicles will have to access the village and surrounding areas via Feniton Old Village, or via the network of lanes and villages leading from A373 and M5. These lanes are highly unsuitable and unsafe for heavy traffic.

- Feniton Primary School is at capacity and in great need of a building upgrade.
- Local GP services are at capacity.
- There has been a disregard of evidence and planning history indicating that this scale of development in Feniton is unsustainable. The proposals for Feniton are not consistent with the local plan's stated vision and strategy and by extension with national policy.
- The only infrastructure noted in the draft local plan is for 1060m new water mains to be laid by 2035.

References: Infrastructure Delivery Plan – Utl-1 Sustainability Appraisal Objectives 4, 5, 9, 10 and 13. Chapter 3 – 3.38, 3.39, 3.40, 3.44, 3.45

Disproportionate allocation of houses compared to local need:

- Funded by EDDC, Devon Communities Together (DCT) identified a local need for only 13 dwellings up to the year 2027.
- The number of houses planned for Feniton in the draft plan is disproportionate and doesn't align to the DCT survey, funded by EDDC.
- When the Strategic Planning Committee realized the number of houses allocated for Feniton were far greater than local need, the Chairman instructed the Officer to rewrite the Strategic Policy SP01 in the Regulation 19 version, in order to justify the increased development proposed for Feniton. There is now a mismatch between vision and strategy.
- Proposed development in Feniton is not 'limited' but huge for a tier 4 village.

References: Chapter 3 – 3.4 Hierarchy of Settlements Chapter 5 – Strategic Policy SD18 – Development actions at Feniton. Strategic Policy SP01 – C, D, E.

Employment site Otry_20:

- Site Otry_20 is an unsafe location. The entrance to the site is off Green Lane, a mostly single track road, some parts not wide enough for a car to pass a pedestrian without said pedestrian leaning back into the hedge. It is unlit, has pinch points, blind bends, distinct lack of pavements and two single track, over the rail line bridges, one with a blind bend. There is a part that is an ancient sunken portion subject to rock falls, blocking the lane. There is a video that can be viewed on Youtube - <https://www.youtube.com/watch?v=6q7DQ6mpgh4> detailing some of the issues with Green Lane. The blind bends on either end of this lane are especially dangerous.

- Feni_08 is also accessed via Broad Lane which has very similar issues to Green Lane.

- Site Otry_20 was brought forward for consideration after the Regulation 18 draft consultation. It could be viewed that EDDC has not had sufficient time to consider all the evidence effectively.

- The size of Otry_20 does not align with EDDC's Spatial Strategy and is totally disproportionate to the scale of Tier 4 Feniton.

- It has a disproportionate allocation for industrial, warehousing and distribution than employment sites allocated for the Principle Centre Tier 1 Exmouth, in Tier 2 Axminster and Tier 3 Ottery and Seaton.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To ensure a sustainable plan, better reflect the Tier 4 status of Feniton and realign the Strategy and Vision, until adequate infrastructure and mitigation has been put into place:

- Removal of Feni_08 from the draft local plan, or at least a reduction in the number of houses allocated for Feni_08.
- Removal of Otry_20 from the draft local plan.

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: Duty to co-operate refer to councils co-operating with each other and isn't really relevant to Feniton.

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Duty to co-operate refer to councils co-operating with each other and isn't really relevant to Feniton.

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Via the Parish Council to have the views of Feniton Residents represented

Full name: Pamela Hayman

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This village cannot take anymore building, sewage & traffic!!

Full name: Sue Jeacock

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I have no idea whether this is legally compliant. But there is no don't know option in this survey question. I have just watched the EDDC info film on the local plan on you tube and the plans for Feniton do not fit with your stated aims of putting the right development in the right place and limited development in the villages. Feniton is being asked to take a large proportion of new development relative to its size, compared with other similar sized villages. The density of the proposed development at Burlands certainly does not fit with the ideal of the right sort of homes in the right place and and the proposed industrial site off Green Lane, a single track lane with no pavements regularly used by school children, dog walkers and pedestrians is horrifyingly unsuitable. I would question the demand for housing in the area, given that the development at Acland Park faltered, leaving houses unfinished and the developer seemingly gone bust. If he couldn't make his business model work in a property boom, I can't see how new houses proposed now will sell any better. Perhaps the other houses could be finished and sold first? The 60 houses proposed in Fen 08 are in a location EDDC previously argued, with the help of expensive lawyers, at the super enquiry was unsustainable for development. Nothing has changed since, so again this cannot be development in the right place. I also understand our parish councillors were prevented from speaking about the inclusion of Otry 20 in the plan because it is technically classed as Ottery. However it clearly hugely impacts the village and has been included in the Feniton section in your plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I have just watched the EDDC info film on the local plan on you tube and the plans for Feniton do not fit with your stated aims of putting the right development in the right

place and limited development in the villages. Feniton is being asked to take a large proportion of new development relative to its size, compared with other similar sized villages. The density of the proposed development at Burlands certainly does not fit with the ideal of the right sort of homes in the right place and the proposed industrial site off Green Lane, a single track lane with no pavements regularly used by school children, dog walkers and pedestrians is horrifyingly unsuitable. I would question the demand for housing in the area, given that the development at Acland Park faltered, leaving houses unfinished and the developer seemingly gone bust. If he couldn't make his business model work in a property boom, I can't see how new houses proposed now will sell any better. Perhaps the other houses could be finished and sold first? Nothing has changed since, so again this cannot be development in the right place.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Hugely reduced number of dwellings for Fen 05 - 15-20 would be what the site could sustain, but only once problems with sewage overflow in that area have been resolved. Otherwise the new estate will be swimming in sewage which might make it a bit tricky to sell the homes. Plans for the industrial site Otry 20 need to be removed from the Local plan, as does Fen 08. As you state yourselves, development needs to be the right sort of development in the right places and Feniton has been shown not to be a sustainable location for additional housing on this scale.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: I don't believe you have listened to our parish council at all. And parish councillors were prevented from speaking on Otry 20

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Kerry Johnstone

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I don't feel qualified to judge whether the draft local plan for Feniton has been developed appropriately from a legal point of view. However, I understand that views expressed to date have not been taken into consideration, despite emails, comments and a petition signed by many residents (over 500!). The Strategic Planning Committee has not been presented with the views of the residents of Feniton, and this seems wrong. Requiring comments to be made through a system that is extremely hard to navigate by a member of the general public is tantamount to discrimination and hardly embraces democratic principles.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Flooding and sewage

Feniton already struggles with flooding and is undergoing a Flood Alleviation Scheme that at best will help protect existing homes from further flooding. Unfortunately, the current plan increases the flooding risk at the main access route to the village. So even the current scheme does not adequately tackle the problem of flooding, and it is unclear how effective it will be in addressing flood risk for existing homes.

Further development, without an appropriate Flood Alleviation Scheme in place, will undermine existing efforts, put existing and new homes at increased risk of flooding, as well as further increase the likelihood of more flooding at Pattersons Cross. Further development without increasing the capacity of Feniton's sewerage system will also cause more instances of raw sewage flooding along roads and homes in Feniton.

References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy
AR01 – C

Lack of Sustainability

I am struck by the scale of the planned developments, which seem to be out of all proportion to the current size of Feniton. It is not clear to me why the proposals don't fit with the local plan's stated vision and strategy. If nothing has changed since the 2014 Super Enquiry that concluded Feniton was not a sustainable location for further development, why is Feniton now considered suitable for substantial further development?

As mentioned above, the Flood Alleviation Scheme has not been designed to cope with many extra homes, and already increases the risk of flooding at the main entry to the village. The FAS therefore does not constitute a significant positive change that would justify overturning the recommendations of the 2014 Enquiry.

Furthermore, Feniton's roads will not be able to cope with a significant expansion to the number of houses in the village. The increased traffic experienced when the Ottery Road and Green Lane junction was closed recently led to significant traffic problems, including cars diverting through Old Feniton along single country lanes, causing congestion and on at least one occasion, preventing a school bus from getting children to secondary school. The increased flooding risk at Patterson's Cross will also lead to diversions through Old Feniton. These roads simply can't cope with a rise in traffic and will have a significant negative impact on home owners and car users in and around Feniton.

There are also issues with lack of capacity at Feniton Primary School and lack of GP Services. Several of my neighbours were unable to enrol their children into Feniton Primary School despite being a 10 minute walk away.

It is not clear to me on what grounds a substantial expansion of Feniton has been judged as sustainable.

References: Infrastructure Delivery Plan – Utl-1 Sustainability Appraisal Objectives 4, 5, 9, 10 and 13. Chapter 3 – 3.38, 3.39, 3.40, 3.44, 3.45

Disproportionate allocation of houses compared to local need

The number of new houses proposed far exceeds local need. Devon Communities Together identified the need for 13 new homes up to 2027. This assessment was funded by EDDC. I understand that the Chairman of the Strategic Planning Committee re-wrote the Strategic Policy SP01 in the Regulation 19 version, in order to justify substantially increased development of Feniton well beyond local need. This has led to a significant mismatch between Vision and Strategy. Proposed development in Feniton is not ‘limited’ – it is excessive for a tier 4 village.

References: Chapter 3 – 3.4 Hierarchy of Settlements Chapter 5 – Strategic Policy SD18 – Development actions at Feniton. Strategic Policy SP01 – C, D, E.

Employment site Otry_20

The plan to have an Employment site and an entrance to the site just off Green Lane is hugely problematic. Green lane is a favourite for pedestrians and dog walkers, is mostly a single track road, with a substantial parts of it not wide enough for a car to pass a walker comfortably. It is unlit, has pinch points, blind bends, and no pavements. It also has an ancient sunken portion subject to rock falls, blocking the lane. It seems highly inappropriate to construct an Employment site at the current planned location with an entry/exit onto Green Lane. I feel that the EDDC need to review the evidence more carefully to make a more informed decision. Furthermore, the proposed size of Otry_20 is inconsistent with EDDC's Spatial Strategy and is once again disproportionate to the scale of Tier 4 Feniton.

References: Chapter 2 The Vision – 2.10, Objective 1, Objective 2, Objective 9, Objective 10 Chapter 3 The Spacial Strategy SP01- C, D, E Service Villages 5.11 – SD18 – Otry_20

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I strongly feel that the Tier 4 status of Feniton should be properly reflected in the proposals, so that the Strategy and Vision can be re-aligned. This would mean imply removing Feni_08 and Otry_20 from the draft local plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Matthew John Keen

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.:

In relation to Feniton and the draft local plan, I argue that the general public's lack of detailed planning knowledge may result in an imbalance between public participation and the planners' expertise, potentially leading to decisions that are not fully representative of the community's interests. My point are.

1. Access to Information: A key argument is that the public may not have had adequate access to the necessary information or resources to understand the complex aspects of the draft local plan. This lack of transparency could lead to a situation where the planners, who are familiar with technical planning details, have an unfair advantage in shaping the final plan.

2. Engagement and Consultation: The consultation process may not have been designed in a way that actively encouraged or facilitated meaningful participation from the general public. This could be seen as an issue if the planners relied on public feedback that was not fully informed or representative due to barriers such as limited

time for consultation, jargon-heavy documents, or insufficient outreach to underrepresented groups.

3. Complexity of the Plan: Planners often use technical language and complex planning terms that may be inaccessible to the general public. This complexity could be seen to skew the process in favor of the planners and limit the public's ability to provide informed, constructive feedback.

4. Bias Toward Planners' Expertise: There could be a perception of bias where the planners, due to their expertise and experience, may disproportionately influence the plan in ways that do not fully account for the preferences or needs of the local community, especially if the public's input is not adequately considered or if the planners dismiss concerns that could be seen as less "technical."

5. Legal Compliance and Fairness: If the consultation process or the way the local plan has been developed is not legally compliant (e.g., failure to meet statutory requirements for public consultation or accessibility), it could be argued that the process has not been fair, which may undermine the legitimacy of the plan.

I argue that the lack of consideration for the emails, comments, and petition from over 500 residents could indicate bias in favor of developers, and not adequately consider the views of Feniton residents.

"I believe that the consultation process for the Feniton development has been flawed in that substantial public input—specifically emails, comments, and a petition signed by over 500 local residents—was not given due consideration simply because it was not submitted through the Common Place platform. This restriction may have unduly limited the scope of public engagement and resulted in the voices of the community being sidelined in favor of developers' interests.

The fact that these responses were dismissed due to the format of submission could be argued to demonstrate a systemic bias that favors the developers' position, as opposed to a fair and transparent process that genuinely takes into account the concerns and views of local residents. Public consultation is a critical component of the planning process and must be inclusive, accessible, and responsive to all forms of input, not just those submitted via specific channels that may not be accessible or widely known to all residents. By disregarding legitimate forms of input from a large group of residents, the process risks undermining the principles of fairness, equality, and genuine community involvement in the planning process."

Additional Points

1. Inclusivity of Consultation: A truly inclusive consultation process should allow all forms of feedback, particularly in a community as engaged as Feniton. The failure to consider the petition and individual emails could be perceived as a procedural oversight that disproportionately disadvantages the community.

2. Bias Toward Developers: The rigid reliance on the Common Place platform, which may not have been widely promoted or accessible to all residents, could create an unintentional bias towards the developers' interests. Developers and planners are typically aware of and comfortable with formal submission processes, while local residents may not be as familiar with these platforms.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Feniton is a community that is all too familiar with regular flooding, a problem that has been well-documented over time. Yet, it appears that East Devon District Council (EDDC) has overlooked the historical evidence of flooding, including instances of raw sewage being released into the environment.

The reality is that further development will only exacerbate the flooding situation. Promises made by previous developers to alleviate flood risks have, to date, not been fulfilled, leaving residents vulnerable.

The Flood Alleviation Scheme (FAS) was designed to accommodate only the current number of homes in Feniton, and its limited scope means it merely diverts floodwaters to the eastern side of the village. This shift will result in increased flooding at Pattersons Cross, the main access route to the village from the A30, which already becomes impassable during heavy rainfall—without the added burden of redirected floodwater.

Despite millions of pounds of public money having been spent on the scheme, there is no tangible evidence to show that the FAS is effective in reducing flood risk, leaving Feniton's residents facing ongoing, unresolved flood threats. The situation demands urgent reassessment, as the current approach is insufficient to protect the community and prevent future disasters.

It is an undeniable fact that our sewerage system is operating beyond its capacity, leading to stormwater overflows that enter the drainage system, intensifying the risk of sewage flooding. This critical issue is not only unresolved but continues to threaten the health and safety of our community.

The evidence is clear and well-documented: roads and homes regularly flood with raw sewage, creating hazardous conditions and significant distress for residents. The severity of this problem is highlighted in Chapter 2 The Vision, Objective 1, and Chapter 7 Flood Risk Strategic Policy AR01 – C, which emphasize the urgent need for action.

This ongoing failure to address the underlying issues of the sewerage system exposes our community to unacceptable risks, and it is imperative that this is rectified before further development compounds an already critical situation.

At the 2014 Super Inquiry, the Planning Inspector, with the full agreement of East Devon District Council (EDDC), determined that Feniton was not a sustainable location for further development. Nothing has changed since that determination—aside from the untested Flood Alleviation Scheme (FAS)—to address the significant issues highlighted during that inquiry.

Feniton remains critically underserved in several key areas:

Public transport is woefully inadequate, offering limited options for residents.

All roads into Feniton are narrow, with dangerous pinch points, poor lighting, and are ill-suited to handle heavy traffic.

The recent closure of the Ottery Road/Green Lane junction for FAS works provided a stark reminder of how vulnerable the village is to traffic congestion. Delays in and out of the village were extensive, showing how even temporary disruptions can severely impact daily life.

When Pattersons Cross floods—as is expected with increased rainfall due to the FAS—all traffic will be forced to reroute through Feniton Old Village or via a series of narrow lanes connecting to the A373 and M5. These routes are unsuitable and unsafe for heavy traffic, posing a serious risk to public safety.

Feniton Primary School is already at capacity and urgently needs expansion, yet there are no plans to address this growing demand.

Local GP services are also at capacity, struggling to meet the needs of the community.

Despite all of this, there has been a clear disregard for the planning history and evidence that show this scale of development in Feniton is unsustainable.

The proposals for Feniton directly contradict the vision and strategy outlined in the local plan, and by extension, they are at odds with national policy. Continuing to push for development in Feniton, given the current infrastructure and services, is not just impractical—it is irresponsible. The issues raised in the 2014 inquiry remain unresolved, and any further development would exacerbate these problems, rather than solve them.

Funded by East Devon District Council (EDDC), Devon Communities Together (DCT) conducted a survey that identified a clear local need for only 13 dwellings in Feniton by 2027. Yet, the number of houses planned for Feniton in the draft local plan is shockingly disproportionate to this identified need and fails to reflect the findings of the DCT survey, which was itself funded by EDDC.

When the Strategic Planning Committee realized that the number of houses allocated for Feniton far exceeded the local demand, the Chairman instructed the Officer to rewrite the Strategic Policy SP01 in the Regulation 19 version, altering the plan to justify the inflated development proposal. This revision has created a serious mismatch between the stated vision and the actual strategy, leaving the local community vulnerable to unchecked overdevelopment that does not align with their needs.

The proposed development for Feniton is no longer ‘limited’—it is massive for a Tier 4 village, and it threatens to undermine the character and sustainability of the settlement.

The scale of this proposal contradicts the principles outlined in Chapter 3 (3.4 Hierarchy of Settlements) and Chapter 5 (Strategic Policy SD18), which emphasize the need for balanced, context-sensitive growth. Furthermore, Strategic Policy SP01 (C, D, E) underscores the need for a strategic approach that prioritizes local needs and sustainable development, principles that are clearly being disregarded.

This proposal is not just misguided; it is an imposition on Feniton's future, one that risks harming the very essence of the community. The voices of local residents and the evidence from the DCT survey must not be ignored. Feniton deserves a plan that respects its scale, infrastructure, and genuine needs, not one that prioritizes growth for growth's sake.

Site Otry_20 is located in an area that poses significant safety concerns. The only access point to the site is off Green Lane, a narrow, single-track road that is often not wide enough for cars to pass pedestrians without the pedestrian having to step into the hedge. It is unlit, has dangerous pinch points, blind bends, and a complete lack of pavements, making it extremely hazardous for pedestrians, cyclists, and drivers alike. There are also two single-track, over-the-railway-line bridges, one of which is situated at a blind bend. Furthermore, a section of the lane is an ancient sunken portion, which is susceptible to rock falls, frequently blocking the road.

The dangers of Green Lane are starkly illustrated in a video available on YouTube, which details many of these issues. The blind bends at either end of this lane are especially treacherous, and they pose a real risk to anyone attempting to navigate this route, whether on foot or by vehicle.

Similarly, Feni_08, which is also proposed for development, is accessed via Broad Lane, which shares many of the same hazards as Green Lane, including narrowness, lack of lighting, and dangerous bends. This further compounds the concerns over the safety of the proposed developments.

It is concerning that Otry_20 was brought forward for consideration after the Regulation 18 draft consultation, leaving EDDC with insufficient time to properly review all the

relevant evidence and consider the full scope of the safety risks. As a result, this site has not been adequately scrutinized, and the community's concerns have not been fully addressed.

Additionally, the proposed size of Otry_20 is entirely out of step with EDDC's Spatial Strategy and is grossly disproportionate to the scale of Feniton as a Tier 4 settlement. This overdevelopment would place an immense strain on local infrastructure, safety, and the environment. The allocation for industrial, warehousing, and distribution uses on Otry_20 is also disproportionate compared to similar employment sites in Tier 1 (Exmouth), Tier 2 (Axminster), and Tier 3 (Ottery St Mary and Seaton), further highlighting the mismatch between the development and the intended role of Feniton as a small rural village.

The development of Otry_20 contradicts several key objectives laid out in the Spatial Strategy—particularly those outlined in Chapter 2 (The Vision), Chapter 3 (The Spatial Strategy), and Strategic Policy SP01 (C, D, E). These documents emphasize the importance of sustainable, context-sensitive growth that aligns with the needs and capacities of each settlement. Otry_20, in its proposed scale, flies in the face of these guiding principles and would undermine the integrity of Feniton as a small, rural community.

The proposed development at Otry_20 is unsafe, unsustainable, and misaligned with the broader objectives of the local plan. The risks to safety, infrastructure, and the community's wellbeing are too significant to overlook, and this proposal must be reconsidered with the utmost care.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: For the sake of our community's future, and to preserve the very heart of Feniton, we must call for a plan that reflects the reality of our village's needs and limitations. Feniton is a small, Tier 4 settlement—an area that simply cannot bear the weight of excessive development without losing its essence. We urge the decision-makers to take a step back, realign the

strategy and vision, and ensure that growth is sustainable and in harmony with our community's true needs.

We ask for the removal of Feni_08 from the draft local plan, or at the very least, a drastic reduction in the number of houses allocated for Feni_08. Our village has already stretched its resources to the limit, and further overcrowding will only lead to a loss of what makes Feniton so special. Our schools are at capacity, our roads are already struggling, and our infrastructure cannot keep up. This is not just about numbers—this is about preserving the spirit of Feniton, the place we call home.

We also ask for the removal of Otry_20 from the draft local plan entirely. The proposed development threatens to overwhelm our narrow lanes, flood-prone areas, and already fragile community services. It's too much, too fast, and it will irreversibly change the landscape we hold dear. The heart of Feniton beats in its quiet, close-knit nature, and we fear that if these plans go ahead, we will lose that forever.

Please, listen to the voices of those who have lived here, loved here, and built their lives here. We deserve a plan that respects Feniton's character, its capacity, and its future. The time to act is now, before it's too late.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Jamie Lawrence

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: N/A

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I can't comment on whether the draft local plan has been developed in a legally-compliant way, as I do not have legal training and am not privy to the processes followed.

However, it is important to point out that in previous consultations, feedback from the community – including a petition signed by over 500 residents – was not taken into consideration because it did not come via Common Place.

This very important feedback from the local community was not reported to the Strategic Planning Committee by EDDC, undermining and ignoring the views of those from Feniton with both knowledge and a stake in the future of the village.

The Common Place system, EDDC's preferred method of commenting, is complex and time-consuming to use, making it harder for residents – especially those lacking digital skills – to make their views known. This is discriminatory, undemocratic and goes against British Values.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: N/A

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: N/A

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Overall, the proposals feel rushed, ill thought through and at odds with infrastructure constraints in the village. My major concern is the lack of sustainability with these proposals.

Notably, at the 2014 Super Enquiry, the Planning Inspector determined, with EDDC agreeing, that Feniton was not a sustainable location for further development. What has changed since then? Only the Flood Alleviation Scheme (FAS) has started.

Overall, it feels there has been a total disregard of evidence and planning history indicating that this scale of development in Feniton is unsustainable. The proposals for Feniton are not consistent with the local plan's stated vision and strategy and by extension with national policy.

Community cohesion within the village would be destroyed, with the current residents feeling disregarded and unvalued, with our concerns and lives being steamrolled by a Council which doesn't understand the area or our concerns, and new residents being brought in who will be adding to the issues of our village. The "old" and "new" residents will struggle to co-exist peacefully, and presumably this community cohesion has been disregarded in any planning.

In terms of sustainability, there are multiple serious issues. Firstly, a lack of adequate transport. All the roads into Feniton are very narrow, with major pinch points, they're mostly unlit and unsuitable for heavy traffic. This became very apparent recently when the Ottery Road/Green Lane junction was closed for the FAS works. Delays were inevitable and extensive and disruptive. This would get a lot worse under the new proposals.

Flooding at Patterson's Cross would also be a major issue. It will flood during heavy rain, as noted by the FAS developers. All vehicles will then need to access the village via the Old Village, or via the A373 and M5. These lanes are not suitable for heavy traffic, which will get much worse should the proposals go ahead.

Furthermore in terms of infrastructure, the current primary school in Feniton is at capacity and in need of a building upgrade, which could not happen on the current site as it is not big enough. Local GP services are also at capacity – where would the residents in the new houses go?

The only concession to the infrastructure challenges in the proposals seems to be 1060m of new water mains pipes to be laid by 2035.

Specific comments related to flooding and sewerage in the village:

Flooding is a massive issue in Feniton and it does not seem like EDDC has considered historic flooding, including raw sewage, when putting together these proposals. Previous promises of flood risk alleviation measures from developers have not resulted in any action.

The Flood Alleviation Scheme (FAS) developers have said that it will increase the flooding risk at Patterson's Cross, which already floods in heavy rainfall. Adding more houses – and increased flooding risk from the development, without additional alleviation measures – seems ill-advised. The FAS has been designed to handle the existing flooding risk, not scoped to deal with increased risks from major developments.

Finally, it's a well known fact that there is an unresolved capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding. It is well documented that roads and homes often flood with raw sewage.

Specific comments on disproportionate allocation:

Devon Communities Together (DCT) identified a local need for only 13 new dwellings up to the year 2027 – this was funded by EDDC. Therefore the number of new houses in the draft plan does not make any sense and is in no way aligned to what was identified in the survey.

After the Strategic Planning Committee realized the number of houses allocated for Feniton were far greater than local need, the Chairman instructed the Officer to rewrite the Strategic Policy SP01 in the Regulation 19 version, in order to justify the increased development proposed for Feniton. There is now a mismatch between vision and strategy. How can this in any way be justified?

Overall, the proposed development is massive for a tier 4 village and can't be justified in any way based on local need.

Specific comments on employment site, known as Otry_20:

I do not understand the thinking behind this location, the site is fundamentally unsafe.

The entrance will be off Green Lane, a mostly single track road – with some parts not even wide enough for a car to pass a pedestrian without the pedestrian pressing themselves into the hedge. The road is unlit, has many pinch points, blind bends, very few pavements and two single track bridges over the railway line, one of which has a blind bend. See this video on YouTube detailing some of the massive issues here: <https://www.youtube.com/watch?v=6q7DQ6mpgh4>.

It should also be noted that Feni_08 accessed via Broad Lane has very similar issues to Green Lane.

Otry_20 was brought forward for consideration after the Regulation 18 draft consultation. How has EDDC even had enough time to consider all the evidence effectively to make a decision? Especially in light of how big the site is and its impact on the village. The sheer size of Otry_20 does not align with EDDC's Spatial Strategy and is totally disproportionate to the scale of Tier 4 Feniton.

It also has a disproportionate allocation for industrial, warehousing and distribution than employment sites allocated for the Principle Centre Tier 1 Exmouth, in Tier 2 Axminster and Tier 3 Ottery and Seaton. This makes absolutely no sense and is negligent considering Feniton is a Tier 4 Village.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The plan needs to be sustainable – and that means reflecting the Tier 4 status of Feniton in these proposals. The Strategy and Vision needs to be realigned, until adequate infrastructure and mitigation has been put into place.

In terms of actions, that means:

Removal of Feni_08 from the draft local plan, and at least a reduction in the number of houses allocated for Feni_05.

Removal of Otry_20 from the draft local plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: N/A

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: N/A

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

NOTE: I am unable to attach my name to this form in Commonplace. My name is Jamie Lawrence and I am a resident of Feniton.

Overall, the proposals feel rushed, ill thought through and at odds with infrastructure constraints in the village. My major concern is the lack of sustainability with these proposals.

Notably, at the 2014 Super Enquiry, the Planning Inspector determined, with EDDC agreeing, that Feniton was not a sustainable location for further development. What has changed since then? Only the Flood Alleviation Scheme (FAS) has started.

Overall, it feels there has been a total disregard of evidence and planning history indicating that this scale of development in Feniton is unsustainable. The proposals for Feniton are not consistent with the local plan's stated vision and strategy and by extension with national policy.

In terms of sustainability, there are multiple serious issues. Firstly, a lack of adequate transport. All the roads into Feniton are very narrow, with major pinch points, they're mostly unlit and unsuitable for heavy traffic. This became very apparent recently when the Ottery Road/Green Lane junction was closed for the FAS works. Delays were inevitable and extensive and disruptive. This would get a lot worse under the new proposals.

Flooding at Patterson's Cross would also be a major issue. It will flood during heavy rain, as noted by the FAS developers. All vehicles will then need to access the village via the Old Village, or via the A373 and M5. These lanes are not suitable for heavy traffic, which will get much worse should the proposals go ahead.

Furthermore in terms of infrastructure, the current primary school in Feniton is at capacity and in need of a building upgrade, which could not happen on the current site

as it is not big enough. Local GP services are also at capacity – where would the residents in the new houses go?

The only concession to the infrastructure challenges in the proposals seems to be 1060m of new water mains pipes to be laid by 2035.

Specific comments related to flooding and sewerage in the village:

Flooding is a massive issue in Feniton and it does not seem like EDDC has considered historic flooding, including raw sewage, when putting together these proposals. Previous promises of flood risk alleviation measures from developers have not resulted in any action.

The Flood Alleviation Scheme (FAS) developers have said that it will increase the flooding risk at Patterson's Cross, which already floods in heavy rainfall. Adding more houses – and increased flooding risk from the development, without additional alleviation measures – seems ill-advised. The FAS has been designed to handle the existing flooding risk, not scoped to deal with increased risks from major developments.

Finally, it's a well known fact that there is an unresolved capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding. It is well documented that roads and homes often flood with raw sewage.

Specific comments on disproportionate allocation:

Devon Communities Together (DCT) identified a local need for only 13 new dwellings up to the year 2027 – this was funded by EDDC. Therefore the number of new houses in the draft plan does not make any sense and is in no way aligned to what was identified in the survey.

After the Strategic Planning Committee realized the number of houses allocated for Feniton were far greater than local need, the Chairman instructed the Officer to rewrite

the Strategic Policy SP01 in the Regulation 19 version, in order to justify the increased development proposed for Feniton. There is now a mismatch between vision and strategy. How can this in any way be justified?

Overall, the proposed development is massive for a tier 4 village and can't be justified in any way based on local need.

Specific comments on employment site, known as Otry_20:

I do not understand the thinking behind this location, the site is fundamentally unsafe.

The entrance will be off Green Lane, a mostly single track road – with some parts not even wide enough for a car to pass a pedestrian without the pedestrian pressing themselves into the hedge. The road is unlit, has many pinch points, blind bends, very few pavements and two single track bridges over the railway line, one of which has a blind bend. See this video on YouTube detailing some of the massive issues here: <https://www.youtube.com/watch?v=6q7DQ6mpgh4>.

It should also be noted that Feni_08 accessed via Broad Lane has very similar issues to Green Lane.

Otry_20 was brought forward for consideration after the Regulation 18 draft consultation. How has EDDC even had enough time to consider all the evidence effectively to make a decision? Especially in light of how big the site is and its impact on the village. The sheer size of Otry_20 does not align with EDDC's Spatial Strategy and is totally disproportionate to the scale of Tier 4 Feniton.

It also has a disproportionate allocation for industrial, warehousing and distribution than employment sites allocated for the Principle Centre Tier 1 Exmouth, in Tier 2 Axminster and Tier 3 Ottery and Seaton. This makes absolutely no sense and is negligent considering Feniton is a Tier 4 Village.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The plan needs to be sustainable – and that means reflecting the Tier 4 status of Feniton in these proposals. The Strategy and Vision needs to be realigned, until adequate infrastructure and mitigation has been put into place.

In terms of actions, that means:

Removal of Feni_08 from the draft local plan, and at least a reduction in the number of houses allocated for Feni_05.

Removal of Otry_20 from the draft local plan.

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: N/A

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: N/A

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: N/A

Full name: Desmond Maddock

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I suggest this plan is not legal because using an online portal discriminates against the elderly who tend not to be computer savvy. This does not provide the right level of community involvement in an area where 37% of the population are aged over 60. Many of these residents would not have downloaded the East Devon App meaning their awareness of any local plan was already extremely unlikely and, if made aware, their options to respond are far too complicated and difficult to navigate. When looking at the plan on your website - although you show numerous comments of reply - there is no easy way to see which parts of the plan these replies relate to which also means you are not communicating the facts sufficiently enough to meet due diligence. I also believe the Sidmouth_31 part of the plan is not legal because you detail this development as one which “could be developed” which is a highly ambiguous statement lacking vital detail. You have not explained why previous rejections for this plot being developed have suddenly been overturned when nothing has changed, simply stating that you could be “squaring off the built edge”. This “built edge” dates back to housing built in the 1960s when regulations were different and the issues you should be considering are current environmental problems of building on today's National Landscape. The same issues that have resulted in you blocking many other developments within the National Landscape apply to this site and you have given no sound argument as to why they are being ignored. You also mention access concerns without offering any explanation of how these could be satisfactorily resolved - making this part of your plan very weak, lacking detail and not fit for progression.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy

or paragraph. Please be as precise as possible.: All residents should receive details of this plan by mail along with the option to respond by letter to ensure all opinions get voiced. The field on Burscombe Lane (Sidmouth-31) should be removed from the plan and and other sites (of which there are many) which fall outside of the National Landscape should be considered instead.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: To develop Sidmouth-31 (Land east of Burscombe Lane / west of Windsor Mead) you are choosing to ignore other much more suitable areas to build which have easier access and more cost effective development potential, that are outside of our precious National Landscape where building should only ever be considered as a last resort. Here are the main reasons why this site should continue to be rejected for development

Access - Access via Burscombe Lane has been refused for previous developments as this lane is very narrow allowing only single car access. The road is prone to subsidence and extremely dangerous to exit onto Sidford High Street with several blind spots also causing issues when turning into Burscombe Lane. Farm vehicles, tractors and trailers frequently cause disruption in Burscombe Lane which usually means that cars have to mount the pavement to pass in the narrow parts of this road. Obviously this is not ideal and dangerous practise. You mention Windsor Mead as an alternative entry route but this is also a very narrow road with the same problems of its junction onto Sidford High Street being very dangerous to navigate. Currently any entry route from Windsor Mead would have to be positioned on land which is private property as the existing houses completely block the perimeter of the field. If requiring compulsory purchase to access this land substantial cost gets added to the project along with considerable disruption to a small cul-de-sac.

Wildlife - Within this field there are bats, owls, dormice and many species of birds. The field is recognised as being part of the hunting zone for bats from Beer Quarry Caves and these should be protected. RSPB voice concerns about the reducing numbers of many bird species and removing this vibrant piece of countryside will make this situation even worse. Badgers are also a protected species and there are many families of badgers in this area. The area is ringed by Devon Hedges which also carry environmental protection orders.

Transport - Other potential sites in Sidmouth fall within easy access to public transport. Sidmouth_31 is a long walk to a bus stop where buses run twice a day meaning all house occupants would need cars adding to the pollution and traffic concerns mentioned.

Infrastructure - Schooling, and public health services are all over stretched and if new houses get built there must be a commitment agreed and in place to ensure additional services can be provided. Our local sewerage plant is extremely dated and unlikely to be able to cope with additional properties. We already see the pollution caused by sewerage spills on our coastline and, until steps have been taken to prevent this - extra building should not be allowed.

Drainage - there is a vast amount of water sent down the hill from Core Hill Woods - so much so that Burscombe lane becomes a river in heavy rainfall. The field of Sidmouth_31 is like a bog in the winter months acting as vital drainage for this water and - if built on - would potentially cause flooding wherever the water gets diverted to or on land beyond the development. NB A video can be supplied of water running down Burscombe lane to demonstrate this point.

Noise Pollution. You mention that the view might not be affected by this build (which I disagree with) but it is also important to consider noise pollution. Currently - all you can hear when standing in this field is birdsong. New housing comes with the required new technology of things like Heat Pumps which emit quite loud humming noises (like air conditioning units). This is another reason to avoid building on National Landscapes.

View - the existing houses at Windsor Mead and Corefields are over 50 years old and have well established screening of trees and hedgerows making them barely visible from higher up. They are also at the lowest point of the valley. New houses would be very noticeable and have a significant impact on a view much admired by people walking to East Hill Strips and Core Hill Woods.

Cost Effectiveness - The strongest message regarding new housing is the need for it to be affordable - but this plot offers the least cost effective solution. Any building on National Landscapes comes with substantial restrictions and these required planning restrictions of single storey dwellings, suitable choice of building materials, and rigid

rules about positioning of reflective surfaces etc add substantial cost to any building project at Sidmouth_31. This is another reason why other sites should be prioritised instead of this one.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: It is impossible to answer yes because I do not know who else you are cooperating with. I know that Highways have not even been consulted yet - who I firmly believe will reject the proposal. What other departments will be consulted and will they include environmental groups such as National Landscapes and CPRE (The Countryside Charity)

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Frances Mutter

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I do not have the appropriate qualifications or knowledge to comment on this section.

But I do believe that previous comments, emails, and petitions from residents was not taken into considerations as it was not submitted via Common Place.

I understand that these vital public comments were not reported by EDDC to the Strategic Planning Committee, therefore ignoring the opinions of the locals in Feniton.

EDDC's preferred method of commenting is the Common Place System. It is complicated and very time consuming effectively putting people off locals trying to put their point across. This could be argued to be discriminatory and undemocratic and contravenes British Values.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: It is well known that Feniton (the new and old village) floods regularly – properties and roads. I live in old Feniton where the 'road' to get out of the village floods and can be impassable, that is if we can even get out of the old village due all the surface water running like a river down to the old village. There have been occasions where we can't even get the car out of the drive due to level of the water. On these occasions, I have waded with wellington boots, up through the torrent of water coming down Broad Lane (which is unsafe to walk through as it is so deep and fast flowing and cars trying to get out the village) to try and catch the train. But the train service is unreliable and when it is so wet, the trains are cancelled. The new flood relief scheme in the new village is only

going to serve the volume of houses that are currently there now, not any more. In the old village, we are waiting for a similar relief scheme. More building will only make the situation much worse with regards to flooding and with more commuters not being able to get to work.

I have been here 10 years and in this time, I have stopped trying to walk around the lanes due to the increased volumes of traffic and size of vehicles. I note that on Plan 19, pavements will be built with cycle lanes – great idea but where are the Council going to have room as there is not even room for 2 cars to get by each other let alone a pedestrian. You take your life in your hands if you try to go for a walk. I know dog walkers who have to put their dogs in their cars and drive them out of the village to give them a walk as it is so unsafe. And the Government promotes increasing exercise in the great outdoors – not in Feniton!

How is the sewerage issue going to be addressed? The sewerage system is not fit for purpose with SWW collecting sewerage but faecal matter often seen in the road or in people's garden or home. A lovely advert to come and buy a new home in Feniton!

The public transport here is terrible. I have already alluded to an unreliable train service, even when there is not poor weather, I gave up trying to commute into Exeter as the service was so unreliable. The bus service is also not frequent or fast enough and doesn't cover and wide enough area.

Schools/medical centres/dentists all over subscribed and cannot cope.

Does Feniton really need this volume of houses when Cranbrook, which is so close to us, will be expanding from 3000 to 8000 houses and has the infrastructure already there?

Employment Site Otry_20 is not needed here.

It is in a totally unsafe location and The access is on a single track lane, blind bends, no pavements. It would be totally unsafe to build this here and the increased traffic along Ottery Road, and on Green Lane makes no sense at all. Ottery Road also floods

and can be impassable. It also seems totally out of proportion for a village setting. Please reconsider this.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I am not against increased housing but the issues I have addressed need to be rectified first. There should be a substantial reduction in the number of houses allocated for Feni_08 and the Removal of Otry_20 from the draft local plan, please. Thank you for reading this.

Full name: Sally Nowell

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Regarding planning for houses and industrial estate for Feniton I am totally against it. The roads in and out of Feniton cannot take any more traffic as it is there are accidents waiting to happen. The thought of an extra 200 cars on these narrow lanes is terrifying. Delivery vans and lorries are also larger these days and with few pavements its dangerous for pedestrians and children being walked to school. Extra housing will not help the flooding problems and I understand that school and doctors surgery are full to capacity. Looking at the 2007 photograph of the triangular green in old Feniton you can see how the vehicles have ruined it by cutting corners.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: However, it's unclear to me if the plan has been developed legally due to the following:

While I commend East Devon District Council (EDDC) for encouraging the public to 'Have Your Say', they insist the public use the Common Place system. It is complex, time consuming and deters the common man/woman from commenting.

Although a professional, I have spent many days trying to formulate my responses and, have also spent time trying to help others struggling. (I am fortunate that I have that time).

In previous consultations, emails, comments and a petition signed by over 500 Fenitonians were not reported, and therefore not considered by the Strategic Planning Committee as they were not submitted via the Common Place system. Effectively, the views of Feniton were ignored.

Common Place does not account for those that have no access to the internet or printer and therefore the on line form or paper version. This contravenes EDDC's own Equality Policy.

I believe the Common Place system is undemocratic, unfair and discriminatory. It also contravenes British Values and The Equality Act 2010.

Finally, although in a private, un-minuted meeting, I'm led to believe that Feniton Parish Council was refused to make representation on Otry_20, even though it was brought late to the table. The reason given that it is in the Parish of Ottery St Mary (OSM), although will have little bearing on OSM but has the ability to have a huge impact on the lives of Feniton residents.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Make it easier for Jo Public to comment.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Flooding:

Firstly I would like to comment that previous developers have promised the earth to help with the issues Feniton faces but have not delivered and often not appear to have been held to account.

It is well documented that Feniton regularly floods, not only with storm water but also sewage.

Perhaps because the draft local plan appears to have been developed rather swiftly, EDDC doesn't appear to have considered the historic flooding events in the village. What concerns many residents is that more development will mean increased flooding. At the recent planning meeting for Feni_06 which was approved, it was in my opinion, an insult to intelligence that installations of two water butts per household would help resolve flooding to any significant degree.

Kier, the company currently installing The Flood Alleviation Scheme (FAS) in Feniton has promised us that it will not cure flooding but only divert flooding away from homes and around the eastern side of the village. It is already known that it has been designed only to accommodate the current level of development in Feniton. We have been warned it will certainly increase flooding at Pattersons Cross, the main access route to and from the A30, which already gets cut off in times of heavy rain.

Despite the millions of public money having been spent on the FAS, we must remember that it is currently untested and there is no evidence of its efficiency!!

References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy
AR01 – C

Sewage:

It's a well known fact that there is an unresolved capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding. It has also been witnessed that raw sewage, (and other unsavoury associated contents, used condoms, tampons etc), spews up via manhole covers flooding Ottery Road. South West Water often discharges raw sewage into a local ditch. Not appreciating the risks, children have been witnessed playing in the foul water. Homes and gardens have also been flooded with sewage, neighbours told not to use their toilets and to 'stuff a duvet down the loo to stop it overflowing. While my home has not flooded to date, during heavy rain I have heard the dreaded 'glug, glug' from my toilet which induces anxiety..... and the stench is vomit inducing!! My bathroom often smells offensive.

Sewage spillage poses a massive health risk, especially to the vulnerable of our society as is well documented in Dr William Weirs report, Consultant Physician for Infectious Diseases, of which EDDC have been made aware and have been sent.

References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy
AR01 – C

Lack of Sustainability:

In 2014, at the expense of EDDC there was a Super Inquiry into the sustainability of Feniton. The Planning Inspector and EDDC agreed that Feniton was NOT a sustainable location for further development.

Apart from the FAS, there have been no other improvements in the infrastructure of the village to support the development suggested on the emerging local plan.

Vehicular access to the village is via mainly a network of lanes with pinch points, unlit, in places single track with minimal pavements. Many flood and become impassable, including Pattersons Cross, Station Road (including at the level crossing) and Colestocks Road leading to the A373, and subsequently the M5. They are all unsuitable for heavy traffic. The additional flooding and traffic, especially larger commercial vehicles will have a knock on effect for the surrounding lanes and villages.

Being unable to get in or out of the village causes residents much anxiety already and often limits our planned activities.

With the installation of the FAS, we have recently had insight into how increased heavy traffic will affect the village, especially when the Ottery Road/Green Lane junction was closed, causing traffic to use Feniton Old Village for access to and fro the village, subsequently causing extensive delays and significantly reducing road safety. This will become common place when Pattersons Cross floods more frequently due to the FAS.

For a quick walk, I would often take my dog up Green Lane but now choose to get in the car to go elsewhere, as you risk taking your life in your hands.

Increased housing will bring more families and children. However, Feniton Primary School is already at capacity which will lead to children having to be educated outside of the village, increasing the reliance on cars as a means of transport. This contradicts EDDC's vision of 'net zero carbon world'.

The school is also in great need of improvements and a significant upgrade.

Although, Feniton boasts a railway station, trains are limited in part due to the single track. Bus links are even more restricted.

Local GP services are currently struggling to serve the current population.

I note in the draft plan, the only infrastructure mentioned for Feniton is 1060m of new water mains to be laid by 2035.

In formulating this draft plan, EDDC appears to have disregarded evidence and planning history that Feniton is not a suitable location for the amount of development proposed.

