4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: see comments above

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I want my voice to be heard

Full name: Mark Robert Moffat

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The developments around Lympstone at least do not appear to be sustainable. There is a lot of development already underway in Exmouth and Lympstone with little regard as to whether the infrastructure can support it. Secondary schools are close to or beyond capacity and no plans for how additional health care would be provided are apparent. The majority of the traffic originating in the area passes through the Sandygate roundabout, which is at 84% capacity already. Already, during the main commuter times, it can easily take half an hour to travel the four and a half miles between Lympstone and the Sandygate roundabout. If the intention behind the new Dinan way bypass is to increase the flow of traffic onto the A376, then this will only make the situation worse. The proposed developments Exmo_23, Lymp_01, Lymp_07, GH/ED/72A and GH/ED/73 also demonstrate a lack of awareness of the local infrastructure. Although Lympstone does have a small railway station, the railway runs alongside the river Exe estuary, so any new development has to take place to the East of the station, outside the current built up area boundary and at considerable distance. In this situation, it is highly unlikely that the occupants of any new development would use rail travel to any significant extent. Due to being bounded by the estuary on the western side, all traffic entering and leaving Lympstone must use or cross the A376. Increasing the size of Lympstone village by such a large proportion, with no possibility for alternative routes of entry or exit can do nothing but increase congestion both within the village and on the A376 itself. Site Lymp_07 is upstream of Lympstone, within the rainwater catchment of the Wotton Brook and increasing the risk of flooding in the village.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Lymp_07 is within Lympstone yet has been included within the allocation for Exmouth. No good reason appears to have been given for this and the impression given is that over time, there will be a coalescence, resulting in the loss of Lympstone as a separate entity. This is a very large development in relation to the size of Lympstone. It has the potential to increase the flooding risk, being upstream of the village and situated on a clay subsoil. If development were to take place here, extensive attenuation measures should be in place. With the exception of Lymp_01, all of the proposed sites within and adjacent to Lympstone are more than 800m from existing key services and will result in increased car use. With the A376 being so congested already and only likely to get worse, sites should have been allocated in locations with at least the potential to increase infrastructure to meet the growing need.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns. Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner. A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath. I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: ?

The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA).

Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy.

? Exmo_20 would destroy the “tranquillity, wildness and dark skies” of the countryside, which is contrary to POLICY OL01.

? Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9

? The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04.

? Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02.

? Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

? Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

? The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: ? Remove Exmo_20 from the Local Plan,

? Reduce the size of Exmo_20,

? Do not access the site via the B3179,

? Do not access the site via Southern Wood,

? Revert to Exmo _20b as previously proposed,

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of site EXMO_04a in the EDDC Local Plan is in contravention of Policy PB 03 - Protection of Irreplaceable Habitats and Features, as this site contains:

- Ancient Woodland, Ancient & Veteran Trees.
- Priority Habitats which support the functionality of Protected Species such as Bat Foraging, and Commuting Habitats, curlew bunting nesting and foraging habitat.
- The northern section of the site provides a Commuting Habitat (Wildlife Corridor) linking Marley Hayes Woods, Marley Woods (Ancient Woodland) and the Pebblebed Heath - the maintenance of this Wildlife Corridor is essential in order to protect the extensive wildlife in this location and provide a buffer zone between the Pebblebed Heath and the developments in the south.

The 'Justification for Policy' is not being adhered to, which states: 13.10. Some habitats, including ancient woodlands and veteran trees, are irreplaceable due to their age, uniqueness, and biodiversity. Planning permission will not be granted for proposals that could harm these habitats unless there are exceptional reasons and a robust mitigation/compensation strategy, as per the NPPF. There are no exceptional reasons and a robust mitigation/compensation strategy does not exist and therefore this site EXMO-04a must be removed from the Draft Local Plan as per the NPPF.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: In accordance with Policy PB03 the site EXMO-04a should be removed from the EDDC Local Plan:

- Ancient Woodland, Ancient and Veteran Trees,
- Priority Habitats which support the functionality of Protected Species such as Bat Foraging, and Commuting Habitats, curlew nesting and foraging habitat.
- Wildlife Corridor or Commuting Habitat

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Planning permission for this site was refused in 2015 when the Woodland Trust objected and stated that Marley Woods in the NE section was Ancient Woodland and that The Lawn was Ancient Pastureland. Residents have expressed their feelings about this site at various meetings but their views have been ignored up to this point and EXMO-04a has been included in the Draft Local Plan. It is now time to re-assess this site and remove it from the Local Plan. The allocation in the plan is for 50 houses. The huge potential damage to the Biodiversity and Wildlife for the sake of 50 houses does not make sense. Please remove EXMO-04a from the Draft Local Plan before submission to the inspectorate.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Lymp_07 is in Lympstone Parish Boundary but was consulted on as an Exmouth site. This failed to highlight to Lympstone residents a site which they would have wanted to respond to consultation on and therefore the site, and policy have not been properly consulted on. The rushed final councillor meetings to select the sites to include in the plan, when they came back to sites that had been previously moved on from, to make up the full required number of houses, put Lymp_07 as the first site to consider. Sites considered earlier in the meeting were clearly more likely to be selected under the time pressure and pressure for numbers that councillors were. Sites should have been considered with the least suitable or least preferred considered last in the meetings and the 'easier' less controversial sites considered first. So that councilors could consider less suitable sites later in the meeting, and be able to decide on these sites in full knowledge of how many more houses they needed to find. therefore being able to not allocate controversial sites that were not required to make up the numbers. The process followed, of considering Lymp_07 first has resulted in this site being selected in preference to far more suitable and less controversial sites.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The final site selection meeting needs to be re-run in order to conduct a more fair site selection only considering less suitable and more controversial sites, towards the end of the meeting if housing numbers are still required.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

In the same way that I believe the plan is not legally compliant, because the site selection process was flawed, I also believe the plan is not justified. The selection of Lymp_07 is not appropriate when compared to the other site options you could have chosen. Lymp_07 is in Lympstone Parish Boundary but was consulted on as an Exmouth site. This failed to highlight to Lympstone residents a site which they would have wanted to respond to consultation on and therefore the site, and policy have not been properly consulted on. The rushed final councillor meetings to select the sites to include in the plan, when they came back to sites that had been previously moved on from, to make up the full required number of houses, put Lymp_07 as the first site to consider. Sites considered earlier in the meeting were clearly more likely to be selected under the time pressure and pressure for numbers that councillors were. Sites should have been considered with the least suitable or least preferred considered last in the meetings and the 'easier' less controversial sites considered first. So that councilors could consider less suitable sites later in the meeting, and be able to decide on these sites in full knowledge of how many more houses they needed to find. therefore being able to not allocate controversial sites that were not required to make up the numbers. The process followed, of considering Lymp_07 first has resulted in this site being selected in preference to far more suitable and less controversial sites.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

The final site selection meeting needs to be re-run in order to conduct a more fair site selection only considering less suitable and more controversial sites, towards the end of the meeting if housing numbers are still required.