The proposals for Feniton are not consistent with the local plan's stated vision and strategy; by extension with national policy.

References: Infrastructure Delivery Plan – Utl-1 Sustainability Appraisal Objectives 4, 5, 9, 10 and 13. Chapter 2 – 2.2 Chapter 3 – 3.38, 3.39, 3.40, 3.44, 3.45

Disproportionate allocation of houses compared to local need:

Recently a survey completed by Devon Communities Together (DCT), identified a local need for only 13 homes up to the year 2027. This survey was funded by EDDC. This means that the allocated housing in the draft plan for Feniton is disproportionate to the DCT survey.

When this was noted by a Strategic Planning Committee member, the Chairman instructed that Strategic Policy SP01 in the Regulation 19 version be reworded to reflect the number of houses in the draft plan, ignoring the DCT survey. This has caused a mismatch between vision and strategy.

SP01 now states ‘limited’ houses. However, proposed development for Feniton is far from limited; it’s huge for a tier 4 village.

References: Chapter 3 – 3.4 Hierarchy of Settlements Chapter 5 – Strategic Policy SD18 – Development actions at Feniton. Strategic Policy SP01 – C, D, E.

Employment site Otry_20:

Site Otry_20 is an unsafe location, totally unsuitable and will severely impact on road safety, especially for vulnerable road users.

This site is located off Green Lane which as most other lanes in Feniton is mostly single track, unlit, and with minimal pavements. Also, the entrance to the proposed site is between two over the railway line bridges, one single track with a blind bend. There are also blind bends at each end of the lane and it is so narrow in places, just wide enough for a car. Part is an ancient sunken lane where it can get blocked due to rock falls.

Please view the YouTube video which details the main issues -

<https://www.youtube.com/watch?v=6q7DQ6mpgh4>

Feni_08 is accessed via Broad Lane which has similar issues to Green Lane.

As Otry_20 was brought for consideration after the Regulation 18 consultation, it could be argued that EDDC hasn't had sufficient time to consider all the evidence regarding this site. The size of the site doesn't align with the Spatial Strategy and is disproportionate for a tier 4 village. Also, it would appear to have a disproportionately large allocation of industrial, warehousing and distribution than other employment sites in Tier 1, 2 and 3 locations.

Having been brought up in a small village, I moved to Feniton in 2017 from a large industrial town, wanting a quieter way of life and enjoy a rural village setting. Since moving to Feniton, I have seen the village constantly fighting development in order to reduce and minimize the problems it faces and to retain its community feel, character and charm. I consider the scale of development proposed for Feniton, especially Otry_20 will thoroughly undermine the village.

References: Chapter 2 The Vision – 2.6, 2.10, Objective 1, Objective 2, Objective 9, Objective 10 Chapter 3 The Spatial Strategy SP01- C, D, E Service Villages 5.11 – SD18 – Otry_20

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Until infrastructure in Feniton is drastically improved, I believe the emerging local plan should reflect the Super Inquiry of 2014 and the DCT survey.

I do appreciate there is a need for sustainable and affordable homes and therefore to ensure a sustainable plan, better reflect the tier 4 status of Feniton and realign the Strategy and Vision, my suggestions would be:

- Removal of Feni_08 from the draft local plan, or at least a reduction in the number of houses allocated for Feni_08, bearing in mind Feni_06 has already been approved.
- Removal of Otry_20 from the draft local plan.
- No further building until the effects of the FAS are known.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Alexander Pryor

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I am not a lawyer so cannot be sure if the section is legally compliant or not, but this 'consultation' process seems designed to make it impossible for the general public to comment, and I believe that in itself is not legally compliant.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The access roads and Green Lane itself are manifestly not suited to lots of industrial traffic. There are no foot paths on Green Lane meaning pedestrians have to dodge cars. I live opposite the proposed entry to the industrial site and walk my children to school down this road - it is single car-width in several places which already means cars/vans driving close to pedestrians. Also frequent instances where cars have to reverse to allow an on-coming vehicle to pass. It would be moronically stupid to deliberately bring lots of industrial traffic into this area.

The flood relief scheme currently being built will by design flood the main access road into the village (including access to the proposed industrial site) on a quite frequent basis making the site difficult to access. The alternative routes involve driving along narrow single-track roads and through Old Feniton (a small hamlet also manifestly unsuited to heavy through-traffic).

Regarding extra housing in the village, the Burlands Mead site has recently received planning permission that will already add many more homes to the village. Despite huge numbers of public comments, these plans have not provided sufficient car parking

spaces within the new development; have not addressed flooding problems; have not addressed sewage problems; have not considered outcomes of the recent Feniton housing needs survey; have not considered employment or transport links or school places or availability of health care. The village and local road network is already at capacity. Any further proposed development like the proposed Feni_08 site should not be allowed to proceed until these same issues have been looked at and resolved - widening access roads, improving transport links, improving sewage so we don't get such frequent over-spills, reducing flooding risks.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Ottery_20 from the proposal as this is manifestly unfit; and reduce the size of Feni-08 to a smaller area to reduce the impact on the village, and to reduce the extra flooding risk that further development will pose (to the existing village + the new development itself)

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Margaret Pinnuck

Proposal:

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: You state there will be limited development in Tier 4 settlements. How can 4.64 Hectares of land in the village of Feniton be considered as limited. I know it comes into OSM parish but very much impacts the village of Feniton. The entrance to this plot is between 2 railway bridges with very limited visibility. How can building 127 houses be considered modest development. How can this match your Net Zero policy. The majority of these households will drive cars. For the majority of the day we have a 2 hourly rail service. You discuss needing adequate sewage provision. Until our sewage works is upgraded no more houses can be built. A cycle track following the old railway line to Ottery St Mary and Sidmouth could help with sustainable transport. This is not in your plan

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Sustainable transport provision and pressure on SWW to upgrade sewage works needs to be in place before any development is considered

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: as above

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: as above

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Laura Richardson

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.:

In relation to Feniton, it's unclear as to whether the draft local plan has been developed in a legally compliant way. Without personal legal knowledge and as a member of the public, I do not feel qualified to make comment on this section.

- However, in previous consultations, emails, comments and a petition signed by 500+ residents was not taken into consideration as it was not submitted via Common Place.

- These vital public comments were not reported by EDDC to the Strategic Planning Committee, effectively ignoring the views of Fenitonians.

- EDDC's preferred method of commenting is the Common Place System. It is complex and extremely time consuming, effectively deterring Jo Public from 'Having Your Say' and making their opinions known. This is discriminatory and undemocratic, and contravenes British Values.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: N/A

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We cannot substantially withstand expansion of the village at present. We have lived here for 6 years and have been shocked by the extent of the flooding and sewage issues. I have listed details below as to all issues that make this development not sound:

Flooding:

- It's well documented that Feniton regularly floods.
- It would appear that East Devon District Council (EDDC) has not considered the historic evidence of flooding, including raw sewage.
- More development equals more flooding.
- With previous developers, promises of flood risk alleviation measures have not transpired.

- The Flood Alleviation Scheme (FAS) has only been designed for the current number of homes in Feniton. It will only divert flood water around the eastern side of the village, leading to increased flooding at Pattersons Cross, the main access route to the village, from the A30.
- In times of heavy rain, Pattersons Cross already becomes impassable, (without the additional flood water from the FAS).
- Despite millions of public money being spent on it, currently there is no evidence of the FAS's efficiency.

References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy
AR01 – C

Sewage:

- It's a well known fact that there is an unresolved capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding.
- It's well documented that roads and homes often flood with raw sewage.

References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy
AR01 – C

Lack of Sustainability:

- At the 2014 Super Enquiry, the Planning Inspector determined, with EDDC agreeing, that Feniton was not a sustainable location for further development.
- Nothing, apart from the untested Flood Alleviation Scheme (FAS), has changed within the village to address the issues raised in said Super Inquiry.
- Lack of adequate public transport.
- All of the roads into Feniton are narrow with pinch points, unlit and unsuitable for heavy traffic.
- Feniton has recently had an insight to the ramifications of increased traffic when the Ottery Road/Green Lane junction was closed for the FAS works. At times delays getting in and out of the village were extensive.

- When Pattersons Cross floods, (as is expected during heavy rain as a result of the FAS), all vehicles will have to access the village and surrounding areas via Feniton Old Village, or via the network of lanes and villages leading from A373 and M5. These lanes are highly unsuitable and unsafe for heavy traffic.
- Feniton Primary School is at capacity and in great need of a building upgrade.
- Local GP services are at capacity.
- There has been a disregard of evidence and planning history indicating that this scale of development in Feniton is unsustainable. The proposals for Feniton are not consistent with the local plan's stated vision and strategy and by extension with national policy.
- The only infrastructure noted in the draft local plan is for 1060m new water mains to be laid by 2035.

References: Infrastructure Delivery Plan – Utl-1 Sustainability Appraisal Objectives 4, 5, 9, 10 and 13. Chapter 3 – 3.38, 3.39, 3.40, 3.44, 3.45

Disproportionate allocation of houses compared to local need:

- Funded by EDDC, Devon Communities Together (DCT) identified a local need for only 13 dwellings up to the year 2027.
- The number of houses planned for Feniton in the draft plan is disproportionate and doesn't align to the DCT survey, funded by EDDC.
- When the Strategic Planning Committee realized the number of houses allocated for Feniton were far greater than local need, the Chairman instructed the Officer to rewrite the Strategic Policy SP01 in the Regulation 19 version, in order to justify the increased development proposed for Feniton. There is now a mismatch between vision and strategy.
- Proposed development in Feniton is not 'limited' but huge for a tier 4 village.

References: Chapter 3 – 3.4 Hierarchy of Settlements Chapter 5 – Strategic Policy SD18 – Development actions at Feniton. Strategic Policy SP01 – C, D, E.

Employment site Otry_20:

- Site Otry_20 is an unsafe location. The entrance to the site is off Green Lane, a mostly single track road, some parts not wide enough for a car to pass a pedestrian without said pedestrian leaning back into the hedge. It is unlit, has pinch points, blind bends, distinct lack of pavements and two single track, over the rail line bridges, one with a blind bend. There is a part that is an ancient sunken portion subject to rock falls, blocking the lane. There is a video that can be viewed on Youtube - <https://www.youtube.com/watch?v=6q7DQ6mpgh4> detailing some of the issues with Green Lane. The blind bends on either end of this lane are especially dangerous.
- Feni_08 is also accessed via Broad Lane which has very similar issues to Green Lane.
- Site Otry_20 was brought forward for consideration after the Regulation 18 draft consultation. It could be viewed that EDDC has not had sufficient time to consider all the evidence effectively.
- The size of Otry_20 does not align with EDDC's Spatial Strategy and is totally disproportionate to the scale of Tier 4 Feniton.

- It has a disproportionate allocation for industrial, warehousing and distribution than employment sites allocated for the Principle Centre Tier 1 Exmouth, in Tier 2 Axminster and Tier 3 Ottery and Seaton.

References: Chapter 2 The Vision – 2.10, Objective 1, Objective 2, Objective 9, Objective 10 Chapter 3 The Spatial Strategy SP01- C, D, E Service Villages 5.11 – SD18 – Otry_20

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To ensure a sustainable plan, better reflect the Tier 4 status of Feniton and realign the Strategy and Vision, until adequate infrastructure and mitigation has been put into place:

- Removal of Feni_08 from the draft local plan, or at least a reduction in the number of houses allocated for Feni_08.
- Removal of Otry_20 from the draft local plan.

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: Duty to co-operate refer to councils co-operating with each other and isn't really relevant to Feniton.

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Duty to co-operate refer to councils co-operating with each other and isn't really relevant to Feniton.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Hayley Roberts

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.:

This long winded document and the common place system is the most un-user friendly system. By insisting that everyone uses this unfamiliar and complicated method to comment on the local plan EDDC are preventing many people from having their say. This goes for this version, as well as the last round of consultations. It is undemocratic and unfair. By using a different system to the normal planning system the public are being prevented from contributing. Therefore the planning officers will not be making informed decisions. I would also like to object that Feniton Parish Council were not allowed to speak on site Otry_20 because it was outside the parish boundary, but in this version of the plan it is included within our settlement boundary. It is not within the settlement. It is agricultural land with 1 large agricultural building.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I would like to see a final consultation, widely advertised and easy to access.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Feniton has a flooding problem. The, yet-to-be-tested flood alleviation scheme is designed to move flood water, not remove it. It is also not designed to take extra water.

Site Feni_08 is uphill of the main flood area. Major, major suds will be required to prevent flooding downhill if this area is paved over.

The flood water will be moved from the village, to Pattersons Cross. This is the main entrance to the village and is expected to become impassable at times of heavy rain. Traffic will have to go through the old village, roads that are tiny, narrow, unit, single track etc. It was a disaster when the road was closed recently, at peak times it was taking people over an hour to leave the village. The school buses were late, coaches got stuck. Lorries got stuck. Old people didn't leave their houses because they were too scared to drive. I personally saw a car reverse into a moped. Car were damaged and the roads were damaged. Increased traffic, particularly large vehicles destined for Otry_20 will cause major problems.

Access to Otry_20 on Green Lane is also unsafe, even without the flooding problems. I use Green Lane to walk my children to school every morning. The proposed site of Ottery 20, for commercial/industrial purposes will use Green Lane as its entry point. The idea of extra traffic on that road terrifies me. Every morning I stand with my children, inches from cars as they edge over a single track railway bridge, often watching them reverse past my children when they realise, because it's a blind point, that another car is trying to come the other way. What happens when 2 lorries meet each other here? There are multiple blind points on the road, single carriage way, no footpaths and no street lights and secondary school children walk the other way, to the bus stop. The junctions at either end of the road are blind and single track, lots of pedestrians use the roads. The large vehicles from the flood relief scheme have also caused serious damage to the roads by the bridges. This ground is a made-up embankment and heavy vehicles are causing it to push out to the sides and therefore the road is collapsing. An increase in large vehicles on Green Lane will be very dangerous. This is not sound. Please watch my video of the road to help you understand why. Broad Road leading to Feni_08 isn't much better. <https://www.youtube.com/watch?v=6q7DQ6mpgh4> This size of this development is hugely disproportioned to the village, and isn't required by the governments new agenda/ statistics/demands for building. Why as a tier 4 village does it need a larger area for industrial, warehousing and distribution than Exmouth (Tier 1), Axminster (Tier 2) and Ottery St Mary and Seaton (Tier 3) The village has well known sewerage issues. Until these are rectified no more houses should be added to the system. SWW will not admit these problems, but they are real and hideous. Having to wade through raw sewage to get to the train station when it spills out of the drains is unacceptable. Residents having sewage backing up into their houses, because the pipes aren't big enough is unacceptable. Adding anything else to the system without improvements is not sound. Feniton is not a sustainable place for development. The

buses are trains are few and far between. We've had to buy two cars, because we cannot both reliably get to work and manage picking children up from school. The roads into the village are small, with pinch points and frequent flooding. In 2014 a super inquiry a planning officer determined that Feniton was not a sustainable location for large development. Nothing has changed since this inquiry apart from the flood relief scheme which is only mitigating the current flooding issues (and moving it away from houses and onto the road network). It is not designed to take extra capacity.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Removal of Otry_20 from the plan. Reduction in area of Feni_08 to reduce impact.

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: I don't know

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Daniel Rundle

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: In relation to Feniton, it's unclear as to whether the draft local plan has been developed in a legally compliant way. Without personal legal knowledge and as a member of the public, I do not feel qualified to make comment on this section.

- However, in previous consultations, emails, comments and a petition signed by 500+ residents was not taken into consideration as it was not submitted via Common Place.

- These vital public comments were not reported by EDDC to the Strategic Planning Committee, effectively ignoring the views of Feniton residents.

- EDDC's preferred method of commenting is the Common Place System. It is complex and extremely time consuming, effectively deterring members of the public from 'Having Your Say' and making their opinions known. This is discriminatory and undemocratic, and contravenes British Values.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Flooding:

- It's well documented that Feniton regularly floods.
- It would appear that East Devon District Council (EDDC) has not considered the historic evidence of flooding, including raw sewage.
- More development equals more flooding.
- With previous developers, promises of flood risk alleviation measures have not transpired.
- The Flood Alleviation Scheme (FAS) has only been designed for the current number of homes in Feniton. It will only divert flood water around the eastern side of the village, leading to increased flooding at Pattersons Cross, the main access route to the village, from the A30.

- In times of heavy rain, Pattersons Cross already becomes impassable, (without the additional flood water from the FAS).
- Despite millions of public money being spent on it, currently there is no evidence of the FAS's efficiency.

Sewage:

- It's a well known fact that there is an unresolved capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding.
- It's well documented that roads and homes often flood with raw sewage.

Lack of Sustainability:

- At the 2014 Super Enquiry, the Planning Inspector determined, with EDDC agreeing, that Feniton was not a sustainable location for further development.
- Nothing, apart from the untested Flood Alleviation Scheme (FAS), has changed within the village to address the issues raised in said Super Inquiry.
- Lack of adequate public transport. The buses are few and far between and the rail services have been reduced over the years and neither option is a reliable way to commute.
- All of the roads into Feniton are narrow with pinch points, unlit and unsuitable for heavy traffic. They are not safe at the moment for pedestrians, cyclist or horse riders and would become more dangerous with more larger vehicles entering the village.
- Feniton has recently had an insight to the ramifications of increased traffic when the Ottery Road/Green Lane junction was closed for the FAS works. At times delays getting in and out of the village were extensive.
- When Pattersons Cross floods, (as is expected during heavy rain as a result of the FAS), all vehicles will have to access the village and surrounding areas via Feniton Old Village, or via the network of lanes and villages leading from A373 and M5. These lanes are highly unsuitable and unsafe for heavy traffic.
- Feniton Primary School is at capacity and in great need of a building upgrade.
- Local GP services are at capacity.

- There has been a disregard of evidence and planning history indicating that this scale of development in Feniton is unsustainable. The proposals for Feniton are not consistent with the local plan's stated vision and strategy and by extension with national policy.
- The only infrastructure noted in the draft local plan is for 1060m new water mains to be laid by 2035.

Disproportionate allocation of houses compared to local need:

- Funded by EDDC, Devon Communities Together (DCT) identified a local need for only 13 dwellings up to the year 2027.
- The number of houses planned for Feniton in the draft plan is disproportionate and doesn't align to the DCT survey, funded by EDDC.
- When the Strategic Planning Committee realized the number of houses allocated for Feniton were far greater than local need, the Chairman instructed the Officer to rewrite the Strategic Policy SP01 in the Regulation 19 version, in order to justify the increased development proposed for Feniton. There is now a mismatch between vision and strategy.

- Proposed development in Feniton is not ‘limited’ but huge for a tier 4 village.

Employment site Otry_20:

- Site Otry_20 is an unsafe location. The entrance to the site is off Green Lane, a mostly single track road, some parts not wide enough for a car to pass a pedestrian without said pedestrian leaning back into the hedge. It is unlit, has pinch points, blind bends, distinct lack of pavements and two single track, over the rail line bridges, one with a blind bend. There is a part that is an ancient sunken portion subject to rock falls, blocking the lane. The blind bends on either end of this lane are especially dangerous.
- Feni_08 is also accessed via Broad Lane which has very similar issues to Green Lane.
- Site Otry_20 was brought forward for consideration after the Regulation 18 draft consultation. It could be viewed that EDDC has not had sufficient time to consider all the evidence effectively.
- The size of Otry_20 does not align with EDDC’s Spatial Strategy and is totally disproportionate to the scale of Tier 4 Feniton.

- It has a disproportionate allocation for industrial, warehousing and distribution than employment sites allocated for the Principle Centre Tier 1 Exmouth, in Tier 2 Axminster and Tier 3 Ottery and Seaton.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: In relation to Feniton, it's unclear as to whether the draft local plan has been developed in a legally compliant way. Without personal legal knowledge and as a member of the public, I do not feel qualified to make comment on this section. However I am concerned that a petition that was signed by 500+ residents, emails and comments have been ignored and not reported by EDDC to the strategic planning committee. Why have the views of people living local to Feniton been ignored? It appears EDDC prefer using the Common Place System as it is complex and time consuming puts people off from having their say. I think this is extremely discriminatory and undemocratic and goes against British Values.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wonder if the members of EDDC who are proposing the extra housing and industrial estate have visited Feniton and travelled along the roads to get to the proposed sites. I cannot imagine that they have because they would see Feniton is unsuitable for a higher volume of traffic, especially large industrial vehicles.

We are very grateful that the flood alleviation scheme has been supported and the work is nearly complete to stop homes from flooding. It is well documented that Feniton floods regularly. Access to my previous home in Feniton Gardens was often restricted because of flood. I was very fortunate that my home was never flooded but my neighbours were not so lucky. The roads are often impassable when we have heavy rain and although the flood alleviation will stop homes from being flooded, the water is directed to the roads so they will flood more. This means for periods of time access in and out of

Feniton will be impossible. The flood alleviation does not mean the village is safe from flooding. We were told by the scheme manager that this scheme is to prevent the current homes from flooding. Adding more homes to Feniton will take more green space where flood water can be absorbed, increasing the risk of flooding to homes. It is also well documented that sewage is a problem in Feniton. When we have heavy rain, the system is unable to cope and homes have become flooded with raw sewage. There is also the issue of lack of sustainability. At the 2014 Super Enquiry, the planning inspector determined, the EDDC agreeing, that Feniton was not a sustainable location of further development. I am unclear what has changed since that decision in 2014. The primary and secondary schools are still full. If all of these homes are built in Feniton, the local primary school does not have capacity for the children these homes will bring. This will be a cost to the council of bussing these children to another school. The roads in and out of Feniton are narrow. During the flood alleviation work the main road to Pattersons Cross was closed and it caused a great deal of congestion in and out of the village through the other routes. Our roads are not wide enough to deal with extra traffic, especially if that traffic is lorries that an industrial estate might bring. The doctor's surgeries are also full. People are unable to access an NHS dentist. There is a lack of public transport and the trains are stopping less frequently in Feniton since 2014. I feel that a disproportionate number of houses has been suggested for Feniton compared to other villages. Feniton is certainly not able to accommodate an industrial estate. The proposed industrial estate is in an unsafe location. Green Lane has no pavements but is a well walked part of the village and provides residents with access to fields for dog walking and enjoying the countryside. To put an industrial estate off this road will bring danger to pedestrians due to the lack of pavement, the pinch points, blind bends and single tracks. The industrial estate does not align with EDDC's Spatial Strategy and is totally disproportionate to the scale of Tier 4 Feniton. I live in Feniton because it is a safe and quiet place to raise my children. We have enjoyed access to walks around the village and through the fields. Feniton is a wonderful place to live with fantastic community spirit. I wanted to live in a village, not a town. If I wanted to have access to an industrial estate and be surrounded with houses then I would have moved elsewhere. Please stop destroying villages and taking choice away.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To ensure a sustainable plan, better reflect the Tier 4 status of Feniton and realign the Strategy and Vision, until adequate infrastructure and mitigation has been put into place:

Removal of Feni_08 from the draft local plan, or at least a reduction in the number of houses allocated for Feni_08. Removal of Otry_20 from the draft local plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: It's unclear if the draft local plan referring to Feniton has been developed in a legally compliant way, as there was a petition signed by 500+ residents, plus emails & comments which were NOT taken into consideration in previous consultations, as it was not submitted via Common Place. The result being that these reports weren't put to the Strategic Planning Committee by EDDC, & therefore depriving the local community of having it's - very vocal!! – voice heard. This is totally undemocratic, & makes a mockery of the whole system. This Common Place system is really difficult to navigate, & extremely time consuming, thereby deterring the average person from pursuing this way of commenting – yet another way for the opinions of the locals being diminished - again is totally undemocratic.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

This development is totally unsuitable for Feniton in many ways:-

1) Flooding – I've lived in Feniton for almost 25 years & have seen the village constantly being flooded in many areas time after time, with houses, gardens & roads repeatedly flooded – including mine ! Fortunately it didn't actually enter our house, but we had a 'moat' (with raw sewage) around our house more than once. Terrifying for all concerned. We have the final stages of the Flood Alleviation scheme being built as I write this. Hopefully it will fulfil its remit of keeping flooding from the resident's homes, however, we have been assured that this will just move the flood water down to under

the bridge at Pattesons Cross, thereby cutting off the village by its main artery – the very road which large vehicles will be using to go to & from the industrial site!!. They will then be forced to go through Feniton old village, which is a complete nightmare, as the roads are too narrow – single track in many places, all with no pavement for pedestrians & esp for school children, and we saw the havoc & chaos this caused during 6th -31st January this year when Kier construction company had to close this Ottery Rd/ Broad St for construction of the FAS. There were buses & lorries coming in opposite directions not able to pass each other, & causing a nightmare esp at commuter & school times. The village tolerated this inconvenience as we knew it was for – hopefully – a better Feniton, with fewer - hopefully, no - houses being flooded, but to have this situation as ‘normal’ is beyond intolerable. There WILL be accidents!!! Let’s pray they won’t be serious ie a pedestrian (child!?) seriously injured - or worse.

2) We had the Super Enquiry in 2014 (which I & many other Fenitonians attended) which deemed that Feniton is unsuitable for further development. Even with the, as yet untested, FAS, nothing has changed :-

a) The village will still have roads flooded. b) There is inadequate public transport. c) Schools are at capacity, as are the Doctors surgeries. d) Don’t get me started on the over flowing sewage system!!! Raw sewage being spewed onto the roads & pavements where pedestrians - esp children - get sprayed with this deadly mix daily! This raw sewage is often backed up into people’s homes!! More development guarantees more raw sewage. e) Promises made by previous developers have not materialised.

3) The number of houses planned for Feniton in the draft plan is disproportionate & doesn’t match to the DCT survey, funded by EDDC. The DCT identified a local need for just 13 dwellings up to 2027. On top of that, there are still brand new houses in Acland Rd still empty & up for sale! So why do we need any more??

There is now a mismatch between vision & strategy because when the Strategic Planning Committee realised that the number of houses allocated for Feniton were far higher than local needs, the chairman (unbelievably!) instructed the officer to rewrite the Strategic Policy SP01 in the reg 19 version, in order to justify the increased development proposed for Feniton!!! This then makes the proposed development in Feniton from ‘limited’ to huge for a tier 4 village

4) Sites Otry_20 & Feni_08 are both in unsafe locations as the roads are totally unsuitable. As previously stated, the roads are too narrow with no pavements, with 2 hump back railway bridges, one with a blind bend. The junctions at either end of this lane (Green Lane) are especially dangerous. All this highlights the dangers & unsuitability of adding more traffic to this area, plus, putting in an industrial site as well on such roads with heavy lorries will cause untold havoc, to say nothing of the further deterioration of the roads locally (we all know about the innumerable, dangerous potholes everywhere!)

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To ensure a sustainable plan, better reflect the Tier 4 status of Feniton and realign the Strategy and Vision, until adequate infrastructure and mitigation has been put into place:

To remove Feni_08 from the draft local plan – or at least reduce the number of houses allocated for Fen_08

To remove Feni_20 totally from the draft local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Feniton Parish Council's comments on the Regulation 19 Publication Draft of the East Devon Local Plan. The Parish Council has commented at all stages of the Local Plan and taken every opportunity to attend and speak at the meetings of the Strategic Planning Committee. It is dismayed that the Planning Authority has never formally acknowledged the Parish Council's legitimate concerns or responded directly to any of the issues and objections that it has raised. It is the Parish Council's view that the process of preparing the Local Plan has been flawed and that elements of the plan, particularly as they relate to Feniton, are unsound. Pre-determination On the one occasion when the Parish Council was invited to meet face to face with the Leader of the Council, the Chief Executive and the Assistant Director responsible for planning, the planning officer stated that as Feniton was not in the AONB and had a railway station it was effectively ripe for development. This set the tone for the way in which Feniton has been viewed throughout this Local Plan process and in the view of the Parish Council demonstrated a pre-determined position from the out-set. This in spite of the fact that in 2014 the District and Parish Councils were united in their opposition to unfettered development at a "Super-Inquiry" that considered the appeals of 4 refused planning consents for large scale housing in the village. The Inspector at that Inquiry agreed with the District and Parish Councils and concluded that Feniton was not a sustainable location for large scale housing. The Call for Sites and "Common Place" Early in the plan preparation there was a call for sites where landowners and developers were encouraged to identify development sites. A total of 13 sites were identified at Feniton, vastly more than at any other tier 4 "service village". While initially only one was recommended for inclusion, the majority were categorised as "Second Choice" sites that could be developed dependent on the quantum of development deemed appropriate for a service village like Feniton. The District Council determined that it was to use the "Common Place" system for public consultation on the plan. It became clear very early on that the system was not suited to a consultation at this scale. There were broken hyper-links and other glitches that led to huge frustration and dissatisfaction

with the general public and District Councillors alike. Many were simply put off commenting at all. Because of this system failure and with additional encouragement by the District Council Chief Executive, Feniton Parish Council organised a clearly worded petition setting out reasoned objections to all the sites in Feniton except the site formally recommended for inclusion. This was signed by more than 500 residents but was never reported to the Strategic Planning Committee when it considered site allocations. Neither was there detailed reporting of the careful responses that a large number of residents persisted in putting on the Common Place system or sending by e-mail. The residents of Feniton do not believe that their views have been acknowledged, let alone given due consideration in the planning and site selection process. Mis-application of policy and arbitrary changes

The Vision of the Local Plan states that “rural East Devon will retain its outstanding charm and character with modest and sensitively planned development to meet local needs”. The Spatial Strategy of the plan is logically based on a hierarchy of settlements. In order to achieve the greatest sustainability, more development is to be concentrated in the Principal, Main and Local Centres where there are existing infrastructures and employment. The Parish Council supports this approach. In the Regulation 18 version of the Local Plan, the Strategy stated that for the smaller settlements in rural East Devon, the tier 4 “Service Villages”, there would be “modest development to meet local needs” - in line with the Vision. When a member of the Strategic Planning Committee pointed out that the committee was allocating in Feniton housing numbers greater than necessary to meet local need the Chairman instructed the Officer to rewrite the Strategic Policy SP01 in the Regulation 19 version so that it now reads: “...E. allowing limited development at the Service Villages...” This was clearly a device to avoid the charge that the unsustainable proposals at Feniton are not in line with the plan’s intended strategic policy of only meeting local housing need in rural villages. However, the Vision in the Regulation 19 Draft remains “modest....development to meet local needs”. There is now a mis-match between Vision and Strategy because of the deception. As a result Feniton is burdened with housing proposals for 102 dwellings far exceeding the definition of modest development to meet local need. A Feniton housing need survey was funded by the District Council and undertaken by Devon Community Together in 2022. The identified local need then was for 13 dwellings in the following 5 years. The site Feni_08 Beechwood was recommended for housing late in the site allocation process as it became clear to the Strategic Planning Committee that it was not going to achieve the housing numbers required by national targets. Inadequate and inappropriate consideration was given by the committee to the sustainability consequences of agreeing this site. The site was already rejected by the Planning Inspector at the 2014 “Super-Inquiry” when it was the District Council arguing (at great public expense) that this was not a suitable site to achieve sustainable development. Nothing in the village has changed to make development here in the 2020s any more sustainable than it was in 2014 - in fact it can be realistically argued that the circumstances have worsened. The frequency and

reliability of public transport to the village has declined, the volume of journeys by private vehicle has increased, there has been no significant increase in employment in the village, the village school is over capacity and the nearest GP practice in Ottery is drastically over-subscribed. There is no credible evidence in the plan that sustainable development will be achieved from this allocation. Furthermore, there is imperfect understanding of both the foul and surface water drainage systems in the village. A flood alleviation scheme is currently being constructed in Feniton with the intention of capturing run-off from Cheriton Hill to the east of the village, diverting it around the village on its eastern side, taking it under the railway line and discharging it via an open watercourse to Ottery Road. This scheme is untested in practice. It is not known whether the scheme will completely solve the flooding in Feniton. Indeed it is quite possible that downstream flooding will occur on Ottery Road, the main access from the A30 to the village. This could have dramatic impact on vehicular access to the village at times of high rainfall and diversion of traffic onto entirely unsuitable country lanes. In particular, it is not clear whether the flood alleviation scheme will stop the surcharging of the foul sewer system in the village that currently occurs at times of high rainfall. At the moment this frequently results in the village foul pumping station on Ottery Road being overwhelmed. The outcome is foul sewage backing up into people's homes, discharge onto the public highway and discharge into the watercourse designed to carry storm water from the village parallel to Ottery Road. Allocating further development in Feniton that will increase surface run off and further burden the foul system, while these issues remain unresolved, is unsound planning. Late introduction of an employment site After the original Call for Sites and the Regulation 18 draft consultation, a late site was brought forward by the landowner and introduced into the local plan. Now known as Otry_20, it is a site of 4.64 hectares comprising an active orchard and a former poultry house. The site is adjacent to but outside the current built area boundary of the village. By a quirk of ancient parish boundaries it is in Ottery parish rather than Feniton. It is far distant from and has no bearing on the functioning of Ottery St Mary as a settlement but is very significant for Feniton village. The site was not consulted on in the routine Regulation 18 round and very few residents had the opportunity to comment. What comments there were, were not discussed at the Strategic Planning Committee. This site is very controversial. It is proposed in the plan as an employment site for general industrial, distribution and office/R&D uses. At 4.6 hectares it is totally disproportionate to the scale of Feniton. It represents more industrial/distribution land to be allocated in Tier 4 Feniton than in Tier 1 Exmouth (the Principal Centre) and in Tier 2 Axminster and in Tier 3 Ottery and Seaton. This is completely out of scale and not in line with the plan's stated spatial strategy of concentrating development proportionately across the settlement hierarchy. The Regulation 19 Local Plan Draft proposes redrawing the Feniton settlement boundary to newly include site Otry_20 to which the Parish Council has objected. The Parish Council contends that this change in boundary is a contrivance to ensure that employment Policy SE01 applies to the site. In

reality the site is outside the village (in fact in another Parish altogether). As such it would normally be considered as “Employment development in the countryside” to which employment Policy SE02 of the Local Plan would apply. In these circumstances the site allocation and its intended uses would fail the policy tests set out in Policy SE02. The business is not close to full occupancy nor is there a proven need from new or expanding functions. Expansion is not proportionate to the size and scale of operations nor prioritising re-use of existing buildings. Development will not be readily accessible via a range of modes of transport, nor would it be socially and environmentally acceptable. Development of this countryside site for industrial, distribution and research purposes would not be compatible with overall plan strategy and other local plan considerations. Were it to be argued that the proposal is a form of farm diversification, the Parish Council would contend that it fails the policy tests in Employment Policy SE03. The allocation does not represent an ancillary or subordinate component of an existing enterprise. Development would prejudice the existing agricultural undertaking on the site. New building, parking and other structures on a 4.6 hectare site would not be modest in scale. Quite apart from the policy failure, the site itself is totally unsuitable. It is accessed off a narrow country lane with an unconventional junction to the village “main” road. The site entry point is between two humped, narrow railway bridges and where there is no footway. It is wholly unsuitable for large commercial vehicles and largely incapable of improvement at a realistic cost. The site is beyond the natural village boundary formed by Green Lane and in open countryside. A recent planning application further east on Green Lane was refused by the District Council for the same reasons. Gaggling of the Parish Council When the site proposal Otry_20 came before the Strategic Planning Committee the Parish Council came to the meeting prepared to make its case against the proposed inclusion of the employment site. However, at the meeting the Chair of the Committee ruled that no representative of the Parish Council could address the Committee because the site was technically in Ottery St Mary Parish. This was totally undemocratic and an abuse of process. As stated above, the site has no bearing on Ottery St Mary but is very important to the functioning of Feniton and the Parish Council was prevented from raising residents’ legitimate concerns with the Committee. Flawed Sustainability Appraisal The Sustainability Appraisal includes a lengthy section on the sites that emerged from the Call for Sites. A member of the Parish Council’s Local Plan Working Group made detailed comments on the original appraisal of the Feniton sites which have never been acknowledged or reported to the Strategic Planning Committee. No changes have been made to the Sustainability Appraisal and no explanation given as to why the suggested amendments were rejected. The Parish Council remains concerned that this element of the Sustainability Appraisal is flawed and understates the sustainability impacts of development proposals in Feniton. Conclusion Because of the failings detailed above, Feniton Parish Council questions whether the plan has been developed in a legally compliant way. It is further doubtful of the soundness of the plan as far as the proposals

for Feniton village are concerned. The lack of evidence to support the allocation of 102 houses and 4.6 hectares of employment land in a small Tier 4 Service Village with poor infrastructure and a known flooding problem is very concerning. In the Council's view there has been a disregard of evidence and planning history indicating that this scale of development in Feniton is unsustainable. The proposals for Feniton are not consistent with the local plan's stated vision and strategy and by extension with national policy. The Parish Council proposes the removal of employment site Otry_20. It would support the inclusion of a more modest employment land allocation proportionate to its Tier 4 status and more appropriately located relative to existing infrastructure. The Parish Council proposes the removal of housing site Feni_08 until such time as the Flood Alleviation Scheme is completed and its efficacy tested and until the foul sewage system has been improved to eliminate excess storm water surcharge. In terms of achieving sustainable development in the village, the Parish Council doubts whether an allocation of more than half the land comprising Feni_08 would be appropriate within the plan period given the lack of evidence of need and the existing infrastructure constraints. The Parish Council supports in principle the inclusion of housing site Feni_05 but remains concerned that it too will be developed before the storm and foul water systems have been improved to cope with the current and new demands.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Because throughout the Local Plan preparation the Parish Council has taken every opportunity to set out to the Strategic Planning Committee and the Council its well founded concerns about emerging proposals for Feniton village. These have been neither acknowledged nor acted upon. The Parish Council believes its only redress now is to provide its evidence to the Planning Inspector unless the Regulation 19 plan is amended before submission to prevent unsustainable and premature development in the village.

Full name: timothy steel

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: It's doubtful if we can argue too effectively that East Devon District Council (EDDC) have not been legally compliant. Therefore we suggest writing something like this:

In relation to Feniton, it's unclear as to whether the draft local plan has been developed in a legally compliant way. Without personal legal knowledge and as a member of the public, I do not feel qualified to make comment on this section.

You may want to comment on the below:

- However, in previous consultations, emails, comments and a petition signed by 500+ residents was not taken into consideration as it was not submitted via Common Place.
- These vital public comments were not reported by EDDC to the Strategic Planning Committee, effectively ignoring the views of Fenitonians.

- EDDC's preferred method of commenting is the Common Place System. It is complex and extremely time consuming, effectively deterring Jo Public from 'Having Your Say' and making their opinions known. This is discriminatory and undemocratic, and contravenes British Values.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Please write how YOU feel in this box. The more personal the comments, the better.

These are suggestions to make on the soundness of the plan:

Flooding:

- It's well documented that Feniton regularly floods.
- It would appear that East Devon District Council (EDDC) has not considered the historic evidence of flooding, including raw sewage.
- More development equals more flooding.

- With previous developers, promises of flood risk alleviation measures have not transpired.
- The Flood Alleviation Scheme (FAS) has only been designed for the current number of homes in Feniton. It will only divert flood water around the eastern side of the village, leading to increased flooding at Pattersons Cross, the main access route to the village, from the A30.
- In times of heavy rain, Pattersons Cross already becomes impassable, (without the additional flood water from the FAS).
- Despite millions of public money being spent on it, currently there is no evidence of the FAS's efficiency.

References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy
AR01 – C

Sewage:

- It's a well known fact that there is an unresolved capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding.

- It's well documented that roads and homes often flood with raw sewage.

References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy
AR01 – C

Lack of Sustainability:

- At the 2014 Super Enquiry, the Planning Inspector determined, with EDDC agreeing, that Feniton was not a sustainable location for further development.
- Nothing, apart from the untested Flood Alleviation Scheme (FAS), has changed within the village to address the issues raised in said Super Inquiry.
- Lack of adequate public transport.
- All of the roads into Feniton are narrow with pinch points, unlit and unsuitable for heavy traffic.

- Feniton has recently had an insight to the ramifications of increased traffic when the Ottery Road/Green Lane junction was closed for the FAS works. At times delays getting in and out of the village were extensive.
- When Pattersons Cross floods, (as is expected during heavy rain as a result of the FAS), all vehicles will have to access the village and surrounding areas via Feniton Old Village, or via the network of lanes and villages leading from A373 and M5. These lanes are highly unsuitable and unsafe for heavy traffic.
- Feniton Primary School is at capacity and in great need of a building upgrade.
- Local GP services are at capacity.
- There has been a disregard of evidence and planning history indicating that this scale of development in Feniton is unsustainable. The proposals for Feniton are not consistent with the local plan's stated vision and strategy and by extension with national policy.
- The only infrastructure noted in the draft local plan is for 1060m new water mains to be laid by 2035.

References: Infrastructure Delivery Plan – Utl-1 Sustainability Appraisal Objectives 4, 5, 9, 10 and 13. Chapter 3 – 3.38, 3.39, 3.40, 3.44, 3.45

Disproportionate allocation of houses compared to local need:

- Funded by EDDC, Devon Communities Together (DCT) identified a local need for only 13 dwellings up to the year 2027.
- The number of houses planned for Feniton in the draft plan is disproportionate and doesn't align to the DCT survey, funded by EDDC.
- When the Strategic Planning Committee realized the number of houses allocated for Feniton were far greater than local need, the Chairman instructed the Officer to rewrite the Strategic Policy SP01 in the Regulation 19 version, in order to justify the increased development proposed for Feniton. There is now a mismatch between vision and strategy.
- Proposed development in Feniton is not 'limited' but huge for a tier 4 village.

References: Chapter 3 – 3.4 Hierarchy of Settlements Chapter 5 – Strategic Policy SD18 – Development actions at Feniton. Strategic Policy SP01 – C, D, E.

Employment site Otry_20:

- Site Otry_20 is an unsafe location. The entrance to the site is off Green Lane, a mostly single track road, some parts not wide enough for a car to pass a pedestrian without said pedestrian leaning back into the hedge. It is unlit, has pinch points, blind bends, distinct lack of pavements and two single track, over the rail line bridges, one with a blind bend. There is a part that is an ancient sunken portion subject to rock falls, blocking the lane. There is a video that can be viewed on Youtube - <https://www.youtube.com/watch?v=6q7DQ6mpgh4> detailing some of the issues with Green Lane. The blind bends on either end of this lane are especially dangerous.
- Feni_08 is also accessed via Broad Lane which has very similar issues to Green Lane.
- Site Otry_20 was brought forward for consideration after the Regulation 18 draft consultation. It could be viewed that EDDC has not had sufficient time to consider all the evidence effectively.

- The size of Otry_20 does not align with EDDC's Spatial Strategy and is totally disproportionate to the scale of Tier 4 Feniton.
- It has a disproportionate allocation for industrial, warehousing and distribution than employment sites allocated for the Principle Centre Tier 1 Exmouth, in Tier 2 Axminster and Tier 3 Ottery and Seaton.

References: Chapter 2 The Vision – 2.10, Objective 1, Objective 2, Objective 9, Objective 10 Chapter 3 The Spatial Strategy SP01- C, D, E Service Villages 5.11 – SD18 – Otry_20

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

If the whole draft local plan is rejected, the whole of East Devon, including Feniton could be imposed with far greater development than has been suggested. Therefore suggestions for this section are:

To ensure a sustainable plan, better reflect the Tier 4 status of Feniton and realign the Strategy and Vision, until adequate infrastructure and mitigation has been put into place:

- Removal of Feni_08 from the draft local plan, or at least a reduction in the number of houses allocated for Feni_08.
- Removal of Otry_20 from the draft local plan.

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: These are a bit like giving evidence in a court where you can be challenged by the Inspector and cross examined by a legal team acting for EDDC or developers.

Feniton Parish Council will probably do this if EDDC do not respond to our points by changing the draft local plan.

This is your choice.

Full name: Jenyth Turner-Steel

Proposal:

5. Development in the Towns and Villages

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: In relation to Feniton, I don't know whether the draft local plan has been developed in a legally compliant way. I don't have legal knowledge and as a member of the public, I do not feel qualified to make comment on this section.

- However, in previous consultations, emails, comments and a petition signed by 500+ residents was not taken into consideration as it was not submitted via Common Place.
- Our public comments were not reported by EDDC to the Strategic Planning Committee, effectively ignoring the views of us who live in Feniton.
- EDDC's preferred method of commenting is the Common Place System. I am computer literate, I run my own accountancy practice and use softwares on a daily basis, I simply couldn't understand this online form, It is complex and extremely time consuming, effectively deters anyone from 'Having Your Say' and making their opinions known. This is discriminatory and undemocratic, and contravenes British Values. I honestly believe its been made like that to discourage people from commenting. Incredibly disappointing.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Reference and copied image at beginning of response form showing Regulation 19 Proposals Inset Map for Feniton, entitled 'Map of Proposed Sites For Feniton', stating, "There are two sites of importance for Feniton- Feni_08 and Otry_20. Planning has already been granted for Feni_05, The Burlands. Feni_08 is housing and in green. Otry_20 is in red."

Flooding: Our village floods regularly after heavy rainfall, we often cannot get in or out of the village in any normal car, I feel relieved I am not on the main estate where they

need sandbags and their homes flood. Its well documents how we flood and how frequently. There are tampons, condoms and raw sewerage in the water ways behind the houses near the new Kier site, its gross but EDDC just ignores this We all know more development equals more flooding. And every developer promises flood risk alleviation schemes but they simply don't materialise. The current Flood Alleviation Scheme (FAS) has only been designed for the current number of homes in Feniton. It will only divert flood water around the eastern side of the village, leading to increased flooding at Pattersons Cross, the main access route to the village, from the A30. If more houses are built this will simply render this work that we have fought for so many years to not have the effect we need. In times of heavy rain, Pattersons Cross already becomes impassable, and this is before the diversion the the FAS will add to this. We don't even know if it will work yet! Despite millions of public money being spent on it, currently there is no evidence of the FAS's efficiency.

AR01 – C

Sewage: It's a well known fact that there is an unresolved capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding. Our roads and home often flood with raw sewage.

References: Chapter 2 The Vision, Objective 1 Chapter 7 Flood Risk Strategic Policy
AR01 – C

Lack of Sustainability: At the 2014 Super Enquiry, the Planning Inspector determined, with EDDC agreeing, that Feniton was not a sustainable location for further development. Nothing, apart from the untested Flood Alleviation Scheme (FAS), has changed within the village to address the issues raised in said Super Inquiry.

Lack of adequate public transport. The trains are unreliable, infrequent and certainly don't negate the need for a car. All of the roads into Feniton are narrow with pinch points, unlit and unsuitable for heavy traffic. I am a dog walker, I take my life in my hands on the roads, its got worse over the years, there are not enough passing points and many many bottlenecks. When the the Ottery Road/Green Lane junction was closed for the FAS works. At times delays getting in and out of the village were extensive. There were literal standstills with the volume of traffic people stuck for over 30 mins, I missed

a doctors appt and my sone had to drive a different rounte addings 10 mins to the journey just to get out of our village.

When Pattersons Cross floods, (as is expected during heavy rain as a result of the FAS), all vehicles will have to access the village and surrounding areas via Feniton Old Village, or via the network of lanes and villages leading from A373 and M5. These lanes are highly unsuitable and unsafe for heavy traffic. I feel grateful my children attended this school between 2004 and 2013 before I was at capacity only 1 or 2 chldren struggled to get a spot then, now we have children being bussed all over the place as there is no space, local kids within walking distance not able to attend the local school, this is ludicrous. Feniton Primary School is at capacity and in great need of a building upgrade My friend works at the school and often talks of the building issues.

Doctors! I cant get an appointment! There are no other words, where on earth will all these people see a doctor?

There has been a disregard of evidence and planning history indicating that this scale of development in Feniton is unsustainable.

The proposals for Feniton are not consistent with the local plan's stated vision and strategy and by extension with national policy. The only infrastructure noted in the draft local plan is for 1060m new water mains to be laid by 2035.

References: Infrastructure Delivery Plan – Utl-1 Sustainability Appraisal Objectives 4, 5, 9, 10 and 13. Chapter 3 – 3.38, 3.39, 3.40, 3.44, 3.45

Disproportionate allocation of houses compared to local need:

- Funded by EDDC, Devon Communities Together (DCT) identified a local need for only 13 dwellings up to the year 2027.
- The number of houses planned for Feniton in the draft plan is disproportionate and doesn't align to the DCT survey, funded by EDDC.
- When the Strategic Planning Committee realized the number of houses allocated for Feniton were far greater than local need, the Chairman instructed the Officer to rewrite the Strategic Policy SP01 in the Regulation 19 version, in order to justify the increased

development proposed for Feniton. There is now a mismatch between vision and strategy.

- Proposed development in Feniton is not ‘limited’ but huge for a tier 4 village.

Employment site Otry_20:

- Site Otry_20 is an unsafe location. The entrance to the site is off Green Lane, a mostly single track road, some parts not wide enough for a car to pass a pedestrian without said pedestrian leaning back into the hedge. Have you actually seen this road????? It is unlit, has pinch points, blind bends, distinct lack of pavements and two single track, over the rail line bridges, one with a blind bend. There is a part that is an ancient sunken portion subject to rock falls, blocking the lane. There is a video that can be viewed on Youtube - <https://www.youtube.com/watch?v=6q7DQ6mpgh4> detailing some of the issues with Green Lane. The blind bends on either end of this lane are especially dangerous.

- Feni_08 is also accessed via Broad Lane which has very similar issues to Green Lane.

- Site Otry_20 was brought forward for consideration after the Regulation 18 draft consultation. It could be viewed that EDDC has not had sufficient time to consider all the evidence effectively.

- The size of Otry_20 does not align with EDDC’s Spatial Strategy and is totally disproportionate to the scale of Tier 4 Feniton.

- It has a disproportionate allocation for industrial, warehousing and distribution than employment sites allocated for the Principle Centre Tier 1 Exmouth, in Tier 2 Axminster and Tier 3 Ottery and Seaton.

References: Chapter 2 The Vision – 2.10, Objective 1, Objective 2, Objective 9, Objective 10 Chapter 3 The Spatial Strategy SP01- C, D, E Service Villages 5.11 – SD18 – Otry_20

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

To ensure a sustainable plan, better reflect the Tier 4 status of Feniton and realign the Strategy and Vision, until adequate infrastructure and mitigation has been put into place:

- Removal of Feni_08 from the draft local plan, or at least a reduction in the number of houses allocated for Feni_08.
- Removal of Otry_20 from the draft local plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Kenny Wells

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I am unable to comment if the local plan has been actioned legally as I do not have enough knowledge in this area

- However, in previous consultations, emails, comments and a petition signed by 500+ residents was not taken into consideration as it was not submitted via Common Place.

- These vital public comments were not reported by EDDC to the Strategic Planning Committee, effectively ignoring the views of Fenitonians.

- EDDC's preferred method of commenting is the Common Place System. It is complex and extremely time consuming, effectively deterring Jo Public from 'Having Your Say' and making their opinions known. This is discriminatory and undemocratic, and contravenes British Values. Also the completion of this form, not all residents have access to this form, this then makes it undemocratic surely and in turn not legally compliant.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Flooding:

- Feniton regularly floods as do the roads in and out. During wet weather you have to consider which way is the safest drier route out of the village-more houses will mean more
- EDDC continues to ignore the flooding, the disruption it causes, including the stress and damage it creates. Some residents even have had sewage in their gardens and homes during the flooding
- If you build more houses the flooding will be worse, as the drainage is not sufficient. The Alleviation scheme is just going in and we have no idea if this will work or is simply moving the problem elsewhere
- Builders have not fulfilled previous promises and in fact at Acland Park not even finished the development.
- At times the village becomes almost cut off, with some of us struggling to get home, the diversion of the water will mean Pattesons Cross will be worse, in 2022 I rescued an elderly neighbour from this location leaving her car in the flood water.

Sewage:

- It's a well known fact that there is an unresolved capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding.
- It's well documented that roads and homes often flood with raw sewage.

Lack of Sustainability:

- There has been no changes since the 2014 Super Enquiry, when the Planning Inspector determined and EDDC agreed, that Feniton was not a sustainable location for further development.
- Nothing, apart from the untested Flood Alleviation Scheme (FAS), has changed within the village to address the issues raised in said Super Inquiry and it is too early to see the effect this has and what other issues it causes.
- There is a lack of adequate public transport, this will mean more cars on our already busy pot holed roads

- All of the roads into Feniton are narrow with pinch points, unlit and unsuitable for heavy traffic. This was apparent during local closures and the carnage that ensued is well documented.
- When Pattersons Cross floods, (as is expected during heavy rain as a result of the FAS), all vehicles will have to access the village and surrounding areas via Feniton Old Village, or via the network of lanes and villages leading from A373 and M5. These lanes are highly unsuitable and unsafe for heavy traffic. And in fact this area also floods, in turn Ironridge has flooded at least 6 times in two months
- Feniton Primary School is at capacity and in great need of a building upgrade, no extra space available. Summer sports already play on football club fields.
- Local GP services are at capacity and no NHS dentist.
- This scale of development in Feniton is unsustainable but EDDC seems to be ignoring this. The proposals for Feniton are not consistent with the local plan's stated vision and strategy and by extension with national policy totally ignoring input given during the super enquiry.

Disproportionate allocation of houses compared to local need:

- Funded by EDDC, Devon Communities Together (DCT) identified a local need for only 13 dwellings up to the year 2027.
- The number of houses planned for Feniton in the draft plan is disproportionate and doesn't align to the DCT survey, funded by EDDC.
- When the Strategic Planning Committee realized the number of houses allocated for Feniton were far greater than local need, the Chairman instructed the Officer to rewrite the Strategic Policy SP01 in the Regulation 19 version, in order to justify the increased development proposed for Feniton. There is now a mismatch between vision and strategy.
- Proposed development in Feniton is not 'limited' but huge for a tier 4 village, soon it will be a small town!

Employment site Otry_20:

- Absolutely ridiculous proposal to put an Employment site in this location. Unsafe in many ways. The entrance to the site is off Green Lane, a mostly single track road, some parts not wide enough for a car to pass a pedestrian without said pedestrian leaning back into the hedge. It is unlit, has pinch points, blind bends, distinct lack of pavements and two single track, over the rail line bridges, one with a blind bend. There is a part that is an ancient sunken portion subject to rock falls, blocking the lane.

- This Site is also accessed via Broad Lane which has very similar issues to Green Lane. No doubt it will attract larger vehicles which will cause chaos for people already residing in the area, to say nothing of the noise in the quiet village location.
- As this has been brought forward it could be suggested that EDDC has not had sufficient time to consider all the evidence effectively.
- The size of Otry_20 does not align with EDDC's Spatial Strategy and is totally disproportionate to the scale of Tier 4 Feniton.
- It has a disproportionate allocation for industrial, warehousing and distribution than employment sites allocated for the Principle Centre Tier 1 Exmouth, in Tier 2 Axminster and Tier 3 Ottery and Seaton.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

- Removal of Feni_08 from the draft local plan, this land was not meant to be built on.
- Removal of Otry_20 from the draft local plan totally the wrong place to have such a development

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: This all seems to be being pushed through by a backdoor,

hardly involving the locals it will effect. Totally unacceptable to only be able to object by completing this unwieldy complicated form. We have the right to object and give our opinions. The main points being Flooding Inadequate roads Poor infrastructure Broken promises by builders and EDDC Unfinished homes in Acland causing an eyesore and rat homes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Sharon Wells

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I am unable to comment if the local plan has been actioned legally as I do not have enough knowledge in this area

- However, in previous consultations, emails, comments and a petition signed by 500+ residents was not taken into consideration as it was not submitted via Common Place.

- These vital public comments were not reported by EDDC to the Strategic Planning Committee, effectively ignoring the views of Fenitonians.

- EDDC's preferred method of commenting is the Common Place System. It is complex and extremely time consuming, effectively deterring the public from 'Having Your Say' and making their opinions known. This is discriminatory and undemocratic, and contravenes British Values. Also the completion of this form, not all residents have access to this form, this then makes it undemocratic surely and in turn not legally compliant.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Flooding:

- Feniton regularly floods as do the roads in and out. During wet weather you have to consider which was is the safest drier route out of the village-more houses will mean more
- EDDC continues to ignore the flooding, the disruption it causes, including the stress and damage it creates. Some residents even have had sewage in their gardens and homes during the flooding
- If you build more houses the flooding will be worse, as the drainage is not sufficient. The Alleviation scheme is just going in and we have no idea if this will work or is simply moving the problem elsewhere
- Builders have not fulfilled previous promises and infact at Acland Park not even finished the deleopment.
- At times the village becomes almost cut off, with some of us struggling to get home, the diversion of the water will mean Pattesons Cross will be worse, in 2022 I rescued an elderly neighbour from this location leaving her car in the flood water.

Sewage:

- It's a well known fact that there is an unresolved capacity in our sewerage system causing outflow storm water to enter the water drains, exacerbating the incidence of sewage flooding.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns. Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner. A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath. I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

I am also very concerned that a recent event was held by Bloor homes, setting out plans for this development. This was before the area had been designated for building. This raises suggestions that this is a "Done Deal" and negates any validity of the consultation.

Exmouth has also seen a recent building boom, which has put immense strain on the sewage system. We only have to look at recent events, such as the burst pipe and almost constant raw sewage overflows on the beach and Maer. Any assurance from South West water that the system can take another large increase in housing should be backed by a period of say two years without constant pollution incidents. The storm overflow system should be only for exceptional events, not as at present when any sort of rainfall causes it to overflow.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The site Feni_08 Beechwood was recommended for housing late in the site allocation process as it became clear to the Strategic Planning Committee that it was not going to achieve the housing numbers required by national targets. Inadequate and inappropriate consideration was given by the committee to the sustainability consequences of agreeing this site. The site was already rejected by the Planning Inspector at the 2014 “Super-Inquiry” when it was the District Council arguing (at great public expense) that this was not a suitable site to achieve sustainable development. Nothing in the village has changed to make development here in the 2020s any more sustainable than it was in 2014 - in fact it can be realistically argued that the circumstances have worsened. The frequency and reliability of public transport to the village has declined, the volume of journeys by private vehicle has increased, there has been no significant increase in employment in the village, the village school is over capacity and the nearest GP practice in Ottery is drastically over-subscribed. There is no credible evidence in the plan that sustainable development will be achieved from this allocation. Furthermore, there is imperfect understanding of both the foul and surface water drainage systems in the village. A flood alleviation scheme is currently being constructed in Feniton with the intention of capturing run-off from Cheriton Hill to the east of the village, diverting it around the village on its eastern side, taking it under the railway line and discharging it via an open watercourse to Ottery Road. This scheme is untested in practice. It is not known whether the scheme will completely solve the flooding in Feniton. Indeed it is quite possible that downstream flooding will occur on Ottery Road, the main access from the A30 to the village. This could have dramatic impact on vehicular access to the village at times of high rainfall and diversion of traffic onto entirely unsuitable country lanes. In particular, it is not clear whether the flood alleviation scheme will stop the surcharging of the foul sewer system in the village that

currently occurs at times of high rainfall. At the moment this frequently results in the village foul pumping station on Ottery Road being overwhelmed. The outcome is foul sewage backing up into people's homes, discharge onto the public highway and discharge into the watercourse designed to carry storm water from the village parallel to Ottery Road. Allocating further development in Feniton that will increase surface run off and further burden the foul system, while these issues remain unresolved, is unsound planning. Late introduction of an employment site After the original Call for Sites and the Regulation 18 draft consultation, a late site was brought forward by the landowner and introduced into the local plan. Now known as Otry_20, it is a site of 4.64 hectares comprising an active orchard and a former poultry house. The site is adjacent to but outside the current built area boundary of the village. By a quirk of ancient parish boundaries it is in Ottery parish rather than Feniton. It is far distant from and has no bearing on the functioning of Ottery St Mary as a settlement but is very significant for Feniton village. The site was not consulted on in the routine Regulation 18 round and very few residents had the opportunity to comment. What comments there were, were not discussed at the Strategic Planning Committee. This site is very controversial. It is proposed in the plan as an employment site for general industrial, distribution and office/R&D uses. At 4.6 hectares it is totally disproportionate to the scale of Feniton. It represents more industrial/distribution land to be allocated in Tier 4 Feniton than in Tier 1 Exmouth (the Principal Centre) and in Tier 2 Axminster and in Tier 3 Ottery and Seaton. This is completely out of scale and not in line with the plan's stated spatial strategy of concentrating development proportionately across the settlement hierarchy. The Regulation 19 Local Plan Draft proposes redrawing the Feniton settlement boundary to newly include site Otry_20 to which the Parish Council has objected. The Parish Council contends that this change in boundary is a contrivance to ensure that employment Policy SE01 applies to the site. In reality the site is outside the village (in fact in another Parish altogether). As such it would normally be considered as "Employment development in the countryside" to which employment Policy SE02 of the Local Plan would apply. In these circumstances the site allocation and its intended uses would fail the policy tests set out in Policy SE02. The business is not close to full occupancy nor is there a proven need from new or expanding functions. Expansion is not proportionate to the size and scale of operations nor prioritising re-use of existing buildings. Development will not be readily accessible via a range of modes of transport, nor would it be socially and environmentally acceptable. Development of this countryside site for industrial, distribution and research purposes would not be compatible with overall plan strategy and other local plan considerations. Were it to be argued that the proposal is a form of farm diversification, the Parish Council would contend that it fails the policy tests in Employment Policy SE03. The allocation does not represent an ancillary or subordinate component of an existing enterprise. Development would prejudice the existing agricultural undertaking on the site. New building, parking and other structures on a 4.6 hectare site would not be modest in scale. Quite apart from the policy failure,

the site itself is totally unsuitable. It is accessed off a narrow country lane with an unconventional junction to the village “main” road. The site entry point is between two humped, narrow railway bridges and where there is no footway. It is wholly unsuitable for large commercial vehicles and largely incapable of improvement at a realistic cost. The site is beyond the natural village boundary formed by Green Lane and in open countryside. A recent planning application further east on Green Lane was refused by the District Council for the same reasons. Gagging of the Parish Council When the site proposal Otry_20 came before the Strategic Planning Committee the Parish Council came to the meeting prepared to make its case against the proposed inclusion of the employment site. However, at the meeting the Chair of the Committee ruled that no representative of the Parish Council could address the Committee because the site was technically in Ottery St Mary Parish. This was totally undemocratic and an abuse of process. As stated above, the site has no bearing on Ottery St Mary but is very important to the functioning of Feniton and the Parish Council was prevented from raising residents’ legitimate concerns with the Committee. Flawed Sustainability Appraisal The Sustainability Appraisal includes a lengthy section on the sites that emerged from the Call for Sites. A member of the Parish Council’s Local Plan Working Group made detailed comments on the original appraisal of the Feniton sites which have never been acknowledged or reported to the Strategic Planning Committee. No changes have been made to the Sustainability Appraisal and no explanation given as to why the suggested amendments were rejected. The Parish Council remains concerned that this element of the Sustainability Appraisal is flawed and understates the sustainability impacts of development proposals in Feniton. Conclusion Because of the failings detailed above, Feniton Parish Council questions whether the plan has been developed in a legally compliant way. It is further doubtful of the soundness of the plan as far as the proposals for Feniton village are concerned. The lack of evidence to support the allocation of 102 houses and 4.6 hectares of employment land in a small Tier 4 Service Village with poor infrastructure and a known flooding problem is very concerning. In the Council’s view there has been a disregard of evidence and planning history indicating that this scale of development in Feniton is unsustainable. The proposals for Feniton are not consistent with the local plan’s stated vision and strategy and by extension with national policy. The Parish Council proposes the removal of employment site Otry_20. It would support the inclusion of a more modest employment land allocation proportionate to its Tier 4 status and more appropriately located relative to existing infrastructure. The Parish Council proposes the removal of housing site Feni_08 until such time as the Flood Alleviation Scheme is completed and its efficacy tested and until the foul sewage system has been improved to eliminate excess storm water surcharge. In terms of achieving sustainable development in the village, the Parish Council doubts whether an allocation of more than half the land comprising Feni_08 would be appropriate within the plan period given the lack of evidence of need and the existing infrastructure constraints. The Parish Council supports in principle the inclusion of housing site

Feni_05 but remains concerned that it too will be developed before the storm and foul water systems have been improved to cope with the current and new demands.

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Feniton Parish Council requests an opportunity to give evidence to the Local Plan Inquiry in due course.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Network Rail supports the principle of the Policy however there is the potential that the draft allocating site Feni_05 could be needed to relocate the train station. Whilst there are no firm plans on this at present, Network Rail raise the issue with the Council to consider this as part of the overall transport network and placemaking within Feniton.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

SD19

Full name: Nick Guildford

Organisation (where relevant): C G Fry & Son

Other party name (if relevant): Mr & Mrs Cowling

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD19

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: C G Fry & Son Ltd (CG Fry) are working in partnership with the landowners Mr & Mrs Cowling of two sites in Hawchurch (HAWK-01 and HAWK-02). Mr & Mrs Cowling have been residents of Hawchurch for over 60 years and are vested in ensuring the future vitality of the village including the key assets within it such as the primary school, village pub, village hall, church and the village shop which they have granted a 20 year lease for on their land within HAWK-01 (Norton Store). CG Fry are a regional housebuilder based in West Dorset and operating across the south west from Cornwall to Hampshire. The Company is in the ownership and control of the Managing Director, Philip Fry, and employs around 200 people across many disciplines from site operatives to professional design, surveying, planning and project management staff. Craftsmanship and quality have always been the hallmarks of CG Fry, earning the Company an enviable reputation. The emphasis is on high quality design and materials, with a finish that can only be achieved by craftsmen working in the traditional way, with the sort of attention to detail which sets our work apart. Our aim at CG Fry is to work in partnership with our landowners and key stakeholders to create developments that everyone involved with can be proud of leaving behind. While supportive of the principle of the allocation of the site for development we have significant concerns in relation to the limited extent of land identified on the Policies Map, the western boundary of which follows an arbitrary line through part of a field. These concerns comprise:

a) Ability of the land included on the Policies Map to accommodate the form of development set out in policy SD19 (retain existing employment space and accommodate 12 dwellings plus a permanent location for the village shop and associated car and cycle parking and turning areas) in a manner that would be in

keeping with the local area with respect to density and character as well as meet other local plan policy requirements; b) Ensuring a commercially viable and deliverable form of development, particularly in the context of the requirement to retain the existing employment space and provide only a limited number of new homes It is noted that point a) above was also raised by the representative of Hawkchurch Parish council that spoke at the morning session of the 1st November 2024 Strategic Planning Committee (SPC) meeting¹ (at 56 mins) noting that they were puzzled by the reduction in site area proposed by officers. As a result, as worded policy SD19 is not considered to be effective in terms of being achievable and deliverable. The area of land available for development includes an additional parcel (part of the same field) immediately to the west, as shown on the plans in Appendix A. The full extent of this area (hereon referred to as the ‘whole site’) was proposed for 38 new homes and 0.15ha of employment land in the Preferred Options Reg. 18 Consultation Draft Plan, Autumn 2022 (see extracts in Appendix B) officers concluding in their assessment of the site, as reported to the Strategic Planning Committee (SPC) in September 2022 that: ‘Hawkchurch is a suitable village for small-scale housing and employment development, particularly if this will increase its potential for self-containment given the narrow, very rural nature of the roads between it and Axminster. The village is not located in a designated landscape and the preferred site for allocation is well screened and discreet in the street scene’ (para 7.33, SPC report 9th September 2022). Village Shop

We have no objection to the reference in Policy SD19 to the site providing a permanent location for the village shop. This will allow for the permanent provision of an existing service that the landowners have already facilitated, both through making the land available for a shop and volunteering at the shop itself. It is a service that we want to see retained and which a commercially viable form of development would help support. Employment Strategic Policy SP04 identifies provision of 178.16ha of employment land within the local plan area against an identified need of 80ha. While reference is made to providing range and choice this significant over supply – some 98 ha – is totally unjustified.

In the context of Hawkchurch and site Hawk_01 it is acknowledged that there may be merit in some form of small-scale commercial / employment related uses being retained on the site, however the type and scale of provision should be in keeping with the village and should include, not be additional to the village shop.

To be effective, the wording of Policy SD19 must incorporate sufficient flexibility to enable the most suitable form and nature of employment provision to be determined

through the development management process. With respect to this matter, we have fundamental concerns to the reference in policy SD19 to ‘retain the existing employment space’.

The suitability of existing Employment Land across East Devon was assessed as part of the Council’s supporting evidence (Employment Land Review – ECN-004). However, despite the existing employment area seemingly meeting the thresholds within the Employment Land review (being over 0.1ha) the site was not even acknowledged or assessed, so no review of its suitability was undertaken. As can be seen from the photographs within Appendix C, the existing employment space is formed of large former agricultural sheds. These structures are associated with the original use of the site for storage of animal feed, where hundreds of tons of feed and fertilisers were stored with regular HGV and articulated vehicles travelling to and from the site 5 days a week. That intensification of use ceased approximately 20 years ago, the buildings now being used for the storage of caravans with no employees. With the existing lawful use being Class B8 (storage and distribution), in planning terms there is no reason why the site could not be reverted back to the original level of activity and associated type and levels of vehicular movements. While this would be possible and seemingly encouraged through the wording of policy SD19 this is not what we feel would be best for the site or the local community. This point was also raised within Hawkchurch Parish Council’s representations on the Reg 18 Local Plan (as referred to within the Draft East Devon Local Plan – Consultation feedback report – July 2023²), citing results of their community survey demonstrating most households did not support employment space on the site with concerns about noise, increased traffic, suitability of access for employment uses and that the current buildings are not fully occupied. CG Fry and the landowners do understand that local employment needs should be considered on site and we would welcome the Policy including some small scale employment provision which is relevant in scale and proportion to the nature of the site and the village as a whole. This would also respond positively to the concerns of local residents mentioned above. Given the significant need for housing it does not make sense that Policy SD19 does not maximise the delivery of new homes on the site and instead seeks to retain agricultural buildings for an employment use that is unsuitable in its location, and is not wanted by local residents. New homes for Hawkchurch

Policy SD19 is not considered to be sound in terms of reference to the provision of only 12 dwellings on the Hawk_01 site, the only housing site allocated in the village. As noted above the Regulation 18 version of the Local Plan (Autumn 2022) included provision of 38 new homes for the village on the whole site. In acknowledging that this represented a relatively large increase in proportionate terms when compared with the 240

households in the parish area of Hawkchurch, paragraph 4.7 of the officer's report to the SPC meeting of 9th September 2022 stated: 'Members will note that in some cases the 10% figure is exceeded however there is no evidence basis for applying a 10% limit so Members are cautioned against basing decisions solely on this figure. The planning merits of the site and the ability of each settlement to accommodate the levels of growth envisaged is key.' The 38 dwelling figure and inclusion of the whole site also formed officers' recommendation to the SPC in respect of proposed housing site allocations to be included in the Reg 19 LP at its meeting on 20th September 2024. Despite acknowledging that the whole site is suitable for development in all other regards the Site Selection Report, appended to the report to the subsequent SPC meeting on 1st November (page 241) simply states: 'In light of concerns that 38 dwellings is too many for this area, it is now proposed to allocate part of the site only.' There is no logic or sound justification set out within the report to the 1st November SPC meeting or the Reg 19 LP consultation documents for the extent of reduction in the quantum of new homes (from 38 to 12) proposed for Hawkchurch. Other Service Villages in EDDC, with a similar range of existing facilities include much larger housing allocations in the LP. For example, Plymtree, which has 250 households in the parish almost exactly the same as Hawkchurch (240) includes an allocation of 30 dwellings (Strategic Policy SD25). And Sidbury with 210 households in the built-up area includes a housing allocation of 43 dwellings (Strategic Policy SD26). 30 dwellings are also allocated at Chardstock, a 15% increase in existing households to a village with no bus service. There is clear inconsistency in the way that these three Service Villages have been assessed, with no evidenced justification for the approach taken in relation to Hawk_01 in the Reg 19 LP. As such policy SD19 is not justified. As highlighted within representations submitted by Hawkchurch Parish Council on the Reg 18 LP, there is support for new homes within the village amongst the local community, with a suggestion of between 20 and 25 referred to. The Parish Council's January 2023 comments state: 'Our survey has shown that 68% of households think that any development should be for 20 or less properties and this increases to 85% believe it should be 25 or less. Most supported selection of the preferred site but with the qualification about the extent and nature of the development.' By restricting the number of dwellings to only 12, Policy SD19 as currently worded would preclude a level of development that the local community has indicated it would support, completely inconsistent with the NPPF's requirement to significantly boost the supply of homes. As such, it is not consistent with national policy. In addition, the local plan should be maximising opportunities to safeguard the long-term viability of existing key facilities in villages such as Hawkchurch, including the primary school, pub and village shop through the increased patronage associated with the provision of new homes in the community. In the absence of any sound justification for the reduced number of dwellings allocated through Policy SD19 it cannot be considered to be positively prepared. For the Local Plan to be effective it is essential that Policy SD19 includes

appropriate flexibility to provide the best potential for a commercially viable scale and form of development to be brought forward that is in keeping with the local area. Such flexibility will enable the site to maximise the contribution it can make to the vitality and long-term sustainability of Hawkchurch.

Omission Site – Site Reference HAWK_02

Site HAWK_02 (location of which is shown in Appendix D) remains available for development of new homes, either in part or in full should through the progression of the local plan examination process there be a requirement to identify additional land for housing. The site offers potential to provide an extension to the existing built form at the eastern edge of the village, with excellent access to the adjacent primary school site, accessed via the existing School Close development. Part of the site may also be suitable for Biodiversity Net Gain offsetting.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Changes sought to Policy SD19

For all of the reasons outlined, the following changes to the wording (text proposed to be deleted struckthrough and new text in bold) of Policy SD19 and an amendment to the Policies Map to include the full extent of the land identified at Appendix A are proposed to ensure that this part of the local plan is sound: Norton Store, Hawkchurch (Hawk_01)

The land is allocated for mixed-use redevelopment comprising around 29 dwellings, small-scale employment (eg. studio/workshop space) including a permanent location for the village shop and associated car and cycle parking and turning areas. The site should be landscaped to provide boundary screening appropriate to the location. Strategic Policy SP03 should also be updated to reflect the increase in housing numbers for Hawkchurch.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Introduction CarneySweeney acts for Mr and Mrs Hansford, in connection with land at Pit Orchard, Bimbom Lane, Kimington (Kilm_05) which our client has been seeking to promote for open market led housing development through the draft Local Plan. These comments are submitted to the East Devon Local Plan 2020-2042 Regulation 19 Consultation. These comments supplement those that were submitted to the Local Planning Authority in September 2024 in connection with the Regulation 18 Consultation. This previous comments are appended in full. Once again, we write to confirm that a series of inaccuracies have arisen within reporting of this site by the Council hat has led to the site not being considered for allocation for market-led residential development. The characteristics of the site, and its location, inform its development potential and its omission from the Draft Local Plan is unjustified. The Site and Surroundings The site – shown below - extends to 0.56ha and is located to the south of Kilminster. The site fronts on to Bimbom Lane from which access is taken: Topographically, the lane is lower than the surrounding landscape, with the exception of a narrow band of land already developed for housing to the north that runs east to west along a section of Silver Street and Silver Lea. The site largely consists of scrubland with the central part of the site already been cleared and an access road constructed up to base course level in connection with an existing planning consent. The site also includes narrow but steep banks in the south west, south and east with heavily planted mature trees positioned at the top of the slope. The northern boundary consists of a low bank topped with a mature hedgerow and trees. The topographical nature of the site and the presence of a band of heavily planted mature trees around the boundary, with

the exception of the point of access, means that the views out of the site are very limited. The level central part of the site falls away from Bimbom Lane meaning that the site is not visible in any views from the east. At this location, Bimbom Lane acts as a small ridge with it being the local high point for views from the east coming from other areas of Kilminster, and Axminster beyond. In addition to the topography of the site, a strong mature Devon hedgebank on the east side of Bimbom Lane prevents any views towards the site from the east, as demonstrated in Photograph 3 of this report.

Kilminster itself is a village with a population of just under 1,000, situated south of the A35. Kilminster has a good range of community facilities including a church, primary school, pub, petrol station, farm shop and cricket pavilion with bus services available to the larger settlements of Honiton and Axminster. These factors contribute to Kilminster being able to accommodate suitable levels of development. Planning History The site has a relatively extensive planning history and benefits from an extant planning consent (ref: 15/1746/OUT and 16/1586/RES) for 6 residential dwellings. The planning consent is for an affordable housing led development, therefore, there is a recognition that residential development can be accommodated at the site. Correspondence received from East Devon District Council by email dated 15th May 2018 states that “the development has begun within the requisite time period established” and consequently, it can be said with confidence that the principle of residential development of this site has been established and secured. In granting consent for the proposal for 6 residential dwellings, the Council concluded that “the benefits of the scheme are considered to outweigh any harm”. In relation to character and appearance, it was determined that the “site would be apparent from localised views... such views as would be afforded would though be localised only and although likely to have a slight negative impact this could be minimised through the use of appropriate design and materials”. Furthermore, landscape impact was considered to be “limited”.

www.carneysweeney.co.uk Subsequently, two more detailed planning applications have been submitted to EDDC for residential development (19/0077/FUL and 20/0435/FUL) with both being refused. The former was dismissed at appeal in March 2020, yet raises pertinent points regarding the development prospects of the site. Notably, in coming to their decision, the Inspector concluded that the development would “utilise a brownfield site which is encouraged by the Framework”, suggesting that weight should be added to the re-use of the site for residential development. Notable in its absence, was any discussion around landscape impact, particularly of interest as the site is within the AONB suggesting that landscape impact was not fundamental to the case for refusal. The latter application provided new commentary on landscape impact, stating that “the impact of the development on visual receptors is likely to be negligible in most views although the visual impact on residents and pedestrians from Silver Street is likely to be moderate adverse during construction and on completion reducing to low as new perimeter planting matures”. These recent applications demonstrate that development would give rise to very limited landscape harm. The fact

remains that the site has secured a consent for 6 dwellings which has been lawfully commenced through the creation of the access road and remains capable of implementation in full. Policy Context for Plan-Making Provisions for plan-making are set out within the NPPF and NPPG. Plan makers are required to take account of the following points when preparing their Local Plan. Under the transitional arrangements of the December 2024 NPPF, the new Local Plan will be considered under the provisions of the December 2023 NPPF. National Planning Policy Framework (December 2023)

- Paragraph 31 states that “The preparation and review of all policies should be underpinned by relevant and up-to-date evidence. This should be ...focussed tightly on supporting and justifying the policies concerned and take account of relevant market signals.”
- Paragraph 35 identifies the tests of soundness as being: a) Positively prepared: As a minimum, seeking to meet the area’s objectively assessed needs and informed by agreements with other authorities so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with sustainable development. b) Justified: An appropriate strategy based on taking account of reasonable alternatives and proportionate evidence. www.carneysweeney.co.uk c) Effective: Deliverable, based on effective joint working on cross-boundary strategic matters, evidenced in a Statement of Common Ground. d) Consistent with national policy. The Spatial Strategy We support the spatial strategy contained within Policy SP01 which identifies Kilminster as a Service Village where the Draft Plan seeks to allow limited development. This is reflective of the amenities available within Kilminster which are located in proximity to the site. However, only two allocations are proposed for the settlement set to deliver 28 new homes in total over the plan period. East Devon Strategic Planning Committee decided not to allocate the site at the meeting dated 20th September 2024. The Report, prepared by Officers in advance of the meeting, proposed not to allocate the site due to development likely having “significant landscape impact”. This assertion of significant landscape impact is not justified and ignores the Council’s own site assessment carried out in preparation of the Report. The Council contends that the site has a very high landscape value but a low to medium visibility due to mature trees at its boundary. The Council has also failed to recognise the extant planning permission on the site which not only secures the principle of residential development but also contains written commentary from the Council within the Officer Report that the landscape impact would largely be negligible with some moderate adverse impacts from Silver Street. As such, the Council failed to appropriately justify the decision to omit Kilm_05 as a draft allocation in the Local Plan. Housing Trajectory and Delivery Up to 2031/32, the Council indicate a trajectory to deliver 850 dwellings per year on average, with the remaining plan period from 2032/33 onwards to deliver an annual average of 1,070 dwellings per year. Whilst this averages out to provide for the required housing need, it means that for the first part of the plan-period, the LPA will be

under-delivering against their identified housing need and more than likely unable to demonstrate a five-year www.carneysweeney.co.uk housing land supply within the early parts of the plan-period, as evidenced by Appendix 1 of the Draft Local Plan. This approach appears to be at odds with the Framework, in particular, the requirement to “meet the area’s objectively assessed needs”. It is, effectively, a workaround, where the LPA will only be delivering 70% of the housing requirement, which would be averaged out by delivery later in the plan period, for the Plan to continue to be assessed against the previous version of the Framework and therefore requiring 80% of the housing requirement to be planned for. Elsewhere in the Draft Local Plan, notably in Strategic Policy HN02 (Affordable Housing), it is referenced that 35% affordable housing would be a target for windfall development outside settlement boundaries. This appears at odds with Policy SP06 which restricts development outside settlement boundaries, presenting concerns about the level of contribution that windfall sites will provide to meeting housing need. Paragraph 75 of the Framework is clear that there should be “compelling evidence” that windfall sites will provide a reliable source of supply. The current wording of Policy SP06 does not provide confidence that development on windfall sites will be a reliable source of supply. In combination, the restrictive nature of Policy SP06, and the reliance of larger sites to deliver the required housing need later in the plan-period cemented by Policy SP02, presents the prospect of a deteriorating housing supply position from the point of adoption within the first half of the plan period. The Framework is clear that planning policies “should identify opportunities for villages to grow and thrive, especially where this will support local services”. The restrictive nature of Policies SP02 and SP06 is at odds with the clear intention of what the Framework is aspiring to achieve. Furthermore, the Framework is clear that strategic policies should provide for objectively assessed needs “as a minimum”. Previously Developed or Brownfield Land An appeal decision for this site from March 2020 concluded that the site is a brownfield site, and factors of perceived neglect are not uncommon with many brownfield sites. Nevertheless, the NPPF acknowledges the significant role of brownfield sites to meet housing need and encourages development of these sites, with Paragraph 123 stating that: “Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or ‘brownfield’ land”. We consider that appropriate weight has not been given to the site’s status as previously developed land in the site assessment for Kilm_05. www.carneysweeney.co.uk Environmental Considerations Ecological matters have never been cited as reasons to refuse planning permission on this site. Furthermore, both preferred allocation options in Kilminster would be caught by both Nutrient Neutrality and mandatory Biodiversity Net Gain requirements which would limit their deliverability and site yield. As Pit Orchard already benefits from an extant planning consent, development would not be subject to the same restrictions either through implementation of the current consent or a variation thereto. CONCLUSION Fundamentally, the reason given by EDDC for not allocating

Kilm_05 is inconsistent with assessments of the site undertaken by officers in determining the previous planning applications on the site. The conclusion that development of the site will create visual impact on the wider parts of the National Landscape overlooks documented evidence contained within the extensive planning history of the site. For example, the description of the site and the ability to develop the site under the extant planning consent are not considered in the EDDC site assessment. Moreover, there is no reference in the EDDC site assessment to Kilm_05 being a brownfield site. This is surprising as the NPPF clearly favours the use of brownfield land for the development of new homes which is a key component in the core theme of 'making effective use of land'. It is considered that much greater weight should be afforded to this status. In the context of the Framework and other material considerations, aspects of the Draft Plan appear inconsistent with these, and sufficient justification is not provided to demonstrate that the housing trajectory is robust, particularly when considering the approach for windfall sites. In the event that additional housing sites are required to meet the identified housing needs of the District, the site is in a prime position to accommodate a modest level of growth. Development of the site is shown to provide very limited impact on heritage assets and areas of landscape importance and is located in a sustainable location with good access to local services and facilities as confirmed by the decision of EDDC in granting permission for residential development of the site in April 2016. Finally, the site is deliverable in BNG and nutrient neutrality terms by virtue of the extant consent. These characteristics put the site head and shoulders above any other site in the village and in our opinion make it a logical and essential choice for allocation.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Kilm_10: We welcome the recognition in policy SD20 that a sensitively designed scheme will be essential to avoid potential adverse impacts on the grade II listed Old Inn. However, at present the site boundary includes the car park to the public house. Loss of the car park would be unacceptable as it would compromise the sustainable future of this historic building, and would therefore be incompatible with NPPF paragraph 196. As the southern part of the site appears adequate to accommodate 5 homes, loss of the pub car park would also be unjustified. To address this issue, we request that either the car park is excluded from the boundary of the site allocation, or that specific provision is made for retention of parking. Boundary planting should also be retained/enhanced on the roadside (consistent with site Kilm_09b), and between the pub and the proposed development site to retain a visual buffer and a sense of enclosure.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Kilm_10: Remove pub car park from site boundary and amend policy to refer to boundary planting, or insert following text: “The existing car park must be retained for the use of the Old Inn public house, with built development restricted to the southern part of the site. Boundary planting should be retained/enhanced on the northern site boundary (along the A35), and to separate the car park from the southern development area.”

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Strategic Policy SD20 - Development Allocations at Kilminster Place Land Limited welcomes the identification of land at Kilminster to deliver new residential development over the plan period, namely at Kilm_09b and Kilm_10. Kilminster is recognised as a service village under Policy SP01, capable of accommodating new development in accordance with the spatial strategy, with a minimum of 59 dwellings to be achieved within the Neighbourhood Plan area over the period 01.04.2020 – 01.04.2042. The cumulative total capacity of allocations identified under Policy SD20 achieves 42 dwellings. Land East of George Lane, Kilm_09b is allocated for 23 dwellings. The site represents the easternmost of two fields sandwiched between the northern built-up edge of Kilminster and the A35 corridor. The western field is allocated for 14 dwellings in the Kilminster Neighbourhood Plan (Made in October 2022) which covers the shorter plan period of 2020-2031. Place Land broadly supports the proposed capacity of 23 dwellings for Kilm_09b. This capacity figure is informed by a presentation by Place Land to the Council's Strategic Planning Committee in January 2022, which indicated a potential capacity of 35 – 40 dwellings for Kilm_09 a and b combined. Since this presentation, further design work has been undertaken to refine the concept layout, including preparation of a landscape appraisal, initial drainage strategy, walkover ecology survey and heritage appraisal. Copies of these studies and concept proposals for the site, prepared by Lacey Hickie Caley Limited accompany these representations. The findings of the additional surveys confirm that Kilm_09 (a and b combined) is capable of accommodating around 39 dwellings in a sensitive manner which respects the special landscape qualities of the National Landscapes and the setting of the listed buildings and mitigates any harm through the design and layout. The surveys submitted

in support of this representation are summarised below.

Landscape The allocation site lies within but on the edge of the East Devon National Landscape; its northern extent is defined by the A35. To the north west of the site lies the Blackdown Hills National Landscape, although land immediately north of the allocation site is not a protected landscape.

2 The landscape and visual appraisal identifies the main impact of the development of the allocation to be on views from the A35 on the approach to the site from the west, where the site can be appreciated as open fields with views to the Baptist Church in Kilminster. In the wider protected landscape of the National Landscapes the site is seen in the context of the rest of the village and its development would have a minimal adverse impact on the protected landscapes. The proposed layout strengthens the established hedgerow and tree planting along the northern boundary, safeguarding a 10 metre corridor for additional landscaping to mitigate the visual impact of development when viewed from the Blackdowns National Landscape and to enhance the health and wellbeing of new residents through separation from the A35 corridor. New and additional planting is proposed along the site's other boundaries to maintain and enhance the established visual enclosure of the site and soften the visual impact of new built development. An orchard is proposed to the south of the site and the existing weak field boundary planting through the centre of the site would be bolstered through additional tree planting to introduce a strong framework of landscaping. The landscaping would be sufficient to mitigate the landscape and visual impact of the proposed development on the National Landscape and assimilate the development into its context.

Heritage The heritage appraisal concludes that there is no functional relationship between the listed Old Inn and the proposed allocation. The setting of the Old Inn can best be appreciated from the roadside approaches along the A35; views of the Old Inn from the allocation site are incidental and do not add to its heritage significance. Similarly the allocation site does not form part of the 'designed' or 'intended' views of the Old Inn and is therefore not within the setting of the listed building. Accordingly, the site's development would not harm the Old Inn's setting or significance. Any views of the development are already well-screened by existing vegetation although additional landscape enhancement could be delivered as part of the development, if desirable. Any impact of development on the setting of George Farm to the west of George Lane can be mitigated by avoiding building in the junction of George Lane and the A35. The listed war memorial to the north of George Lane has a very intimate setting which would not be affected by the development of the allocation.

3 Ecology The site comprises two arable agricultural fields with trees, hedgerows and other planting along the site boundaries. The northern hedgerow alongside Gammons Hill (A35) comprise two distinct sections. The western section appears to be a species rich hedgerow that has been in place for a good many years, the eastern extent beyond the field entrance is a line of overgrown beech trees, possibly planted as a hedgerow which became overgrown. This extent is of significantly lower value than the western extent. The eastern hedgerow is also species rich and contains some significant trees.