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.:

I don't know. I haven't found any description of the co-operation with other councils.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?:

Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.:

to clearly articulate and represent the views I have expressed that the conduct of the final site selection meetings was flawed

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

EXMO20 as a site for 700 homes representing an increase in population of over 2000 people on the edge of the Pebblebed heath is unacceptable. This is encroaching within the 400m limit to development of the SPA SAC and NNR. The strategy for almost linking this development with Goodmoors will significantly alter that whole ecosystem. There has been no wildlife survey done thus far as mature woodland, grassland and open field will support a huge diversity of flora and fauna which will be eroded. It is also ill considered when it comes to access. The B3179 from the Ting Tongs is an accident black spot and the road heading to Woodbury has a 60 mile limit making right angle access dangerous.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Exmo 20 will be a development of 100 houses situated along St Johns Rd so as not to encroach on virgin farm land or encroach on non permitted areas adjoining Pebblebed heaths.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: David Murphy

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns. Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner. A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath. I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

In addition to the above, I do not believe that the planners and developers have demonstrated that this planned development has or will meet the criteria as set out, for it to qualify as "in exceptional circumstances".

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The plan lacks clarity and legal certainty regarding land contributions. The proposal involves multiple parcels of land across separately owned areas, some of which have not yet been agreed upon by the landowners. Additionally, areas designated for key community facilities such as the community hub, school, and common areas are included on the original plans, despite not being available for development. Without legally binding agreements in place, the application may be deficient and fail to meet the requirements of Section 106 of the Town and Country Planning Act 1990, particularly regarding the necessary contributions for infrastructure and affordable housing. This lack of secure land agreements undermines the soundness of the plan.

Full name: Mark Nicholls

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is in clear conflict with paragraph 11.2 of the Local Plan, which advocates for the concentration of significant development in areas that minimize travel distances, reduce reliance on private vehicles, and promote sustainable transport choices. Exmo_20 is situated in a location that will inevitably increase travel needs, necessitating the use of cars for even the most basic journeys. The housing is proposed to be at the southern end of the site, while the primary vehicular access point is located at the very northern edge, adjacent to the protected Pebblebed Heaths (SAC/SPA/SSSI). Due to the mandatory 400-meter buffer zone around these ecologically sensitive areas, no housing can be constructed within the top 400 meters of the site. This restriction creates a minimum of a 0.5 km drive just to reach the residential areas from the site entrance. This means that for every journey, residents will have to drive at least 1 km within the site itself just to get from the entrance to the housing. This unnecessary internal driving will increase overall car dependency and is incompatible with the objectives of the Local Plan, which seeks to reduce the environmental impact of transportation.

The situation is further exacerbated by the need for residents to drive an extended route to access Exmouth town center. From the B3179 site entrance, residents must drive around the edge of Exmouth and back down into the town center, covering a distance of 4.0 to 4.3 miles. This longer route will make daily travel to and from the town center more time-consuming, inefficient, and car-dependent. Given that Exmo_20 is located far from the town center and essential services, this development will likely result in a significant increase in the number of car journeys, which will further contribute to traffic congestion, pollution, and the carbon footprint of the area.

This development's location is at odds with the strategic aims of paragraph 11.2 of the Local Plan, which advocates for development that minimizes the need for travel, particularly by private car. The long distances and lack of immediate access to services make walking, cycling, and public transport impractical options for most residents. While the Local Plan encourages developments that promote more sustainable travel options, the design and location of Exmo_20 will inevitably increase the number of car trips, generating greater road traffic and undermining any efforts to reduce the environmental impact of transportation.

Additionally, the proposed development will further marginalize individuals without access to private vehicles, exacerbating social exclusion by isolating residents from essential amenities and services. The lack of alternative transport infrastructure, coupled with the increased reliance on cars, will make it difficult for non-car owners to access work, school, healthcare, or recreational facilities, creating a greater divide between those who can afford a car and those who cannot. This not only undermines the sustainability goals of the Local Plan but also threatens to exacerbate social inequality and limit the ability of residents to fully participate in the community.

In conclusion, the allocation of Exmo_20 fails to meet the objectives set out in paragraph 11.2 of the Local Plan, which advocates for sustainable development that reduces travel needs and minimizes reliance on cars. The site's location and design will increase car dependency, generate additional traffic, and marginalize non-car owners, all of which are in direct opposition to the principles of sustainable development outlined in the Local Plan.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is in clear conflict with policy TR01 of the Local Plan. Due to the significant distance between this site and essential services such as shops, workplaces, and schools, walking or cycling will not be the preferred mode of transport for residents. Research cited in the Local Plan indicates that most people prefer to walk to their destinations if they are within 0.5 miles. Beyond 1 mile, cars become the dominant mode of transport, and at distances greater than 2 miles, trips made on foot are rare. Exmo_20 is located far beyond the 0.5-mile or even 1-mile thresholds, making walking or cycling an unrealistic option for most residents when accessing daily necessities. As such, these sustainable modes of transport cannot be relied upon as the primary means of travel for the majority of the population.

Even if walking routes, cycle paths, or public transport options were introduced, they would have minimal impact on reducing the number of car journeys generated by this development. The steep local topography, combined with the considerable distances to essential infrastructure and services, further exacerbates the difficulty of walking or cycling. The landscape's natural incline and the lack of nearby facilities make these alternatives unfeasible for the majority of residents. As a result, the development is likely to generate a high volume of car traffic, which would add to congestion and further undermine the Local Plan's aims for sustainable travel.

Additionally, the site's location presents a significant challenge for individuals without access to a car. The distance from essential services, combined with the lack of viable transport options, could lead to social exclusion for those who are reliant on public transport or walking. For these individuals, the isolation of Exmo_20 from key amenities would limit their ability to engage in daily activities, such as shopping, work, or school

runs. The development would therefore not only increase car dependency but also marginalize residents without cars, undermining the social inclusivity that should be a priority for any new development. In summary, the allocation of Exmo_20 does not align with the objectives of policy TR01, as it will create a car-dependent community and exacerbate social exclusion for vulnerable groups.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is in direct conflict with paragraph 13.9 of the Local Plan. According to the National Planning Policy Framework, ‘irreplaceable habitats’ are defined as habitats that are extremely difficult, or take an extended period of time, to restore, recreate, or replace once destroyed. The development of Exmo_20 would result in the loss of such irreplaceable habitats. The site contains a significant number of mature trees, many of which display signs of veteranisation. These trees are crucial for providing unique microhabitats that support a wide range of species. Their loss cannot be compensated simply by planting new trees, as these mature trees have established complex ecological roles that take decades, if not centuries, to replicate.

In addition to the trees, Exmo_20 is home to numerous long-established hedgerows that traverse the site, some of which stretch over considerable lengths. These hedgerows, along with the mature trees, contribute to a highly biodiverse environment, offering essential habitats and functioning as wildlife corridors. While it may be possible to leave spaces around some of these features, the overall degradation and fragmentation of the habitats they provide is unavoidable with the proposed development. The impact on biodiversity would be significant, and these natural features cannot be easily replaced or restored.