The southern hedgerow (to the north of Meadow Bank) consists of a line of trees with an understory of shrubs. None of the trees in this area are considered significant in an arboricultural context, but several are significant in an ecological context. There are a small number of trees to the rear of properties in The Orch, including one very large oak which is of significant biodiversity value. A line of small and insignificant trees, largely ash, bisects the two field, separating it in two. These tree are of low value from an ecological context and ash die back is already prevalent in this site, which will mean their demise. There is a section of defunct dry stone wall in this area. Very little of it now remains and it serves no purpose. The boundary 'bund' of Dares Field is currently of low biodiversity value. The species rich hedgerow alongside George Lane is of a similar composition and age as that alongside the A35. Two large oak trees are located within this hedgerow. Both have been butchered by Western Power as the power lines run close to and through the trees canopy. The grassland within the two fields is arable in nature. The first survey recorded 100% rye grass, shortly after this it was replaced with maize and has subsequently been returned to rye. The ecological value is negligible.

Transport The site's location on the edge of Kilminster offers good opportunities to access an existing network of footways, cycleways and public rights of way, including a footway on the A35 connecting to a footway/cycleway routing along the B3261 into Axminster. Existing bus stops are located on the A35 within 260 metres of the site. The bus services provide a service between Exeter and Axminster with services every 2 hours Monday to Saturday. Axminster Rail Station located 2.64 kilometres from the site provide hourly train services to Exeter and London Waterloo. 4 The site benefits from a good range of facilities within an acceptable walking and cycling distance. Accordingly, the site represents a sustainable location for development with reasonable opportunities to travel by sustainable transport modes. There are two potential vehicular access options. Option 1 is an access off George Lane, via a simple priority T-junction, whilst option 2 is an access off the A35 via a priority junction with a ghost-island right turn lane arrangement. Devon County Council Highways Authority has commented on Option 1 and raises no concerns to the principle of a vehicular access off George Lane. Initial consultation with National Highways on Option 2 indicate that access onto the A35 could be achieved if a departure from standards was accepted. The proposed allocation offers the opportunity to introduce additional pedestrian and cycle connections onto the A35 and into Kilminster village to the benefit of new and existing residents.

Drainage The site comprises relatively flat agricultural land; the topography falls generally from west to east at an average gradient of 1 in 33 to a low point in the north-east corner adjacent to the A35. The whole site lies within Flood Zone 1 and is at very low risk of surface water flooding. British Geological Society mapping indicates that the site is underlain by a bedrock of mudstone with superficial deposits of silt, sand and gravel in the western part of the site and sand and gravel in the eastern part. It is therefore anticipated that the use of soakaways will be practical to dispose of surface water runoff. As a worst case scenario, an infiltration basin would be located in

the north-east corner of the site to restrict run-off to greenfield rates. The accompanying layout plan incorporates the infiltration basin. Sewer records indicate that there is a foul sewer connection from the existing residential development in Dares Field, to the south west of the site. A combined sewer should be capable of draining the western part of the site by gravity. The remainder of the site will gravitate to the north-east corner and can be connected to the existing combined sewer in the A35.

[Further detail on the site can be found in the attached PDF]

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Wording of Policy SD20 The Neighbourhood Plan was prepared in general conformity with the Adopted East Devon Local Plan 2031 and there is a stated intention to monitor the relationship with the emerging Local Plan and undertake a review of the Neighbourhood Plan, if necessary, to ensure it takes precedence in decisions on developments in the parish (paragraph 1.1, Kilminster Neighbourhood Plan). 5 The National Planning Policy Guidance advises that where a neighbourhood plan has been brought into force, the LPA should take its policies and proposals into account when preparing the local plan and should not duplicate those policies in the neighbourhood plan unless changed circumstances justify this (Paragraph: 006 Reference ID: 61-006-20190723). For the following reasons Place Land considers that changes in circumstance justify the inclusion of the land allocated in the Neighbourhood Plan under Policy HD3 in this Local Plan within Policy SD20:

1. The Neighbourhood Plan expires in 2031, some 10 years prior to the Local Plan and whilst there is a stated intention from the Neighbourhood Plan group to review the Plan, it cannot be relied upon to ensure the ongoing allocation of the site for housing.

2. Kilm_09b is reliant on vehicular access via the land identified within the Neighbourhood Plan land (HD3). The Highway Authority, Devon County Council has advised that a satisfactory access arrangement can be secured via George Lane (see attached email and access drawing). A vehicular access via the A35 would also be taken from within the Neighbourhood Plan allocation. The allocation of Kilm_10 within this Local Plan also includes a stated preference for the highway access to be gained from Kilm_09b. Accordingly, the Local Plan allocations are interlinked with, and reliant upon, the delivery of a site which falls outside the Local Plan and which may not retain its status as an up-to-date allocation for the lifetime of the Local Plan.

3. The Neighbourhood Plan site is referred to as “Kilm 09a” within Policy SD20. However, Kilm_09a is not an allocated site within this Local Plan, it is not identified on the Policies Map and is not known by this reference within the Neighbourhood Plan. It would appear that the site reference has been carried over from earlier drafts of the Local Plan when the land was included in the site allocation.

4. Policy SD20 requires that a comprehensive development layout should cover both the Neighbourhood Plan allocation and the local plan site, with the whole site conforming with the design principles set out in Neighbourhood Plan policy. The effectiveness of this policy approach is questionable. Firstly, the design principles in the Neighbourhood Plan policy were drafted to apply to HD3 only. These policy principles cannot be conveyed to another allocation outside the Neighbourhood Plan. Policy SD20 does not clarify which elements of Policy HD3 represent the “design principles” which should apply across the whole site, leaving this open to interpretation at the submission of a planning application. Policy SD20 includes 6 some further design principles regarding buffer planting and footpath links. However the relationship between these principles and those within the Neighbourhood Plan are unclear.

5. The design principles within Policy HD3 refer to policies in the Adopted Local Plan, including EN19 and TT1. These policies will be superseded by the new Local Plan.

6. In respect of affordable housing and self-build, the Neighbourhood Plan policy requirements under Policy HD3 are overly prescriptive and onerous, requiring 50% affordable housing and a specific mix of house types for affordable housing and self-build. The policy requirements are inconsistent with the policies of this Local Plan and the prescriptive nature of the policy impedes delivery of housing (see attached copy of Policy HD3).

7. In light of these policy discrepancies and in the interests of establishing clear development principles for the comprehensive development of land at Kilm_09 (a and b), Place Land finds Policy SD20 to be ineffective and unsound in its current form. To achieve a sound policy, the wording should be amended to allocate Kilm_09 a and b under Policy SD20 with comprehensive design principles to apply to the whole site and affordable housing provision consistent with Kilm_09b. b) Place Land propose the following amended wording: Policy “Land east of George Lane is allocated for 37 homes. This site is in the East Devon National Landscape and requires very careful design to take account of its landscape setting. A comprehensive development layout should include:

- a buffer of planting to the northern site boundary (along the A35);
- safe pedestrian and cycle access with connections to adjoining roads and paths, including to southern and northern site boundaries and a west-east pedestrian/cycle link to connect to existing facilities in the village”

Policies Map For the reasons set out in respect of representations to Policy SD20, Place Land objects to the omission of land west of Kilm_09b from the policies map. In order to ensure the comprehensive delivery of development across Kilm_09a and Kilm_09b, the sites should be identified as a contiguous residential allocation on the policies map, supported by Policy SD20, as proposed for amendment by Place Land Limited.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD22

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The paragraphs make the point that there needs to be a new footpath to link these two developments to the village and the development needs to be sensitively made due to the nature of the landscape.

1. A new footpath would be necessary as the road has no pavement beyond the roundabout where the Exmouth road (B3178) joins the A3052. It is dangerous to attempt to walk along the busy A3052 where there is no pavement, the road narrows at The Toll House, and traffic make no allowances for a pedestrian walking along the road.

2. The proposed development is a considerable way from the centre of the village. The centre of the village is not in the centre of the dwellings, it is skewed towards the eastern end of the village. The pub, church and primary school are all in the eastern edge of the village and even linking a new development to the existing footpath, it's still a long walk to these facilities.

3. It draws reference to the sensitivity of both sites. The land is steeply sloping up from the Exmouth road (B3178). It is part of the National Landscape (old A.O.N.B.) therefore two new housing developments would be out of place in such a designated area.

4. The land is steep. When we had the severe rainfall event, May 2023 when 5 1/2 inches of rain fell in 3 hours (Environment Agency figures), I have photographs of the runoff from these fields, coming down the footpath from Badger Close and onto the Exmouth Road, B3178 where it caused a deep flood across the road. The footpath looked like a muddy river in spate, emptying out onto the corner of Exmouth Road (B3178). Changing these fields from agricultural land to a housing development would greatly increase the ability for the land to create runoff onto a busy road, the B3178. Non absorbent roadways, driveways and hard standings for cars would exacerbate this situation as the land which was once absorbent agricultural land would be unable to absorb such rainfall and so increase runoff.

5. The Exmouth Road, B3178, is a very busy road. Despite the best efforts of our local Speedwatch Team, traffic continuously speed on it, whether entering or exiting the village in what is a 30m.p.h. area. A further 55 houses in this location would increase traffic on this road and also be at risk entering their access road off the B3178. In particular, traffic leaving the village goes around the corner by Littledown Lane, then accelerates away along the straight part of the road exiting the village despite it still being a 30m.p.h. speed limit, and would be accelerating away where the access road to these developments would join the Exmouth Road.

For these reasons I consider the developments as described at SD22 Newt-04 and 05 to be unsound.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Keith Symes

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD22

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: This development is part of a National Landscape (NL) and part of a Site of Special Scientific Interest (SSSI) and does not comply with the requirements for development within these areas.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I do not consider that this plan can be legally compliant in this area.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

There are a number of reasons I believe these plans for Newton Poppleford (NEWT04 & NEWT05) are not viable and are listed here.

1. In a National Landscape (NL) the conservation and enhancement of their natural beauty should be given priority over other considerations. Within these areas development should only be provided for where it would support the conservation or enhancement. National Landscape is afforded the same level of importance in terms of landscape importance as is enjoyed by National Parks. There is a duty of all relevant authorities to have the purpose of conserving these areas. These new plans are overbearing and would change the nature and outlook of the National Landscape.

2. This land is adjacent to a Site of Special Scientific Interest (SSSI) namely the Pebblebed Heath.

3. The wild life in this area requires protection. There are Deer, Bats, Badgers and I am informed Dormice. There are a large variety of bird species that include Owls and Buzzards plus many others. We are next to this plot of land and we have Newts, Frogs and Toads in our garden and they can be heard calling to others in the field (NEWT05).

4. Where is the justification for a need of this much expansion in Newton Poppleford. The proposals would increase the Village size by 5.6%, a major increase in a small Village. This proposal represents unsustainable development and is inappropriate in terms of social, economic and environmental roles that development should play in such settlements.

5. South West Water with their current infrastructure struggle to cope with the clientele they currently have, they are clearly not in a position to cope with more.

6. The small school is at capacity and not in a position to take what would almost certainly be a large increase in pupils.

7. In 2023 there was unprecedented rainfall that is becoming more common. The run-off from NEWT05 caused flooding in a number of houses in Badger Close. Building (i.e. impermeable material) on that area will only further increase the potential for surface water run-off onto Badger Close and the B3178 road.

8. On two previous occasions permission was sought to develop this land and even on appeal the permission was refused. These refusals were for very good reasons, those reasons still stand today.

9. There are minimal facilities in Newton Poppleford, No Doctor Surgery, No Pharmacy, No Access to a Dentist - NHS or Private. Just a small village shop, two takeaway restaurants and two car repair garages. Safe road crossing facilities are also inadequate as evidenced (but not acted upon) by the death of an elderly person attempting to cross the road. 10. The increased road traffic through the adjoining roads, Badger Close and potentially Beech Close, would be hazardous for current residents and generate further traffic entering the B.3178 with consequential risk of additional danger to and free flow of traffic.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The planning boundary has been shifted to encompass a site previously dismissed as inappropriate in a NL. This goes against co-operation with those who previously worked on and developed the previous plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: This plan needs to take into account all of the points I have raised and obviously those raised by others in the community. Justice as they say "needs to be seen to be done".

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Land north of Behind Hayes (Otto_01) The site is allocated for 10 homes. There are significant heritage and landscape constraints at this site and the northwestern part of the site is not appropriate for built development. This land should be kept open and made available as a community open space/orchard or similar use. Development should be very carefully designed to ensure that it is compatible with the National Landscape and adequately mitigates any impact on the surrounding heritage assets. Vehicular access needs to be to the east/Orchard Drive.

The site is an ancient orchard that needs to be protected and managed for its cultural, heritage and potential biodiversity significance and is already deemed as inappropriate for built development on the northwestern side. However, it is not clear enough in the local plan (above paragraph and map) as to the exact area the 'northwest side' refers to. The surveyors have been surveying the whole of the paddock in recent days, including the south and the west which is of concern.

It is important that the village retains its rural character by preserving green spaces in between housing and other buildings to maintain the landscape and rural heritage rather than using these areas for infill which would permanently impact the important wildlife that may exist as well as the landscape view of the conservation area. The

orchard could be used for outdoor educational purposes, especially due to its proximity to the school especially as the latter has very limited outdoor space.

There are more suitable sites for development, for example brownfield sites on the outskirts of the village that would have far less negative environmental impact.

While there are constraints mentioned in the local plan regarding the landscape importance of the orchard, there is a lack of reference to protection / enhancement of biodiversity or to the alternative educational and community uses that it could provide.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

- The wording in the local plan needs to be more precise on the exact area of the orchard that is proposed for the housing development, and which will be preserved as a community orchard (or similar).
- The wording needs to include reference to biodiversity/ wildlife importance and protection, including protection of trees
- The wording should make reference to alternative uses of the area to housing, such as livestock grazing and educational opportunities

Below, I have made suggestions for rewording the local plan paragraph.

The site is allocated for 10 homes. There are significant heritage and landscape constraints at this site and the north western and south western part of the site is not appropriate for built development. This latter section of the land in question should be kept/ preserved as a historic orchard and made available as a community open space/orchard or similar use, managed for the benefit of people and wildlife.

Development should be very carefully designed to ensure that it is compatible with the National (or should this be Natural?) Landscape and adequately mitigates any impact

on the surrounding heritage assets and the natural environment as well as considering the educational value of the green space. Vehicular access needs to be to the east/Orchard Drive.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Michael Parkin

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD23

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Representation to the Regulation 19 consultation on the East Devon Local Plan 2020-2042,

This representation concerns: The strategic Policy SD23 Development allocation at Otterton Land north of Behind Hayes (OTTO-01)

Relevant parts of the local plan:

Our Outstanding Historic environment

Land north of Behind Hayes (Otto-01)The site is allocated for 10 homes. There are significant heritage and landscape constraints at this site and the northwestern part of the site is not appropriate for built development. The land should be kept open and made available as a community open space/orchard or similar use. Development should be very carefully designed to ensure that it is compatible with the National Landscape and adequately mitigates any impact on the surrounding heritage assets. Vehicle access needs to be to the east/Orchard Drive.

Policy HEO3: Conservation Areas

B. Requirement: take in to account important views within, into or out the Conservation area and show that these would be retained and unharmed;

E. Be sympathetic to important spaces such as paddocks which make a positive contribution to the pattern of development in the Conservation area.

My submission to EDDC

I welcome all of the above restrictions but feel that they do not sufficiently protect the important and only view of the conservation area looking from the south towards the north. Please note : the developer is already surveying the whole of this paddock, including the south and west, and the whole of the second smaller paddock to the east.

The field gate, in Behind Hayes, alongside the property EDZEL, provides the only public view of the conservation area, from the south. From the field gate there is a perfect landscape view across the paddock, to the village, the conservation area and, to the right, the plantation of sycamore trees with Anchoring Hill and the landscape beyond.

Although not open to the public, this paddock is a huge amenity for the village. Families bring their children to watch the sheep and lambs grazing in the orchard, just as they have done for centuries before. Visitors to the village and walking groups all stop at the gate to take in this beautiful view. The paddock also has a few remaining ancient cider-apple trees which still produce a large crop every year. It is also worth mentioning that the field gate is the historic entrance once led to a “roadway” which ran all the way down to the main road. This is shown on the Tythe Map from 1844.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: My request to the Local Plan Team

In order to protect this heritage view and taking account of Policy HEO3 part B and E, the only alteration I would ask to be made is to add a few words which are shown in red below.

Land north of Behind Hayes (Otto-01) The site is allocated for 10 homes. There are significant heritage and landscape constraints at this site and the northwestern part of the site, and the southwestern part of the site, including the historic view over the conservation area, from the field gate in Behind Hayes, is not appropriate for built development. The land should be kept open and made available as a community open space/orchard or similar use. Development should be very carefully designed to ensure that it is compatible with the National Landscape and adequately mitigates any impact on the surrounding heritage assets. Vehicle access needs to be to the east/Orchard Drive.

Full name: Roger PELLOW

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD23

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: This particular site would be difficult to develop and has many obstacles to building housing on it which would need to be sorted out. The site is in an elevated position within the village and will have a large visual impact on surrounding listed buildings and also the villages Heritage area. Also the site is very undulating with large contour changes. Due to the elevation of the site and the drop to current housing the risk of flooding is significant to established housing. From my property alone the drop from the site varies between 7 -14 meters. The other factors that need to be considered are the impact of light and noise pollution which at present there are neither. There are Bats in the surrounding trees that also need to be considered. Due to the exposed site any development need to be low profile such as Bungalows. Some properties sit at an elevated position in relation to the site and their foundations and gardens would need to be reinforced to avoid erosion.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: All the properties below the the proposed development need to have protection against flooding. An area such as an Orchard with trees would help elevate flooding, incidentally the field was in the past an orchard. Any housing need to be low profile. Finally the Heritage properties and preservation area must not be impacted.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Not suitable due to impact on Heritage area listed buildings ! As elevated site. Severe danger and risk of properties below site of flooding ! Noise and light pollution will affect HUMANS AND BATS

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Look for another more suitable site in village

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Roger PELLOW

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The Draft Emerging Local Plan 2020-2040 states as follows in relation to what I shall refer to as the Orchard Site. Land north of Behind Hayes (Otto_01) I support the over-riding policy objective to provide additional housing in line with national policy and agree that further housing should be built in Otterton. The issue is where this would best take place.

The 2023 Consultation In 2023, a consultation took place seeking feedback as to which of five sites would best be targeted for redevelopment. These were identified as Otto_01, 02, 03a, 03b and 04. The product of the consultation was outlined in a response made by the Parish Council in a report to EDDC dated 15 January 2023. In that report the Orchard Site was ranked 4th in terms of preference for redevelopment. (Ranked 1-5 the most preferred has the lowest number.) Ranking 1. Otto_04 85 2. Otto_02 87 3. Otto_03a 98 4. Otto_01 113 5 Otto_03b 133 The preferred sites were those at the northern end of the village. Otto_04 This is the derelict site on Ottery Street adjacent to the most recent Rydon Orchard development that has generally met with approval in the village. Otto_02 This is the site adjacent to the North Star engineering works and largely level. By some margin, Otto_1, was not seen as a suitable or preferred target for development.

The location of Rydon Orchard, Otto-04, the North Star Engineering Works and Otto_02 are shown below. Quite why these sites were not selected is unclear when they are within the Settlement Boundary, adjacent to essential services and located where any scheme would have no adverse affect upon the landscape nor impact upon heritage assets located in the village.

Otto_1 – The Orchard Site

The votes against the Orchard Site would have represented local appreciation of the issues that arise from any attempt to develop the site. Some of these impact directly upon the costs of such a scheme and ultimately, its viability. If a scheme is not viable, it will not be built, and the objectives of the underlying policy will fail. The particular issues that detract from the decision to allocate the Orchard Site and will impact upon viability are these:

Contours of the Site The site slopes steeply from south to north and particularly towards the northwestern boundaries. Parts of the site are known to be unstable and have shown a propensity to slip after wet weather.

Run-off Any scheme will substantially increase the surface water run-off and there is the prospect of flooding affecting those properties lying to the north of the site.

Surface and Foul Water Drainage The concerns over flooding are exacerbated by the knowledge that the current surface and foul water drainage systems in the village are already overloaded. This is especially in the summer months when additional pressure is placed on the system by the Ladram Bay Holiday and Caravan Park. Before any further development takes place in the village, this issue requires resolution. Such additional cost might fall on the developer.

Access The draft plan envisages access to the site via Orchard Drive, correctly acknowledging the inherent unsuitability of attempting access from Behind Hayes that is narrow and single carriageway. But even the roadway from Orchard Close is likely to require upgrading thereby adding to the costs of the scheme.

The draft plan as quoted above [para.1.2] acknowledges that the site is unsuitable for development on a number of grounds:

The ‘Significant heritage and landscape constraints’ The Orchard Site directly abuts the former Houstern Farm of which Houstern Farmhouse formed part. This is one of the oldest houses in Otterton dating from 1550. Any scheme will overshadow and degrade the property as a heritage asset.

A key element of Otterton's heritage is that a number of farms were sited on Fore Street with their land rising up the slopes behind them. In the case of Houstern Farmhouse, this included the ancient orchard, the remnants of which are still apparent in the old apple trees on the site. Part of the essential character of the village is its lineal nature with the original houses fronting Fore Street and their gardens, farms and open space behind.

The preservation of the Orchard site as open space is essential to preserve the historical nature of the village and whilst the Draft Plan states that any 'Development should be very carefully designed to ensure that it is compatible with the National Landscape and adequately mitigates any impact on the surrounding heritage assets', it is difficult if not impossible to see how this can actually be achieved.

Conclusions

Looking at a plan of the village, one only sees it in two dimensions and the attraction of infill within the settlement boundary might look neat and logical, but that is not the case.

The Draft Plan makes plain a number of impediments to any development of the site and goes so far as to declare that the northwestern part of the site is not appropriate for built development. The Draft Plan, by implication, divides Otto_1 into two parts that might be described as the Orchard Site to the west and the Paddock site to the east. This said, I would submit that the same issues apply to the entirety of the site Otto_1.

On top of the issues raised in the Development Plan, are those I listed above which would significantly add to the costs of the scheme and in my view, are likely to render it unviable, especially when there is likely to be an additional need to accommodate Social and Affordable Housing.

If the objective is to see the provision of new housing in the village, the most obvious route is to identify and facilitate the development of sites that are suitable and more readily built out. In 2023, Otterton residents recognised which of the options identified should be preferred, and they are right. If local consultation is to mean anything, the

sites to be allocated should be those to the north of the village, not least because the Orchard/Paddock site is so plainly unsuitable for development and the economics stand every prospect of rendering such development unviable.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD23

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Otto_01: While the policy for Otto_01 helpfully identifies, and goes some way to addressing, the heritage issues at this site, we consider that it would be helpful if there were greater clarity around some of the key parameters that developers will need to consider.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Otto_01: Suggested adjustment to policy text: "... Development should be very carefully designed to ensure that it is compatible with the National Landscape and adequately mitigates any impact on the surrounding heritage assets through its layout, design, landscaping and limits on building heights. This should include identification of any key views to be conserved and enhanced. Vehicular access needs to be to the east/Orchard Drive.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD24

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

We support Strategic Policy SD24 and specifically the proposed allocation at Payhembury, the Land adjacent to Markers Park (Payh_03a). However an amendment to the allocation boundary is proposed. See attached...

The proposed allocation states:

Land adjacent to Markers Park (Payh_03a)

This site is allocated for 15 homes.

Design and layout of proposals should be appropriate to this village gateway location and sensitively and appropriately take account of the topography of the site and the heritage and any ecological significance of the marl pit (a non-designated heritage asset) which must be retained in the end proposals. Access should be designed to retain existing mature trees and minimise hedgerow removal, whilst ensuring highway safety. No house shall be occupied until a footpath connection is provided with existing

pedestrian routes to the centre of the village. Landscaping which responds appropriately to the introduction of built form in this location shall be provided, including the introduction of substantial boundary screening along the southern boundary to maintain the rural character of the lane and the significance of the setting of the Grade II listed Glebe Farm on the southern approach.

Payhembury is a sustainable location for future development, for the scale of development proposed.

The village hosts the following which provide day-to-day services and facilities:

- Shop / convenience store
- Primary school
- Pub
- Village hall
- Sports playing pitch
- Children's play area

As a result, Payhembury is an entirely appropriate location for future growth, and we support the Council's commitment to direct a proportion of the required growth to the village.

We specifically support the proposed allocation of Land adjacent to Markers Park (Payh_03a) for the development of 15 residential dwellings.

The development of the site can provide much needed market and affordable housing to help meet local housing needs, as well as helping to sustain the vitality and viability of the existing services and facilities in the village.

In terms of the proposed allocation requirements, we agree that the development of the site should also provide footpath connections to the village. Such improvements can be reviewed further as part of an emerging masterplan for the site.

Notwithstanding our support for the allocation of the site, we do have some concerns over the proposed allocation boundary which we consider could be more sensitively located.

Instead, we have prepared and appended to these representations an indicative layout plan (Appendix 1) which would enable the delivery of the 15 dwellings proposed whilst providing a suitable access and associated open space.

As a result of this work undertaken for the site, we request that the allocation boundary for Payh_03a be amended to align with the extent of the Indicative Layout Plan attached at Appendix 1. Having said this, we have prepared a layout within the suggested allocation boundary, which we also attach (Appendix 2). We consider that providing housing fronting onto the road provides a lesser visual and landscape impact as housing is avoided on the higher ground. These layouts retain the TPO trees and offer the opportunity to provide strategic landscaping at this entrance to the village on land within the same ownership. The alternative layout and allocation boundary also provides a buffer towards the marl pit. Foul and surface water drainage connections are nearby and some soakaways are likely to form part of the overall drainage strategy, with some of the land being freely draining with the rest having slightly impeded drainage. Technical work dealing with ecological, heritage, drainage, vehicular/pedestrian/cycle access and other technical impacts will be dealt with as part of the application. Initial work undertaken on these technical matters, both by Summerfield Homes and East Devon District Council, indicate that none of these matters represent an insurmountable bar to delivery of the policy aspirations.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: It is important that Summerfield Homes Ltd is present to participate in the hearing session for Policy SD24 owing to their interest in the Land

adjacent to Markers Park, Payhembury (Payh_03a). It is important that they are given the opportunity to make their case in relation to this policy.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD25

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

On behalf of MR J PERSEY REPRESENTATIONS ON THE EAST DEVON LOCAL PLAN (2020 – 2042) REGULATION 19 CONSULTATION DRAFT (MARCH 2025) BY BELL CORNWELL LLP 1 INTRODUCTION Mr Persey and his family are long standing owners of large areas of agricultural land in East Devon. Our client's interests include much of the land around the village of Plymtree and the surrounding area. The family continue to farm the land today, and also have commercial operations including Fordmore Farm Shop and other commercial space on the East Devon / Mid Devon border. Our client therefore has a wide range of land and building interests in the district and they are actively promoting a site for housing in the village of Plymtree (Plym_03). Against this background, Bell Cornwell LLP has reviewed the policies and information set out in the East Devon Local Plan (2020 -2042) Regulation 19 Consultation Draft and makes the following representations. CHAPTER 5. DEVELOPMENT IN THE TOWNS AND VILLAGES Strategic Policy SD25: Development Allocation at Plymtree Mr Persey supports the development allocation for Plymtree listed in Strategic Policy SD25 and identified on the Policies Map, as "Land north of School - site reference Plym_03)". Mr Persey is the owner of the site, and the land is immediately available for development. The applicant is committed to seeing their site and respective allocation delivered. The inclusion of Plym_03 for residential development is clearly supported as its represents a logical approach to development and growth to the village of Plymtree. It is centrally located to services and facilities and is most appropriately located to assimilate with the built form of the village. The specific policy allocating Plym_03 states; "Land is allocated for 30 new homes and a community facility. This site is particularly sensitive in heritage terms and

detailed assessment will be needed to ensure that an acceptable design solution is reached that respects the special character of the area and the setting of the heritage assets around the site. Footpath links to local facilities will be required as part of the development. The development will need to maximise opportunities for localised improvements/ contributions to enhance sustainable travel modes..” MR J PERSEY REPRESENTATIONS ON THE EAST DEVON LOCAL PLAN (2020 – 2042) REGULATION 19 CONSULTATION DRAFT (MARCH 2025) BY BELL CORNWELL LLP 2 On these technical points we would ask it to be noted that:

- Outline planning application 23/1247/MOUT for 30 dwellings is currently being considered by officers and has support. At the time of submitting these representations the scheme is heading to planning committee with an officer recommendation for approval.
- The scheme confirms that 30 dwellings can be accommodated without detriment to ecology and heritage issues and is technically sound in all respects.
- Footpath connections will be provided to link the site to various parts of the village and safe and suitable access exists for the site. As such, the allocation of the site for residential development is sound and supported by appropriate officer assessment in the submitted evidence base.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD25

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Plym_03: There are a number of designated heritage assets in close proximity to this site allocation including the grade I listed Church of St John the Baptist – a heritage asset of the highest significance according to the NPPF. Development of Plym_03 could result in considerable harm to this asset by urbanising its setting, eroding the relationship with its wider rural landscape to the northeast, and through impacts on views of or from the church and its grounds. We are aware of a current planning application for 30 dwellings on this site. We have outstanding concerns about this proposal and therefore, while we acknowledge that it may be possible to accommodate some new housing in this location, we suggest that the site capacity is further reduced to mitigate impacts. We request that policy SD25 is amended to better reflect these issues and to improve consistency with both the NPPF and evidence base.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Plym_03: We suggest that the site capacity is reduced, or amended to state “up to 30 new homes” along with the following additional policy text: “This site is particularly sensitive in heritage terms and detailed assessment will be needed to ensure that an acceptable design solution is reached that respects the special character of the area and the setting of the heritage assets around the site. Careful consideration will need to be given to layout, building heights, design and landscaping. Development should conserve views of and from the grade I listed church and retain an open green space linking the church and its wider rural setting.”

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

We fully support Strategic Policy SD26 and specifically the proposed allocation of the Land South of Furzehill, Sidbury (SIDM_34).

The proposed allocation states:

Land South of Furzehill, Sidbury (SIDM_34)

This site, to the south of Sidbury, is allocated for 43 new homes. Development of this site will enable the second phase of the Devon County Council proposed multi-use trail (routes used by a combination of cyclists, pedestrians and by/for other movement), ensuring delivery of the entirety of the route from Sidford to Sidbury. Vehicle access to the site will be via A375. Development would be expected to play its role in delivering part of the Sidbury to Sidmouth cycle route through the allocation.

In order to ensure no adverse effect on the integrity of the Beer Quarry and Caves SAC and bat activities, suitable avoidance or mitigation measures will need to be identified and implemented.

The site is within the East Devon National Landscape and particular care will be needed to avoid adverse impacts, especially on higher westerly site parts where open space provision may be appropriate. Listed buildings are found to the north and east of the site and the Sidbury Conservation Area also lies to the north; proposals will need to be carefully designed to avoid detrimental impacts on these heritage assets. A comprehensive overview of the land south of Furzehill, Sidbury was provided as part of representations to the previous stages of the Local Plan, including the Preferred Options Consultation in January 2023, and further Regulation 18 consultation in May 2024. Therefore, as part of these representations we have not sought to repeat the previous information and have instead set out the updated position, not least given an outline planning application has now been submitted for the site (ref: 24/2434/MOUT).

OUTLINE PLANNING APPLICATION AND PUBLIC CONSULTATION

Since the previous representations were submitted in June 2024, further public consultation has been undertaken in relation to the emerging proposals, including a consultation website with draft plans and a series of questions to obtain comments from the public and stakeholders. The consultation website ran from the end June 2024 to early October 2024.

As part of this, local ward members and Sidmouth Town Council were notified and comments sought.

The consultation material available for the public and stakeholders to view comprised background information on the site, an overview of the policy context and local affordable housing need, constraints and opportunities analysis and a draft masterplan. The draft masterplan explained the options available for the connections between the first and second phases of the County Council cycle link and the ability of the site to accommodate the second phase to ensure the link is delivered in its entirety.

This consultation was followed by a presentation of the proposals to Sidmouth Town Council on 9 October 2024. This comprised a presentation to town councillors, followed by a question and answer ‘round table’. The presentation was given as part of one of the town council’s formal planning meetings and was therefore open to members of the public to attend. A few local residents attended the meeting and asked questions.

Questions during the presentation covered several matters including highways / access, flood risk and drainage, pedestrian linkages, landscape impacts, ecology and heritage.

The outline planning application was then submitted in November 2025 (ref: 24/2434/MOUT) and is currently pending determination with East Devon District Council.

The submission of the outline planning application demonstrates the intent of the applicant, Sidbury LVA LLP, to deliver the site in the context of the significant need for housing in the district, as well as delivering the second phase of the multi-use path.

Indeed, the masterplan for the site submitted with the planning application (Appendix 2) provides for up to 43 new homes as per the emerging allocation SIDM_34.

The submitted application comprises the following:

- the delivery of 43 new homes, comprising 28 market homes and 15 affordable homes to for the local community to address the current housing shortfall;
- the delivery of a high quality and sustainable off-road multi-use path linking Hillside and Furzehill - extending the proposed Devon County Council multi-use path, for which the first phase is subject to a live planning application;

- integration of the development with the existing urban form and surrounding landscape (specifically ensuring that the upper slopes are kept free of development in accordance with the requirements of emerging policy SIDM_34);

- the delivery of a high-quality residential environment;

- delivery of considerable open space provision, over and above adopted policy requirements;

- net biodiversity gain through the retention and enhancement of existing habitats, and creation of new habitats alongside delivery of a range of ecological mitigation and enhancement measures. Indeed, as demonstrated by the supporting plans the application proposals can provide more than the Government's 10% requirement in Biodiversity Net Gain across habitats, hedgerows and watercourses; and

- a sustainable drainage strategy which will restrict site runoff to the greenfield equivalent rate and provide long-term storage.

The submitted masterplan includes a significant amount of integrated multifunctional green space that is easily accessible for the use and enjoyment of the whole community and makes connections with the wider landscape - including a new pocket park, a community orchard and new hedgerows, wetland and meadow areas to enhance biodiversity.

The development of the site would comprise a natural extension to the existing houses at Furzehill and Hillside, sitting in the lower part of the valley with minimal landscape and visual impact on the wider area, sensitive to the AONB setting. Indeed, the site is physically surrounded by built development to the north, south and east, and is

therefore capable of seamless integration with the village and being developed with relatively limited visual impact.

Overall, it is clear from the submitted planning application plans and documents that the pending outline planning application demonstrates intent by Sidbury LVA LLP to bring forward this site now to facilitate new homes and the delivery of the second phase of the multi-use path. It also demonstrates that the pending outline application is entirely consistent with the requirements of the emerging allocation particularly through the number of new homes proposed, the provision of the second phase of the multi-use path and the protection of the upper slopes from built development.

JOINT WORKING WITH DEVON COUNTY COUNCIL AND KEY PUBLIC BENEFITS

The first phase of the cycle route, which is being progressed by Devon County Council, will run between Sidford and Hillside, which forms the lower part of Sidbury. However, there is a need for a second phase of the cycle route, to connect Hillside to main part of Sidbury and for this to be delivered in a timely manner.

Devon County Council have submitted the planning application for the first phase (ref: DCC/4404/2024) and this is currently pending determination.

Sidbury LVA LLP have been working with Devon County Council for some time to discuss options for the delivery of Phase 2 of the route, and specifically how the land south of Furzehill can provide this.

This joint working involved engagement in the development of the Phase 1 route including attendance at an online consultation event held by the County Council in December 2023 which involved discussion around the need to provide a second phase to the route. Indeed, there were concerns expressed by local residents as part of that event that residents of Hillside do not currently have a safe route to the centre of Sidbury, and therefore that a second phase of the link is crucial. This was also apparent from representations by local residents, with the published consultation report from WSP on behalf of the County Council confirming that one of the key concerns expressed by local residents was a “lack of connectivity to the wider Sidbury village”.

This is clear given Chapel Street, heading north from Hillside does not have a footpath, and is very narrow, and therefore local residents already experience problems connecting from the southern end of Sidbury towards the village centre. The provision of phase 2 of the County Council's proposed link, through the site, would therefore allow both new and existing residents to find safe access to the village centre, rather than negotiate a section of Chapel Street which does not benefit from a footpath.

The principle of the delivery of the Phase 2 link has therefore been discussed with Devon County Council who are supportive of the delivery of the entirety of the link between Sidford and Sidbury.

In our view local residents should not be left with the delivery of a Phase 1 link which terminates at Hillside meaning residents, if wanting to walk or cycle from Hillside to the village centre to the north, would need to negotiate a stretch of Chapel Street which lacks pavement and is not safe.

The alternative would be to wait for a second phase to be delivered in the future, but that would be entirely dependent upon the availability of government funding. Therefore, such an alternative at best could be several years away, and at worst may not proceed due to a lack of funding.

Therefore, the potential for the site to deliver the second phase of this important link as a safe 'off road' link through the site would ensure the whole link between Sidford and Sidbury is delivered, and not just Sidford to Hillside. It would also, importantly, ensure that the second phase is delivered now.

This would be a significant public benefit as part of the development of the land south of Furzehill, particularly as the site is the only site capable of facilitating the phase 2 link, and therefore a very good reason why the site should be allocated in the draft Local Plan.

Overall, the Land south of Furzehill, Sidbury remains a very good candidate for allocation in the emerging Local Plan Review. As the masterplan for the site and supporting technical work demonstrates, the site is capable of accommodating the 43 new homes proposed in draft Policy SIDM_34, including a policy compliant level of

affordable housing, as well the delivery of the second phase of the Sidford to Sidbury cycle link. Given the lack of local affordable housing delivery and lack of any other feasible options at Sidbury, the Land south of Furzehill is an ideal candidate for allocation in the plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: It is important that Sidbury LVA LLP is present to participate in the hearing session for Policy SD26 owing to their interest in Land South of Furzehill (Sidm_34). It is important that they are given the opportunity to make their case in relation to this policy.

Full name: Suzanne Lienert and Adriana Chittleborough

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD26

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Legal Compliance The proposal is not legally compliant with the designation of National Landscapes. Under Section 245 (Protected Landscapes) of the Levelling Up and Regeneration Act 2023, public bodies must ‘seek to further’ the purposes of protected landscapes. The East Devon AONB, in which this site is entirely located, is afforded the highest level of protection under Strategic Policy OL02. Development within a National Landscape is only permitted where it avoids harm and contributes positively to the special qualities of the area.

There has been no evidence that this site meets these criteria. Instead, the developer’s own assessments acknowledge the harm it will cause. Furthermore, in the Planning Committee discussions, there was no consideration of how this development would meet the legal requirement to enhance the AONB. Proposals to limit the development’s footprint were later reversed in favour of expanding it, without proper scrutiny or compliance with the Levelling Up and Regeneration Act.

Additionally, Policy OL02 states that major development in a National Landscape will only be permitted in exceptional circumstances and when it is demonstrably in the public interest. There has been no explanation of what the exceptional circumstances are or how this development serves the public interest. This failure to consider the legal requirements further undermines the validity of the site’s inclusion in the emerging Local Plan.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We are writing to formally object to the inclusion of land around Furzehill Farm in the emerging Local Plan. While our property is not directly opposite the site, we are significantly affected by both the increased risk of flooding and the dangers posed by additional traffic on the already hazardous A375. Soundness of the decision For a decision to be sound, it must be based on solid evidence and represent the most appropriate option. The Planning Committee's discussions on this site were superficial and lacked the necessary data to support an informed decision.

1. Flooding risks – The site is located on steep agricultural land with non-porous clay soil, contributing to surface water runoff. Localised flooding is already a serious issue, affecting our property and others nearby. It has since been confirmed that the site cannot use road drains to manage runoff, raising serious concerns about the viability of any drainage solutions. There is significant flooding without the extra housing. Unless the the infrastructure can be upgraded meet expectations to not worsen the situation, the current proposal is not viable.

2. Road safety and infrastructure – The A375 is narrow, with blind corners and no footpaths, making it dangerous for pedestrians, cyclists and existing traffic. No expert assessment of the proposed access has been conducted, despite the clear risks. The Town Council and local residents have repeatedly raised concerns that additional traffic from 43 homes would make the road even more hazardous.

3. Lack of proper process – Initially, only part of this site (Sidm-34a) was being considered to preserve a break between developments. However, following lobbying by the developer, the full site (Sidm-34a and 34b) was included in the plan without transparent discussion or debate. This undermines the credibility of the decision-making process.

4. Failure to compare to alternative sites – The committee did not rank or compare sites for suitability. Instead, sites were reviewed in isolation, and when the committee found they had not met their housing target, they revisited previously rejected sites with lower thresholds. This is not a robust or strategic approach to site selection.

5. Viability and sustainability – Given the site's challenges—steep slopes, impermeable soil, and the need for significant infrastructure investment—there is no evidence that it can be delivered affordably or sustainably. A developer has already stated that it would not be viable to build here while meeting affordable housing requirements, undermining the rationale for including it in the plan. This is particularly the case when coupled with the danger to life from the road, lack of footpath and blind spots.

6. National Policy Compliance – The proposal fails to meet national policy objectives. It does not comply with the requirement to “seek to further” the National Landscape, nor does it align with policies prioritising the delivery of affordable homes.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Given these legal and procedural failures, we strongly urge the removal of this site from the emerging Local Plan. Including it would set a dangerous precedent for development within the AONB, undermining national and local policy protections for East Devon’s landscape and failing to ensure a sustainable future for Sidbury.

Full name: Helen S MUNDAY

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD26

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

7. The guidance on the consultation document states that the plan should be 'deliverable not aspirational'. The principle of potential for 'economic development' seems to be lacking in planning considerations. The Sidbury business park, seems a case in point, when years after approval, no developer has come forward to purchase and develop the land as a business park. There is a risk that 'history will repeat' with plan Sidm_34. In this case, numerous consultees have expressed concerns about the development, e.g. requiring archaeological digs before commencement, significant upgrading of drainage plans, negative impact on the AONB and the overall adverse nature of the site in a steep sided valley. Not only is there a risk that it will be a challenging site to develop, but that it will not be economical to do so. If approved the Council will no doubt 'tick off' 43 houses from their quota. However, this is totally disingenuous, if the land is never actually developed. The Council is delusional about their plan if applications will never result in the building of much needed homes, and should only include in the local plan, those cases that can be considered economically viable.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The definition of what constitutes 'deliverable' should be set out. A discussion of economic viability should be explicitly discussed at local plan stage.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD26

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: It is not legally compliant with the designation of National Landscapes, Specifically, section 245 (Protected Landscapes) of the Levelling Up and Regeneration Act 2023 now requires all public bodies to ‘seek to further’ the purposes of protected landscapes. Only local authorities or the Secretary of State can give permission for development in, or affecting, an AONB. As a local authority, you must make sure that any proposals seek to further the purpose of conserving and enhancing the natural beauty of the AONB, for example when: adding utility services, like gas pipes and telecommunications cables or creating public access as part of rights of way improvement The local plan document Strategic Policy OL02 states that the highest level of protection will be given to the landscape and scenic beauty of the National Landscape in East Devon. The site in Sidbury is completely inside the National Landscape. Development in a NL will only be permitted where it avoids harm and contributes to the protection , conservation and enhancement of the special qualities , character and natural beauty of the NL. When discussing the local plan or in the document of the emerging plan there is no mention of how this site being developed with 43 dwellings would either avoid harm or contribute positively to the landscape. In fact it is plain to see that it would cause harm, and a recent planning application admits this in their planning application.

Not only does this site not meet the requirement of policy OL02, in the planning committee meetings it was never discussed or considered. There was mention of restricting the development to a smaller area to reduce the harm to the landscape, but this was reversed later to include the whole site around Furzehill Farm at the request of the developer. The committee mentioned developing the lower portion of the site to reduce the visual impact, but this does not “seek to further”, it is only admitting that harm is being done to the landscape and the committee talked about measures to

reduce that harm. This is clearly in contradiction to the Levelling Up and Regeneration Act 2023.

Furthermore in policy OL02 it states that major development in a NL will be only permitted in exceptional circumstances and where it can be demonstrated to be in the public interest. Again in the local plan discussion it was not mentioned or discussed how this site being developed would be in the public interest, or what the exceptional circumstance was. The committee failed in its duty to consider this in suggesting this major development of 43 dwellings inside the National Landscape. A recent application on this site has been objected to by the National Landscape Department of the council for this very reason.

As an explanation I found the following regarding the recent changes to the legislation with respect to AONB or National Landscape:

In December 2023, the legislation was updated to:

“In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty in England, a relevant authority other than a devolved Welsh authority must seek to further the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty.”

What does this actually mean?

The changes to AONB (National Landscape) legislation may seem minor but it's actually quite significant. Whilst the previous duty – to “have regard to” – was a passive duty, the new duty – to “seek to further” – is an active one.

In practice, the previous duty only really required relevant authorities* to take impacts on the AONB (National Landscape) into account. By contrast, the new duty expects them to proactively take steps to positively conserve or enhance the special qualities of the AONB (National Landscape).

*relevant authorities include local councils, local planning authorities, highways authorities, county councils and more.

Natural England has written to AONB (National Landscape) Teams throughout the UK to advise them about what the changes to AONB (National Landscape) legislation mean in practice. DEFRA is also expected to publish further guidance shortly. Natural England's advice letter includes:

The new duty to “seek to further” is an active duty, not a passive one. Relevant authorities must take all reasonable steps to explore how the natural beauty of the AONB (National Landscape) can be conserved and enhanced. The new duty goes beyond mitigation, like-for-like measures and replacement. Relevant authorities should take measures to avoid and mitigate the effects of development. Those measures should be appropriate and proportionate to the type/scale of development. They should also be in line with the AONB (National Landscape)'s management plan. In all cases, the relevant authority must be able to demonstrate how they have actively sought to conserve and enhance the natural beauty of the AONB (National Landscape). And this should be open to scrutiny.

It is plain to see that East Devon County Council has not followed this instruction in proposing the land at Sidbury for developing 43 new dwellings. They were behaving as though the old legislation was in place in only mentioning some minor mitigation measures on the harm of this potential development. This is surprising as the legislation is clearly referenced in Chapter 12 of the emerging local plan “Our Outstanding Landscape”.

This land in Sidbury should be removed from the emerging local plan and not be adopted into the future local plan as it clearly does not comply with current legislation.

I am more familiar with the site at Sidbury as I live there, but I suspect the deficiencies of respecting the national landscape may also be relevant to other sites in the emerging local plan in protected sites.

These comments are from myself, and also supported and agreed with my neighbours Mr and Mrs C Ryan

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove the land in Sidbury from the document. Additionally there might be other sites within the AONB that should also be removed as the council did not follow the law with regard to the National Landscape.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: To be a sound decision it should be made on solid evidence and be the most appropriate when compared with other options.

The debate about this site being adopted into the emerging plan was superficial at best. The planning committee failed to debate or consider whether this was an appropriate location for a major development and how it could contribute to the National Landscape. There was insufficient data available to make the required decision. For example this site had serious questions about the validity of a safe access and how to alleviate the occurrence of frequent flooding in the area. The county highways had not given an expert opinion or examined the issues at the time of the meeting. The committee made assumptions that the issues could be solved without evidence with regard to the access safety or the flooding issues. Subsequently it has been confirmed that the site could not use road drains to the run off from the site, which makes the development highly questionable in terms of affordability or sustainability. The highways authority has still not investigated whether the proposed access onto the A375 could be viable, with the Town Council and residents clearly arguing that an access onto a narrow main road with blind corners would represent a serious safety risk to cars, bicycles, pedestrians and other road users (the road is not wide enough for two large vehicles to pass at this point). There was confusion as to why a larger site had been put forward on the emerging plan. At the first meeting it was decided to only consider Sidm-34a so as to keep a break between two existing developments. The developer lobbied the planning department and at the second meeting the plan then showed the complete site (34a and 34b) to be on the emerging plan. This was a surprise to all those at the meeting as it had never been discussed or put forward at the formal committee meetings. It was not following the approved process to allow private lobbying to make changes to the committee's output.

The other major failing is that the council process never made any attempt to compare sites, it was a simple go / no go discussion for each site. Even more damning at the end of the session when they realised they did not have enough sites to make their “target” they revisited sites which initially had been rejected, looked at them with lower thresholds, and then approved them to go forward. In developing a plan it would be expected to rank different locations for the suitability of development. Each site could be ranked with various criteria to establish which sites should take priority in being put forward to a local plan the meetings and the document makes no mention or attempt to rank or prioritise one location from another.

Effective the policies need to be achievable and deliverable in the next 15-20 years.

The site considered in Sidbury is inherently challenging. The agricultural fields are on the side of a valley and very steep. It is mainly composed of non-porous clay and has many streams flowing from the surrounding hills. The run off goes currently to a constrained mill leat that was built in the Middle Ages to supply the existing working water mill. There is a history of flooding to the surrounding properties and roads. Traditional methods for alleviating run off issues are ineffective due to no soak away possibilities (impervious soil) and no existing man made drainage solutions. The main road would require upgrades to allow for a safe and viable access to be built. To develop such a challenging site would require a great deal of investment, and there is no evidence that it would be economically viable to develop this site. To back this up a developer has already indicated that they could not make the site work with the affordable housing requirement as these are less profitable to build.

Finally the question is whether the selection of this site would be in line with national policy . As already mentioned the site is not compliant with the need to “seek to further” the National Landscape. Also it will not be compliant with the policies of building more affordable homes due to the large investment needed to turn these steep agricultural fields into a building site. These comments are from myself, and also supported and agreed with my neighbours Mr and Mrs C Ryan

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove the land at Sidbury from this emerging plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: For example There has never been any mention or discussion about transport links to Sidbury which would require cooperation from other councils. For example better bus links to Exeter would be critical, but never considered.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: The council have failed to perform due diligence in assessing potential sites with data and evidence based decisions, and failed to follow section 245 (Protected Landscapes) of the Levelling Up and Regeneration Act 2023. I have made previous statements at the committee meetings but never felt listened to as a member of the public. I feel it is important to be able to represent these points in person to an independent body and gain confidence in the process.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD26

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Strategic Policy SD26 Development Allocation at Sidbury.

Sidbury falls wholly within an AONB. Government planning guidance recommends that 'major development' on AONB land should only happen under exceptional circumstances and only when it can be demonstrated that it is in the public interest. Where is this demonstration that it is in the public interest? All but one person responding to the outline planning permission for this site, have been against it. This would see to demonstrate that it is definitely not in the public interest of those living in the village and who will have to put up with the extra traffic on a narrow and already overburdened road. And it is especially not in the interest of those whose properties will be overlooked and overshadowed by it. Also, as a local authority you are supposed to "Make sure any proposals seek to further the purpose of conserving and enhancing the beauty of the AONB". Clearly, ripping out ancient hedgerows and building over pasture land is not going to further or conserve the beauty of this site. Developments that have been allowed in the village over the past 30 years or so, have all been hidden around the back of the main thoroughfare, presumably in order to avoid this issue.

Further to this, the "Development would be expected to play its role in delivering part of the Sidbury to Sidmouth cycle route through the allocation". The one person in favour of this development was from the Sidmouth Cycling Campaign, who although they want a cycle route, pointed out the current plan of having the multi-use path coming from the site onto Ebdon Lane in order to connect to the phase 1 cycle route, is considerably steeper, approximately a 15% gradient, than the absolute maximum gradient of 8% specified in LTN 1/20. Even ignoring the steepness of the road, the exit from the phase one route onto Ebdon lane would take cyclists downhill on a blind corner on a single

lane road, that although not busy all day every day, certainly has busy periods with farm vehicles so big they take up the entire width of the lane, repeatedly driving up and down it. How anyone taking toddlers in a cargo bike or families with small children on their own bikes, for example, could be expected to use this route is beyond me.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD26

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Sidm_34: While we do not object in principle to the provision of housing in this location, greater care is needed to identify the potential heritage impacts and to ensure that these will be minimised and mitigated through the policy framework. Most importantly, the policy and evidence do not currently identify Sidbury Castle Scheduled Monument – an Iron Age hill fort of massive proportions, located to the west of the site and overlooking it. While we appreciate that at present there are plantations on much of the eastern flank of the monument, there are also clearings that may be expanded in future years. The proposed site allocation would have the effect of connecting a string of housing development to the south of Sidbury. We note that existing development is a more obtrusive presence in the landscape and long views where it occupies an exposed location and employs materials such as white render. Controls on building heights and materials, as well as appropriate landscaping, will therefore be important to ensuring that harm is minimised. The site also encircles grade II listed Furzehill Farmhouse and associated buildings, and forms the rural/agricultural setting on their western side. While the farmstead appears to be somewhat enclosed by vegetation, it would nevertheless be beneficial to retain a linkage between the historic buildings and their rural setting by retaining a broad green corridor between the northern and southern sections of the site.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Sidm_34: “.. The site is within the East Devon National Landscape and particular care will be needed to avoid

adverse impacts. It is also located due east of Sidbury Castle, an Iron Age hill fort designated as a Scheduled Monument, the setting of which should be conserved and enhanced. especially on h Higher westerly site parts of the site should therefore remain undeveloped and field boundaries should be reinforced with appropriate planting. where open space provision may be appropriate. Listed buildings are found to the north and east of the site and the Sidbury Conservation Area also lies to the north; proposals will need to be carefully designed to avoid detrimental impacts on these heritage assets, and where possible to secure enhancements. This should include controls on building heights and materials, and the retention of a broad green corridor connecting Furzehill Farm with the wider rural setting.”

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD27

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

This brief representation is made on behalf of the landowners of the subject site. It is supported by two indicative layouts; one for the 45 dwellings referenced under Strategic Policy 26 and one for a one form entry primary school, with some limited residential development on the eastern part of the site fronting the main road. We are aware that the existing school suffers from severe flood risk and there has recently been an allocation of funding under the School Rebuilding Programme. There have been previous efforts to relocate the school to Ottery St Mary. In fact Local Plan states that it should be noted that in the event that land is allocated in Ottery St Mary for the relocation of the primary school in Tipton St John then the village would no longer meet the threshold for a Tier 4 settlement and this potential allocation would not be taken forward. We believe that the proposal to take a primary school out of the village is in direct conflict with NPPF(79) and also reference within this Local Plan to a desire to make settlement 'more sustainable'. Actively planning to remove such an integral part of the community's facilities will be counter productive to the future sustainability of the village. We consider that the local planning authority should work in partnership with the education authority to ensure that the school remains in the village. Now that funding has been secured, there will clearly need to be a formal process of assessing suitable sites and we would consider that a site in the village should be given preference over moving the school to the nearest town. If a site is found for a school elsewhere in the village, the subject site should be upgraded to a first-choice allocation for around 45 dwellings. If, on the other, the subject site is considered suitable for a school site, the landowners have intimated a desire to work with the relevant officers of the District and County Councils to potentially deliver this. As part of a comprehensive scheme for the site, we propose a small amount of self/custom build housing. Release of a small amount of land for housing would facilitate the possible release of land for the new

school. This is a genuine offer, and we would be happy to discuss further with both the District and County Councils. We commend the subject site to the LPA and would like to confirm our availability to discuss this site further with relevant officers and ward members on either option shown on the attached. We appreciate that setting out such a complex and multi-faceted document is a difficult task for the local planning authority. We look forward to working through our comments at the eventual examination.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Our District Councillor proposed at least 50 houses adjacent to Bramley Gardens, totally against the wishes of villagers. This is a critical site in the village as the development would 'eat into' the green wedge between Whimble and Cranbrook. In addition, it is regrettable that he did not grasp the village feeling towards the old historic Cricket Ground, when there was evidence available to indicate villagers' feelings. Whimble Neighbourhood Draft Plan -Appendix II provides a clearer view of village opposition: EDDC - Local Plan Common Place Feedback. Consultation period – 7th November 2022 until 15th January 2023. (Spread sheet data)

Whim_11 - Station Road (Old Cricket Ground) – Extracted from EDDC Speed sheet
Dissatisfied (15) Unhappy (49) Neutral (8) Happy (2) Satisfied (6) Total
Responses (80) Whimble Site 8 - land west of Church Road and Bramley Gardens was
discussed. *** Personal details have been removed ***, speaking for the development,
provided false /inaccurate information to the committee, which makes the decision
making unreliable in law. In addition, I am not aware that *** Personal details have been
removed *** had visited the site prior to making the decision to incorporate the site into
the village built up area. EDDC - Local Plan Common Place Feedback. Consultation
period – 7th November 2022 until 15th January 2023. (Spread Sheet data) Whim_08 -
Land west of Church Road and Bramley Gardens. Dissatisfied (9) Unhappy(77)
Neutral(0) Happy (0) Satisfied (1) Total Responses (87) Councillors have
acted without due diligence and unprofessionally in making 'seismic' major decisions
without fully appreciating the evidence gathered about what development is acceptable
and what is not by the citizens of Whimble. Localism matters, but this has been

steamrollered by the inadequately informed. The EDDC draft Local Plan indicated only 41 houses, but now we have 83 houses. This is totally unacceptable and an unsafe decision. Accordingly, one needs to determine the true motivating forces behind the decision to build twice the number?

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The only descent modification is to eliminate Whim Site 8 from the draft local plan. This needs to be linked to the Localism act 2011 indicates that the neighbourhood planning provided an opportunity for “meaningful” community engagement in the planning process. With the evidence gathered from the emerging Whimple Neighbourhood Plan the villagers has spoken. But the councillors have not listened. The Emerging Neighbourhood plan is opposed to all development on the western flank which provides a vital and important green belt between. Cranbrook and Whimple. In addition, it is harmful to the process when Councillors provide unreliable / illinformed information to the decision making. Furthermore, there is a clear conflict of interest as a Parish Councillor and a District Councillor and in the role of Chair of the Strategic Planning Committee. You can't act in the interests of villagers but then go totally against the village in which you live.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The local district Councillor has not co-operated professionally with the POW+R Group. The Parish Council has not co-opoerated professionally with the POW+R Group. N.B. The POW+ Group undertook 90% of the drafting of the Whimple Neighbourhood Plan, utilising a wide range of skills relevant to the task.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I have said what needs to be said

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Land off Station Road (Ref: Whim_11)

Our client fully endorses the allocation of land at Station Road for residential development.

Representations were also made to the Local Plan Reg 18 Further Consultation in June 2024, which also advised of our client's full support to the residential allocation. These have been attached at APPENDIX 1.

Our client is willing to work closely with EDDC to achieve the objectives of the policy in relation to this site.

Land to the west of Bramley Gardens, Whimble (Ref: Whim_08a)

The above site had been identified on the Reg 18 Emerging Local Plan Policy Maps as a 'second choice site' referenced as LP_Whim_08. Representations were made to the Local Plan Reg 18 Further Consultation in June 2024, which strongly encouraged the second-choice allocation ref: Whim_08 to be upgraded to a Preferred Allocation for residential development for Whimble. As above, the previous representations have been attached at Appendix 1.

The Draft Strategic Policy SD29 now includes this site as a residential allocation for Whimble. Our client's fully support the allocation of land to the west of Bramley Gardens for residential development and are prepared to work with stakeholders to achieve the objectives of Policy SD29.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Land off Broadclyst Road (Ref: Whim_07)

The above site had been identified on the Emerging Local Plan Policy Maps during the Reg 18 Consultation of the Local Plan as a 'second choice site' as referenced LP_Whim-07 and coloured orange on Figure 2 (see page 4 of the attached document).

On the 1st November 2024, EDDC's Strategic Planning Committee (SPC) met to consider a range of further allocations for sites within the District of East Devon.

With regard to site ref: Whim_07, SPC was advised that further work looking at the critical drainage matters for Whimble which had not been completed due to the high cost of the technical work. It was proposed by SPC not to include this site as a further allocation for development due to the flood risk covering half of the site. SPC did however consider that the inclusion of half of the site, situated outside of the floodplain could be included within the BUAB to allow windfall development to come forward in the future.

On the 22nd November 2024 SPC considered a report on amended settlement boundaries and draft allocation plans for the emerging Local Plan. For Whimble, the built-up area boundary (BUAB) had been amended to include further land, as shown in Figure 3 (see page 5 of the attached document). The revised BUAB included within it, land off Broadclyst Road, highlighted for completeness, by the red circle.

The Settlement Boundaries Evidence Paper [ED LP Settlement Boundaries Evidence Paper 222 Nov 2024 SPC Version 2] supported the report taken to SPC and set out how the boundaries have been drawn for individual settlements and why any changes have been made. The report states "The strategy of the emerging local plan differs from the adopted plan in wanting to promote some opportunities for housing within the settlement boundaries so that they guide but do not stifle the outward growth of settlements in line with the plan strategy."

The report references the inclusion of land off Broadclyst Road and states “Most of the areas to the northwest of the village that were included in the 2022 consultation plan have now been excluded due to their retention in the Green Wedge. The exception is a house and part of a field north of Manley Close, as agreed at the Strategic Planning Committee meeting on 1st November 2024.”

The Local Plan Regulation 19 version, of which is being consulted on, shows the BUAB to have been pulled back to not include Whim_07.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Given the previous history of the site being included within the settlement boundary for Whimple, our clients wish to propose their land as suitable for development and deliverable within the plan period. It is considered that the land is centrally located with easy pedestrian/cycle access to Whimple’s services, facilities and railway station and that it can be brought forward at an early stage within the plan period to meet the objectives of Whimple to support development that meets local needs.

Our clients therefore consider that the site should be included within the BUAB for Whimple and allocated for residential development.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The density is to intense for the allocated area.

The infrastructure to support this development is not there.

The site lacks safe pedestrian access and the traffic impact on access and egress through Bramley Gardens onto and from Church Road is unsustainable.

Evidence of the capacity of Church Road to cope with the volume of existing traffic and the safety of pedestrians in what is in large parts single road, is currently under review and of concern to a number of residents.

The site forms part of the Green Wedge between Whimble and Cranbrook.

There is no justification for the need of additional housing in this area given the permission for the development 1500 houses, immediately adjacent in the next phase of the expansion of Cranbrook.

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Our main objection to the proposed developments in Whimble are road infrastructure, both to and through the village, which are very dangerous particularly to pedestrians, cyclists, horses etc and any increase in population will only exacerbate this problem. A footpath through the orchard north of Whimble 08 is hardly going to change the situation. The road infrastructure in Whimble is similar to Branscombe - a long pavement-less lane both to and through the village and as far as I can find out just ten new homes were proposed for Branscombe in 2016 (and that's too many.) If they laid a new road with pavements from Hand and Pen (old A30) connecting the south and north of the village that should satisfy our main health and safety concerns but we would be losing our green wedge as well as prime agricultural land and it would be undoubtedly harmful to wildlife. As deer use the green wedge to commute between north and south Whimble, it's essential to maintain a buffer between Cranbrook and Whimble.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: My husband and I wish to comment on the strategic allocations for Whimble, particularly WHIM08 and WHIM11.

As residents of the village we regularly walk up and down Church Road and along, past the school, to Whimble Surgery. At any time of the day walking on this very narrow road, leaves us very exposed to being hit by cars, motor cycles, delivery vans, delivery lorries and tractors. It is impossible to improve the safety of this road due to the historic layout of residential properties. On regular occasions, eg refuse collection/ recycling collection, the road is blocked for both pedestrians and traffic. More and more people are making online purchases and having food deliveries from major supermarkets, adding to the traffic density throughout the village, during the day and into the late evening.

Any housing developments that require residents to utilise Church Road, by car or on foot, will increase the dangers of injury / death or severe damage exponentially. To make any planning decision without fully exploring these dangers, would be foolhardy and probably illegal.

We urge you to fully understand our community and its road layout, before making any strategic decisions in respect of Whimble.

Thank you

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

SD29: Development of allocations at Whimble - are not sound for a variety of reasons. The lanes throughout the village are already busy and at times dangerous (a community speed watch group is now needed following advice from the Police). Existing residents' vehicles are already regularly using the main routes in and out of the village, including many parents dropping off and picking up school pupils twice a day. Also, the main route (Church Lane) into the village is not wide enough for two cars to pass in many places along it. Furthermore, it does not have a footpath along one side of it to allow pedestrians to safely walk into, out of and around key parts of the village. It is inappropriate to build new homes without basic infrastructure in place to keep people safe. Other sites - not within Whimble village - that can be directly accessed from London Road, the main A30 (or other two-lane A roads) should instead be considered for new housing in East Devon - for example, near to the soon to be built services - the McDonalds and farm shop site - at Daisy Mount. Also, there are already thousands of houses being built in neighbouring Cranbrook and Rockbeare to meet affordable housing and new housing quotas in East Devon. The Cobden Lane development phases is already within the Whimble Parish and will provide new housing, including affordable housing. The other countryside areas surrounding Whimble should be preserved as important 'green spaces/areas' for wildlife and plants to live and flourish so residents see and benefit from countryside being around them. Furthermore, the village primary school is already at capacity and if plans proceed to building 83 more homes, and many of these houses are occupied by families with children, where are these children going to go to school? It certainly won't be the local primary school and it seems that this consequence of building new houses in Whimble has not been considered fully or properly. Also, having a possible 166 additional cars (or even more) driving around the

narrow lanes of the village will be completely impractical and lead to all kinds of environmental and traffic issues - which do not need to be created. Loss of the remaining wildlife and green countryside areas in this part of East Devon is also a reason why building 83 houses is not necessary. Swathes of fields and hedges have already been sacrificed east of Exeter to make room for the ongoing building phases of Cranbrook's new town development so no further green spaces need to be removed in this area to build houses, patios, concrete driveways etc. Green spaces in areas of Whimble have already had to absorb wildlife displaced by nearby house building - where will these creatures of nature and plants thrive if more of their habitat/growing space is taken away? In addition, the increase in traffic (cars, pick-ups, vans, lorries from developers in the first instance and then residents of the new houses) will lead to greater amounts of pollution and damage to both the environment and the conditions of the roads - already full of potholes and crumbling at the edges. An increase in traffic will be harmful to local air quality in the future and to animals, plants and humans in the surrounding environment. Light pollution will also become more of an issue as well.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

I consider it necessary to have Whim_08a and Whim_11 removed from the EDDC Emerging Local Plan and advise that the 83 suggested new homes being allocated elsewhere in the area (outside of Whimble Village), where there is appropriate infrastructure and housing developments should be built adjacent to existing main roads (A roads) where two cars can easily pass each other, and where pedestrians can easily use footpaths to access regular bus routes. No alternative sites in Whimble, previously suggested, should be revisited or explored by the Parish Council or any other group - as they have already been ruled out and reasons for this clearly provided earlier in the process.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The information received by Whimble residents earlier in the consultation, following a presentation of proposals in the Victory Hall, was that the all of the sites initially put forward in Whimble were not suitable for mass house building

for one reason or another (access issues, potential flooding issues etc.) Then, more recently, residents have been told that 83 houses now have to be built within the village area. This number is not appropriate for this village. In fact, only about 4 affordable homes are needed over the next 5 years - which should easily be achieved within the Cobden Lane area of proposed development - which is already within Whimple Parish.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Please find attached comments regarding planning to build houses on the sites whim_11 and whim_8

Objection to Proposed Development WHIM_11 (33 Houses on the Old Cricket Pitch, Whimble)

Dear East Devon District Council Planning Department,

I am writing to object in the strongest terms to the proposed development known as WHIM_11, which seeks to build 33 houses on the old cricket pitch in Whimble. This site has been subject to multiple planning applications in the past — all of which have rightly been refused. The reasons for those refusals remain entirely valid and are, if anything, even more pressing today.

Flood Risk and Environmental Impact: The WHIM_11 site includes land that floods frequently. The adjacent fields are often waterlogged, and the stream at the bottom of the field has overflowed multiple times this winter alone. With increasingly unpredictable and extreme weather events, this area is wholly unsuitable for residential development. Building here will raise the risk of flooding to nearby homes and put future residents at unnecessary risk. The unsuitability of this site for development due to flood risk has already been acknowledged by the East Devon local plan.

Land of Local Importance: The site is designated as land of local importance, which should offer it protection from speculative development such as WHIM_11. This status is in place to safeguard green spaces that matter to the local community. Ignoring this designation would contravene East Devon planning policy and weaken trust in the planning system.

Protected Species and Wildlife Habitats: The area surrounding the WHIM_11 site supports diverse wildlife, including legally protected species. Bats are regularly seen foraging and commuting across the site, and otters have been spotted using the stream. Both species are protected by law, and any disturbance to their habitat from construction would be highly damaging — and potentially unlawful.

Trees and the Natural Landscape: The site contains a historic oak tree and several other mature trees with Tree Preservation Orders. These trees form an important part of Whimble's natural and visual heritage and provide crucial habitats for local wildlife. The risk of damage to them during construction is high, and their loss would be a significant and irreversible blow to local biodiversity.

Road Safety and Traffic Concerns: Whimble's narrow lanes and limited pavements make it wholly unsuitable for increased traffic volumes. In many parts of the village, only one car can pass at a time. The addition of 33 homes — potentially bringing 60+ cars — would lead to congestion, safety risks for pedestrians, and increased pollution in a village where walking is already compromised. Crucially, any future proposals should avoid bringing additional traffic through the centre of Whimble, where the infrastructure is simply not capable of safely accommodating it.

Unsuitable Infrastructure and Strain on Local Services: Whimble does not have the capacity to support a development of this size. Public transport bus links are limited, parking is scarce, and services such as schools and GP practices are already stretched. In contrast, nearby Cranbrook has been specifically developed to accommodate housing growth. It has modern infrastructure, designated expansion areas, and services designed to absorb additional demand. Directing development there is far more appropriate and sustainable.

Loss of Green Space and Village Character: The old cricket pitch is part of Whimble's heritage and rural charm. Green spaces like this are becoming increasingly rare, and their loss cannot be reversed. Allowing WHIM_11 to go ahead would fundamentally alter the character of the village and erode the community's identity.

In summary, WHIM_11 represents an unsustainable, inappropriate, and damaging development for Whimble. It conflicts with environmental protections, places unacceptable pressure on local infrastructure, and would significantly harm the fabric of this rural village. I strongly urge the Council to reject the application once again, in line with previous decisions and the views of the local community.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The Old Cricket pitch which is the land being proposed to be built on is subject to a Land of Local Importance designation. This therefore prohibits the use of this land to be built on for the purpose of dwellings.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: There should be no dwellings built on the Land of Local importance.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This proposal is not sound as it is not justified compared with other proposals. The risk to the village of increased traffic through the village is not justified compared with other proposals that would keep traffic to the outskirts of the village or the outskirts of Cranbrook. There is no solid evidence that this proposal at whim_11 is the most appropriate and it has been acknowledged that there is significant risk of flooding in this area.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: No development should increase traffic through the centre of Whimple. Any development should be on the extreme outskirts which is closer to bus links.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Impact on the environment: the proposal acknowledged the risk of flooding. The stream at the bottom of the field regularly floods and has flooded a record number of times this winter. There are a number of protected trees within this field which are the habitat for wildlife including woodpeckers and squirrels. In addition otters have been seen in the Slewton Crescent area near the stream backing onto the field and bats are commonly seen. Both species are protected by law. With regards to infrastructure the impact of potentially 60 more vehicles through the village carries significant risk to residents as there are no complete pavements and both children and elderly residents are particularly at risk. Planning permission has been declined on this site three times in the past therefore it is impotent to consider alternate options.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

EDDC Emerging Local Plan Consultation I wish to place on record my objections as a local resident of Whimble in respect to a specific element of the EDDC Emerging Local Plan Consultation, namely policy SD29: Strategic Allocations in Whimble, and particularly to the allocation of Whim_08a (Land west of Bramley Gardens) site. My objections are on the grounds of soundness in that the allocation and policy is not based on solid evidence. It appears that the EDDC Strategic Planning Committee expressed similar objections at their meeting held on 1 October 2024 when they voted not to allocate this site. The following text is taken from the Whimble Parish Council submission and is included to add context; The EDDC Strategic Planning Committee considered the Whimble Site Selection Report at a meeting on 1 October 2024. Professional planning officers identified and assessed the potential sites in Whimble and using their professional judgement, backed up with sound evidence recommended to Members whether to allocate the site or not. In the case of Whim_08 site, officers recommended that the site was not allocated for the following reasons: · Scale of development incompatible with spatial strategy. · Site lacks safe and convenient pedestrian access to services and facilities in the village. · The site forms part of the ‘Green Wedge’ between Whimble and Cranbrook. · Forms an important part of the very attractive rural landscape setting for the settlement. · Potential impact on unconfirmed wildlife site. · Part of is at risk of flooding and further work would be required to understand the nature and extent of the risk before consideration could be given to allocation. In the earlier phases on consultation, Planning Officers held a Public Consultation event at the Victory Hall, Whimble. This site was never considered as being appropriate for development at that event and, in fact, when local residents asked the question, the Officers in attendance vehemently denied that it was a possibility for consideration. At the meeting on 1 October 2024, Members of the committee voted to go with the officer recommendation and not allocate the site. However, at the Strategic Planning Committee meeting on 1 November 2024 Members did a complete u turn and

decided to allocate part of the site, contrary to Officer recommendation. There was no justification or reason given as to why this site was picked above any others in Whimble or other sites in the east Devon area. Also no additional work appears to have been completed by officers to assess the risks relating to this site before allocating it. This gives the appearance of the Strategic Planning Committee having a knee jerk reaction to needing to allocate additional houses across the district without considering a fully worked up proposal or sound justification (based on evidence and facts), as to why the site should be allocated (partially or otherwise). This site allocation report also considers 'If whole site is not suitable for allocation, could a smaller part be allocated?' The view of the professional planning officers was 'No'. Again, this leads Whimble Parish Council to challenge the soundness of any allocation of this site. The remainder of Whimble Parish Councils submission outlines in detail the reasoning for the unsuitability of this site and I do not wish to replicate that explanation here, however, I would wish to comment on the actions of the Strategic Planning Committee which appear to display either an unacceptable level of incompetence or a contemptuous attitude to the local community. The Nolan Principles clearly set out the standards expected of those in public life, not least elected officials in the service of their constituents. Based on the evidence presented it is apparent that the Strategic Planning Committee fully agreed with the views of the local Parish Council and their own professional Planning Officers at their 1 October meeting when this site was deemed to be unsuitable. As a local resident I, and others, were reassured that the Committee had recognised the strong evidence presented and factored this into the emerging local plan. It is unfortunate that this assurance was subsequently dissipated at the committee meeting held on 1 November 2024. The lack of any coherent rationale for the U-turn on this site by the Strategic Planning Committee within the space of a few weeks and with no apparent additional assessment to the contrary is startling, particularly in light of the disproportionate amount of development on the old A30 corridor when compared to other parts of the District (much of which has afforded no development at all in recent years, one assumes to the delight of relevant local councillors). I would contend that the behaviour of the Strategic Planning Committee in turning a blind eye to their own previous decision displays an attitude to the local community that, at best can be described as lackadaisical and an attempt to appease the requirements of National Government. The lack of honesty, transparency and accountability in failing to provide appropriate rationale to the local community could more appropriately be described as a failure to uphold the basic values of The Nolan Principles. Frankly, local residents deserve more respect. Therefore, I would like to add my objection alongside other local residents who want to see the modification of site Whim_08a being removed from the EDDC Emerging Local Plan and the homes being allocated elsewhere in the district, where there is more appropriate infrastructure. I am also forwarding this response to the local District Councillor in his capacity as Chair of the Strategic

Planning Committee with a formal request that, as a matter of courtesy, the rationale for this decision be provided to local residents.

Objecting to EDDC Emerging Local Plan: Whim_08a

We strongly disagree and fully object to policy SD29: Strategic Allocations in Whimble, particularly to the allocation of Whim_08a (land west of Bramley Gardens) site in the EDDC Emerging Local Plan. The objection is on the grounds of soundness in that the allocation and policy is not based on solid evidence.

The EDDC Strategic Planning Committee initially rejected the site on October 1st 2024 following professional planning officers' advice that it was unsuitable due to: incompatibility with the spatial strategy, lack of safe pedestrian access, Green Wedge status separating Whimble and Cranbrook, impact on rural landscape & wildlife and flood risk requiring further assessment. Despite this on November 1st 2024, the committee reversed its decision, without justification and against the original evidence. No additional assessments were carried out to support the allocation raising serious concerns about the decision.

Whim_08 forms part of the 'Green Wedge' between Whimble and Cranbrook

We challenge the soundness of the proposed allocation due to the Green Wedge. Allocation of this site would potentially damage the individual character and identity of Whimble. This site forms an important part of the very attractive rural landscape setting for the settlement of Whimble. The EDDC Emerging Local Plan Policy OL05: Green Wedges states 'Within green wedges, as defined on the policies map, development will not be permitted if it would add to existing sporadic or isolated development, damage the individual character or identity of a settlement, or could lead to or encourage settlement coalescence, whether physical, visual, or intrinsic.'

This would also lead to settlement coalescence between Whimble and Cranbrook, which is a material planning issue, and clearly demonstrates that this site should not be allocated in the Local Plan. This was the view of the EDDC professional Planning Officers as stated in their report 1st October 2024.

Scale of development incompatible with spatial strategy

The Strategic Planning Committee have already approved the Cobdens area of Cranbrook part of which is within the Whimble Parish boundary to build 1500 houses, a school and a traveller site. These sites will have a far better infrastructure than Whimble Village so why has the additional housing requirement not been allocated at these sites.

The EDDC Site Allocation Report for Whimble states Whimble is a 'Tier 4' settlement, where the draft local plan seeks to promote limited development to meet local needs. The original proposed development of up to 180 dwellings on Whim_08 is excessively high in relation to the scale of the existing village. This would suggest that an additional 396 people based on 2.2 people per household are going to be added to the current Whimble parish population of circa 1900. That's an increase of 24% which is a ridiculous amount of expected growth for a village and incompatible with spatial strategy. Policy SP01: Spatial Strategy section E states 'Allowing limited development at the Service Villages of Beer, Branscombe, Broadhembury, Chardstock, Clyst St Mary, Dunkeswell, East Budleigh, Exton, Feniton, Hawkchurch, Kilmington, Musbury, Newton Poppleford, Otterton, Payhembury, Plymtree, Sidbury, Stoke Canon, Tipton St John, Uplyme, Westclyst, West Hill and Whimble.'

The total allocation of 83 homes in Whimble is not a 'limited development' (Whim_11 total 33 homes; Whim_08a total 50 homes), especially when the Whimble Housing Needs Report lists a significantly lower figure. This also represents 183 more people in the village (working on 2.2 people per household) or another 9.6% increase in the number of people living in this village. When working on the Whimble Neighbourhood Plan, the Parish Council commissioned a Housing Needs Survey and the results in the report states 'a need for at least 4 affordable homes within the next 5 years.' The housing allocation is not sound as it is contrary to EDDC Emerging Local Plan Policy HN01: Housing to address needs, which states 'this will be achieved by providing an appropriate mix of decent, good quality homes which meet identified needs for housing as identified in a neighbourhood plan, local needs assessment or other evidence

document over the plan period, at locations consistent with the settlement hierarchy and the spatial strategy.’

Site lacks safe and convenient pedestrian access to services and facilities in the village

Church Road is the main route into the Village and is a narrow and dangerous road. Access to the site and potential development would be through Bramley Gardens and onto Church Road. The section of Church Road nearest to the Square and village shop is single track road with houses either side of the road. There is no pavement along the stretch of Church Road to The Square and School Hill nor is there room for a pavement. The villagers and Parish Council have raised concerns about the volume and speed of traffic on that road.

I was a parish council meeting recently and they are so concerned about the volume and speed of traffic along Church Road that they have created a Community Speed Watch Group to monitor the traffic and speed along Church Road. The issue was raised as to why the Speed Watch Group had not undertaken any monitoring to date with speed guns along this route and the answer was because the police have stated it ‘was too dangerous in terms of where to record the speed of traffic and traffic monitors safety was at high risk!

To access the village shop in the Square and Whimble primary School in School Hill we have to walk down Church Road which has no pavements. There is no safe and convenient pedestrian access to services and facilities in the village. To ensure safety most people will use their car or vehicle to access the village shop or primary school. This is not sustainable and surely would be against EDDC Emerging Local Plan Policy TR01: prioritising walking, wheeling, cycling and public transport and is also contrary to the EDDC Climate Change aspirations.

Part of is at risk of flooding and further work would be required to understand the nature and extent of the risk before consideration could be given to allocation

Part of is at risk of flooding and does flood as we have witnessed over the 14 years we have lived here. A full survey would be required to understand the nature and extent of the risk before consideration could be given to any allocation. Our understanding is that

planning officers have not carried out further work relating to the flood risk before consideration was given to a partial allocation. There is no sound evidence for allocating this site in the EDDC Emerging Local Plan and it is contrary to Policy AR01: Flooding.

Potential impact on unconfirmed wildlife site

There is an abundance of wildlife and development of this site would be contrary to EDDC Emerging Local Plan Policy PB03: protection of irreplaceable habitats and important features. As a local resident with our property backing onto Whim_08, I can confirm there is a huge amount of wildlife which is home to little owls, great spotted woodpeckers, badgers, deer, crows, green finches, bats, badgers, hedgehogs and more.

A public consultation was held in Whimble by the planning officers in the very early phases of the strategic plan consultation. Whim_08 was never considered as being appropriate for development at that event and when local residents asked the question like us, the planning officers in attendance vehemently denied that it was a possibility for consideration, nor should it be considered.

At the meeting on 1 October 2024, Members of the committee voted to go with the officer recommendation and not allocate the site. However, at the Strategic Planning Committee meeting on 1 November 2024 Members did a complete u turn and decided to allocate part of the site, contrary to Officer recommendation.

There was no justification or reason given as to why this site was picked above any others in Whimble or other sites in the east Devon area. Also no additional work appears to have been completed by officers to assess the risks relating to this site before allocating it. It looks like the Strategic Planning Committee have panicked and they need to allocate additional houses across the district without considering a fully worked up proposal or sound justification based on evidence and facts, as to why the site should be allocated, partially allocated or otherwise.

This site allocation report also considers 'If whole site is not suitable for allocation, could a smaller part be allocated?' The view of the professional planning officers was 'no'. We challenge the soundness of any allocation of this site, full or partial.

We are totally against the proposed size and location of the development. It is the view of the Parish Council and us that development would be better placed elsewhere in Whimble or in Cranbrook or elsewhere in the district where there is appropriate infrastructure. This is also our view as we have very poor infrastructure within Whimble. There is no sound justification as to why the Strategic Planning Committee decided to go against the professional judgement of the Planning Officers and allocated this site in the Emerging Local Plan. Also, in terms of soundness, the Strategic Planning Committee does not appear to have fully considered a number of other options that could have been chosen.

Whimble Parish Council is looking at site allocations as part of the evidence base for its Neighbourhood Plan. A number of sites have been put forward which are:

Whim_03 Land to the south of Grove Road Whim_07 Land south of Broadclyst Road
Whim_13 Land north side of Grove Road Whim_18 Land to the east of Church Road
Whim_20 Land to the north of Plumtree Lane

The Parish Council's preference would be that a site is allocated to the east of Church Road (Whim_18) so that it is nearer to the established infrastructure near Hand and Pen. It is appreciated that there are constraints to these sites but the Parish Council challenges and us as residents also challenge there are constraints with site Whim_08a, hence why the EDDC professional Planning Officers recommended that the site was not allocated.

Whimble Parish Council believes that Policy SD29: Strategic Allocations for Whimble, specifically site Whim_08a is not sound, as the decision to allocate this site went against the solid evidence provided by the professional Planning Officers report and recommendations, without any justification as to why the decision was made to partially allocate the site. Therefore, Whimble Parish Council and local residents want to see the modification of site Whim_08a being removed from the EDDC Emerging Local Plan and the homes being allocated elsewhere in the district (and outside of Whimble Village which is a Tier 4 settlement) where there is appropriate infrastructure.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We do not believe that the EDDC Emerging Local Plan policy SD29: Strategic Allocations in Whimple is sound, and therefore site Whim_08a should not be allocated.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I live at 35 Slewton Cr, Whimble and object to the proposed development at Whimble_11, for all the reasons cited in the parish council's response. These include drainage/flooding issues, unsuitable road access, increased traffic through the village (already a safety hazard at peak times with school buses trying to get through the narrow road through centre of the village and children walking to school), plus the need to preserve the DEFRA 'priority habitat (woodland and orchard)' and several protected trees, notably the one in the middle of the land. Furthermore, 33 houses on this small site is too many. It was considered unsuitable for development in the past, so what has changed?

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to object to the proposed development at Whimple_11. I live in Slewton Crescent, Whimple, adjacent to this land. It is my understanding that the land was deemed 'Land of local importance' and therefore should not be built on for housing but only used for activities which retain its open nature. I understand that it is also classed as priority habitat (woodland and orchard) and therefore contrary to EDDC Emerging Local Plan Policies PB02. In addition to this, building 33 houses on this land is too many for the space, and would increase traffic in the very narrow lanes nearby, especially through the centre of the village which is already a log-jam at peak times and a safety hazard for the children walking to the primary school. I understand there are protected trees on the land, in particular the tree in the middle of the land. Part of the land is subject to flooding and further development would risk flooding further downstream, which is already an issue.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

These are my points regarding Whim_08 site

- The size of the developement seems out of proportion to the size of the village
- Lack of pedestrian access to amenities is of GREAT CONCERN
- This site is preferable to others insofar as the amount of traffic passing 'through the square' will be somewhat less with this plot of land than with many of the others, but any increase will be most unwelcome
- Further work must be done to understand the nature and extent of flood risks. For example, surface run off cascading into Cobden Lane and the village square would be disastrous The professional judgement of the planning officers was that this site is not suitable. Why seek professional advice and then ignore it?

i think that it would be preferable to have additional housing built near to Hand and Pen or for the Cobden Lane site to be increaed. Both of these sites would prevent a large increase of vehicular and pedestrian traffic funneling in and out of Whimple square on a very inadequate road.

The only other way i can think of to increase housing but not traffic, would be to build a retirement village. This would also have the benefit of releasing family houses onto the open market.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I do not know.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The planning officers recommended that the site should not be allocated due to the following points: No convenient pedestrian access to services and facilities in the village- the roads are very narrow, there are no pavements and no streetlights. This site is part of the green wedge, which should divide Whimple and Cranbrook- building on Whim_08a could lead to the two settlements becoming joined. There will be an impact on the rural landscape and wildlife sites. There is a risk of flooding in the area, which would be exacerbated by an increase in non-permeable surfaces such as roads, roofs, car parking areas etc.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Do not develop this site.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The transport connections do not support an increase in homes due to the narrow, dangerous road plus the lack of bus services and a reduction in the number of train stops. I do not believe that the village needs 83 new homes based

on the housing needs survey. I do not feel that the environmental protection has been thoroughly thought through with the risk of flooding and the loss of wildlife sites. The infrastructure cannot cope with development of this size due to the narrow roads, small village primary school, lack of safe parking and the lack of car parking. It would be unsafe for the pupils to walk to the outside facility (MUGA) for PE lessons with an increase in traffic on the roads and more cars parked.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: As I do not have legal training, I am unable to confirm that it is or is not legally compliant.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of land Whim_08a is not sound for numerous reasons:

1. The site forms part of the Green Wedge. The EDDC Emerging Local Plan Policy OL05 states that development should not be allowed on Green Wedges if it "damages the individual character or identity of a settlement or could lead to or encourage settlement coalescence,". Building on Whim_08a would therefore be in breach of this policy in two ways. Firstly, it is likely that building here would lead to coalescence with Cranbrook due to the geographical closeness of the Cobdens development. Secondly, this in turn would lead to Whimple and in particular the Bramley Gardens area of the village, losing its individual identity and becoming part of the suburban sprawling spreading east of Exeter.

2. The proposed development is incompatible with spatial strategy. The EDDC Site Allocation Report states that "Whimple is a 'Tier 4' settlement, where the draft local plan seeks to promote limited development to meet local needs". A recent Housing Needs

Survey commissioned by Whimble PC identified the need for 4 affordable homes within the next 5 years. The proposed developments of Whim_11 or Whim_08a individually are excessively beyond the locally identified need. In addition, the development at the Cobdens of 1500 houses which falls within Whimble Parish Area meeting (and exceeding) the identified need of 4 houses. No more are needed within the village.

3. The site lacks safe and convenient pedestrian to the village. Access is onto Church Road which is narrow yet extremely busy especially during peak times such as 9am and 3.30pm for the school run. The Police have confirmed that Church Road is not recommended as a safe route to the Primary School, village shop, church or train station. The building of any more homes in the village will only add to this hazard.

4. The allocation of Whim_08a goes against Planning Officers' recommendations . Consultation in an earlier phase had deemed this site unsuitable for development (even partially) yet the Strategic Planning Committee have ignored this recommendation without any justification of reason making the allocation unsound.