Furthermore, the site lies within an identified ‘Strategic Nature Area’ (SNA 368) on the Nature Recovery Network, part of the Local Nature Recovery Strategy. This strategy aims to connect and expand existing wildlife sites, creating a more integrated and resilient ecological network. Exmo_20 plays a crucial role in linking habitats, providing wildlife corridors between the Pebblebed Heaths to the north and the woodlands to the south.

The development of Exmo_20 would disrupt these connections, causing adverse effects on both the local biodiversity and the broader goals of the Nature Recovery Network.

The site is also home to species such as the Nightjar, which is a qualifying feature of the East Devon Heaths SPA. Studies show that Nightjars can travel up to 7km from their nesting sites to feed at night, making the loss of foraging habitats or the disruption of their flight paths a serious concern. Such disturbances could undermine the conservation objectives of the SPA and negatively impact the Nightjar population.

In summary, the allocation of Exmo_20 threatens irreplaceable habitats, disrupts vital wildlife corridors, and undermines the broader ecological objectives of the Local Plan and the Nature Recovery Network. The development of this site would lead to irreversible ecological damage, significantly affecting both the local and regional biodiversity.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is in direct conflict with paragraph 13.23 of the Local Plan. The site lies within an identified 'Strategic Nature Area' (SNA 368), which forms an integral part of the Nature Recovery Network. This network, outlined in the Local Nature Recovery Strategy, aims to link and expand existing wildlife sites while enhancing habitats and biodiversity across the region. Exmo_20, as part of this strategy, serves as a vital connector between different ecological zones, facilitating wildlife corridors that enable species to move and thrive. The site connects the Pebblebed Heaths to the north with the woodlands to the south and beyond, forming a continuous habitat that supports a diverse range of species. The development of Exmo_20 would fragment these critical habitats, disrupting the connectivity that is essential for maintaining biodiversity and the health of local ecosystems.

This disruption is particularly concerning given that the area supports species that rely on the integrity of the landscape for their survival. Notably, the Nightjar, a qualifying feature of the East Devon Heaths SPA, relies on the heathlands for breeding and foraging. Research indicates that Nightjars can travel up to 7km from their nesting sites to forage for food, typically at night. The proposed development could lead to the loss of foraging habitat or disrupt the Nightjars' routes to their feeding areas, undermining the species' ability to meet its nutritional needs and jeopardizing the conservation objectives of the SPA. As these birds are already vulnerable to habitat fragmentation, the loss or disturbance of key foraging areas could have a devastating effect on their population and on the broader ecological balance of the region.

Therefore, the allocation of Exmo_20 would have far-reaching consequences not only for the immediate wildlife corridors and habitats but also for the long-term conservation

goals set forth in the Local Plan and the Nature Recovery Network. The development threatens to undermine the effort to combine and extend wildlife sites, with the potential to disrupt the delicate balance of local ecosystems, particularly those that rely on the integrity of the strategic nature areas and their associated habitats.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is in clear and direct conflict with policy OL09 of the Local Plan. The recent Habitats Regulations Assessment (dated 30.01.25) raises significant concerns, specifically highlighting that there is, at present, a "lack of sufficient certainty to rule out adverse effects on the integrity of the East Devon Pebblebed Heaths SAC/SPA, particularly in relation to air quality." This uncertainty is particularly troubling as it underscores the potential, albeit unquantified, risks that the proposed development may pose to this important and sensitive ecological area.

One of the key issues identified in the assessment stems from the fact that the primary access route to Exmo_20 would be via the B3179, which passes directly along the boundary of the East Devon Pebblebed Heaths. This access route, therefore, has the potential to increase traffic volumes along the boundary of the SAC/SPA, a factor that could exacerbate air quality concerns, particularly in relation to nitrogen dioxide and other pollutants that are harmful to the delicate ecosystems of the heathlands. The additional traffic generated by the development could lead to a significant and lasting impact on the health of the protected site, especially given that the Pebblebed Heaths SAC/SPA is already vulnerable to the effects of atmospheric pollution.

Given this considerable uncertainty regarding the impact of air quality on the integrity of the site, it is evident that the allocation of Exmo_20, without further detailed and robust mitigation measures, could result in harm to the ecological value of the Pebblebed Heaths. This situation calls into question whether sufficient precautions are being taken to protect the health and sustainability of this vital natural resource. Furthermore, it highlights the need for the local planning authority to reconsider alternative sites that would not pose such significant risks to the integrity of the SAC/SPA, thus adhering to

the principles of the Habitats Regulations and the objectives set forth in policy OL09, which seeks to protect and preserve the natural environment from development pressures that could lead to adverse effects.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is in direct conflict with policy PB01 of the Local Plan and fails to align with the established mitigation strategy. The proposed development at this location poses a significant risk to the integrity of the nearby Pebblebed Heaths (SAC/SPA), an area of considerable ecological value. Given the environmental sensitivity of the Pebblebed Heaths, the development of Exmo_20 would likely result in harmful consequences, including potential disruption to local wildlife habitats, biodiversity, and the overall ecological balance of the site.

Furthermore, there are alternative sites available for development that would have far less, if any, adverse impact on the Pebblebed Heaths. These alternatives would allow for necessary growth and development without encroaching on this environmentally sensitive area. By choosing Exmo_20 for development, the plan disregards the possibility of using less damaging locations, thus failing to adhere to the principles of sustainable development outlined in policy PB01. The proposed site not only contradicts the mitigation strategy but also undermines efforts to protect the ecological integrity of the Pebblebed Heaths, raising serious concerns about the long-term environmental consequences of this allocation.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is in clear conflict with policy HE02. The scale of development proposed for Exmo_20, located in proximity to St. John in the Wilderness Church (Grade II* listed), would have profound and lasting negative effects on the serene and isolated environment surrounding both the church and its churchyard. St. John in the Wilderness Church, a historically and architecturally significant structure, currently benefits from a quiet, tranquil setting that provides an essential atmosphere for contemplation, reflection, and worship. The church and its immediate surroundings are integral to the religious and cultural experience of its congregation, with the peaceful environment contributing to the spiritual and communal values associated with the church.

However, the substantial development of Exmo_20 in such close proximity to this sensitive site would dramatically alter the existing setting. The introduction of new buildings, roads, and infrastructure would introduce a level of noise, activity, and visual intrusion that would undermine the calm and reflective atmosphere the church currently enjoys. The proximity of such a large-scale development would effectively strip away the seclusion of the site, transforming the space from one of peacefulness and historical reverence into one overshadowed by the demands of modern urban growth. This disruption to the church's surroundings would significantly impact not only the aesthetic and spiritual experience for those attending the church but also the broader historical context in which this important building is situated. The development threatens to irreparably harm the heritage value of the church and its grounds, undermining the objectives of policy HE02, which aims to preserve and protect such sensitive sites from developments that could alter their character and historical significance.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with policy OL05. The site's main access point is just 2.2 miles from Budleigh Salterton's centre but 4 miles from Exmouth, making Budleigh significantly more accessible. The natural route from the site leads directly into Budleigh Salterton High Street, whereas reaching Exmouth requires traveling twice the distance and skirting around its outskirts. Residents of Exmo_20 would naturally rely on Budleigh's High Street, doctor's surgery, primary school, and other amenities. Currently, Exmouth and Budleigh function as separate communities, but this development would blur that distinction, effectively merging the two by placing housing in one town while depending on services in the other.

? Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02.

? Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

? Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

? The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

First: development will not be permitted if it could lead to or encourage settlement coalescence. The allocation of Exmo_20 will lead to coalescence between Budleigh and Exmouth. Allocation of Exmo_20 is in conflict with policy OL05. The main access point to Exmo_20 is 4 miles from the centre of Exmouth and only 2.2 miles from the centre of Budleigh Salterton, making Budleigh significantly more accessible to the development. The access arrangement for the site leads naturally down the road into Budleigh Salterton High Street whereas to get into Exmouth means travelling twice the distance and having to go around the edge of Exmouth to get back down into it. The High Street, Doctor's surgery, primary school, beach etc in Budleigh would be the most accessible and obvious choices for residents of Exmo_20. Currently Exmouth and Budleigh are separated in terms of functionality but this development would merge the two, with residents living in one town whilst relying on day-to-day services and infrastructure of the other. (POLICY OL05: This policy stated that development will not be permitted if it could lead to or encourage settlement coalescence).

Second: Allocation Exmo_20 is in conflict with paragraph 3.30. The settlement boundary around Exmouth has been extended to include not only the land which housing will be built on but also to include the 400m buffer zone adjoining the Pebblebed Heaths, therefore defining this land as acceptable for development. Although housing cannot be built on the buffer zone, by including it within the settlement boundary it is available for other kinds of development. This is contradictory to the precautionary approach as the plan fails to robustly protect against adverse effects of recreational use etc on the Pebblebed Heaths.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Catherine OConnor

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Further reasons in addition to Unsustainable Location include Flood Risk and the impact on the Grade II* listed church St John in the Wilderness.

First: Allocation of Exmo_20 is in conflict with policy AR01(B). The site sits upstream of Exmouth on the main rainwater catchment area of Withycombe Brook. The subsoil is heavy clay, the impermeable nature of which makes soakaways ineffective and the land is often waterlogged. Building on this steep site would significantly exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Withycombe. (POLICY AR01(B) states that development should be safe for its lifetime without increasing or exacerbating flood risk elsewhere).

Second: ALLOCATION OF Exmo_20 is in conflict with policy HE02 - a development the size of Exmo_20 surrounding St. John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote and tranquil surroundings of the church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. (POLICY HE02 states that proposals for development will be expected to be sympathetic to listed buildings and their settings).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Catherine OConnor

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: This is for two reasons.

First: “Policy 23 - Infrastructure Delivery: This policy outlines the requirement for necessary infrastructure, including wastewater management systems, to be in place to support new developments. It ensures that housing growth is aligned with the capacity of existing or planned infrastructure to prevent overloading of systems. Policy OL09: Control of pollution Permission will not be granted for development which would result in pollution that cannot be adequately mitigated. This will include: A. Pollution of the environment by gas or particulates, including: smell, fumes, dust, grit, smoke and soot; B. Pollution of surface or underground waters, for example by untreated sewage, including discharges to:

1. Rivers, other watercourses, water bodies and wetlands;
2. Water gathering grounds including water catchment areas, aquifers and groundwater protection areas;
3. Harbours, estuaries or the sea;”

Second: The plan making process has not been in accordance with the PCPA 2004. Exmo_20 was deemed "not suitable or achievable" at site sifting stage (HELAA stage 2). It has never been either preferred or 2nd choice therefore the site was omitted from regulation 18 consultations. On 3/9/24 the site went from 'ongoing assessment' to 'allocated' and no further consideration or representation was permitted to the public or the Strategic Planning Committee despite the assessment not being complete.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Modification necessary is as follows: Remove SDO1 development within Exmouth, Maer Lane STW catchment from the Local Plan. Even if to be addressed by SWW, Ofwat processes meant that such improvements cannot be completed within 8 years. To allow development of these locations prior to infrastructure expansion is to knowingly enable, create, add to sewage pollution of Exmouth river, sea and streams.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Unsustainable Location

Allocation of EXMO_20 is in conflict with policies SP01, TR01, TR03, and paragraphs 11.2, 11.6, 3.34 and 2.6 of the Local Plan. ALLOCATION OF Exmo_20 is in conflict with policy SP01. Although Exmouth is a tier 1 town, Exmo_20 is 4 miles by car from Exmouth town centre and detached from it; it cannot be considered to be a development in Exmouth. Exmouth is totally unsuitable for further significant growth. It is on a peninsula, wedged between the river Exe and the coast. The town centre is at the south end of the peninsula making 360degree development impossible and with the large amount of existing development already sprawled a long distance from the town centre, any new development is closer to neighbouring towns & villages and therefore not development at the principal centre of Exmouth. Any development here will be a long distance from the town such that it is an unsustainable location. (POLICY SP01 proposes to promote the most significant levels of development at the principal centre of Exmouth).

ALLOCATION OF Exmo_20 is in conflict with paragraph 11.6. It is a 'larger' development and most of the site is not within 800m (approx 10 mins walk) of any existing key services and facilities. There are no plans to provide significant key services on site so residents will likely need to drive over two miles (via the B3179) to access them within Exmouth or neighbouring settlements. (PARAGRAPH 11.6 proposes that it is feasible for

larger developments to be within 800m of key services and facilities. (Studies cited in the Local Plan show that people prefer to walk if their journey is not further than 800m/10 minutes walking each way)).

ALLOCATION OF Exmo_20 is in conflict with policy TR01. Walking or cycling will not be the first choice of transport from this site for people to do their shopping/ work/ school run etc because the distance is too great. Studies cited in the Local Plan show that most people prefer to walk if their destination is within 0.5 miles, that beyond the distance of 1 mile cars are the dominant mode of travel and that beyond 2 miles trips on foot are few. Exmo_20 is significantly further than 0.5 miles or even 1 mile from essential infrastructure and services therefore walking or cycling as first choice of transport is unviable. Providing walking routes, cycle paths or public transport will do little to reduce the amount of car journeys this development would generate because the steep local topography and distance to access essential infrastructure and services is too far. It will also be a difficult location for those without car access and cause social exclusion. (POLICY TR01 proposes that walking, wheeling, cycling and public transport should be the natural first choice and that walking and cycling routes must be prioritised in new development).