5. The site is at risk of flooding.

6. Development of the site could have impact on wildlife and therefore contrary to EDDC Emerging Local Plan Policy PB03: protection of irreplaceable habitats and important features.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Whim_08a as an allocated site. No building should be allowed there. Limit building on Whim_11 to 4 dwellings to meet the local need identified.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: I do not think this development is compliant with the duty to co-operate. The National Planning Policy Framework has not been adhered to as Effective Cooperation has not been maintained. Section 3, paragraph 24 states Strategic policy-making authorities should engage with local communities and relevant bodies. There has not been significant engagement. There has been no general information from EDDC or Parish Council regarding this consultation. The PC have advertised this only through Facebook massively limiting who might see this and therefore significantly limiting the numbers of parishioners participating in the consultation.

There has been no consistent approach with the Strategic Planning Committee ignoring Planning Officers' recommendation and suddenly 'u-turning'.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We do not feel that we are qualified to comment on the legal compliance of this part of the Development in the Towns and Villages chapter.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Whimble is a Tier 4 settlement, so the addition of 83 houses is at odds with the Local Plan directive to promote 'limited development to meet local needs'

Much of Whimble is in a critical drainage area where surface water needs to be managed to a higher standard than normal.

WH_08 was initially not recommended for allocation for any size of development by EDDC officers (2020 -2040 site selection report), but recently the East Devon Strategic Planning Committee chose to allocate contrary to officers recommendations. We are not sure on what basis there was a change of mind because the original reasons for not allocating have not altered.

1. Church Road lacks footways until its junction with Bramley Gardens (only two very small stretches of pavement exist on Church Road at the junction with Bramley Gardens, approx. 35 and 25 metres in length each). The lane to the north of the site is very narrow and lacks footways.
2. A narrow strip of land along the western site boundary is within flood zone 3. Grade 3 agricultural land.
3. The site is within a Green Wedge in adopted Local Plan 2013-31 or made Neighbourhood Plan.
4. There is an unconfirmed wildlife site (Gateshayes Farm Orchard) in part of the north of the site. This land also forms a core nature area (grassland). There are two small watercourses within the site. Significant moderate adverse effect predicted. The site is within the East Devon Pebblebed Heaths SAC HRA mitigation zone.

The lane leading off the London Road (old A30) to Whimble village as far as the Thirsty Farmer Public House is at least a mile long. This is an extremely dangerous road for pedestrians, motorists and horses alike due to its narrowness (pinch points) and almost total lack of pavements and lighting. We are advised that Devon Highways have informed EDDC 'the road through the village being very narrow preventing the flow of two-way traffic in numerous places. The majority of the main road leading to and through the village having no pavements or adequate lighting. The lane to the north of the site is very narrow and lacks footways'. The building of the proposed quantities of houses would result in a totally unacceptable and dangerous increase in traffic on the village road due to the reasons already stated.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Due to the issues

relating to the inadequate road through the village it is difficult to see how such a plan can be modified. Our suggestion would be to consider marginally increasing the currently proposed building of a new town at nearby Farringdon, where all the required infrastructure would be catered for and thereby provide a safe environment e.g suitable roads, pavements, lighting, schools, shops, GP Surgeries. This would alleviate the unrealistic demands for building in small villages in East Devon which, particularly in Whimple, provide very little of this type of infrastructure.

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: We do not feel we are qualified to comment on the duty to co-operate.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to formally object to the proposed allocation of Whim_08a in the EDDC Emerging Local Plan. As a resident of Bramley Gardens (Hindcott, Bramley Gardens, Whimble, EX5 2SJ), I have serious concerns regarding the safety implications, environmental impact, and the flawed consultation process associated with this proposal. First and foremost, the site lacks safe pedestrian access to essential services in Whimble. Church Road has no pavements, making it an unsuitable and hazardous route for residents—particularly children and families—who need to reach the shop, school, or train station. This contradicts policies that prioritize sustainable and secure transport solutions. Additionally, the land falls within a designated Green Wedge, intended to prevent the merging of Cranbrook and Whimble. Development here would compromise the distinct identity of the village and violate the principles of Policy OL05, which seeks to protect local character and landscape integrity. Environmental concerns are also significant. The site is home to various unconfirmed wildlife species, including owls, bats, birds of prey, badgers, and deer. Furthermore, the flood risk in this area has not been adequately reassessed, despite previous recommendations for further investigation. The absence of up-to-date environmental and flood risk assessments means the plan lacks the necessary evidence to support this allocation. Equally troubling is the lack of transparency in the consultation process. At a public consultation event in Whimble, officers explicitly stated that this site was not under consideration. Its sudden inclusion in the plan, without proper explanation or community engagement, raises serious concerns about the integrity of the process. For these reasons, I strongly oppose the allocation of land next to Bramley Gardens (Whim_08a) for development.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: My next comment relates to work done by local parish councils to protect green wedges. We spent hours trying to protect Whimble and Rockbeare from joining up with Cranbrook. THE ORIGINAL LOCAL PLAN SAID IT WOULD PROTECT AND SUPPORT EXISTING VILLAGES. Now Whimble 08 site has been put forward for 50 houses. - Whimble Parish Council have sent an excellent response to this awful idea, please look at what they have written - again with local people's knowledge and comments in the minutes of their meetings. No proper consultation with residents in Whimble had been conducted. The wildlife in Whimble 08 is the last area for animals, birds and reptiles to be safe in- all the land before it is taken by housing. THIS SHOULD BE A DEFINITE GREEN WEDGE TO KEEP EXISTING ANCIENT COMMUNITIES SAFE FROM CRIMEBROOK. The land in this area is some of the best farm land in Devon for growing, Our children will ask us in the future why we don't have sustainable locally grown food because we let all the land be built on. Why Does East Devon need so much housing where is the evidence? I realise that housing needs to be provided but it's not good housing that has gone Up, it's not quality of life housing. None of it is in keeping with nearby communities. I have handed in my notice as a councillor because whatever we do or say is never listened to. Everything we commented on about Cranbrook has now come true. The developers rule and do what they want.

Beautiful farmland destroyed, where will all our future sustainable food come from . Sick of how you are allocating land

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Not enough consultation with local communities. The original EDDC plan promised to protect local communities and villages.

Full name: Andrew Hardy

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I live at no. 8 Slewton Crescent and strongly object to the proposed development at Whimple_11 for all the reasons cited in the parish council's response, including drainage/flooding issues, unsuitable road access leading to increased traffic through the village and the need to preserve natural habitat.

Full name: Robert Hazell

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to express my view and concerns and strong objection regarding the Strategic Allocation in Whimble of Whim_11 (land at Station Road) Whimble.

I support Whimble Parish Councils responses in full, further as a resident of Sleuton Crescent, number 27 I have first hand experience of Cranny Brook flooding on an increasingly regular basis, my house is immediately adjacent to Cranny Brook, it has broken it's bank on 10 occasions in the winter of 2024/25 the highest recorded in the 28 years I have been resident. Any development upstream which Whim_11 is can only increase the risk of flooding to mine and other properties.

Whim_11 is already subject in part to flooding as confirmed by the Environment Agency, development would increase risk of adding in a world where weather patterns are changing and increased flood risk is widely known and expected to make vulnerable areas more vulnerable.

My objection is on the grounds of soundness in that the allocation and policy is not based on solid evidence. The EDDC Strategic Planning Committee considered the Whimble Site Selection Report at a meeting on 1 October 2024. Professional planning officers identified and assesses the potential sites in Whimble and using their professional judgement, backed up with sound evidence recommended to Members whether to allocate the site or not. In the case of Whim_11, Planning Officers

recommended that the site be allocated for the following reason: ‘The site is considered to be the best option for accommodating an appropriate scale of development for Whimble. It is well related to the exiting settlement pattern and benefits from relatively good pedestrian access to facilities in the village centre. Although the northern part of the site is at risk of flooding, there is potential for the development of around 30 dwellings on the remainder of the site.’ Representatives from the Parish Council were not able to attend the Strategic Planning Committee on 1 October 2024, but instead submitted a statement, which was read out by a Democratic Services Officer. The Whim_11 site in Station Road (which is also known locally as the old cricket ground) has been put forward for development several times before when East Devon District Council (EDDC) have called for sites. In the 1995, 1999 and 2015 Local Plans the proposed site was rejected on several legitimate planning grounds and the site was not allocated in the Local Plan. The Parish Council asked the Strategic Planning Committee to give an explanation as to what has changed since this site was previously rejected that now makes it suitable for allocation. To date, no response has been received from EDDC.

Trees and Wildlife Habitat The site contains a number of mature trees several of which have existing Tree Preservation Orders (TPOs). The tree in middle of old cricket pitch is unique, mentioned in Wisden and should be preserved as of historic importance. In the EDDC Site Selection Report for Whimble, there does not appear to be any mention of the tree in the middle of the old cricket pitch and allocation on this site would surely be subject to the provision of EDDC Emerging Local Plan Policy PB08: Trees, Hedges and Woodland on development site. The DEFRA website shows the site and north east of site as Woodland Priority Habitat and Woodland Improvement Area, Priority Habitat (woodland and orchard), and a national habitat and network enhancement zone 1. Any development of this site would be contrary to the EDDC Emerging Local Plan Policies PB02: protection of regionally and locally important wildlife sites and PB03: protection of irreplaceable habitats and important features.

Flooding It is noted that the site is already subject to (partial) flooding (confirmed by the Environment Agency), and any development would run the risk of adding to this with impact both on the site and further downstream. There is no evidence to suggest that officers have carried out further work relating to the flood risk before consideration was given to a partial allocation. Therefore, Whimble Parish Council suggests that there is no sound evidence for allocating this site in the EDDC Emerging Local Plan and that it is contrary to Policy AR01: Flooding.

Access to the site and Infrastructure The exit from the site is on to a single track road with a blind corner – not only would this create an immediate local problem but the potential to add 33 houses on this site would seriously compromise an already congested and busy exit route from the village (continuing through the Centre of the village – along Church Road and then on to the old London Road. Church Road is the main route into the Village and is a narrow and dangerous road. The section of Church Road nearest to the Square and village shop is single track road with houses either side of the road. There is no pavement along the stretch of

Church Road to The Square and School Hill. The Parish Council and Villagers have raised concerns about the volume and speed of traffic on that road. The Parish Council are so concerned about the volume and speed of traffic along Church Road that it has convened a Community Speed Watch Group to monitor the traffic and speed along that road. There is no capacity to add a footpath to exit and continue from this site. All access routes are narrow country lanes, so development would exacerbate the existing problems of public safety (given the lack of footpath), traffic congestion and noise. This site was considered unsuitable for development in 1995 due to traffic issues. What has changed since then which now makes this site suitable? This question was asked to the EDDC Strategic Planning Committee meeting on 1 October 2024 but, to date, no response has been received. The Parish Council has been advised that the owners of the site do not own the hedge bordering the site. Also another local resident owns land adjacent to the site that would be needed for the installation of a footpath, and he has advised that he will resist any land grab. Whimble Parish Council feels that this site is not sustainable and therefore should not be allocated in the EDDC Emerging Local Plan.

Land of Local Importance In 1993 The EDDC Chief Engineer and Planning Officer wrote to a local resident to confirm that the Richard Whiteway Memorial Ground was inset as “Land of Local Importance” (copy of the letter has been provided). The letter states ‘the intention of the designation is that the land should not be built upon’, and ‘the designation means that the land can only be used for activities which retain its open nature. Any applications to develop the land would be resisted’. Whimble Parish Council asks what has changed since 1993 to suggest that this site should now be allocated in the Emerging Local Plan? This question was asked to the EDDC Strategic Planning Committee meeting on 1 October 2024 but, to date, no response has been received.

Developing this site would be contrary to Policy OL06: Land of Local Amenity Importance and Local Green Space. Spatial Strategy Whimble is a is a 'Tier 4' settlement, where the draft local plan seeks to promote limited development to meet local needs. The development of up to around 33 homes on Whim_11 is consistent with that strategy. Whimble Parish Council challenges this assumption. As part of the work on the Whimble Neighbourhood Plan, the Parish Council commissioned a Housing Needs Survey. The Whimble Parish Housing Needs Report states ‘The survey identified a need for at least 4 affordable homes within the next 5 years.’ Whimble Parish Council does not class a total allocation of 83 homes in Whimble to be ‘limited development’ (Whim_11 total of 33 homes; Whim_08a total of 50 homes), especially when the Whimble Housing Needs Report lists a significantly lower figure. The Parish Council also suggests that the allocation is not sound as it is contrary to EDDC Emerging Local Plan Policy HN01: Housing to address needs, which states ‘This will be achieved by providing an appropriate mix of decent, good quality homes which meet identified needs for housing as identified in a neighbourhood plan, local needs assessment or other evidence document over the plan period, at locations consistent with the settlement hierarchy and the spatial strategy.’ In addition to this, there are developments planned in

neighbouring areas e.g. Cranbrook. This includes the current Cobdens Expansion of Cranbrook, part of which is still in the Whimble Parish Area, where 1500 houses, a school and a travellers site have already been approved by the Strategic Planning Committee. These sites have a far better infrastructure than Whimble Village so why has the additional housing requirement not been allocated at these sites? Other Comments The Parish Council and local residents in Whimble have not said that they are against development. But the issue is the size and location of the development. It is the view of the Parish Council that development would be better placed elsewhere in Whimble, or in Cranbrook or elsewhere in the district where there is appropriate infrastructure. As set out earlier there is no sound justification as to why the Strategic Planning Committee decided to go against the professional judgement of the Planning Officers and allocated this site in the Emerging Local Plan. Also, in terms of soundness, the Strategic Planning Committee does not appear to have fully considered a number of other options that could have been chosen. Whimble Parish Council is looking at Site Allocations as part of the evidence base for its Neighbourhood Plan. The Parish Council is considering a number of sites, which are: Whim_03 Land to the south of Grove Road Whim_07 Land south of Broadclyst Road Whim_13 Land north side of Grove Road Whim_18 Land to the east of Church Road Whim_20 Land to the north of Plumtree Lane The Parish Council's preference would be that a site is allocated to the east of Church Road so that it is nearer to the established infrastructure near the Hand and Pen. It is the view of the Parish Council that further work should be carried out on all of the sites by the professional Planning Officers before any allocation is made in Whimble. Summary Whimble Parish Council believes that policy SD29: Strategic Allocations for Whimble, specifically site Whim_11 is not sound, as the decision to allocate failed to consider the protected tree in the middle of the site, which is protected by a Tree Preservation Order (TPO). Also, there is no mention of the fact that previously the EDDC Planning Department designated this site as "Land of Local Importance" which should not be built on and should be used for activities which retain its open nature. Therefore, Whimble Parish Council and local residents want to see the modification of site Whim_11 being removed from the EDDC Emerging Local Plan and the homes being allocated elsewhere in the district (outside of Whimble Village), where there is appropriate infrastructure.

Full name: Terence David Hill

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: As a Whimple resident I strongly object to the plan to develop Whim08 for 50 houses and a 'community orchard/open area'.

This plan was rejected unanimously in whole or in part at a Strategic Planning Meeting in October 2024 in accordance with Planning Officer recommendations and yet a month later the same committee unanimously voted for the proposal that was proposed by the Chair of said committee who lives in Whimple.

A speaker justified the proposal with comments regarding the facilities available in the village including:- a Post Office (there is not one!) a school (now full due to overspill from Cranbrook and already using a village hall as an overflow that should be for the use of all residents resulting in the community having to raise £400,000 to extend the hall to make it available for all) a shop (up for sale and no guarantee that it will continue) a Railway Station with good services (not a good service and no parking available already in this area) and all of these facilities are isolated from Whim08 by a narrow often single track Church Road that is poorly lit with no pavements. There is no suitable bus service from Whimple to anywhere.

It was also stated in the November Strategic Committee meeting that once the 50 houses are built there could be more development of the site on the other side of the flood plain towards Cranbrook so clearly this proposal is just a lever to over develop a small village and join it up to Cranbrook on what is a Green Wedge.

One aspect that has been thrown in without any apparant discussion or consideration is that attached to this development could be a community orchard/open area. It is not clear what use this would be put to but would border an existing historic orchard that continues around the back of Bramley Gardens and is a haven for wildlife. This area could not survive as such if an open area were developed next to it as inevitably children would use this orchard as an extension of the 'open area' and if that becomes used as a play area and dog walking area it is inevitable that Bramley Gardens could become a parking area for these activities for those coming from other parts of the village rather than the Whim08 development.

If EDDC are short on their needs then surely other areas of Whimble Parish should be considered nearer to Hand & Pen where there is a good bus route and is close to local facilities at Cranbrook.

The Parish Council have identified that 5 affordable houses would be needed in the near future and yet 15 would be included in the 50 house allocation for Whim08.

In conclusion this proposal has not been given adequate diligence, goes against Planning Officers recommendations, is not a suitable , safe site and seems to be a kneejerk reaction to Government prssure to meet targets regardless of the practical issues that exist.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I live in Whimble and I object to the plan to develop Whim08 for 50 houses and a 'community orchard/open area'.

This plan was rejected unanimously in whole or in part at a Strategic Planning Meeting in October 2024 in accordance with Planning Officer recommendations and yet a month later the same committee unanimously voted for the proposal that was proposed by the Chair of said committee who lives in Whimble.

A speaker at the November meeting justified the proposal with comments regarding the facilities available in the village compared to Feniton including:- a Post Office (there is not one!) a school (now full due to overspill from Cranbrook and already using a village hall as an overflow that should be for the use of all residents resulting in the community having to raise £400,000 to extend the hall to make it available for all) a shop (up for sale and no guarantee that it will continue) a Railway Station with good services (not a good service and limited parking available) and all of these facilities are isolated from Whim08 by a narrow often single track Church Road that is poorly lit with no pavements unlike the area around Feniton Railway Station that has wide roads, pavements and decent station parking. There is no suitable bus service from Whimble to anywhere.

It was also stated in the November Strategic Committee meeting that once the 50 houses are built there could be more development of the site on the other side of the flood plain towards Cranbrook so clearly this proposal is just a lever to over develop a small village and join it up to Cranbrook on what is a Green Wedge.

One aspect that has been thrown in without any apparant discussion or consideration is that attached to this development could be a community orchard/open area. It is not clear what use this would be put to but would border an existing historic orchard that continues around the back of Bramley Gardens and is a haven for wildlife. This area could not survive as such if an open area were developed next to it as inevitably children would use this orchard as an extension of the 'open area' and if that becomes used as a play area and dog walking area it is inevitable that Bramley Gardens could become a parking area for these activities for those coming from other parts of the village rather than the Whim08 development.

If EDDC are short on their needs then surely other areas of Whimble Parish should be considered nearer to Hand & Pen where there is a good bus route and is close to local facilities at Cranbrook.

The Parish Council have identified that 5 affordable houses would be needed in the near future and yet 15 would be included in the 50 house allocation for Whim08.

In conclusion this proposal has not been given adequate diligence, goes against Planning Officers recommendations, is not a suitable , safe site and seems to be a kneejerk reaction to Government pressure to meet targets regardless of the practical issues that exist.

Full name: Terence David Hill

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Whim08a is not suitable for development because

1. the entrance via Bramley Gardens off Church Road is totally unsuitable as an access to further development as it enters Church Road on a blind bend.

2. The development would be served by a village but would be isolated from the village amenities by a narrow Church Road with no pavements and no street lights.

3. Access to the village from Hand and Pen is a winding narrow lane with some single track elements that are already dangerous for existing village residents.

4. The provision of turning an existing traditional orchard to the north of the development into a community orchard with open space for the use of the new development would seem to not only destroy the idea of retaining a traditional orchard but would surround an existing development of mainly retirement bungalows in Bramley Gardens with open spaces no doubt used for children's play areas and dog walking resulting in noise plus Bramley Gardens being used a parking area as there is currently an access to the orchard between 11 and 12 Bramley Gardens.

4.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Keep the area currently designated as traditional orchard as such and not turn it into an open space

for community use. Develop open space elsewhere around the new development. Change the access to the WHIM08a development along Church Road nearer to Hand and Pen and seal off the road access from Bramley Gardens leaving only pedestrian access from Bramley Gardens to the new development. To enable residents to access decent bus services Church Road from Bramley gardens to Hand and Pen needs a footpath as a full bus service only runs from Hand and Pen. Following a Community Speed Watch initiative just commencing the Highways Dept needs to reduce speed limit to 30mph until it meets the 20mph limit just past Bramley Gardens and to improve signage to encourage priority to one direction of traffic in the village where it is single track. This village has a major accident waiting to happen and further development will make this situation even worse.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The villagers have already demonstrated their desire to avoid such development in previous consultations. The proposal to develop WHIM08a and take over an historic orchard was hastily decided with a throw away line at a Strategic Planning Committee meeting without any discussion about the difficulties of this idea and with statements made by Councillors about the facilities in the village being incorrect and misleading i.e There is no Post Office in the village, there is not a 20mph limit at the junction of Church Road and Bramley Gardens, the proposed development would be isolated from the village by narrow roads with no footpath and no street lights. The decision appears to be riding roughshod over practical issues and the wishes of a lot of villagers.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Ian Holten

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I live at no. 28 Slewton Crescent and strongly object to the proposed development at Whimple_11 for all the reasons cited in the parish council's response, including drainage/flooding issues, unsuitable road access leading to increased traffic through the village and the need to preserve natural habitat.

Full name: Margaret Holway

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I write to strongly object about the 2 proposed developments in Whimble: Whiteways Cricket Pitch Bramley Gardens

The village cannot sustain any more housing. There is no parking ,no capacity for schools/GPs/Dentist/Hospitals. The Bramleys Garden area forms part of the green wedge between Whimble and Cranbrook so cannot be usedv as per previous agreeemnts. The roads are chock a block now and there is no parking. The Whiteway Cricket Pitch will mean at least an extra 60 cars .

Whimble needs green spaces not more houses.

Full name: Margaret Holway

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: With regards to the planning on Whiteways old cricket pitch. To put 33 houses there is creating a major vehicle problem for the village, It will be at least 50 to 60 cars using our village lanes and creating even worse traffic jams than we have now. Also re Bramley gardens...we need some green spaces in Whimple,I believe Cranbrook was developed to keep our villages as villages! Bramley garden side of the village is the green wedge between us and Cranbrook There is not enough parking here now Whimple centre is full to capacity.

Full name: Rob Giffard

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: This part of the development plan is in direct violation of the rejection of building on these sites as agreed on 1st October 2024 by the EDDC Strategic Planning Committee which followed professional planning officers' advice that the location was unsuitable for housing development.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of land Whim_08a for development is not sound for several important reasons:

Conflict with Green Wedge Protection: The site is located within a designated Green Wedge, which is protected under the EDDC Emerging Local Plan Policy OL05. This policy states that development should not proceed in Green Wedges if it "damages the individual character or identity of a settlement or could lead to or encourage settlement coalescence." Developing on Whim_08a would violate this policy in two key ways. First, the proximity to the Cobdens development increases the likelihood of coalescence with Cranbrook. Second, this would erode the distinct identity of Whimble, particularly the Bramley Gardens area, and contribute to the suburban sprawl extending eastward from Exeter.

Incompatibility with Spatial Strategy: According to the EDDC Site Allocation Report, Whimble is a "Tier 4" settlement, where the draft local plan seeks to promote limited development to address local needs. A recent Housing Needs Survey commissioned by

Whimble Parish Council identified a need for only 4 affordable homes in the next 5 years. The proposed developments on Whim_08a, either alone or combined with Whim_11, significantly exceed this local need. Additionally, the ongoing Cobdens development, which includes 1,500 homes within Whimble Parish, already meets and surpasses the need for affordable housing in the village.

Lack of Safe Pedestrian Access: Access to the site would be via Church Road, which is narrow and heavily congested, particularly during peak times such as the school run (9am and 3:30pm). The police have confirmed that Church Road is not a safe route to essential village amenities such as the primary school, village shop, church, or train station. Additional development would exacerbate this safety hazard.

Contradiction of Planning Officers' Recommendations: In earlier consultations, planning officers deemed this site unsuitable for development, even in part. However, the Strategic Planning Committee has ignored these recommendations without providing any clear justification. This decision undermines the soundness of the allocation.

Flooding Risk: The site is at risk of flooding, which raises significant concerns regarding the safety and sustainability of any proposed development.

Impact on Wildlife: The development of Whim_08a could have detrimental effects on local wildlife, conflicting with EDDC Emerging Local Plan Policy PB03, which aims to protect irreplaceable habitats and important natural features.

For these reasons, the allocation of Whim_08a for development is fundamentally unsound.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Whim_08a from the list of allocated sites, as no development should be permitted there. Development on Whim_11 should be restricted to just 4 dwellings to meet the locally identified housing need.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: This development does not meet the duty to co-operate. The National Planning Policy Framework (NPPF) has not been followed, as effective cooperation has not been maintained. Section 3, paragraph 24 of the NPPF states that strategic authorities must engage with local communities and relevant bodies NPPF, Paragraph 24. However, there has been minimal outreach. The Parish Council only advertised the consultation on Facebook, which limited its visibility and participation.

Additionally, the Localism Act 2011 requires that local communities are properly consulted on planning matters Localism Act 2011, Section 122. The Strategic Planning Committee ignored Planning Officers' recommendations and made an abrupt decision without explanation, undermining the consultation process.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: N/A

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: N/A

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: I don't believe it is sound to develop here.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

From a personal viewpoint of a Whimple resident living nearby to the site at Bramley Gardens in particular, I'm not wholly against development but considering the current infrastructure here it would be completely irresponsible. I believe the main issue to be access, the existing roads cannot handle/are not sufficient for current traffic volumes as it is. It is a very narrow, single track lane with no pavements or safe way of pedestrian access. I live close by and walk my 2 year old to the school, it is frankly quite scary and dangerous to life as it is. Adding more volume to this already inappropriate infrastructure would be grossly irresponsible and I can only conclude would be decided

by individuals who have never attended the site. If pedestrian and vehicle access were MUCH improved through the center (down church road), only then perhaps it could be considered.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: These proposed developments in policy SD29 (especially Bramley Gardens), can only possibly be considered sound if the existing access and in particular the pedestrian access is vastly improved on the main road (lane) through the village.

It always shocks me how anyone can possibly expect to build and build and build without ever improving existing infrastructure/access that's ancient. It doesn't take much brain power at all to realize that eventually that will pop and the road will be permanently clogged up with pedestrians forced to jump into hedges. Please please do not build here without improving this lane first, all you need to do is walk down this lane at rush hour yourself to actually realize this. Thank you.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: As mentioned in 3(c), it totally fails anyone living here to build more houses when there is absolutely zero safe pedestrian access.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: N/A

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Re: Objection to SD29 Strategic Allocations in Whimble particularly Whim_08a

I would like to make my objections to the above proposal.

Professional planning officers have already assessed potential sites in Whimble and recommended that the site was not allocation for a variety of reasons, including being incompatible with spatial strategy and forming part of the green wedge with Cranbrook. The objection is supported by the Parish Council.

The road network around Whimble provides huge challenges as every access is narrow and does not have safe pedestrian access. Any large development within Whimble will cause major issues in terms of access of contractors to any site.

Safe pedestrian access is already a concern within the village, with a rising number of vehicles passing through the village and no pavements with no potential to provide safe access. Due to the narrow access in the Square and through the centre pedestrians have to walk on the road as there are no pavements. Therefore access to the school is likely to be by vehicle.

Transport links are not particularly good; although there is a train service only alternate trains stop at this station and the bus service is limited and ceases at 6pm and does not operate on Sundays.

Wildlife: There is an abundance of wildlife in Bramley Gardens and on the proposed site including woodpeckers, newts, owls, deer, badgers and bats which are regularly seen flying around this area. This would therefore be contrary to policies with regard to protection of irreplaceable habitats for wildlife.

Flooding: The centre of Whimple regularly floods and this proposed development is likely to increase the severity and frequency due to the run off down into the centre of the village. I would like to see evidence of flood risk assessments.

In my opinion Whimple is unsuitable for further large scale development due to the access issues and unless a new access road is constructed into the village from the old London Road providing two lane road with a cycle lane and pavement.

Full name: Peter Johnson

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. I live in Millend directly opposite the proposed building site. Access to the site would bring all construction traffic through whimple a village with NO Footpaths.

2. No footpaths exist from the proposed site to the school or Whimple facilities.

3. The site is accessed from a single track lane, two vehicles can't pass each other as witnessed by the recent accident of the local Sidmouth bus trying to pass a stationary lorry, showering its current customers in glass shards.

4. Yes it has been noted that field floods, no one has noted that the single track lane also floods, current drainage is insufficient in the lane, more houses and tarmac won't help cure this

5. Site wh_04 already has access and footpaths into Bramley gardens and is the right side of the village to stop any construction traffic increasing the likelihood of pedestrian injury.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to object to the allocation of Whim_08a in the EDDC Emerging Local Plan. This proposal is unsound due to safety concerns, environmental risks, and a failure of proper consultation and evidence.

The site lacks safe and convenient pedestrian access to key services in Whimple. There are no pavements on Church Road, and it is unsuitable for walking to the shop, school or station—especially for children and families. This makes the allocation contrary to policies encouraging sustainable and safe transport. The land is also part of a Green Wedge, designated to prevent coalescence between Cranbrook and Whimple. Development here would contribute to settlement merging and undermine the character of the village. This breaches the principles of Policy OL05 and has long-term implications for landscape and community identity.

Additionally, there are unconfirmed wildlife habitats on this land, including owls, bats, birds of prey, badgers and deer. These issues have not been fully assessed, nor has the site's flood risk, which officers previously said required more work. The lack of updated assessments makes the plan unsound, as it is not supported by proportionate evidence.

Importantly, at a public consultation event in Whimple, officers stated that this site was not under consideration. For it to appear later in the plan, without proper communication or justification, undermines the integrity and transparency of the consultation process.

It is on this basis, I strongly object to the plan to allocate land next to Bramley Gardens for development (Whim_08a)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Procedural Errors: I believe that due process was not followed by the EDDC Strategic Planning authority by failing to follow proper procedures when they re-assessed the sites for Whimble at the EDDC Strategic Planning Committee on 1 November 2024.

Substantive Errors: I believe that the assessment of the planning proposal has failed to correctly consider the guidance provided by the planning officers' that the majority of sites including Whim_08 were unsuitable due to:

· Scale of development incompatible with spatial strategy. · Site lacks safe and convenient pedestrian access to services and facilities in the village. · The site forms part of the 'Green Wedge' between Whimble and Cranbrook. · Forms an important part of the very attractive rural landscape setting for the settlement. · Potential impact on wildlife · Part of is at risk of flooding and further work would be required to understand the nature and extent of the risk before consideration could be given to allocation.

No additional assessments were carried out to support the allocation, raising serious concerns about the decision.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I do not believe that the process to arrive at the required number of houses for Whimble as

outlined in Strategic Policy SD29: Development allocations at Whimble is a sound and just recommendation.

The objection is on the grounds of soundness in that the allocation in the policy is not based on solid evidence. The EDDC Strategic Planning Committee considered the Whimble Site Selection Report at a meeting on 1 October 2024. Planning officers identified and assessed the potential sites in Whimble and using their professional judgement, backed up with sound evidence recommended to Members whether to allocate the site or not. In the case of Whim_08 site, officers recommended that the site was not allocated for the following reasons: · Scale of development incompatible with spatial strategy. · Site lacks safe and convenient pedestrian access to services and facilities in the village. · The site forms part of the ‘Green Wedge’ between Whimble and Cranbrook. · Forms an important part of the very attractive rural landscape setting for the settlement. · Potential impact on unconfirmed wildlife site. · Part of is at risk of flooding and further work would be required to understand the nature and extent of the risk before consideration could be given to an allocation.

Members of the committee voted to go with the recommendation and not allocate the site. However, at the Strategic Planning Committee meeting on 1 November 2024 Members allocated part of the site, contrary to Officer recommendation without justification or additional work appearing to have been completed by officers to assess the risks relating to this site before allocating it.

Scale of development incompatible with spatial strategy. Policy SP01: Spatial Strategy section E states ‘Allowing limited development at the Service Villages of Beer, Branscombe, Broadhembury, Chardstock, Clyst St Mary, Dunkeswell, East Budleigh, Exton, Feniton, Hawkchurch, Kilmington, Musbury, Newton Poppleford, Otterton, Payhembury, Plymtree, Sidbury, Stoke Canon, Tipton St John, Uplyme, Westclyst, West Hill and Whimble.’ The EDDC Site Allocation Report for Whimble states ‘Whimble is a ‘Tier 4’ settlement, where the draft local plan seeks to promote limited development to meet local needs. The development of up to 83 dwellings for Whimble is excessive in relation to the scale of the existing village and is not at the density of existing housing in the settlement boundary.

The allocation is not sound as it is contrary to EDDC Emerging Local Plan Policy HN01: Housing to address needs, which states ‘This will be achieved by providing an appropriate mix of decent, good quality homes which meet identified needs for housing as identified in a neighbourhood plan, local needs assessment or other evidence document over the plan period, at locations consistent with the settlement hierarchy and the spatial strategy.’ There are developments planned in neighbouring areas e.g. Cranbrook. This includes the current Cobdens Expansion of Cranbrook, part of which is still in the Whimble Parish Area, where 1500 houses, a school and a travellers site have already been approved by the Strategic Planning Committee. These sites have a far better infrastructure than Whimble Village so why is the additional housing requirement not allocated at these sites?

The site forms part of the ‘Green Wedge’ between Whimble and Cranbrook. The EDDC Emerging Local Plan Policy OL05: Green Wedges states ‘Within green wedges, as defined on the Policies Map, development will not be permitted if it would add to existing sporadic or isolated development, damage the individual character or identity of a settlement, or could lead to or encourage settlement coalescence, whether physical, visual, or intrinsic.’ The Allocation of this site would potentially damage the individual character or identity of Whimble. This site forms an important part of the rural landscape setting for the settlement. This would also lead to settlement coalescence between Whimble and Cranbrook, which is a material planning issue, and clearly demonstrates that this site should not be allocated in the Local Plan. This was the view of the EDDC Planning Officers. Potential impact on unconfirmed wildlife site. Residents of Whimble have stated that this site is a wildlife site which is home to bats, owls, woodpeckers, deer and badgers. Any development of this site would be contrary to EDDC Emerging Local Plan Policy PB03: protection of irreplaceable habitats and important features. Part of is at risk of flooding and further work would be required to understand the nature and extent of the risk before consideration could be given to allocation. There is no evidence to suggest that officers have carried out further work relating to the flood risk before consideration was given to a partial allocation. Summary Whimble Parish Council believes that Policy SD29: Strategic Allocations for Whimble, specifically site Whim_08a is not sound, as the decision to allocate this site went against the solid evidence provided by the professional Planning Officers report and recommendations, without any justification as to why the decision was made to

partially allocate the site. Therefore, Whimble Parish Council and local residents want to see the modification of site Whim_08a being removed from the EDDC Emerging Local Plan and the homes being allocated elsewhere in the district, where there is appropriate infrastructure.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduction of the allocation for Whimble to 33 houses at (Whim_11).

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: As residents of Church Street for 42 years, we write to object to the scale of development planned as it is incompatible with spatial strategy. We have had our front wall knocked on numerous occasions by vehicles (both large and small) and find it difficult to walk to the square and beyond owing to the traffic not obeying the 'give way' priority signs and there is no pavement. It is dangerous for children walking to the primary school, as well as elderly people. The proposed site forms part of the 'green wedge' between Whimble and Cranbrook and would destroy the individual character and identity of this old cider village. The green wedge is home to wildlife and any development of this area would be contrary to EDDC emerging local plan policy PB03: Protection of irreplaceable habitats and important features. Has there been any flooding assessment done?

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We would therefore like to see the modification of site Whim_08 being removed from the EDDC emerging local plan and the houses being allocated elsewhere, outside of Whimble where there is appropriate infrastructure.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: Plans for development of the 2 sites in Whimble need to take into consideration the capacity that Whimble has for 80+ homes which will have 1, possibly 2, cars each. The housing plans MUST include space for residents vehicles. Transport considerations for traffic through the village needs to be thought of as access through the narrow streets is already an issue and causes problems, including damage to property and trucks getting stuck under the railway bridge.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proposal for 50 dwellings on land west of Bromley Gardens (Whim_08a) is out of proportion with the size of the village, especially as 33 new homes are already earmarked at Station Road. It is situated on land previously allocated as a green wedge between Whimble and Cranbrook, as such the proposal would erode protection against encroachment on the village. In addition, Church Road, which provides access to Bramley Gardens is a busy, narrow lane without pavement. Additional traffic associated with this development will lead increase the danger to pedestrians.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert to the original proposal to only develop the land at Station Road (keeping that to 33 dwellings). Failing that, significantly decrease the number of homes to no more than 12.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I write to object to the allocation of Whim_08 (land west of Bramley Gardens on the 1st November 2024 in the EDDC Emerging Local Plan.

I object on the basis of soundness. On 1st October 2024, just 30 days earlier, the EDDC Strategic Planning Committee rejected the Whim_08 site on the basis of:

* Scale of development incompatible with spatial strategy * Site lacks safe and convenient pedestrian access to services and facilities in the village * The site forms part of the 'Green Wedge' between Whimble and Cranbrook * Forms an important part of the very attractive rural landscape setting for the settlement * Potential impact on unconfirmed wildlife * Part of is at risk of flooding and further work would be required to understand the nature and extent of the risk before consideration could be given to allocation.

To our knowledge, none of these issues have been addressed.

As a resident of Church Road below Bramley Gardens, I can confirm that the site lacks safe pedestrian access to services and facilities in the village. With an additional 50 houses with potentially in excess of 100 pedestrians and a further 50 vehicles (at least), the pedestrian route to the village would be even more hazardous.

Residents of Church Road can already testify to the fact that the road is far too busy for a single track village road, with a constant stream of traffic driving past our homes.

The section between Bramley Gardens and the shop in the square is in many places single track with no pavement and cars are regularly stationary in the road waiting for a stream of traffic to pass before they can proceed. This leads to increased pollution to the village and even less space for pedestrians to walk safely to the facilities in the village.

In addition, the village is already struggling with drainage issues with the potential for flooding. Our own garden after just one day of rain becomes saturated and water logged with visible surface water which takes days to clear. With another estate of 50 homes, the run off could easily induce flooding to existing properties further down the hill.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Given the above list of ongoing and serious issues with the Whim_08 site we believe the decision to allocate 50 homes on this site should be reversed.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Co-operate with whom? What duty? Who has mandated this? This format is completely unfriendly to lay people who are trying to make comments

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Jenny Love

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Policy SD29: Strategic Allocations for Whimble Site WHIM 08a I have tried to submit my response via the portal but found it very difficult to navigate, the language impossible to understand and therefore only suitable for legal professionals to use. It is not 'user friendly' for the general public, is quite discriminatory and results in fewer responses being made. No response being taken as affirmative! Not being legally trained, I do not fully understand the term LEGALLY COMPLIANT or what is needed to make the proposal compliant. Or what is needed to make it SOUND. I am therefore making my response by email! My response to the proposal. On October 1st 2024, the EDDC Strategic Planning Committee rejected the site following advice given by professional PLANNING OFFICERS. WHIM08a was deemed unsuitable due to: INCOMPATIBILITY with the special strategy, LACK OF SAFE PEDESTRIAN ACCESS throughout the village. IMPACT ON RURAL LANDSCAPE & WILDLIFE. FLOOD RISK REQUIRING FURTHER ASSESSMENT and most importantly, the site has GREEN WEDGE STATUS to prevent coalescence with CRANBROOK. The site allocation report also considers whether a smaller part could be allocated. The PLANNING OFFICERS view was 'NO'. However, on November 1st 2024, the District Councillor, Todd Olive, suddenly reversed the decision. This was against the original evidence and without any further investigation/assessment, discussion or justification. Making this decision UNSOUND and raising concern. I question the SOUNDNESS of the proposal for the reasons below and oppose the proposal to develop WHIM 08a. The EDDC Site Allocation Report for Whimble states that development should reflect local needs. The Whimble Parish Housing Needs Report states 'The survey identified a need for 4 affordable homes within the next 5 years! Whim 08 is considered to be excessively high in relation to the rest of the village. A total of 83 homes (Whim 08a and Whim11) is not a small development! This is way too many for a small village which has already seen substantial development. Smaller developments that 'blend in' with existing homes/architecture are more appealing and reflect the rural community. The Parish Council suggests the allocation is not sound as it is contrary to EDDC Emerging Local Plan Policy HN01.

Cranbrook is delivering thousands of new homes in the area. There is capacity for more homes to the North of this settlement with direct access to schools, shops and railway station. The current Cobdens Expansion is set to deliver 1500 homes, a school and a Travellers site. THIS SITE IS WITHIN THE WHIMPLE PARISH. Whimble is providing a sufficient number of homes in a location that will provide the required infrastructure. The infrastructure of the small village of Whimble is already inadequate. New development should be built in a more suitable location, along with the required infrastructure and easy access to existing facilities. Whimble School is already full to capacity, relying on the daily use of The Victory Hall to provide the necessary education and well being of the pupils. This means that the rest of the local community are not able use the hall's facilities. New homes bring children with them! Through traffic has increased considerably over the past 20 years. Delivering and collecting children to and from school is dangerous and difficult. There is no availability to park safely! Bottlenecks occur frequently. More homes bring more cars into the area at least two per home! Pavements through the village are non-existent and traffic speeds through the narrow lanes at dangerous levels. The road out of Whimble near WHIM 08a, does not have a pavement for residents who need to walk to the Hand and Pen to catch a bus into Exeter. The lane twists and turns making it dangerous for pedestrians. Whimble is an agricultural village. Traffic includes large farm vehicles moving between farms. Home delivery vehicles have also added to the congestion and high numbers. Although there is currently a small shop, this is now for sale and Whimble stands to lose this amenity. The Surgery is an off shoot of the Coleridge Medical Centre in Ottery St Mary, and therefore caters for patients in the wider community. The train service has declined considerably since the station at Cranbrook opened. Many trains ceased stopping at Whimble- there is only one line and speed is lost if a train stops. Putting the schedule out! The public bus service through the village is very infrequent and not sufficient for people working in Exeter ,as the bus travels through narrow lanes, small villages and on to Sidmouth. Village residents are forced to use their own vehicles which are bad ecologically and environmentally. Being dangerous for pedestrians and cyclists. WHIM 08a is surrounded by beautiful fields, hedgerows, orchards and woodland, which provide a wide range of habitat for wildlife, including bats and owls. We are constantly being told that the natural world is fundamental to our health and wellbeing. I feel that none of these things are taken into account and quick decisions are short sighted. WHIM 08a is prime agricultural land and is currently used as such. As well as having GREEN WEDGE STATUS preventing coalescence between Whimble and Cranbrook. Development would have a detrimental visual impact upon entering the village, increase light and noise pollution and have a great impact on the immediate surroundings. Flooding and sewerage is also a concern. Drainage trenches and pipes have recently been laid by the farmer to alleviate flooding issues. Investigations and assessments by the planners have been lacking. All of the above points challenge the SOUNDNESS of the proposal. I believe the proposal to develop WHIM08a,has been put

forward without careful consideration, lack of transparency, and lack of co-operation and communication with the residents of Whimple.

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: NON-COMPLIANT and lacking in DUTY TO CO-OPERATE.

Webarchive.nationalarchives.gov.uk PLANMAKING No 16 C) Plans should be shaped early, be proportionate and have effective engagement between PLANMAKERS and COMMUNITIES, LOCAL ORGANISATIONS, BUSINESSES, INFRASTRUCTURE PROVIDERS and OPERATORS and STRATEGIC CONSULTEES. E) Be accessible through use of digital tools to assist public involvement of policy presentation. EXAMINING PLANS A) Does it address the areas assessed needs? B) Is it justified by having looked at reasonable alternatives?

There has been insufficient information about this proposal. Many residents appear to be unaware of it. Especially those who do not use the latest technology for communication,

Site WHIM 11 33 homes on this site is above the number quoted in the needs report for Whimple. This being 4! All of the reasons stated for opposition to development of WHIM 8a are also applicable to WHIM 11. These developments would have a detrimental impact on the village and all who live here.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

agree with allocation of Whim_11. 30 homes in this location seems proportion to the village needs and growth provided that the site is designed sensitively to protect the irreplaceable and important habitats it supports.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Land west of Bramley Gardens Whim 08a should not be allocated for 50 homes. An additional 50 homes beyond the 30 at Whim_11 is disproportionate and unnecessary in the context of Whimble's housing requirements. The site is located within the allocated green wedge and should remain undeveloped to protect and maintain Whimble's village status and feel in the context of Cranbrook which is proposed to encroach further east. The site does not provide safe transport/pedestrian links for this number of homes through the village.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Removal of Whim_08a or significant reduction in number of homes proposed there

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Road access through the village is already extremely challenging with narrow slow lanes. Speeding has already been an issue and parking is already another problem. The addition of such a number of new homes will have an adverse effect on the existing community.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Better road access in to and through the village. Consideration if the capacity of the existing pre-school and school.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.:

Consultation seems to be online nowadays, it is disappointing that there does not seem to be in person consultation being held in person with communities to discuss planning/development proposals. During such a meeting it would be beneficial to ensure the community concerns are captured and issues addressed or mitigations presented by planning team.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wish to comment on the above plan, being a long time resident of Whimble {60 years}, and being situated off Church Road midway between Bramley Gardens and the village square.