ALLOCATION OF Exmo_20 is in conflict with paragraph 11.2. It will increase travel needs and necessitate cars to take longer routes. Housing is proposed at the southern end of the site whereas the main vehicular access point is at the very northern edge of the site, adjacent to the Pebblebed Heath (SAC/SPA/SSSI). Due to the mandatory 400m buffer zone to SAC/SPA/SSSI no housing is permitted within the top 400m, resulting in a very minimum of

0.5km drive just to get from the site entrance to the housing. This would result in at least 1km of 'on site' driving every time you went out anywhere and returned home. In addition to this, from the B3179 site entrance you need to drive 'around and back down' (4.0-4.3 miles) to get into Exmouth centre. Exmo_20 would increase travel needs resulting in an increased number of car journeys and requiring cars to travel more miles. (Paragraph 11.2 promotes focussing significant development at locations which are, or can be made sustainable, through limiting the need to travel and reduce traffic congestion).

ALLOCATION OF Exmo_20 is in conflict with paragraph 3.34: despite being a tier 1 settlement Exmouth does not have sufficient infrastructure and services for the existing population. Even if the proposed development brings financial contributions towards

infrastructure etc it will not add another Doctors' surgery or dentist - both of which are already insufficient for the current population of Exmouth. Neither will it provide another secondary school - within the last 3 years numerous children have had to travel to Cranbrook for secondary school provision due to there being no capacity at Exmouth Community College. The existing sewage system in Exmouth is so inadequate that sewage is discharged into the sea on a very regular basis and the beach is often closed for swimming. Exmouth's problem with sewage has been featured on national news several times, highlighting the scale of the problem it has. (PARAGRAPH 3.34 states that by directing growth to the tier 1-4 settlements their approach ensures development is concentrated in areas with existing infrastructure and services).

ALLOCATION OF Exmo_20 is in conflict with policy TR03, and figure 7 in the Local Plan. Due to Exmo_20's restricted access arrangements, the development would generate significant amounts of vehicle movements just to access services within Exmouth and the neighbouring settlements using the B3179. Due to the site's steep topography and remote location from services, any walking or cycling routes will provide limited viable alternative options to using a car. The local plan notes that congestion is a particular issue in Western East Devon, and with this site having no access to Dinan Way and the A376, the significant amounts of vehicle movements from this site will be on rural B roads, locally notorious for being congested and substandard. (POLICY TR03 states that where development is likely to generate significant amounts of vehicle movements planning permission will not be granted unless they can identify measures to secure new sustainable travel arrangements, taking into account (amongst other things) the scale of development and the availability of public transport, and walking and cycling opportunities).

ALLOCATION OF Exmo_20 is in conflict with paragraph 2.6; Exmo_20 is currently open countryside, and this is not 'modest' development. It is a 'comprehensive development scheme' within a rural part of East Devon. (PARAGRAPH 2.6 states that "Rural East Devon will retain its outstanding charm and character with modest and sensitively planned development).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: There has been a failure to comply with the duty to co-operate in relation to Exmo_20. The plan making process has not been in accordance with NPPF Chapter 3. Exmo_20 was deemed "not suitable or achievable" at site sifting stage (HELAA stager 2). It has never been either preferred or 2nd choice therefore the site was omitted from regulation 18 consultations. On 3/9/24 the site went from 'ongoing assessment' to 'allocated' and no further consideration or representation was permitted to the public or the strategic planning committee despite the assessment not being complete.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Julia Ojaim

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to express my strong objection to the application to build 700 houses under plan Exmo_20 – 20a and 20b. I fully understand the need for additional housing and for the governments drive to reach targets however I feel this site would be detrimental to the environment and to the town. Access Firstly, I would like to address the access through Southern Wood. The road was not designed as and is not suitable as a through road for up to 1000 cars. The existing infrastructure of the surrounding roads is not capable of accommodating this increased demand The comment by the developer in the vision document for “St Johns Woodland Village” implies walking and cycling would be prioritised, I think we all know this is untrue. Access for buses, which would have an increased demand, would also be very difficult. A bus service through Meadow View was cancelled a few years ago for this very reason proving this is not a sustainable option. From a safety concern Emergency Vehicles such as Fire Engines and Ambulances would without doubt have access issues. I also feel there would be a safety issue for pedestrians who would have to dismount pavements and cyclist who would have to mount roads in order to avoid cars which have been forced to park in dangerous positions. I have not seen the plans for the bridge at the bottom of the road yet and so do not know the infrastructure behind it. Where will it start? What barriers will there be? Agreed I am not an engineer, but I assume the bridge will need to be very substantial in order to carry the vehicles and materials required for the construction in the first instance then long term. Once the bridge is in place the precious parking spaces at the bottom of the road will be removed forcing more cars to park on the road. Adding to the parking issues we already have which in turn will limit the size of vehicles able to get through. When access off the Salterton Road or through the readymade Liverton Business Park is easier, more practical, and most importantly safer, I fail to see why this is not the obvious and preferred option. Impact on the environment Secondly there would be a very negative impact on the environment. A variety of wildlife, including protected species, live in the assigned development area such as not limited to

woodpeckers, bats, fox, deer, Dormice and Buzzards to name but a few. This proposal would be a destruction of their habitats. A negative effect on the local ecosystems and ecology, reduced air quality, light pollution, increased traffic, increased flood risks, and a decline in local biodiversity are just a few of the environmental repercussions all having long term effects. In addition, there will be the potential pollution from construction activities. Turning natural drainage into a concrete jungle invites a huge flood risk and with the issues Southwest Water are currently facing I feel this will only enhance the issue. They cannot cope with the waste management system as it stands today! The bridge itself could also cause a build-up of debris causing flooding. Impact on local amenities and services Lastly but by no means least is the impact on local amenities The Goodmores Development off Dinan Way is not anywhere near finished so the impact that will have on the town, in the short and long term, is unknown. With all the additional people coming to live in Exmouth there will be excessive strain on an already bowing services. Access to Healthcare, whether that be a Dr, Dentist or Hospital appointment is difficult if not impossible to get. We do not have enough Police to cover the current requirements of the town without extending the size quite dramatically. Maintaining access to essential amenities and services is crucial for the well-being and quality of life of residents. Who are buying all these houses, families with children? Therefore, schools will also be affected. If I am correct the original plans for the Goodmores development included a school, these plans were passed and I assume changed after, as there doesn't appear to be a school!!! I feel very strongly opposed to the development of Exmo_20 and would very much appreciate if my voice could be heard. Thank you for your time in reading this letter.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20, Under paragraph 5.3, page 78 of plan, states that “vehicular access, to accommodate modest levels of development, will be allowed for southern site parts from the road ‘Southern Wood’.” No information is given as to what exactly forms the ‘southern site parts’, how many houses this comprises, nor the measures that will prevent the entire site using an access point via Southern Wood. It should therefore be assumed that any entrance to the site via Southern Wood would be available to the entire site of 700 homes.

The Government Centre for Social Research published a study in June 2024 on Car Ownership that stated amongst its key findings under 1.1.1. that “the proportion of households with one car has remained at around 45% and the proportion with two or more vehicles has increased from 8% to 34%.” So it is safe to assume that with 700 homes there will be around 1000 vehicles on the proposed site of Exmo_20. It is also worth noting that the average cars per household in Southern Wood currently is more than 2 cars per household which supports the likely quantity of cars in Exmo_20. While Southern Wood is a quiet cul de sac, the road connecting it to the nearest main route is Meadow View Road which is constantly full of parked cars and at numerous points it only passable for one vehicle at a time. Vehicles have to regularly stop and give way, sometimes reversing to create space, and cars will regularly be stuck on Dinan Way, unable to even turn in to Meadow View Road.

It’s also worth noting that Meadow View Road on which had regular scheduled bus services cancelled due to lack of accessibility. It is ludicrous to think that 1000 vehicles taking an average of 2 trips per day, would not make the situation considerably worse than it already is. Any properly conducted assessment that took place around school

pick up times and rush hours would see how unfeasible Southern Wood is as an access point.

Furthermore, any access via Southern Wood would necessitate a bridge being built over Withycombe brook at the end of Southern Wood. We have not seen the plans for a potential bridge at the bottom of the road yet and so do not know the infrastructure behind it but given the positioning of the brook it would need to be substantial and inevitably seriously negatively impact Southern Wood and its residents as well and the woodland habitat surrounding the bridge.

Once the bridge is in place the precious parking spaces at the bottom of Southern Wood will be removed forcing more cars to park on the road, adding to the parking and road accessibility issues already faced by existing residents.

When access through the ready built Liverton Business Park via B3179 is easier, more practical and most importantly safer, I fail to see why any other entrance is required, particularly given the impact.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Do not consider any access point to Exmo_20 via Southern Wood. Instead rely solely on the B3179 access via Liverton Business Park.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am a local resident whose family live near to the proposed site of Exmo_20. I therefore have a vested interest and would like to be present for any and all hearing related to this site.

Full name: Julia Ojaim

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with paragraph 11.2. It will increase travel needs and necessitate cars to take longer routes. Housing is proposed at the southern end of the site whereas the main vehicular access point is at the very northern edge of the site, adjacent to the Pebblebed Heath (SAC/SPA/SSSI). Due to the mandatory 400m buffer zone to SAC/SPA/SSSI no housing is permitted within the top 400m, resulting in a very minimum of 0.5km drive just to get from the site entrance to the housing. This would result in at least 1km of car travel through the development each time residents leave their home and returned.

In addition to this, from the B3179 site entrance you need to drive 'around and back down' (4.0-4.3 miles) to get into Exmouth centre. Exmo_20 would increase travel needs resulting in an increased number of car journeys and requiring cars to travel more miles. With a large development of around 700 homes and noting the UK average of 1.29 cars per household, the proposed development would lead to around 1000 additional cars hugely increasing congestion and pollution in the area which directly contradicts Paragraph 11.2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20

from the Local Plan and instead look to develop a far more suitable location close to existing amenities and transport links.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am a local resident and my family, who live very near to the proposed site of Exmo_20, will be severely impacted if the planned development goes ahead. Therefore I would like to be present for any and all hearings.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The plan has not been in accordance with the PCPA 2004 Section 33A. Exmo_20 was deemed not suitable or achievable at site sifting stage (HELAA stage 2). It has never been either preferred or 2nd choice therefore the site was omitted from regulation 18 consultations with Devon County Council.

Paragraph 17 – HELAA assessment concluded that the proposed site for Exmo_20 was “Available but not suitable or achievable” [appendix E(v)1]. However the Sustainability Appraisal Report states that Exmo_20 was assessed as suitable, available and achievable in the HELAA” which is incorrect. A key process for the site selection has not been adhered to by EDDC and an incorrect outcome of a report recorded.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am a local resident living close to the proposed site of Exmo_20 and will be very negatively impacted if the development goes ahead. I would like to be present for any/all hearings related to this site.

Full name: Julia Ojaim

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The plan making process has not been in accordance with the PCPA 2004. Exmo_20 was deemed "not suitable or achievable" at site sifting stage (HELAA stage 2). It has never been either preferred or 2nd choice therefore the site was omitted from regulation 18 consultations. On 3/9/24 the site went from 'ongoing assessment' to 'allocated' and no further consideration or representation was permitted to the public or the Strategic Planning Committee despite the assessment not being complete.

Exmo_20 directly contradicts Chapter 17, paragraph 17.1 of the local plan which states that sites must be "Suitable for residential development according to Local Plan and NPPF policies."

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Find an alternative site(s) because Exmo_20 was deemed "not suitable or achievable" at site sifting stage (HELAA stage 2).

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am a local resident living close to the proposed site of

Exmo_20 and will be very negatively impacted if the development goes ahead. I would like to be present for any/all hearings related to this site.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with policy AR01(B). Turning the natural drainage the site current provides through trees and grassland into a concrete jungle invites a huge flood risk, particularly to all of the existing houses and businesses bordering Withycombe Brook.

The proposed site of Exmo_20 sits upstream of Exmouth on the main rainwater catchment area of Withycombe Brook. The subsoil is heavy clay, the impermeable nature of which makes soakaways ineffective and the land is often waterlogged. Building on this steep site would significantly exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Withycombe. In addition there will be the potential pollution added to flood waters from construction activities.

A site entrance via Southern Wood has been included in the plan for Exmo_20 that would require a large bridge to be built over Withycombe Brook that runs along the end of Southern Wood (it would NOT be possible to access the site from Southern Wood without a bridge being built). Withycombe Brook regularly floods and there has been land erosion as a result of flooding to the area at the bottom of Southern Wood where the bridge would need to be built and surrounding homes. The bridge itself could also cause a build up of debris causing further flooding.

A nearby development, Goodmores, is still under construction and we are already seeing swathes of mud and flood water covering areas of the main access road that is Dinan Way. Water run off from Exmo_20 would inevitably compound this issue due to the location of the proposed site.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation Exmo_20 is in conflict with paragraph 3.30. The settlement boundary around Exmouth has been deliberately extended to include not only the land which housing will be built on but also to include the 400m buffer zone adjoining the Pebblebed Heaths Nature Reserve, therefore changing the definition of this land to be acceptable for development. Although housing cannot be built on the buffer zone, by including it within the settlement boundary it is available for other kinds of development. This is contradictory to the precautionary approach as the plan fails to robustly protect against adverse effects of recreational use etc on the Pebblebed Heaths.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with policy OL05 as it would effectively join the town of Exmouth and Budleigh Salterton by removing the green belt currently separating the towns – very definition of coalescence being “the joining or merging of elements to form one mass or whole.”

The primary access point to Exmo_20 is 4 miles from the centre of Exmouth and only 2.2 miles from the centre of Budleigh Salterton, making Budleigh significantly more accessible to the development. The access arrangement for the site leads naturally down the road into Budleigh Salterton High Street whereas to get into Exmouth means travelling twice the distance and having to go around the edge of Exmouth to get back down in to it.