Understanding that this plan is still being considered despite originally being rejected, following professional planning officers' advice, and agreeing with their concerns over the incompatibility with the promised green wedge status, bearing in mind the proposal for expanding Cranbrook into whimble boundaries already, the impact to wildlife, to which i can personally attest to sightings of deer, owls and woodpeckers on the land surrounding Bramley Gardens, and the flood risk, my main concern is with the lack of pedestrian access not only to the site itself, but also to the village facilities.

On a daily basis i walk along Church Road in both directions, to the Square and also past Bramley Gardens. Much of this route is single track road with very few, if any short stretches of pavement, all of which necessitate stepping out into traffic, often with very limited visibility. Along the vast majority of this road there is no pavement and in many circumstances i will have to dive into driveways, or flatten myself against hedges or cottage walls in order to allow vehicles to pass safely, particularly in the case of lorries, vans and the bus or when cars are trying to pass one another in narrow stretches. Collecting my grandchild from the preschool, situated in the village hall, and walking her home to my house is particularly hazardous and stressful.

In order to make use of any of the village facilities {the shop, the church, the school or preschool, the village hall, the Doctors surgery, train station or bus stop or even the

pub], this is the journey i must make and will be the journey the inhabitants of this proposed development will also have to take.

Obviously it is precarious to say the least and with, no doubt, the addition of yet more vehicles using this narrow stretch of road, the situation can only get worse.

Put simply the village has not the infrastructure to cope with an influx of more inhabitants so close to the heart of the village, be they pedestrians or vehicle users.

Thank you for your time in considering my concerns.

Strategic Policy: SD29: Development allocations at Whimble. Land at Station Road (Whim_11) (Correction: Talaton Road)

Development proposals should deliver a footway extension from the west and tie into the site?

Site 11 Whimble Richard Whiteway Memorial Ground Talaton Road I implore you to reject the recommendation of RWMG as it should already have been removed. This field was subject to a 425 signature petition in 1988 to preserve unchanged as submitted to EDDC. (i.e Open Space which we sadly lack). In fact the ashes of two cricket supporters have been scattered. The field is home to owls, woodpeckers, nesting buzzards and foraging bats. There are a TPOs on several trees including those against the Talaton Road. The road is only 4.5 metres wide forcing cars into drive ways and viability is dire. It appears that it is intended to take part of my garden for a footpath which is not negotiable and I have never even been extended the courtesy of being consulted. The area has been granted “Land of Local Landscape Importance” by EDDC. Also I have correspondence from EDDC stating “Permission will not be granted for development on these areas except for recreational uses which retain the open character of the area”. Where are an estimated 50 extra cars going to be parked? Dangers of increased vehicles passing the primary school, the square and Church Road should be seriously considered. Exiting Station Road is already an accident waiting to happen without approximately 100 additional vehicle passing movements. Devon County Council refused an application for access by occasional LPG vehicles on highway grounds. (Letter 19 June 1995 attached) Flooding to The Green and then Clyst Honiton and Clyst St Mary should be considered. Whimble already suffers from sewage overflows without

additional housing. Please see attached letters. The Richard Whiteway Memorial Ground (Slewton) must be declared as Open Space to be enjoyed by all.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site conflicts with Local Plan policies and lacks evidence of sustainability

I strongly object to the inclusion of site Whim_08a in the Local Plan on grounds of soundness. This allocation fails several tests of sound planning and contradicts numerous Local Plan policies.

The site is part of the Green Wedge between Whimble and Cranbrook. According to Policy OL05, development should not be permitted where it risks settlement coalescence or damages the rural character of the landscape. Allocating this site will contribute to the erosion of Whimble's individual identity and breaches the intent of this policy.

Furthermore, there is no safe pedestrian access to village services. Residents would need to use Church Road, which is narrow, without pavements, and considered unsafe by the police and the local Community Speed Watch group. This directly conflicts with Policy TR01, which seeks to promote walking and cycling.

The allocation also ignores the Whimble Housing Needs Survey, which found a need for just 4 affordable homes over the next five years. Allocating 83 homes in the village (including the Whim_11 site) is inconsistent with this evidence and conflicts with Policy HN01, which stresses that developments must respond to documented local housing needs.

There are unconfirmed wildlife habitats that haven't been investigated. The Parish Council's preference would be that a site is allocated to the east of Church Road so that it is nearer to the established infrastructure near the Hand and Pen (Bramley Garden's is to the West). It is the view of the Parish Council that further work should be carried out on all of the sites by the professional Planning Officers before any allocation is made in Whimble. The spontaneous decision to offer up Bramley Gardens was inappropriate and against expert advice.

The allocation fails to consider the 1,500 homes already approved in the Cobdens Expansion of Cranbrook, which sits within Whimble Parish and includes a school and traveller site. Given the existing infrastructure in that area, additional allocation in Whimble village itself is unnecessary and unjustified.

In addition, the partial allocation was previously deemed inappropriate by EDDC officers. No new flood risk assessments or environmental assessments have been completed to support this change. This makes the plan unsound, as it is not based on proportionate evidence.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Unsound allocation contrary to spatial strategy, officer advice and infrastructure limitations I object to the allocation of site Whim_08a in Policy SD29 of the EDDC Emerging Local Plan on the grounds of soundness. The decision to allocate this site contradicts professional planning advice and is not supported by robust evidence.

At the October 2024 Strategic Planning Committee, EDDC's own planning officers recommended that Whim_08 was unsuitable for allocation. They cited reasons including incompatibility with the spatial strategy, a lack of safe pedestrian access, and impact on the Green Wedge. Despite this, the Committee reversed its decision one month later in November, allocating part of the site without providing any evidence or justification for the change. This lack of transparency and disregard for expert opinion undermines the justified and effective tests of soundness.

Furthermore, Church Road, the main access route, is narrow, lacks pavements and is not a safe route for pedestrians. There is a high risk to public safety, particularly for children walking to the local school, and this contradicts the objectives of Policy TR01 to prioritise sustainable travel.

The plan also fails to consider the 1,500 homes already approved in the Cobdens Expansion of Cranbrook, which sits within Whimble Parish and includes a school and traveller site. Given the existing infrastructure in that area, additional allocation in Whimble village itself is unnecessary and unjustified.

Whimble is classified as a Tier 4 settlement, where only limited development should occur. However, the plan proposes 83 houses in total (Whim_11 and Whim_08a), far exceeding the 4 affordable homes identified as needed in the Housing Needs Survey. This goes against Policy SP01 and HN01, which state that development should match local needs and fit the character of the village.

The allocation of Whim_08a ignores this context and the professional recommendation that even partial allocation was inappropriate. Without updated evidence or justification, the plan does not meet the justified or effective tests of soundness and should be amended to remove this site.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The road infrastructure, both to and through the village, which are very dangerous particularly to pedestrians, cyclists, horses etc and any increase in population will only exacerbate this problem.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: If they laid a new road with pavements from Hand and Pen (old A30) connecting the south and north of the village that should satisfy our main health and safety concerns

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Our main objection to the proposed developments in Whimble are road infrastructure, both to and through the village, which are very dangerous particularly to pedestrians, cyclists, horses etc and any increase in population will only exacerbate this problem. A footpath through the orchard north of Whim 08 is hardly going to change the situation. The road infrastructure in Whimble is similar to Branscombe – a long pavement-less lane both to and through the village and as far as I can find out just ten new homes were proposed for Branscombe in 2016 (and that's too many.)

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: If they laid a new road with pavements from Hand and Pen (old A30) connecting the south and north of the village that should satisfy our main health and safety concerns but we would steal be losing our green wedge as well as prime agricultural land and it would be undoubtedly harmful to wildlife. As deer use that green wedge to commute between north and south Whimble, it's essential to maintain a buffer between Cranbrook and Whimble.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: No for the reasons given.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wish to share my concerns with regards the local plan for East Devon and, more specifically the allocation of Whim_08, potential allocation of land next to Brantley Gardens for development.

I would like to confirm that I agree with Whimble Parish Council's challenges to the policy and would like to echo their concerns. Please take it as written that those concerns are included as part of this submission without the need for duplication here.

In particular I have significant concerns over the traffic levels and road safety in Whimble as it stands already and consider Church Road to already be dangerous to turn out on to from Hindstrete, Dince Hill and Bramley Gardens. Any proposed developments would exacerbate this, making the village unsafe for children and animals (there are already a lot of pets and wildlife falling victim to the road as it is). The comments in the Parish Council's response with regards pavement safety are wholeheartedly supported.

Whimble is currently an example of an attractive village with a nice community, adequately supported by services for the people living here but would not be able to support further developments to any real degree (eg via the school and village shop). Other sites are more appropriately serviced following recent development eg Cranbrook.

Without prejudice to the above challenge, in the event that the site was allocated the following must be noted:

- the proposed allocation site is home to a sewerage treatment plant for a number of houses and consideration would need to be given to how this would be dealt with: going on to mains sewerage is exceptionally expensive and not feasible for the properties in question; and

- any development should be made at a reasonable distance from the properties on Hindstrete and Bramley Gardens to allow continued enjoyment of those properties which currently sit on the edge of the Green Wedge.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site Whim_08a is unsound due to conflict with policies, infrastructure concerns and lack of evidence I object to the inclusion of site Whim_08a in the EDDC Emerging Local Plan on the grounds of soundness. This proposed allocation is not justified, not supported by proportionate evidence, and is inconsistent with several key Local Plan policies. The site lies within the designated Green Wedge between Whimble and Cranbrook. According to Policy OL05, development in these areas should be avoided where it risks settlement coalescence or harms the character of the local landscape. Allocating Whim_08a would undermine Whimble's rural identity and clearly breaches this policy. Access to the village from the site is also unsafe. There are no pavements along Church Road – the main route to local amenities such as the school and shop – and the road is narrow and hazardous. The police and Community Speed Watch group have both raised concerns. This directly contradicts Policy TR01, which aims to prioritise walking and sustainable transport. The allocation also fails to align with local housing needs. The Whimble Housing Needs Survey identified a requirement for only four affordable homes over five years, yet this plan allocates 83 homes in total (Whim_11 and Whim_08a), far exceeding what is required. This conflicts with Policy HN01, which states that housing development should reflect identified need. There are also unconfirmed wildlife habitats on the site that have not been properly assessed, and no updated flood risk or environmental assessments have been provided to support this partial allocation – despite it having previously been ruled out by EDDC's own planning officers. Furthermore, the allocation of Whim_08a appears to have been made spur-of-the-moment, going against professional advice and without clear justification. Meanwhile, other more suitable sites — including land to the east of Church Road near established infrastructure — have not been properly evaluated. The Parish Council has asked that these alternatives be considered before any final allocations are made. Importantly, the plan also ignores the 1,500 homes already approved in the Cobdens Expansion of Cranbrook, which falls within Whimble Parish and includes a school and traveller site.

These homes will meet housing needs with far better access to infrastructure than Whim_08a. Ignoring them when determining Whimble's housing allocation further undermines the soundness of the plan. In summary, this allocation is unsound. It conflicts with planning policy, disregards expert assessments, fails to reflect local needs, and does not follow a transparent or evidence-led approach. I request that Whim_08a be removed from the Local Plan.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Although I am not completely sure if this will be a legal factor, it is worth noting. This land has been designated as Land of Local Importance. That designation is there for good reason — to protect green spaces that matter to the community and the local environment. It helps preserve the rural character of Whimble and offers a valuable green buffer that contributes to the wellbeing of the village. Allowing a development on this land would completely undermine the purpose of that designation.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Flood risk is a major issue. The field is often waterlogged, and the stream at the bottom of the site has overflowed several times this winter alone — something that's happening more frequently in recent years. Building houses here will only increase the problem, pushing excess water into the surrounding area and raising the risk for existing homes. It's hard to see how this could be considered a safe or sensible location for development.

The environmental impact also can't be ignored. The site is home to a number of mature trees — including a historic oak — several of which are protected by Tree

Preservation Orders. The area is also used by protected wildlife, including bats and otters, both of which have been regularly seen near the stream and surrounding fields. Any development here risks destroying habitats and putting protected species at risk.

Importantly, this land has been designated as Land of Local Importance. That designation is there for good reason — to protect green spaces that matter to the community and the local environment. It helps preserve the rural character of Whimble and offers a valuable green buffer that contributes to the wellbeing of the village. Allowing a development on this land would completely undermine the purpose of that designation.

Traffic, however, is the issue that worries many of us most. Whimble's roads simply aren't built for this kind of increase in cars. The centre of the village has several narrow pinch points where only one car can pass at a time. There are very few pavements, making it risky for pedestrians — especially children walking to school, families with pushchairs, and older residents. We already deal with congestion at busy times, and it's hard to see how 33 houses — and the associated cars — won't make things significantly worse.

In particular, Talaton Road (and the roads feeding into it) would become even more congested. It's effectively a single-track road, already difficult to navigate when there's two-way traffic or delivery vans. Adding more vehicles to it is a serious safety risk — especially considering it's used by farm vehicles, cyclists, and walkers as well.

Cranbrook, just a few miles away, has been purpose-built with this kind of expansion in mind. It has wider roads, proper pavements, schools, shops, and services that are designed to accommodate more housing. Whimble simply doesn't — and trying to force that kind of development into a rural village setting just isn't sustainable.

In short, WHIM_11 isn't the right plan for Whimble. It puts pressure on roads, local services, and the environment — and goes directly against the protections in place for this piece of land. I hope the Council will continue to listen to the community and reject the proposal.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: With near misses around the area of Whimble Primary School being a regular concern, such an increase in traffic for the local population would likely require a one-way traffic management system to be formally introduced on School Hill. Building over 30 new houses (and probably adding 40-50 new cars) at Whimble_11 and significantly increasing the weight of traffic in mornings and evenings to/from the northern side of the school completely defies logic.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to

set out your comments.: The environmental impact also can't be ignored. The site is home to a number of mature trees — including a historic oak — several of which are protected by Tree Preservation Orders. The area is also used by protected wildlife, including bats and otters, both of which have been regularly seen near the stream and surrounding fields. Any development here risks destroying habitats and putting protected species at risk.

Importantly, this land has been designated as Land of Local Importance. That designation is there for good reason — to protect green spaces that matter to the community and the local environment. It helps preserve the rural character of Whimble and offers a valuable green buffer that contributes to the wellbeing of the village. Allowing a development on this land would completely undermine the purpose of that designation.

Traffic, however, is the issue that worries many of us most. Whimble's roads simply aren't built for this kind of increase in cars. The centre of the village has several narrow pinch points where only one car can pass at a time. There are very few pavements, making it risky for pedestrians — especially children walking to school, families with pushchairs, and older residents. We already deal with congestion at busy times, and it's hard to see how 33 houses — and the associated cars — won't make things significantly worse.

In particular, Talaton Road (and the roads feeding into it) would become even more congested. It's effectively a single-track road, already difficult to navigate when there's two-way traffic or delivery vans. Adding more vehicles to it is a serious safety risk — especially considering it's used by farm vehicles, cyclists, and walkers as well.

Cranbrook, just a few miles away, has been purpose-built with this kind of expansion in mind. It has wider roads, proper pavements, schools, shops, and services that are designed to accommodate more housing. Whimple simply doesn't — and trying to force that kind of development into a rural village setting just isn't sustainable.

In short, WHIM_11 isn't the right plan for Whimple. It puts pressure on roads, local services, and the environment — and goes directly against the protections in place for this piece of land. I hope the Council will continue to listen to the community and reject the proposal.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wish to object to the Whim_08 plan for my village. There was always meant to be a green wedge between Whimble and Cranbrook, yet we already have an incursion within the village boundary of a travellers site you have approved. Now you wish to extend this to another 50 that could increase to near 180. There are also 1500 homes being built on the Whimble side of Cranbrook and even some of these could be within Whimble Boundary already.

This will greatly impact the villages rural setting and destroy the community feel with too many additional houses. It is fast becoming a suburb and losing it's village feel. Wildlife would also be destroyed if this goes ahead as planned. Should this extend into one of the historic orchards then it would also be destroying the history of the village and these orchards should be protected.

The roads are in no way adequate for such an increase either. The only route for people to access the shops, pubs and school would be down Church Road, and there are no pavements here and as such would increase dangers to pedestrians. The entrance to the village from the A30 has already seen an increase with traffic, including through traffic, and also has no paved area for pedestrians, with traffic travelling too fast. Increasing the amount of traffic to this extent would be plain dangerous.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The site has already been rejected from inclusion in the Local plan on three separate occasions.

The development would increase the risk of further and more regular flooding downstream of the plot. In recent years engineering of the banks of the stream passing Slewton Crescent has failed and needed to be replaced or repaired and recent flood events have been the worst in memory. Climate change will only increase the likelihood of flooding and increase the chance of properties being flooded/damaged and it is unlikely future developments will adequately mitigate flood risk.

The village access roads are not of sufficient width or quality to allow a safe increase in the volume of traffic. The village has suffered from speeding drivers (as evidence by the Parish Council introducing a speed watch) and drivers not driving with due care and attention through the centre of the village which lacks pavements. Being a rural area, horse riding, livestock movements and cyclists are common and would their safety would be put under threat by an increase in commuter traffic.

EDDC had previously designated the site as Land of Local Importance, which should not be built upon and should be used for activities which retain its open nature

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please

be as precise as possible.: The proposal doesn't take into account that current GP medical centres and the local school are at or near capacity and it is unlikely that these could be scaled up fast enough to keep pace with the rise in population.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to the above plan.

This site, Whim_08, was considered by EDDC Strategic Planning Committee on 1st October 2024 and took reports from professional planning officers who recommended that the site was NOT allocated for building. There were a number of sound reasons given, and at a public meeting held in Whimble where Planning Officers were in attendance they strongly denied that the site was a possibility for development. The building of some 50 houses would increase the identified risk of flooding, It is probable the the house owners would have private transport of at least one car per house. Whimble does not have the infrastructure to cope with even more cars entering and leaving Church Road, the main road into and out of the village. There are no suitable footpaths in the village, should those house owners decide to walk anywhere, it's already a dangerous place to walk without yet more traffic. More delivery / service vehicles would be in evidence exacerbating the problem. The site is part of the ' Green Wedge' between Whimble and Cranbrook which has already been ignored by EDDC ! This site is contrary to EDDC Emerging Local Plan Policy HN01.

Please advise me what has changed that has allowed this site to be now considered, apart from your arbitrary decision !

Full name: Sam Scotcher

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Whim_08 site is on a scale of development incompatible with spatial strategy. Furthermore, the site lacks safe and convenient pedestrian access to services and facilities in the village. The site also forms part of the 'Green Wedge' between Whimble and Cranbrook. This land forms an important part of the very attractive rural landscape setting for the settlement. It is also highly likely to have a negative impact on wildlife. Of great concern is the risk of flooding, and further work would be required to understand the nature and extent of the risk before consideration could be given to allocation. The decision to allocate this site went against the solid evidence provided by the professional Planning Officers report and recommendations, without any justification as to why the decision was made to partially allocate the site.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: As the decision to allocate Whim_08a was made without solid evidence provided by the Planning Officers report and recommendations, I do not believe that any modifications can make this a sound plan. Therefore, it should be removed from the EDDC Emerging Local Plan and the homes should be allocated elsewhere in the district (outside of Whimble Village), where there is appropriate infrastructure. It is my view that further work should be carried out on all of the sites by the professional Planning Officers before any allocation is made in Whimble.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Hannah Shaw

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I do not know what this means or where to find information about it, therefore I cannot agree that it is legally compliant.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I do not believe that Whimble can cope with a big increase in number of new homes due to the existing infrastructure and the lack of opportunity to be able to improve it. For example, the road through the village is narrow, with blind bends and houses on either side, preventing it from being widened. An increased number of cars, delivery vehicles as well the initial construction traffic, will make it dangerous to both drive and walk through Whimble.

Whimble Primary School has already expanded the buildings to meet pupil needs and even now, uses the Victory hall every day because of a lack of suitable hall space. Building 33 homes on Whim_11 (and the proposed 50 homes on Whim_08) will increase the number of pupils (and therefore the associated traffic to and from school)- how does the council plan to meet the needs of all these pupils?

I also do not believe that Whim_11 is a sound choice due to the flood risk and the associated risk to properties nearby. What will happen to existing homes if the stream floods further downstream near Sleuton Crescent?

Also, the loss of another green field is extremely disappointing, especially as there are thousands of homes that have, and are, still being built only a few miles from the village in Cranbrook.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Do not develop the site!

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: I do not believe that the best interests of the residents of Whimble have been considered. There is a lack of planning relating to how the infrastructure will cope with the additional homes and what will be implemented to improve or help the situation. The transport connections have also not been fully considered as although Whimble has a train station, there are limited stops and also no regular bus service into Exeter. The numbers of home proposed to be built in Whimble (83), far exceeds the housing needs of residents already living nearby (according to the Parish Council Housing Needs Survey). The environmental protection is lacking due to the flood risk and loss of natural environment.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I cannot comment on this as I do not know if this part is legally compliant as I do not know where to access information about it.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I do not believe that the plan has been positively prepared. I believe that Whim_08a is not a sound site for a housing development in the village for the following reasons:

- The Parish Council commissioned a housing needs survey and the results showed that at least 4 affordable homes may be needed within the next 5 years. Allocating 83 new homes to Whimble far exceeds the needs of the village. This is especially true considering that the new town of Cranbrook is only 4.5 miles away and 500 homes for that settlement actually fall within the boundary of the parish of Whimble, which therefore more than makes-up this need.
- Councillor Geoff Jung's reason for supporting the Whimble 08a site during the Strategic Planning Committee 1st October 2024, was that "We have allocated 35 homes for Whimble and it has a train station. How can I justify that to the residents that I represent and villages that are have taken far far more, I want to see some development at this site". This is not a sound reason to develop a particular site and illustrates that

the plan has not been positively prepared. I do not believe that the strategies and policies are justified and have not been based on solid evidence. Professional planning officers assessed Whim_08 and recommended that the site was not allocated for a number of reasons, see the bullet points below:

- The proposed site forms part of the green wedge between Cranbrook and Whimble.
- Whim_08a is an important part of the attractive rural landscape.
- There is a potential impact on wildlife.
- Part of the site is at risk of flooding.
- The scale of the development is not compatible with the special strategy.
- There is very limited safe pedestrian access to the facilities in the village.

Building upon the green wedge will lead to the possibility of settlement coalescence of Cranbrook with Whimble. This would result in the loss of the individual character of the village, as well as the loss of the surrounding countryside, which gives Whimble its unique identity. Also, it sets a precedent for further development in this area. The infrastructure of the village is not sufficient for the increase in number of homes: o

Whimble Primary School is not of a sufficient size for an increase in number of pupils. o Church Road is single track in many places, with very few pavements, making it unsafe for an increased number of children to be walking to and from school.

o Building homes at Whimble 08a will result in more traffic driving through the village to access the facilities. The roads are narrow and visibility poor in many places, making it dangerous. o Church Road near the school is frequently congested, due to families driving to school. o There is very limited parking elsewhere in the village.

Developing Whim_08a is not a sound and effective proposal. This is due to the many sustainability issues involving the lack of suitable infrastructure including a primary school which cannot cope with the influx of many more pupils, the narrow road with blind bends and the lack of pavements. There is also the issue of potential flood risk which could cause problems not only on the site but may also affect nearby properties that are currently unaffected. There is also the loss of green field and habitat, which will never be recoverable as well as the erosion of the green wedge, which is supposed to prevent development from spreading from one settlement to another. The National Planning Policy Framework, Identifying land for homes 72. states that planning policies should identify a supply of both a) sites for 5 years following the date of adoption and b) developable sites or broad locations for growth for years 6-15 of the remaining plan period. If 50 homes are built upon Whim_08a in the near future, I can fully imagine where the next quota of houses will be situated: on Whim_08a. This site is not sustainable and therefore not an effective and sound choice.

Although the Government have decided that a certain number of new homes must be built and allocated in East Devon, I do not believe that local priorities have been fully addressed. For example, the number of houses allocated far exceeds the needs that the Parish Council Housing Needs Survey identified. Furthermore, the Site Selection report states that: ‘Contribution to spatial strategy Whimble is a 'Tier 4' settlement, where the draft local plan seeks to promote limited development to meet local needs. The development of up to 180 dwellings on Whim_08a is considered to be excessively high in relation to the scale of the existing village.’

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Whim_08a should not be developed at all.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.:

- Transport connections: I do not believe that the full implications of the extra traffic that a development of 50 homes would create, have been fully considered. The main road to the village is single track in many places, with blind bends and buildings/gardens flanking the road, therefore widening the road is impossible. It cannot safely and sustainably support the increase in the traffic that a development of this size would create. Whimble is often promoted as having a train station, however, the service is not reliable and the number of stops reduced significantly after the creation of the train station at Cranbrook. Furthermore, being realistic, residents may drive to the train station, therefore putting the limited parking facilities under greater pressure.

- **Housing needs:** The Parish Council commissioned a housing needs survey and the results showed that at least 4 affordable homes may be needed within the next 5 years. Allocating 83 new homes to Whimble far exceeds the needs of the village. Also, when studying the numbers on the Regulation 19 Publication Draft, February 2025, Appendix 2 – Designated Neighbourhood Area Housing Requirement Figures Breakdown, states that Whimble has 500 homes allocated under the Adopted Cranbrook Plan Allocations. If these homes fall within the boundary of the parish of Whimble, then a further 83 homes is completely unnecessary. The nearby village of West Hill has only been allocated 64 homes and doesn't include any homes from Cranbrook encroaching the village.

- **Environmental protection:** Planning officers have already dismissed Whim_08a as being unsuitable in part due to the resulting loss of very attractive rural countryside and the potential impact on wildlife sites. The officers also highlighted concerns over potential flooding on the site. There has been no mention how building 50 homes here will affect the flood risk, not only to new homes but existing homes. Protecting the existing homes must be a priority, not only considering flooding but also from a visual, environmental pollution, light pollution and noise pollution perspective.

- **Infrastructure planning:** The infrastructure of the village is not sufficient for the increase in number of homes. There has been no communication of ways that the following issues could be rectified:

- o Whimble Primary School is not of a sufficient size for an increase in number of pupils. The school already relies daily on using the Victory Hall to be able to provide sufficiently for the current pupils. This in turn means that other users, cannot access and benefit from the hall.

- o The road through the village is single track in many places, with very few pavements. It is therefore not safe for an increased number of children to be walking to and from school (see photos)

- o Church road near the school already becomes congested, especially in the morning and at school collection time, but also during the daytime, as many cars remain parked along the road opposite the Hive all day. This, combined with the existing road usage of tractors, school buses, delivery drivers etc, make the idea of further increasing the vehicular and foot traffic a nonsensical notion. The Headteacher at Whimble Primary School has voiced concerns over safety regarding drop off and collection times and parking whilst doing so. This is a quote from a school newsletter dated 24.01.25: (also see attachment)

“PARKING: Due to the requirements of the start and end of the day, schools by their very nature end up causing congestion around them. It is important, particularly in villages with narrow roads, like Whimble, that we all do what we can together to help minimise the impact of this for the locals who live here. We have had reported a number of near misses with cars and children, particularly in the hall car park but also, from older children walking home. We want to keep all our children and families safe so it is up to you to help with this. How you can help: Reduce your speed - do not zoom across to park beside the road near to the school. Parents are asked not to park in the hall car park as this is for hall users and the doctors surgery. The Thirsty Farmer continues to support the school by allowing parents to park there - please do this with consideration for others. Be considerate of pedestrians - look around, especially when opening car doors.”

Building homes at Whimble 08a will result in more traffic driving through the village to access the facilities such as the school and the village stores. The roads are narrow and visibility poor in many places, making it dangerous for both pedestrians and drivers.

- o There is very limited parking in the village, with the Victory Hall car park often full, cars often parked extremely close to the roundabout near the Thirsty Farmer, the Square

often being full of parked cars and the car park off Webbers Close, also often full to capacity. (see photos attached)

o Sandfords doctor surgery is also quoted as a positive reason to increase the number of homes in the village. However, this is purely a different setting, manned by Coleridge Medical Centre in Ottery. I do not believe that it provides a greater number of appointments to users of the surgery and is also used by patients outside of the area, who drive in to the village, if they are offered an appointment here, instead of in Ottery. It is already difficult to receive the medical care that we are all entitled to and currently hard to get an appointment- Councillor Todd Olive implied as such as he put forward Whim_08a as a potential site. No doubt, any additional patients using the surgery will only increase the traffic and parking issues.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I wish to represent the voice of Whimple residents.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This comment relates to the whole paragraph. It argues that the Whimble 11 is NOT a sound site for development.

Positively prepared: As part of the work on the Whimble neighbourhood plan, the Parish Council commissioned a Housing Needs Survey. The Whimble Parish Housing Needs Report states ‘The survey identified a need for at least 4 affordable homes within the next 5 years.’ The allocation of 33 houses to Whim_11 is not consistent with the requirement established by the Parish Council. The counter argument to this is that the wider local plan needs to ‘consider how we might help neighbouring areas meet their needs too’. However, Whim_11 and the wider plan for Whimble seems to ignore the expansion of Cranbrook, the erosion of the Green Wedge between the two settlements, the allocation of 611 - 500 of which relate to Cranbrook expansion - to the Whimble Parish between now and 2042. In summary, I contest the requirement to develop in Whimble and, when considering the wider needs of the Local Plan, I argue that Whimble has more than its fair share of development planned within its Parish boundaries.

Justified: I believe Whimble 11 to not be a justified site for development because the site is not sustainable - a key justification point for the policy in paragraph 3.2. The sustainability issues are: it lacks safe pedestrian access to services and facilities; there is a stated 20% risk of flooding which must be fully analysed by the developers before building starts – this doesn’t consider the wider water run-off and impact on The Green which is an area of Whimble which consistently suffers from flooding; it will likely have an impact on unconfirmed wildlife sites.

Effective: The policy of aligning growth with infrastructure has clouded the judgement of the local plan because ‘on paper’ Whimble is an attractive potential Service Village with good facilities, services and infrastructure. When viewed against the mandate to build circa 20,000 homes in East Devon by 2042, I understand the appeal of allocating development to Whimble. However, the reality of living in Whimble is that access to the village from the A30 and throughout the settlement to the associated facilities, is already heavily limited – I would argue it is at capacity but have no hard evidence to back this up. Subjectively, it can take over 10 minutes to get out of the village at rush hour (normally a 4 minute drive) due to congestion at bottlenecks throughout the settlement. There is no opportunity to develop better access owing to immovable objects such as properties and the church. Based on this I argue that further development, and an increase in the population of Whimble, targeting the preexisting facilities, is unsound and unsustainable due to the limited access bandwidth. This doesn’t consider the impact, albeit temporary, during the construction phase of any new development which would be considerable. At the 1 November SPM it was also highlighted that no significant development had occurred in Whimble for around 20 years. Instead of assuming that this makes Whimble prime for development in the 2020 - 2042 Local Plan, I contend it reinforces my argument that Whimble 11 is an unsound site for development. Whilst I assume development in Whimble has previously been considered, it has been discounted for over 20 years. I suspect part of the reason for Whimble being rejected is because of the practicality issues associated with access to the settlement. In summary of this paragraph, development of Whimble 11 will further exacerbate the aforementioned issues, detract from the rural appeal of the village be dangerous because the infrastructure (roads, paths, parking) lack the bandwidth for further development.

Consistent with national policy: No comment.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Flooding risk and mitigation must be mandated in this chapter.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Transport connections. Access to Whimble is limited by bottlenecks caused by pre-existing infrastructure. This limits access to the village by large vehicles (construction vehicles, buses etc) and cars. An alternative is to use the pre-existing train station but again there is limited access to the facility by pedestrians (no continuous path connecting one side of the village to the other), cars (bottlenecks) and very limited parking throughout the village and at the train station itself.

Housing needs. As part of the work on the Whimble neighbourhood plan, the Parish Council commissioned a Housing Needs Survey. The Whimble Parish Housing Needs Report states 'The survey identified a need for at least 4 affordable homes within the next 5 years.' The 83 houses allocated to Whimble (Whim_08a and Whim_11) exceed the need highlighted by this survey.

Environmental protection. The Whim_11 site comes with a known flooding risk but does not consider the wider flooding issues downstream of the proposed site and which are already a notable issue in the village.

Infrastructure planning. The plan does not mandate appropriate improvements to the pre-existing supporting infrastructure (specifically improvements to roads and paths to alleviate access bottlenecks throughout the settlement). Practically, these would be difficult to incorporate given very limited opportunity to widen the bottlenecks through the village owing to pre-existing houses and the church. Flood protection for pre-existing properties must be mandated in the text.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Justin Shaw

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

This comment relates to the whole paragraph. It argues that the Whim_08a is NOT a sound site for development because it is at odds with the justification for the policy laid out in Chapter 3, the Spatial Strategy.

Positively prepared: At the 1 November 2024 SPM, when Whim_08a was allocated, there was clear pressure from Councillors to allocated new housing to Whimble because they wanted to justify wider their development decisions to the residents of their parishes. This undue pressure created a perceived need and urgency to allocated housing to Whimble in this Local Plan. Conversely, the decision did not consider the wider 611 houses allocated under the Whimble Designated Neighbourhood Area (page 37 of the Local Plan). Whilst the majority of these houses form part of the Cranbrook development in the vicinity of Cobden Lane, they are clearly stated as being in the Whimble Parish. Between the expansion plan of Cranbrook and the Whim_08a development there is an erosion of the Green Wedge and therefore increased risk of Whimble becoming consumed by Cranbrook in subsequent future development plans – again I would argue Whimble 08 is unsound based on this.

Justified: I believe Whim_08a to not be a justified site for development because the site is not sustainable - a key justification point for the policy in paragraph 3.2. This view was captured by the professional planning officers Site Selection Report, Whimble dated September 2024. They stated that the proposed 08 development (originally proposed as

180 homes) was: incompatible with the Spatial Strategy; lacked safe pedestrian access to services and facilities; encroached on part of the green wedge between Whimble and Cranbrook (an critical area required to maintain the identity of Whimble); proposed in an important part of the attractive rural landscape; likely to have an impact on unconfirmed wildlife sites; caused a potential risk of flooding and further survey work would be required on the site before being allocated. It was the recommendation of the report that the site should not be developed, nor should a reduced development be accepted. At the 1 October 2024 Strategic Planning Committee, Whim_08a was rejected as a site for development. With no new evidence presented, this decision was overturned at the 1 November 2024 Strategic Planning Meeting (SPM). This alone demonstrates that Whimble 08 is an unsound choice for development.

Effective: The policy of aligning growth with infrastructure has clouded the judgement of the local plan because ‘on paper’ Whimble is an attractive potential Service Village with good facilities, services and infrastructure. When viewed against the mandate to build circa 20,000 homes in East Devon by 2042, I understand the appeal of allocating development to Whimble. However, I believe this strategic pressure has created a pressure to allocate sites which have previously been discounted as being unfit for development – resulting in unsound decisions - and Whimble 08 is one of those sites. The reality of living in Whimble is that access to the village from the A30 and throughout the settlement to the associated facilities, is already heavily limited – I would argue it is at capacity but have no hard evidence to back this up. Subjectively, it can take over 10 minutes to get out of the village at rush hour (normally a 4 minute drive) due to congestion at bottlenecks throughout the settlement. There is no opportunity to develop better access owing to immovable objects such as properties and the church. Based on this I argue that further development, and an increase in the population of Whimble, targeting the pre-existing facilities, is unsound and unsustainable due to the limited access bandwidth. This doesn’t consider the impact, albeit temporary, during the construction phase of any new development which would be considerable. At the 1 November SPM it was also highlighted that no significant development had occurred in Whimble for around 20 years. Instead of assuming that this makes Whimble prime for development in the 2020 - 2042 Local Plan, I contend it reinforces my argument that Whim_08a is an unsound site for development. Whilst I assume development in Whimble has previously been considered, it has been discounted for over 20 years. I suspect part of the reason for Whimble being rejected is because of the practicality issues associated with access to the settlement. In summary of this paragraph, development of Whim_08a will further exacerbate the aforementioned issues, detract from the rural appeal of the village be dangerous because the infrastructure (roads, paths, parking) lack the bandwidth for further development.

Consistent with national policy: No comment.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I propose that Whim_08a be removed from the local plan. I don't believe it to be a sound proposal for the reasons highlighted in 3b. I am unable to propose an alternative site but based on my argument no sites in Whimble are appropriate.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Transport connections. Access to Whimble is limited by bottlenecks caused by pre-existing infrastructure. This limits access to the village by large vehicles (construction vehicles, buses etc) and cars. An alternative is to use the pre-existing train station but again there is limited access to the facility by pedestrians (no continuous path connecting one side of the village to the other), cars (bottlenecks) and very limited parking throughout the village and at the train station itself.

Housing needs. As part of the work on the Whimble neighbourhood plan, the Parish Council commissioned a Housing Needs Survey. The Whimble Parish Housing Needs Report states 'The survey identified a need for at least 4 affordable homes within the next 5 years.' The 83 houses allocated to Whimble (Whim_08a and Whim_11) exceed the need highlighted by this survey. Additionally, at the 1 November 2024 SPM, when Whimble 08 was allocated, there was clear pressure from Councillors to allocate new housing to Whimble because they wanted to justify wider their development decisions to the residents of their parishes. This undue pressure created a perceived need and urgency to allocate housing to Whimble in this Local Plan. Conversely, the decision did not consider the wider 611 houses allocated under the Whimble Designated Neighbourhood Area (page 37 of the Local Plan). Whilst the majority of these houses form part of the Cranbrook development in the vicinity of Cobden Lane, they are clearly stated as being in the Whimble Parish. Between the expansion plan of Cranbrook and

the Whimble 08 development there is an erosion of the Green Wedge and therefore increased risk of Whimble becoming consumed by Cranbrook in subsequent future development plans – again I would argue Whimble 08 is unsound based on this.

Environmental protection. The professional planning officers site survey report (September 2024) of Whim_08a did not recommend the site for development with flooding concerns being raised.

Infrastructure planning. The plan does not mandate appropriate improvements to the pre-existing supporting infrastructure (specifically improvements to roads and paths to alleviate access bottlenecks throughout the settlement). Practically, these would be difficult to incorporate given very limited opportunity to widen the bottlenecks through the village owing to pre-existing houses and the church.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: christopher shell

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The land in Station Road Whim 11 is unsuitable for housing development for a large number of reasons. Part of the field is a flood plain and the field in general is permeable land acting as a sponge during the increasingly heavy rainfall that we are experiencing. If it is built upon the rainfall will add further to the already existing floodplain and floodwater will flow to the area of Whimple that has already suffered severe flooding in the past. There is also the risk of floodwater mixing with sewage further downstream which will eventually enter the Exe estuary with all the environmental issues that will be created as a result. The field also has numerous mature trees that have tree preservation orders placed upon them. There is an abundance of wildlife in and around the field including bats, owls, woodpeckers, field mice and no doubt other species that need protection. The proposed development of 33 houses would be completely out of character with the existing nearby houses which includes a grade 2 listed house and a number of detached houses. Incongruous development would damage this field which is a delightful hay meadow. Planning permission for Whim 11 has already been refused on at least two previous occasions and is precisely the reason why we purchased the house as we have open views across the field from the rear of our home.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: No further housing development should take place in Whimple.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The access through Whimple is narrow and unsuitable for an increase in traffic that any future development would bring. There are no pavements in a large area of the village.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: No further developments in Whimple.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Housing development has already been refused three times for Whim 11. That status should remain.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Diane Shell

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: This field was not developed by Bovis homes 28 years ago as planning permission was refused on the grounds of green site in Whimple. Farmers who rented the land and later bought it from Allied Domecq on the understanding that it would be for agricultural use.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: This land should remain a green site, considering flood issues, preservation orders on the trees and wild life habitats. This small piece of land could not possibly contain 33 homes and potentially 66 cars plus pavement and roads.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This land is not sound due to flooding issues not only for near by properties but also properties in The Green at lower levels within the village.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: This land should not

be modified but remain green site to prevent flooding issues in the village and protect wildlife and preserved trees and hedges.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: No development plans have been sent to neighbouring properties most affected by housing that could cause flooding to their properties and light pollution. My property which is next to the field and built at a lower level to the field after heavy rain causes water logged lawn and pooling of water in patio area. If 33 properties were built this could cause water to enter the house.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Michael and Tamara Snell

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: With reference to the above Plan and particularly to Station Road Whimble which is referred to as Whim_11 (land at Station Road), we have the following observations:

1. We thoroughly endorse the comments submitted by Whimble Parish Council.

2. In the last few months the stream which runs along one boundary of the proposed site has flooded over ten times. It is already a flood risk and more property close by will add to it, particularly at the bottom of Slewton Crescent. Our boundary wall faces the stream and we have first hand knowledge of just how frequently it breaks its banks. Doubtless, climate change with increased rainfall will add to what is already a serious problem.

3. The entry and exit has already been discussed in our Parish Council paper. Additionally we wish to reiterate the danger to pedestrians, wheelchair users and parents with prams as there is no pavement nearby. This applies throughout the village and any increasing vehicular traffic will obviously increase road safety problems.

4. Why doesn't EDDC respond to clarifications, changes or any questions?

5. We feel that the planners appear to overlook historical events, investigations, and existing regulations to suit the needs of fulfilling overall housing requirements. For instance, tree preservation and land of local importance, etc.