The High Street, Doctor’s surgery, primary school, beach etc in Budleigh Salterton would be the most accessible, nearest and therefore the obvious choices for residents of Exmo_20. Currently Exmouth and Budleigh are separated in terms of functionality but this development would merge the two towns, with residents living in one town whilst relying on the already over stretched day-to-day services and infrastructure of the other.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with policy OL01. The proposed site of Exmo_20 is distinctive for its dark skies, tranquillity and wildness. In addition to light that will inevitable be produced from the housing and lamp posts on the development itself, the main site access point being at the B3179, directly opposite the SPA/SAC/SSSI would cause a significant flow of car headlights destroying the darkness across the entire length of the site and all shining directly onto the Heaths as vehicles exit the site.

The area around the neighbouring St John in the Wilderness church is characterised by dark skies and a strong sense of remoteness and tranquillity, a 'wilderness' setting integral to the grade II* listed church which would be harmed by having a housing development surrounding it, regardless of a buffer zone being left. This will also have a negative impact on church goers and those with loved ones in the surrounding cemetery.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan and instead look to develop a far more suitable location.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am a local resident living close to the proposed site of Exmo_20 and will be very negatively impacted if the development goes ahead. I would like to be present for any/all hearings related to this site.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with paragraph 13.9. The NATIONAL PLANNING POLICY FRAMEWORK defines ‘irreplaceable habitat’ as “habitats which would be technically very difficult (or take a significant time) to restore, recreate or replace once destroyed”. Exmo_20 will cause loss of long established and irreplaceable habitats.

The woodland on the site has a great number of mature trees, many of which show signs of veteranisation. These provide unique micro habitats and their loss cannot simply be mitigated by planting new trees that would take hundreds of years to mature and are unlikely to ever achieve the same level of biodiversity.

We have already seen healthy veteran trees being felled on the proposed site of Exmo_20 to produce pathways from what was previously dense and undisturbed woodland. These newly created pathways have been since described as ‘naturally occurring’ which is absolutely incorrect.

The Exmo_20 site also contains many long established hedgerows, the lengths of which are considerable. The trees and hedgerows have high intrinsic biodiversity value providing habitats and wildlife corridors, and although space can be left around them, degradation and fragmentation of habitat is unavoidable.

Nightjar are a qualifying feature of the East Devon Heaths SPA, and studies show that these birds fly up to 7km from nesting sites to feed at night. Loss of foraging habitat or

disruption of routes to feeding areas could undermine the conservation objectives of the SPA.

Exmo_20 lies within an identified 'Strategic Nature Area' (SNA 368) on the Nature Recovery Network, part of the Local Nature Recovery Strategy aimed at combining existing wildlife sites and extending habitats. It provides connecting habitats and wildlife corridors between the Pebblebed Heaths Nature Reserve at the north of the site through to the woodland at the south and beyond, all of which would be adversely impacted by the development of Exmo_20.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan and instead look to develop a far more suitable location which would not remove or reduce irreplaceable habitats.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am a local resident living close to the proposed site of Exmo_20 and will be very negatively impacted if the development goes ahead. I would like to be present for any/all hearings related to this site.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with policy OL09. The proposed site of Exmo_20 is along the boundary of Pebblebed Heaths Nature Reserve. The Pebblebed Heaths Conservation Trust was established by Clinton Devon Estates in 2006. Its creation was in response to increasing national and European recognition that lowland heathlands are a habitat rich in wildlife, are highly threatened, and require professional management to maximise their wildlife value.

The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA)”. This is due to the primary access to Exmo_20 being into B3179 which would send traffic along the boundary of the Pebblebed Heath.

The entire proposed site of Exmo_20 is currently home to a large variety of wildlife (some of which are protected species) including woodpeckers, bats, fox, deer, dormice and buzzards to name but a few. This proposal would lead to a destruction of their natural habitats and have unknown but certainly negative impact on the neighbouring nature reserve and on the local ecosystems and ecology, reduce air quality, increase light pollution, increase flood risks, and see a significant decline in local biodiversity. In addition there will be the potential pollution from construction activities.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. 1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with paragraph 2.6; Exmo_20 is currently open countryside, what is now green fields and historic woodland with an abundance of wildlife will be replaced with 700 houses and roads, a 'comprehensive development scheme' within a rural part of East Devon.

The rural, natural site is currently home to a large variety of wildlife (some of which are protected species) including woodpeckers, bats, fox, deer, dormice and buzzards to name but a few. This proposal would lead to a destruction of their natural habitats.

The development of Exmo_20 would have a very negative effect on the local ecosystems and ecology, reduce air quality, increase light pollution, increase flood risks, and see a significant decline in local biodiversity. In addition there will be the potential pollution from construction activities.

Turning natural drainage into a concrete jungle, particularly with huge numbers of trees being removed, invites a severe flood risk and with the issues South West Water are currently facing with sewerage this will only enhance the issue.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: · Remove Exmo_20 from the Local Plan and instead look to develop a far more suitable location.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am a local resident living close to the proposed site of Exmo_20 and will be very negatively impacted if the development goes ahead. I would like to be present for any/all hearings related to this site.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with paragraph 3.34: despite being a tier 1 settlement Exmouth does not have sufficient infrastructure and services for the existing population. With all the additional people coming to live in Exmouth there will be excessive strain on an already bowing services.

Even if the proposed development brings financial contributions towards infrastructure etc it will not add another Doctors surgery or dentist - both of which are already insufficient for the current population of Exmouth. GPs in Exmouth are already facing wait times of 3+ weeks to acquire an appointment. Similarly does not have enough Police resource to cover the current requirements of the town without extending the size dramatically.

The proposed development on Exmo_20 does not include provision for another primary or secondary school - within the last 3 years numerous Exmouth children have had to travel 30-40 mins to attend school in Cranbrook due to there being no capacity at Exmouth Community College. The original plans for the nearby Goodmores development included a primary school which has yet to even begin development, further increasing strain on local schools.

The existing sewerage system in Exmouth is so inadequate that sewage is discharged into the sea on a very regular basis and the beach is often closed for swimming. Exmouth's problem with sewerage has been featured on national news several times, highlighting the scale of the problem it has. Other developments have added significantly to the sewerage problem in recent years. The Goodmores Development (off

Dinan Way in Exmouth) is not anywhere near finished so the impact that will have on the town, in the short and long term, is unknown. However, increased flooding and sewerage issues have increased since the build went ahead.

Maintaining access to essential amenities and services is crucial for the well-being and quality of life of existing residents.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with policy TR03, and figure 7 in the Local Plan.

The proposed location on Exmo_20 and its distance from amenities means that there are no viable options to create sustainable travel alternatives to using cars. Research findings around the distances from the site to local services show that using cars will be by far the preferred choice of transportation for residents which directly contradicts Policy TR03.