We consider that this project should be abandoned.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I

find it crucial to express my serious concerns pertaining to the East Devon District Council's (EDDC) proposed Emerging Local Scheme, notably policy SD29 and the intended assignment of the Whim_08a plot (Land located to the west of Bramley Gardens). It's my firm belief this assignment is unsound, demonstrating a lack of credible rationale. This unsound assignment threatens the well-being of our community and the integrity of the planning process. The EDDC Strategic Planning Body conducted a review of the Whimble Site Selection Document during a session on October 1, 2024. During this session, seasoned planning personnel offered their detailed analysis of potential locales within Whimble. Drawing from their expertise and reliable evidence, they advised against assigning the Whim_08 location. The planning personnel, with their professional expertise, provided a clear and reasoned recommendation. The personnel's advice against assignment arose from several key elements, each of which requires careful consideration: ? The extent of development clashes with the spatial scheme in place for Whimble. The spatial scheme for Whimble designates limited development to meet local needs. The proposed development at Whim_08a far surpasses this limitation, posing a threat to the village's infrastructure and resources. This conflict with the spatial scheme should not be ignored. ? The site lacks safe and convenient pedestrian entry to essential amenities and resources in the village. The safety of residents, including vulnerable groups, must be a priority. Developing Whim_08a would force residents to use roads lacking adequate pedestrian facilities, creating a dangerous situation. This lack of safe access directly contradicts the Council's stated goals for promoting sustainable transport. ? The site is part of the designated 'Green Band' situated between Whimble and Cranbrook. Green Bands are vital for preserving the unique identity of settlements and preventing urban sprawl. Developing Whim_08a would result in the loss of important green space and the coalescence of Whimble and Cranbrook, an undesirable planning outcome. This would significantly impact the rural character of our area. ? It forms a vital component of

the attractive rural backdrop for the settlement. The rural landscape surrounding Whimble is a valuable asset, contributing to the quality of life and the village's appeal. Development at Whimble_08a would damage this landscape, diminishing the village's unique charm and setting. A potential impact exists on an unverified wildlife habitat. The Whimble_08a site is home to diverse wildlife. Development could have devastating consequences for local ecosystems. Comprehensive ecological surveys are essential before any development decisions are made. Protecting our natural heritage should be a primary concern. A section of the land carries a risk of flooding, necessitating further work to ascertain the nature and scope of the risk. Flood risk is a serious issue, and development in flood-prone areas can have severe repercussions. It is unacceptable to proceed without a thorough understanding of flood risks and robust mitigation plans. It's important to note that during earlier public consultations, planning personnel organized a public gathering at Victory Hall in Whimble. At that event, this specific site was never deemed appropriate for development. Indeed, when local inhabitants inquired, the personnel present issued firm denials of its possibility. This inconsistency raises concerns about the reliability of the consultation process. Initially, at the October 1, 2024, meeting, the Strategic Planning Body sided with the personnel's advice and voted against assigning the site. However, I was both surprised and disappointed when, at the subsequent November 1, 2024, meeting, the body reversed its decision and chose to assign a portion of the site, acting contrary to the personnel's guidance. This reversal of the decision is deeply troubling and raises questions about the factors influencing the committee. To this day, no justification or reason has emerged explaining why this site was favored over other sites in Whimble or East Devon. Furthermore, it seems no additional work was completed by personnel to evaluate the potential hazards tied to this site before its assignment. This lack of transparency and evidence-based decision-making is unacceptable. This determination gives the impression the Strategic Planning Body made a hasty choice to allocate additional dwellings throughout the district, without fully considering a carefully constructed proposal or sound reasons based on evidence and facts. Such an approach undermines careful planning and disregards the legitimate concerns of the local community. The site assignment report itself directly posed the question, "If the entire site lacks suitability for assignment, could a smaller section be assigned?" The qualified planning personnel responded with a firm "No." This clear response should have been decisive. Therefore, similar to Whimble Parish Council, I challenge the soundness of any assignment of this site, whether in full or part. Let's revisit the personnel's reasons for advising against assignment, examining them closely, to ensure the Council fully understands the implications of its decision.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I

feel it necessary to communicate my deep misgivings concerning the East Devon District Council's (EDDC) proposed Emerging Local Plan, most notably policy SD29 and the suggested designation of the Whim_08a tract (Land situated to Bramley Gardens' west). It is my conviction that this designation is fundamentally flawed and lacks a base in sound reasoning. This flawed designation has the potential to cause lasting harm to our community and the surrounding environment. The EDDC Strategic Planning Committee undertook deliberations on the Whimple Site Selection Report during a meeting held on October 1, 2024. During these deliberations, expert planning officials presented their considered evaluations of potential sites within Whimple. Relying on their professional competence and robust evidence, they advised against the designation of the Whim_08 site. These officials, with their specialized knowledge, provided a clear and well-supported recommendation. The officials' counsel against designation was grounded in several vital factors, each of which deserves careful consideration: ? The scale of the intended development is incompatible with the established spatial strategy guiding Whimple. The spatial strategy for Whimple dictates limited development, focused on meeting local needs. The proposed development at Whim_08a far exceeds this limitation, threatening to overwhelm the village's infrastructure and resources. This incompatibility represents a direct contradiction of the planning strategy. ? The site is deficient when it comes to safe and convenient pedestrian access to essential village services and amenities. Pedestrian safety is of paramount importance. The development of Whim_08a would necessitate residents traversing roads that lack adequate pedestrian facilities, posing a significant risk, particularly to vulnerable individuals. This deficiency directly conflicts with the Council's stated aims to promote sustainable transportation options. ? The site itself forms a segment of the designated 'Green Wedge' positioned between Whimple and Cranbrook. Green Wedges play a crucial role in preserving the distinct identity of settlements and preventing uncontrolled urban expansion. Developing Whim_08a would lead to the loss of valuable green space and the merging of Whimple and Cranbrook, an undesirable planning outcome. This would irrevocably alter the character

of the area. ? It constitutes an important part of the attractive rural landscape that provides a setting for the settlement. The rural landscape surrounding Whimble is a valuable asset, contributing significantly to the quality of life for residents and the overall appeal of the village. Developing Whim_08a would result in the degradation of this landscape, diminishing the village's unique charm. ? There is a potential impact that could affect an unconfirmed wildlife site. The Whim_08a site provides habitat for diverse wildlife. Development could have detrimental effects on local biodiversity. Comprehensive ecological surveys are essential before any development decisions are made. The protection of our natural heritage must be a priority. ? A portion of the site carries a risk of flooding, and further investigative work is required to fully comprehend the nature and scope of this risk. Flood risk poses a significant threat, and development in flood-prone areas can have devastating consequences for communities. It is unacceptable to proceed with development without a thorough understanding of the flood risks and the implementation of robust mitigation measures. It warrants mentioning that during earlier public consultations, planning officials hosted a public event at the Victory Hall within Whimble. At this event, this particular site was never entertained as being appropriate for development. In fact, when local residents posed questions about it, the officials present issued strong denials about its potential. This inconsistency undermines the credibility of the consultation process. Initially, on October 1, 2024, the Strategic Planning Committee concurred with the officials' recommendation and voted against allocating the site. However, I was both surprised and disappointed when, at the subsequent meeting on November 1, 2024, the committee reversed its stance and decided to allocate a part of the site, acting in direct opposition to the officials' advice. This reversal of the decision raises serious concerns about the committee's decision-making process and the factors that influenced the change in position. To this day, no justification or sound reasoning has been provided to explain why this site was preferred over other sites in Whimble or the wider East Devon area. Furthermore, it appears that officers did not complete any additional work to properly assess the risks linked to this site before its allocation. This lack of transparency and the absence of evidence-based justification are deeply concerning. This decision creates the distinct impression of the Strategic Planning Committee making a hasty decision to allocate more housing across the district, without adequately considering a carefully developed proposal or robust justification supported by evidence and facts. Such an approach disregards the importance of careful planning and the legitimate concerns of the local community. The site allocation report itself directly addressed the question, "If the whole site lacks suitability for allocation, could a smaller part be allocated?" The professional planning officials provided a firm "No" in response. This decisive response should have been the determining factor. Therefore, much like Whimble Parish Council, I challenge the soundness of any allocation of this site, whether it be full or partial. Let us now revisit the officials' reasons for

recommending against allocation, examining them in detail, to ensure that the Council fully appreciates the implications of their decision.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am compelled to register my serious reservations regarding the East Devon District Council's (EDDC) proposed Emerging Local Framework, specifically policy SD29 and the intended designation of the Whim_08a parcel (Land situated to the west of Bramley Gardens). It is my firm belief that this designation lacks a solid foundation and is, therefore, unsound. This lack of soundness not only undermines the credibility of the Local Framework but also threatens the very fabric of our community. The EDDC Strategic Planning Committee undertook a review of the Whimple Site Selection Document during their meeting on October 1, 2024. During this review, professional planning officers presented their considered analysis of potential locations within Whimple. Drawing upon their experience and substantiated evidence, they advised against the allocation of the Whim_08 location. Their professional assessment, based on years of expertise, was clear and unequivocal. Their recommendation to reject this allocation was based upon several key factors, each of which carries significant weight and deserves meticulous consideration: The scope of the proposed development is incompatible with the established spatial strategy for Whimple. Our village is designated within the spatial strategy for limited development, focused on meeting local needs. The proposed scale of development at Whim_08a far exceeds what can be considered "limited" and would place an unsustainable burden on our existing infrastructure and community resources. This incompatibility not only disregards the strategic vision for the area but also risks overwhelming the village's character. The location is deficient in safe and convenient pedestrian access to essential services and facilities within the village. The safety of our residents, especially vulnerable groups such as children and the elderly, is paramount. Developing Whim_08a would force residents to navigate narrow, often dangerous roads without adequate pedestrian provisions. This lack of safe access directly contradicts the Council's objectives to promote sustainable transport and healthy lifestyles. The site constitutes a portion of the designated 'Green Wedge' that lies between Whimple and Cranbrook. Green Wedges are crucial for maintaining the distinct identity of settlements and preventing urban sprawl. Developing Whim_08a would erode this vital green space, leading to the

coalescence of Whimble and Cranbrook, a planning outcome that should be avoided at all costs. This would have a detrimental impact on the rural character of our area. It represents an integral component of the visually appealing rural landscape that forms the setting for our settlement. The beauty of our natural environment is not merely aesthetic; it contributes significantly to the quality of life for residents and the attractiveness of our village. Developing Whim_08a would scar this landscape, diminishing the unique character and setting of Whimble. There exists a potential impact upon an unconfirmed wildlife site. It is imperative that we protect our natural heritage and biodiversity. The Whim_08a site is known to harbor a variety of wildlife, and development could have devastating consequences for local ecosystems. Further ecological surveys are essential before any development decisions are made. A section of the land is vulnerable to flooding, necessitating further investigation to ascertain the nature and extent of the associated risk. Flood risk is a serious concern, and development in areas prone to flooding can have severe consequences for both residents and property. It is unacceptable to proceed with development without a comprehensive understanding of the flood risks and appropriate mitigation measures. It is important to recall that during earlier public engagement, planning officers conducted a public forum at Victory Hall within Whimble. During that event, this specific site was never entertained as a suitable option for development. Indeed, when local residents raised direct inquiries, the officers in attendance explicitly denied its potential consideration. This inconsistency in the Council's position is deeply troubling. Initially, at the meeting held on October 1, 2024, the Strategic Planning Committee aligned themselves with the officers' professional recommendation and voted against the allocation of the site. However, I was greatly surprised and disappointed when, at the subsequent meeting on November 1, 2024, the committee executed a complete reversal and decided to allocate a portion of the site, thereby contradicting the officers' considered advice. This abrupt about-face raises serious questions about the decision-making process and the factors influencing the committee's change of heart. Regrettably, no clear justification or rationale has been provided to explain why this particular site was favored over alternative sites, either within Whimble itself or the wider East Devon area. Furthermore, it appears that no supplementary work has been undertaken by officers to thoroughly assess the potential risks linked to this site prior to its allocation. This lack of transparency and evidence-based decision-making is unacceptable. This decision gives the distinct impression that the Strategic Planning Committee has acted with undue haste in their perceived need to allocate additional housing throughout the district, without affording appropriate consideration to a fully developed proposal or sound justifications rooted in evidence and factual data. This approach not only undermines the integrity of the planning process but also disregards the legitimate concerns of the local community. The site allocation report itself explicitly addressed the query: "If the whole site is not suitable for allocation, could a smaller part be allocated?" The considered response from the professional planning

officers was an unequivocal "No." This clear and definitive statement should have served as the final word on the matter. Consequently, I, in alignment with Whimble Parish Council, challenge the very soundness of any allocation pertaining to this site, whether in its entirety or only partially. Let us now revisit the officers' stated reasons for recommending against the allocation, and examine these in greater detail, ensuring that the Council fully understands the implications of their decision.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I'm writing to strongly object to the housing going up in winter gardens.

We have lived at little Loxbrook farm (Ex53bn) since 2012 , our business is having horses on livery and breaking (baby horses) and schooling problem horses. when we first arrived the country lanes were quiet with traffic but slowly as Cranbrook went up turned dangerous for the horses and people.

We have had extreme accidents resulting in hospital stays and on one occasion a horse loosing its life at a later date due to injury from dangerous driving. I can confirm that horse and riders are MEANT to be the most protected on the roads?

We personally are always polite and move on to a safe place as soon as we can for road users and thank them for their patience , never rude or ignorant keeping their time longer than needed.

We have been run off the road by angry drivers and tailed by drivers that come back to make fun when the horses are spooked.

Are you trying to get rid of local businesses?

Or have someone seriously hurt (which they have been) or even worse killed?

I've seen walkers/ cyclists/ riders / wheel chair users nearly run over / abused/ shouted at and physically hit by the drivers which seem to be extremely angry!

The sewage is a massive problem constantly having to be pumped out and won't cope with more houses as can't now!

The flooding is horrendous (all pictures/ videos attached)

What about the wildlife?

What are you going to do about all of this?

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: My assumption is that it is compliant.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The part of Chapter 5 is not sound. In October 2024, the professional judgement of the planning officers was that the site was NOT recommended for the following reasons which REMAIN VALID: (1) the scale of the development is incompatible with the spatial strategy; (2) the site lacks safe and convenient pedestrian access to services and facilities in the village; (3) the site forms part of the 'Green Wedge' between Whimble and Cranbrook; (4) the site forms an important part of the very attractive rural landscape setting for the settlement; (5) the potential impact on unconfirmed wildlife site; (6) part of the site is at risk of flooding and needs more detailed consideration before it is given to allocation. All six of these are of concern but especially the fact that the development goes against the spatial strategy and far exceeds the local needs – by 45 times – the assessed local need is for 4 affordable homes. As a resident of Bramley Gardens I am especially concerned that the impact of the development on the wildlife on this site which is home to bats, owls, woodpeckers, deer and badgers. There is also a flood risk which needs further assessment. However, my greatest concern is that this development is within the green wedge and its development would lead to settlement coalescence between Whimble and Cranbrook. This goes against EDDC Emerging Local Plan Policy OL05.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The allocation of this site goes against the professional judgement of the Planning officers. The development would be better placed elsewhere in Whimple or in Cranbrook or elsewhere where there is appropriate infrastructure for example, the Cobdens expansion of Cranbrook and also, the site east of Church Road close to the established infrastructure near the Hand and Pen.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: My assumption is that it is compliant.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

The development would be better placed elsewhere in Whimble or in Cranbrook or elsewhere where there is appropriate infrastructure – especially with respect to roads/ footpaths – for example, the Cobdens expansion of Cranbrook and also, the site east of Church Road close to the established infrastructure near the Hand and Pen.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: My assumption is that it is compliant.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Paul Ashley Waite

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We fully endorse the Whimble Parish Council response to these proposals on the grounds of soundness. In addition to the points made by the Parish Council, we would also like to add the following: 1/ Pedestrian access: this will not only impact on the residents of the proposed new properties, but will also significantly increase the risks to all pedestrians due to the extra volume of traffic that will be generated within the village. 2/ Parking: the proposed development of 50 houses will likely require space for 75+ additional vehicles. Unless there is specific allocation within the development itself, there is no obvious space for these additional vehicles within the village. 3/ There will presumably be an increase in demand for bus services into Exeter. These can only be accessed at Hand and Pen and requires about a mile walk along a narrow, winding, unlit, and un-paved stretch of Church Road. This is unsafe. 4/ We live in Webbers Close which is to the north of the proposed development and sits at a lower level than the proposed site, adjacent to the stream. This area has previously been identified as a potential flood risk, so the construction of 50 dwellings above the level of Webbers Close would likely increase this risk.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We again endorse

Whimble Parish Council's response to this question. The main improvements required to address our additional issues would be improved pedestrian facilities on Church Road, including paving and lighting, additional parking facilities, potentially as part of the new development, e.g. additional village car park, bus routes extended into Whimble Village and reassurances of measures proposed to alleviate the raised risk of flooding to Webbers Close.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Neal Ward

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: This site sits on a green wedge that is within the current adopted local plan. I was not pointed out at consultation stage that proposed site Whimple 08 was on the agreed Green Wedge. This Green Wedge was put in place to prevent coalescence between Whimple and Cranbrook. Allowing development on Green Wedges contravenes the current adopted plan and NPPF section 13. The area of this Green Wedge has also been altered without any consultation.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Whimple 08 should not and should never have been considered due to it being on a Green Wedge. It should have been refused at the first site investigation part of the consultation, however at that point the officers dealing with this seemed unaware of the Green Wedge. It goes against the the current adopted local plan and the legislation protecting same. It also contravenes the NPPF.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site on agreed Green Wedge and other parts of the Green Wedge have been altered without any consultation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Whimble 08 as a site for future Development.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The council have totally ignored the large amount of public concern re developing on the Green Wedge. They have also ignored the current adopted plan and its contents re developing on Green Wedges. A/ Development on a green wedge would start the coalescence of Whimble to Cranbrook and once the precedence is set there is nothing stopping the rest of the green wedge being developed on. Contravenes Strategy 7/8 re coalescence in current local plan 2013 to 2031. Policy 78 Green Wedges, page 243 proposed local plan. B/ Removal of the historic orchard and destruction of natural habitat contravenes Strategy 47 and policies D1, D2, D3, ENG of the current local plan 2013 to 2031. It also contravenes the proposed local plan policies 84,85 & 86.

Based on the above supportive and significant evidence I request that site Whim_08 is removed from the proposed local plan and in no way included in the adopted plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Sally Elizabeth Wilde

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: I

wish to object to the following part of the EDDC Emerging Local Plan Consultation is, as follows: I am challenging policy SD29: Strategic Allocations in Whimble, particularly to the allocation of Whim_08a (Land west of Bramley Gardens) site in the EDDC Emerging Local Plan. The objection is on the grounds of soundness in that the allocation and policy is not based on solid evidence. The EDDC Strategic Planning Committee considered the Whimble Site Selection Report at a meeting on 1 October 2024. Professional planning officers identified and assessed the potential sites in Whimble and using their professional judgement, backed up with sound evidence recommended to Members whether to allocate the site or not. In the case of Whim_08 site, officers recommended that the site was not allocated for the following reasons:

- Scale of development incompatible with spatial strategy.
- Site lacks safe and convenient pedestrian access to services and facilities in the village.
- The site forms part of the 'Green Wedge' between Whimble and Cranbrook.
- Forms an important part of the very attractive rural landscape setting for the settlement.
- Potential impact on unconfirmed wildlife site.
- Part of is at risk of flooding and further work would be required to understand the nature and extent of the risk before consideration could be given to allocation. In the earlier phases on consultation, Planning Officers held a Public Consultation event at the Victory Hall, Whimble. This site was never considered as being appropriate for development at that event and, in fact, when local residents asked the question, the Officers in attendance vehemently denied that it was a possibility for consideration. At the meeting on 1 October 2024, Members of the committee voted to go with the officer

recommendation and not allocate the site. However, at the Strategic Planning Committee meeting on 1 November 2024 Members did a complete u turn and decided to allocate part of the site, contrary to Officer recommendation. There was no justification or reason given as to why this site was picked above any others in Whimble or other sites in the east Devon area. Also no additional work appears to have been completed by officers to assess the risks relating to this site before allocating it. This gives the appearance of the Strategic Planning Committee having a knee jerk reaction to needing to allocate additional houses across the district without considering a fully worked up proposal or sound justification (based on evidence and facts), as to why the site should be allocated (partially or otherwise). This site allocation report also considers 'If whole site is not suitable for allocation, could a smaller part be allocated?' The view of the professional planning officers was 'No'. Again, this leads me to challenge the soundness of any allocation of this site, whether full or partial. Taking the list of reasons drawn up by officers as to why the site should not be allocated, I would like to make the following comments: Scale of development incompatible with spatial strategy. Policy SP01: Spatial Strategy section E states 'Allowing limited development at the Service Villages of Beer, Branscombe, Broadhembury, Chardstock, Clyst St Mary, Dunkeswell, East Budleigh, Exton, Feniton, Hawkchurch, Kilmington, Musbury, Newton Poppleford, Otterton, Payhembury, Plymtree, Sidbury, Stoke Canon, Tipton St John, Uplyme, Westclyst, West Hill and Whimble.' The EDDC Site Allocation Report for Whimble states 'Whimble is a is a 'Tier 4' settlement, where the draft local pan seeks to promote limited development to meet local needs. The development of up to 180 dwellings on Whim_08 is considered to be excessively high in relation to the scale of the existing village. As part of the work on the Whimble Neighbourhood Plan, our Parish Council commissioned a Housing Needs Survey. The Whimble Parish Housing Needs Report states 'The survey identified a need for at least 4 affordable homes within the next 5 years.' I do not class a total allocation of 83 homes in Whimble to be 'limited development' (Whim_11 total of 33 homes; Whim_08a total of 50 homes), especially when the Whimble Housing Needs Report lists a significantly lower figure. I also suggest that the allocation is not sound as it is contrary to EDDC Emerging Local Plan Policy HN01: Housing to address needs, which states 'This will be achieved by providing an appropriate mix of decent, good quality homes which meet identified needs for housing as identified in a neighbourhood plan, local needs assessment or other evidence document over the plan period, at locations consistent with the settlement hierarchy and the spatial strategy.' In addition to this, there are developments planned in neighbouring areas e.g. Cranbrook. This includes the current Cobdens Expansion of Cranbrook, part of which is still in the Whimble Parish Area, where 1500 houses, a school and a travellers site have already been approved by the Strategic Planning Committee. These sites have a far better infrastructure than Whimble Village so why has the additional housing requirement not been allocated at these sites? Site lacks safe and convenient pedestrian access to services and facilities in the village. Access to

the site and potential development would be through Bramley Gardens and onto Church Road. Church Road is the main route into the Village and is a narrow and dangerous road. The section of Church Road nearest to the Square and village shop is single track road with houses either side of the road. There is no pavement along the stretch of Church Road to The Square and School Hill. Whimble Parish Council and Villagers have raised concerns about the volume and speed of traffic on that road. There is so much concern about the volume and speed of traffic along Church Road that Whimble Parish Council has convened a Community Speed Watch Group to monitor the traffic and speed along that road. The Police confirmed that Church Road is not recommended as a safe route to the Primary School, Village shop, church or railway station. To access the village shop in the Square and the Primary School in School Hill villagers would have to walk down Church Road which has no pavements. Therefore, there is no safe and convenient pedestrian access to services and facilities in the village. To ensure safety most people would probably use their car or vehicle to access the village shop or primary school. This is not sustainable and surely would be against EDDC Emerging Local Plan Policy TR01: prioritising walking, wheeling, cycling and public transport and is also contrary to the EDDC Climate Change aspirations. The site forms part of the 'Green Wedge' between Whimble and Cranbrook. The EDDC Emerging Local Plan Policy OL05: Green Wedges states 'Within green wedges, as defined on the Policies Map, development will not be permitted if it would add to existing sporadic or isolated development, damage the individual character or identity of a settlement, or could lead to or encourage settlement coalescence, whether physical, visual, or intrinsic.' I challenge the soundness of the proposed allocation, due to the Green Wedge. The Allocation of this site would potentially damage the individual character or identity of Whimble. This site forms an important part of the very attractive rural landscape setting for the settlement. This would also lead to settlement coalescence between Whimble and Cranbrook, which is a material planning issue, and clearly demonstrates that this site should not be allocated in the Local Plan. This was the view of the EDDC professional Planning Officers. Potential impact on unconfirmed wildlife site. This a wildlife site which is home to bats, owls, woodpeckers, deer and badgers. Any development of this site would be contrary to EDDC Emerging Local Plan Policy PB03: protection of irreplaceable habitats and important features. Part of is at risk of flooding and further work would be required to understand the nature and extent of the risk before consideration could be given to allocation. There is no evidence to suggest that officers have carried out further work relating to the flood risk before consideration was given to a partial allocation. Therefore, I suggest that there is no sound evidence for allocating this site in the EDDC Emerging Local Plan and that it is contrary to Policy AR01: Flooding. Other comments The residents in Whimble have not said that they are against development. But the issue is the size and location of the development. It is my view that development would be better placed in Cranbrook or elsewhere in the district where there is appropriate infrastructure. As set out earlier there is no sound

justification as to why the Strategic Planning Committee decided to go against the professional judgement of the Planning Officers and allocated this site in the Emerging Local Plan. Also, in terms of soundness, the Strategic Planning Committee does not appear to have fully considered a number of other options that could have been chosen. I believe Whimble Parish Council is looking at Site Allocations as part of the evidence base for its Neighbourhood Plan. The Parish Council is considering a number of sites, which are: Whim_03 Land to the south of Grove Road Whim_07 Land south of Broadclyst Road Whim_13 Land north side of Grove Road Whim_18 Land to the east of Church Road Whim_20 Land to the north of Plumtree Lane My preference would be that a site is allocated to the east of Church Road so that it is nearer to the established infrastructure near the Hand and Pen. It is appreciated that there are constraints to these sites but I challenge that there are constraints with site Whim_08a, hence why the EDDC professional Planning Officers recommended that the site was not allocated. It is my view that further work should be carried out on all of the sites by the professional Planning Officers before any allocation is made in Whimble. Summary I believe that Policy SD29: Strategic Allocations for Whimble, specifically site Whim_08a is not sound, as the decision to allocate this site went against the solid evidence provided by the professional Planning Officers report and recommendations, without any justification as to why the decision was made to partially allocate the site. Therefore I demand to see the modification of site Whim_08a being removed from the EDDC Emerging Local Plan and the homes being allocated elsewhere in the district (outside of Whimble Village), where there is appropriate infrastructure.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: For the land at Whim11 at Station Rd, it is suggested that it will be possible to extend a footpath behind the hedgerow, coming out opposite The Withey. This would not be possible as the land opposite The Withey entrance belongs to Slewton House, which I own, and is not available for sale or development. This would mean that any idea of extending a footway along adjacent to Talaton Rd as far as The Withey entrance would not be a possible outcome of any development.

In addition, for both developments in Whimble the number of proposed houses is too great for the village. Most of the roads are single track and extra traffic would pose a danger to pedestrians and gridlock along the narrow roads.

Both sites are precious for wildlife and vital for the habitat of rare species. Once built upon they would be lost forever, permanently putting further pressure on vanishing insect life, birds and mammals.

Both sites are precious to the villagers. One is the old cricket pitch and the other an ancient orchard. They are historically important and no one wants extra houses on either site.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The suggestion of a footpath at the Whim11 site should be removed as it is not possible . Any idea of a a footpath being an advantage to the village is erroneous.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Andrea Young

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: Yes but I do not agree with the proposal

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Both proposed developments in Whimble would put extreme pressure on the village. There is a single track road which is the direct route between the two sides of the railway line. There is only pavement in parts and the village school is on the route. Additional traffic on the road would lead to gridlock and danger to pedestrians.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Whilst I appreciate the pressures from central government, further development in Whimble is inappropriate. The roads are too narrow for flow of traffic with the main route north/south along Church Rd, Broadway, School Hill being largely single track with a blind bend by the church, with no continuous pavement. It would be very unsafe to introduce additional vehicles and an increase of 83 houses within the village would lead to hundreds of new vehicle movements a day, leading to gridlock and accidents on roads not designed to cope with traffic.

Both sites are havens for wildlife. Both are hunting grounds for the large population of owls, woodpeckers, tree creepers and other birds which nest in the trees nearby and in the TPO trees. Bats are also present at both sites. The eco systems are extremely precious and once lost would be gone forever, leading to collapse of local populations of protected species. The locals do not support this.

There are flooding problems already within the village. Cranny Brook floods in heavy rain and additional areas of tarmac would exacerbate the problems. As climate change takes place things will become worse without additional stress on lower areas of the village, which risk flooded homes and danger to life in floodwaters.

The local infrastructure is inadequate for these levels of development. We have an inadequate sewerage system already cannot cope in high rainfall. The roads are unsuitable and additional traffic will lead to accidents. A pleasant village would be ruined.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove the proposed development areas Whim011 and Whim08 as the village cannot support such large development without danger to life and an ecological crisis.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Both sites in Whimble have already been considered by planning officers as being unsuitable for development. The parish council does not support this. The locals do not agree. The planning authority is not taking into account local wishes.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Organisation (where relevant): Whimble Parish Council

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Whimble Parish Council is responding to, and challenging policy SD29: Strategic Allocations in Whimble, particularly to the allocation of Whim_11 (Land at Station Road) site in the EDDC Emerging Local Plan.

The objection is on the grounds of soundness in that the allocation and policy is not based on solid evidence.

The EDDC Strategic Planning Committee considered the Whimble Site Selection Report at a meeting on 1 October 2024.

Professional planning officers identified and assessed the potential sites in Whimble and using their professional judgement, backed up with sound evidence recommended to Members whether to allocate the site or not.

In the case of Whim_11, Planning Officers recommended that the site be allocated for the following reason:

‘The site is considered to be the best option for accommodating an appropriate scale of development for Whimble. It is well related to the exiting settlement pattern and benefits from relatively good pedestrian access to facilities in the village centre. Although the northern part of the site is at risk of flooding, there is potential for the development of around 30 dwellings on the remainder of the site.’

Representatives from Whimble Parish Council were not able to attend the Strategic Planning Committee on 1 October 2024, but instead submitted a statement, which was read out by a Democratic Services Officer.

The Whim_11 site in Station Road (which is also known locally as the old cricket ground) has been put forward for development several times before when East Devon District Council (EDDC) have called for sites. In the 1995, 1999 and 2015 Local Plans the proposed site was rejected on several legitimate planning grounds and the site was not allocated in the Local Plan.

The Parish Council asked the Strategic Planning Committee to give an explanation as to what has changed since this site was previously rejected that now makes it suitable for allocation. To date, no response has been received from EDDC.

Trees and Wildlife Habitat

The site contains a number of mature trees several of which have existing Tree Preservation Orders (TPOs). The tree in middle of old cricket pitch is unique, mentioned in Wisden and should be preserved as of historic importance.

In the EDDC Site Selection Report for Whimble, there does not appear to be any mention of the tree in the middle of the old cricket pitch and allocation on this site would surely be subject to the provision of EDDC Emerging Local Plan Policy PB08: Trees, Hedges and Woodland on development site.

The DEFRA website shows the site and north east of the site as Woodland Priority Habitat and Woodland Improvement Area, Priority Habitat (woodland and orchard), and a national habitat and network enhancement zone 1.

Local knowledge is that the site is home to an array of wildlife habitats including bats and owls.

Any development of this site would be contrary to the EDDC Emerging Local Plan Policies PB02: protection of regionally and locally important wildlife sites and PB03: protection of irreplaceable habitats and important features.

Flooding

It is noted that the site is already subject to (partial) flooding (confirmed by the Environment Agency), and any development would run the risk of adding to this with impact both on the site and further downstream.

There is no evidence to suggest that officers have carried out further work relating to the flood risk before consideration was given to a partial allocation.

Therefore, Whimble Parish Council suggests that there is no sound evidence for allocating this site in the EDDC Emerging Local Plan and that it is contrary to Policy AR01: Flooding.

Access to the site and Infrastructure

The exit from the site is on to a single track road with a blind corner – not only would this create an immediate local problem but the potential to add 33 houses on this site would seriously compromise an already congested and busy exit route from the village (continuing through the Centre of the village – along Church Road and then on to the old London Road.

Church Road is the main route into the Village and is a narrow and dangerous road. The section of Church Road nearest to the Square and village shop is single track road with houses either side of the road.

There is no pavement along the stretch of Church Road to The Square and School Hill. The Parish Council and Villagers have raised concerns about the volume and speed of traffic on that road.

The Parish Council are so concerned about the volume and speed of traffic along Church Road that it has convened a Community Speed Watch Group to monitor the traffic and speed along that road.

The Police confirmed that Church Road is not recommended as a safe route to the Primary School, Village shop, church or railway station.

There is no capacity to add a footpath to exit and continue from this site. All access routes are narrow country lanes, so development would exacerbate the existing problems of public safety (given the lack of footpath), traffic congestion and noise.

This site was considered unsuitable for development in 1995 due to traffic issues. What has changed since then which now makes this site suitable? This question was asked at the EDDC Strategic Planning Committee meeting on 1 October 2024 but, to date, no response has been received.

The Parish Council has been advised that the owners of the site do not own the hedge bordering the site. Also, another local resident owns land adjacent to the site that would be needed for the installation of a footpath, and he has advised that he will resist any land grab.

Whimble Primary School is at capacity so there is no infrastructure in place to accommodate additional children at the school arising from 83 additional homes split across the proposed allocations of Whim_11 and Whim_08a.

Whimble Parish Council feels that this site is not sustainable and therefore should not be allocated in the EDDC Emerging Local Plan.

Land of Local Importance

In 1993 The EDDC Chief Engineer and Planning Officer wrote to a local resident to confirm that the Richard Whiteway Memorial Ground was inset as “Land of Local Importance” (copy of the letter has been provided). The letter states ‘the intention of the designation is that the land should not be built upon’, and ‘the designation means that the land can only be used for activities which retain its open nature. Any applications to develop the land would be resisted’.

Whimble Parish Council asks what has changed since 1993 to suggest that this site should now be allocated in the Emerging Local Plan? This question was asked to the EDDC Strategic Planning Committee meeting on 1 October 2024 but, to date, no response has been received.

Developing this site would be contrary to Policy OL06: Land of Local Amenity Importance and Local Green Space.

Spatial Strategy

Whimble is a 'Tier 4' settlement, where the draft local plan seeks to promote limited development to meet local needs. The development of up to around 33 homes on Whim_11 is consistent with that strategy.

Whimble Parish Council challenges this assumption.

As part of the work on the Whimble Neighbourhood Plan, the Parish Council commissioned a Housing Needs Survey. The Whimble Parish Housing Needs Report states ‘The survey identified a need for at least 4 affordable homes within the next 5 years.’

Whimble Parish Council does not class a total allocation of 83 homes in Whimble to be ‘limited development’ (Whim_11 total of 33 homes; Whim_08a total of 50 homes), especially when the Whimble Housing Needs Report lists a significantly lower figure.

The Parish Council also suggests that the allocation is not sound as it is contrary to EDDC Emerging Local Plan Policy HN01: Housing to address needs, which states ‘This will be achieved by providing an appropriate mix of decent, good quality homes which meet identified needs for housing as identified in a neighbourhood plan, local needs assessment or other evidence document over the plan period, at locations consistent with the settlement hierarchy and the spatial strategy.’

In addition to this, there are developments planned in neighbouring areas e.g. Cranbrook. This includes the current Cobdens Expansion of Cranbrook, part of which is still in the Whimble Parish Area, where 1500 houses, a school and a travellers site have already been approved by the Strategic Planning Committee. These sites have a far better infrastructure than Whimble Village so why has the additional housing requirement not been allocated at these sites?

Other Comments

The Parish Council and local residents in Whimble have not said that they are against development. But the issue is the size and location of the development.

It is the view of the Parish Council that development would be better placed elsewhere in Whimble, or in Cranbrook or elsewhere in the district where there is appropriate infrastructure.

As set out earlier there is no sound justification as to why the Strategic Planning Committee decided to go against the professional judgement of the Planning Officers and allocated this site in the Emerging Local Plan.

Also, in terms of soundness, the Strategic Planning Committee does not appear to have fully considered a number of other options that could have been chosen.

Whimble Parish Council is looking at Site Allocations as part of the evidence base for its Neighbourhood Plan. The Parish Council is considering a number of sites, which are:

Whim_03 Land to the south of Grove Road Whim_07 Land south of Broadclyst Road
Whim_13 Land north side of Grove Road Whim_18 Land to the east of Church Road
Whim_20 Land to the north of Plumtree Lane

The Parish Council's preference would be that a site is allocated to the east of Church Road so that it is nearer to the established infrastructure near the Hand and Pen.

It is the view of the Parish Council that further work should be carried out on all of the sites by the professional Planning Officers before any allocation is made in Whimble.

So, in summary, Whimble Parish Council does not feel that the EDDC Emerging Local Plan policy SD29: Strategic Allocations in Whimble is sound, and therefore site Whim_11 should not be allocated.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Whimble Parish

Council believes that policy SD29: Strategic Allocations for Whimble, specifically site Whim_11 is not sound, as the decision to allocate failed to consider the protected tree in the middle of the site, which is protected by a Tree Preservation Order (TPO). Also there is no mention of the fact that previously the EDDC Planning Department designated this site as “Land of Local Importance” which should not be built on and should be used for activities which retain its open nature.

Therefore, Whimble Parish Council and local residents want to see the modification of site Whim_11 being removed from the EDDC Emerging Local Plan and the homes being allocated elsewhere in the district (outside of Whimble Village), where there is appropriate infrastructure.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Whimble Parish Council wishes to participate in the hearing session(s) to challenge the soundness of the allocation of Policy SD29: Strategic Allocations at Whimble, and to represent local residents of Whimble who have also voiced significant concerns and objections.

Full name: Amy Tregellas

Organisation (where relevant): Whimble Parish Council

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Whimble Parish Council is responding to, and challenging policy SD29: Strategic Allocations in Whimble, particularly to the allocation of Whim_08a (Land west of Bramley Gardens) site in the EDDC Emerging Local Plan.

The objection is on the grounds of soundness in that the allocation and policy is not based on solid evidence.

The EDDC Strategic Planning Committee considered the Whimble Site Selection Report at a meeting on 1 October 2024.

Professional planning officers identified and assessed the potential sites in Whimble and using their professional judgement, backed up with sound evidence recommended to Members whether to allocate the site or not.

In the case of Whim_08 site, officers recommended that the site was not allocated for the following reasons:

- Scale of development incompatible with spatial strategy.
- Site lacks safe and convenient pedestrian access to services and facilities in the village.
- The site forms part of the ‘Green Wedge’ between Whimble and Cranbrook.
- Forms an important part of the very attractive rural landscape setting for the settlement.
- Potential impact on unconfirmed wildlife site.
- Part of is at risk of flooding and further work would be required to understand the nature and extent of the risk before consideration could be given to allocation.

In the earlier phases on consultation, Planning Officers held a Public Consultation event at the Victory Hall, Whimble. This site was never considered as being appropriate for development at that event and, in fact, when local residents asked the question, the Officers in attendance vehemently denied that it was a possibility for consideration.

At the meeting on 1 October 2024, Members of the committee voted to go with the officer recommendation and not allocate the site. However, at the Strategic Planning Committee meeting on 1 November 2024 Members did a complete u turn and decided to allocate part of the site, contrary to Officer recommendation.

There was no justification or reason given as to why this site was picked above any others in Whimble or other sites in the east Devon area. Also no additional work appears to have been completed by officers to assess the risks relating to this site before allocating it.

This gives the appearance of the Strategic Planning Committee having a knee jerk reaction to needing to allocate additional houses across the district without considering a fully worked up proposal or sound justification (based on evidence and facts), as to why the site should be allocated (partially or otherwise).

This site allocation report also considers ‘If whole site is not suitable for allocation, could a smaller part be allocated?’ The view of the professional planning officers was ‘No’. Again, this leads Whimble Parish Council to challenge the soundness of any allocation of this site, whether full or partial.

Taking the list of reasons drawn up by officers as to why the site should not be allocated, Whimble Parish Council makes the following comments:

Scale of development incompatible with spatial strategy.

Policy SP01: Spatial Strategy section E states ‘Allowing limited development at the Service Villages of Beer, Branscombe, Broadhembury, Chardstock, Clyst St Mary, Dunkeswell, East Budleigh, Exton, Feniton, Hawkchurch, Kilmington, Musbury, Newton Poppleford, Otterton, Payhembury, Plymtree, Sidbury, Stoke Canon, Tipton St John, Uplyme, Westclyst, West Hill and Whimble.’

The EDDC Site Allocation Report for Whimble states ‘Whimble is a is a 'Tier 4' settlement, where the draft local pan seeks to promote limited development to meet local needs. The development of up to 180 dwellings on Whim_08 is considered to be excessively high in relation to the scale of the existing village.

As part of the work on the Whimble Neighbourhood Plan, the Parish Council commissioned a Housing Needs Survey. The Whimble Parish Housing Needs Report states ‘The survey identified a need for at least 4 affordable homes within the next 5 years.’

Whimble Parish Council does not class a total allocation of 83 homes in Whimble to be ‘limited development’ (Whim_11 total of 33 homes; Whim_08a total of 50 homes), especially when the Whimble Housing Needs Report lists a significantly lower figure.

The Parish Council also suggests that the allocation is not sound as it is contrary to EDDC Emerging Local Plan Policy HN01: Housing to address needs, which states ‘This will be achieved by providing an appropriate mix of decent, good quality homes which meet identified needs for housing as identified in a neighbourhood plan, local needs assessment or other evidence document over the plan period, at locations consistent with the settlement hierarchy and the spatial strategy.’

In addition to this, there are developments planned in neighbouring areas e.g. Cranbrook. This includes the current Cobdens Expansion of Cranbrook, part of which is still in the Whimble Parish Area, where 1500 houses, a school and a travellers site have already been approved by the Strategic Planning Committee. These sites have a far better infrastructure than Whimble Village so why has the additional housing requirement not been allocated at these sites?

Site lacks safe and convenient pedestrian access to services and facilities in the village.

Access to the site and potential development would be through Bramley Gardens and onto Church Road. Church Road is the main route into the Village and is a narrow and dangerous road.

The section of Church Road nearest to the Square and village shop is single track road with houses either side of the road. There is no pavement along the stretch of Church Road to The Square and School Hill. The Parish Council and Villagers have raised concerns about the volume and speed of traffic on that road.

The Parish Council are so concerned about the volume and speed of traffic along Church Road that it has convened a Community Speed Watch Group to monitor the traffic and speed along that road. The Police confirmed that Church Road is not recommended as a safe route to the Primary School, Village shop, church or railway station.

To access the village shop in the Square and the Primary School in School Hill villagers would have to walk down Church Road which has no pavements. Therefore, there is no safe and convenient pedestrian access to services and facilities in the village.

To ensure safety most people would probably use their car or vehicle to access the village shop or primary school. This is not sustainable and surely would be against EDDC Emerging Local Plan Policy TR01: prioritising walking, wheeling, cycling and public transport and is also contrary to the EDDC Climate Change aspirations.

The site forms part of the ‘Green Wedge’ between Whimble and Cranbrook.

The EDDC Emerging Local Plan Policy OL05: Green Wedges states ‘Within green wedges, as defined on the Policies Map, development will not be permitted if it would add to existing sporadic or isolated development, damage the individual character or identity of a settlement, or could lead to or encourage settlement coalescence, whether physical, visual, or intrinsic.’

Whimble Parish Council again challenges the soundness of the proposed allocation due to the Green Wedge. The Allocation of this site would potentially damage the individual character or identity of Whimble. This site forms an important part of the very attractive rural landscape setting for the settlement.

This would also lead to settlement coalescence between Whimble and Cranbrook, which is a material planning issue, and clearly demonstrates that this site should not be allocated in the Local Plan. This was the view of the EDDC professional Planning Officers.

Potential impact on unconfirmed wildlife site.

Local residents have stated that this site is a wildlife site which is home to bats, owls, woodpeckers, deer and badgers. Any development of this site would be contrary to EDDC Emerging Local Plan Policy PB03: protection of irreplaceable habitats and important features.

Part of is at risk of flooding and further work would be required to understand the nature and extent of the risk before consideration could be given to allocation.

There is no evidence to suggest that officers have carried out further work relating to the flood risk before consideration was given to a partial allocation. Therefore, Whimble Parish Council suggests that there is no sound evidence for allocating this site in the EDDC Emerging Local Plan and that it is contrary to Policy AR01: Flooding.

Other comments

The Parish Council and local residents in Whimble have not said that they are against development. But the issue is the size and location of the development.

It is the view of the Parish Council that development would be better placed elsewhere in Whimble, or in Cranbrook or elsewhere in the district where there is appropriate infrastructure.

As set out earlier there is no sound justification as to why the Strategic Planning Committee decided to go against the professional judgement of the Planning Officers and allocated this site in the Emerging Local Plan.

Also, in terms of soundness, the Strategic Planning Committee does not appear to have fully considered a number of other options that could have been chosen.

Whimble Parish Council is looking at Site Allocations as part of the evidence base for its Neighbourhood Plan. The Parish Council is considering a number of sites, which are:
Whim_03 Land to the south of Grove Road
Whim_07 Land south of Broadclyst Road
Whim_13 Land north side of Grove Road
Whim_18 Land to the east of Church Road
Whim_20 Land to the north of Plumtree Lane

The Parish Council's preference would be that a site is allocated to the east of Church Road so that it is nearer to the established infrastructure near the Hand and Pen.

It is appreciated that there are constraints to these sites but the Parish Council challenges that there are constraints with site Whim_08a, hence why the EDDC professional Planning Officers recommended that the site was not allocated.

It is the view of the Parish Council that further work should be carried out on all of the sites by the professional Planning Officers before any allocation is made in Whimble.

So, in summary, Whimble Parish Council does not feel that the EDDC Emerging Local Plan policy SD29: Strategic Allocations in Whimble is sound, and therefore site Whim_08a should not be allocated.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Whimble Parish Council believes that policy SD29: Strategic Allocations for Whimble, specifically site Whim_08a is not sound, as the decision to allocate this site went against the solid evidence provided by the professional Planning Officers report and recommendations, without any justification as to why the decision was made to partially allocate the site.

Therefore, Whimble Parish Council and local residents want to see the modification of site Whim_08a being removed from the EDDC Emerging Local Plan and the homes being allocated elsewhere in the District (outside of Whimble Village), where there is appropriate infrastructure.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Whimble Parish Council wishes to participate in the hearing session(s) to challenge the soundness of the allocation of Policy SD29: Strategic Allocations at Whimble, and to represent local residents of Whimble who have also voiced significant concerns and objections.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Land at Station Road (Whim_11) - this policy suggests that an FRA 'may' be required, but it may be more proactive to state the 'where a development cannot locate development outside of the area at risk for flooding (over the lifetime of development) an FRA will be required. The policy indicates that the site layout should enable convenient pedestrian and cycle links which is supported. However, the priority should be to avoid the areas of flood risk where possible, alongside sustainable links. As stated in SD09, we would encourage the policy to prevent gardens and other domestic features within the area of flood risk.