Due to Exmo_20's restricted access arrangements, the development would generate significant amounts of vehicle movements just to access services within Exmouth and the neighbouring settlements using the B3179. Due to the site's steep topography and remote location from services, any walking or cycling routes will provide limited viable alternative options to using a car. The local plan notes that congestion is a particular issue in Western East Devon, and with this site having no direct access to Dinan Way and the A376, the significant amounts of vehicle movements from this site will be on rural B roads, locally notorious for being congested and substandard.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am a local resident living close to the proposed site of

Exmo_20 and will be very negatively impacted if the development goes ahead. I would like to be present for any/all hearings related to this site.

Full name: Julia Ojaim

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with paragraph 11.2. It will increase travel needs and necessitate cars to take longer routes. Housing is proposed at the southern end of the site whereas the main vehicular access point is at the very northern edge of the site, adjacent to the Pebblebed Heath (SAC/SPA/SSSI). Due to the mandatory 400m buffer zone to SAC/SPA/SSSI no housing is permitted within the top 400m, resulting in a very minimum of 0.5km drive just to get from the site entrance to the housing. This would result in at least 1km of 'on site' driving every time you went out anywhere and returned home. In addition to this, from the B3179 site entrance you need to drive 'around and back down' (4.0-4.3 miles) to get into Exmouth centre. Exmo_20 would increase travel needs resulting in an increased number of car journeys and requiring cars to travel more miles. With a large development of around 700 homes and noting the UK average of 1.29 cars per household, the proposed development would lead to around 1000 additional cars hugely increasing congestion and pollution in the area which directly contradicts Paragraph 11.2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan and instead look to develop a far more suitable location close to existing amenities and transport links.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am a local resident living close to the proposed site of Exmo_20 and will be very negatively impacted if the development goes ahead. I would like to be present for any/all hearings related to this site.

Full name: Julia Ojaim

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with policy TR01. Walking or cycling will not be the first choice of transport from this site for people to do their shopping/ work/ school run etc because the distance is too great. Studies cited in the Local Plan show that most people prefer to walk if their destination is within 0.5 miles, that beyond the distance of 1 mile cars are the dominant mode of travel and that beyond 2 miles trips on foot are few. Exmo_20 is significantly further than 0.5 miles or even 1 mile from essential infrastructure and services therefore walking or cycling as first choice of transport is unviable. Providing walking routes, cycle paths or public transport will do little to reduce the amount of car journeys this development would generate because the steep local topography and distance to access essential infrastructure and services is too far.

It will also be a difficult location for those without car access and cause social exclusion.

It is also worth noting that the existing infrastructure of the surrounding roads is not capable of accommodating the increased demand that Exmo_20 would cause. Access for buses, which would have an increased demand, would also be very difficult. A bus service through Meadow View Road (next to the proposed site) was cancelled a few years ago for this very reason proving this is not a sustainable option. From a safety concern Emergency Vehicles such as Fire Engines and Ambulances would without doubt have access issues.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am a local resident living close to the proposed site of Exmo_20 and will be very negatively impacted if the development goes ahead. I would like to be present for any/all hearings related to this site.

Full name: Julia Ojaim

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with paragraph 11.6. It is a 'larger' development and most of the site is not within 800m (approx 10 mins walk) of any existing key services and facilities. The minimum walk to the nearest shop is 20-25 minutes.

There are no plans to provide significant key services on site so residents will likely need to drive over two miles (via the B3179) to access them within Exmouth or neighbouring settlements.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan in favour of more suitable locations.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am a local resident living close to the proposed site of Exmo_20 and will be very negatively impacted if the development goes ahead. I would like to be present for any/all hearings related to this site.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with policy SP01. Although Exmouth is a tier 1 town, the proposed development of Exmo_20 is 4 miles by car from Exmouth town centre and detached from it; it cannot be considered to be a development in Exmouth. It is closer to neighbouring towns than the centre of Exmouth. Exmouth is totally unsuitable for further significant growth. It is on a peninsula, wedged between the river Exe and the coast. The town centre is at the south end of the peninsula making 360degree development impossible and with the large amount of existing development already sprawled a long distance from the town centre, any new development is closer to neighbouring towns & villages and therefore not development at the principal centre of Exmouth, directly conflicting with the policy SP01. Any development here will be a long distance from the town such that it is an unsustainable location.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan, instead look to develop much smaller sites closer to the principal centre of Exmouth OR other sites across East Devon.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am a local resident living close to the propped site of Exmo_20 and will be very negatively impacted if the development goes ahead. I would like to be present for any/all hearings related to this site.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: ?

The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA).

Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy.

? Exmo_20 would destroy the “tranquillity, wildness and dark skies” of the countryside, which is contrary to POLICY OL01.

? Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9

? The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04.

? Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02.

? Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It

would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

? Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

? The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Don't go for the easy and cheap option of building on green belt land. Find a previously used site, such as a derelict/demolished house, car park. Or even better, go down the much harder, less environmentally destructive route of wondering why we are building homes for a population with a decreasing birth rate and address the cause for an increasing population despite this. Once developments are in place, they are never reversed. I honestly cannot believe that housing would be even contemplated so close to our pebble bed heaths.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Timothy Osullivan

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This area of land is considered to be the natural transition between the town and the common land , in destroying it means it will alter the common land in all respects. The landowners have already ruined the Maer Valley and this will only result in another great loss which will also result in complete over population of the area.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: It would be better to just extend Littleham instead .

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: INCREASED FLOOD RISK Submit this under Chapter 5 - policy SD01. Select ‘No’ to being sound. Allocation of Exmo_20 is in conflict with policy AR01(B) as it will significantly increase and exacerbate flood risk to neighbouring areas. The significant levels of proposed development on a steep site that is upstream of Exmouth and drains into the Withycombe Brook is of serious concern to current residents who already note the added volumes and rates of flow on the brook, with implications for erosion, flooding and risk to life when managing (see attached photograph from winter 2024/25 – the stream is typically ankle deep). There is a lot of existing natural and physical infrastructure along this brook that cannot accommodate increased run-off from the adjacent areas (e.g., woodlands adjacent to and access roads over the stream). Increased flooding would damage mature trees next to the stream and cause water logging of gardens and 1 acre of mature wildflower meadow in our property. Furthermore, water flow over winter is already noticeable increasing in intensity and will

continue to do so with climate change all of which would be significantly exacerbated by such extensive proximate development

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. NATURAL ENVIRONMENT

Allocation of Exmo_20 is in conflict with PB01 and its proposed mitigation strategy. The Regardless of any proposed buffer the sites as a whole is still likely to have a direct and indirect adverse impact on the sensitive and unique Pebblebed Healths, which are nationally and internationally designated sites (SAC/SPA). Exmo_20a in particular was a recent addition to the Local Plan proposal (with the most direct impact), suggesting that alternative sites are available but were only excluded because councillors in other towns fixated on this site as a single, large-scale solution. Exmo_20 is in conflict with OL09 that states that permission will not be given for developments which result in pollution that cannot be adequately mitigated. The lack of connectivity between Exmo_20 and accessible and safe walking, cycling and public transport (train) will lead to additional use of vehicles and their concentration along B3179. The Habitats

Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA)”. Developments at this site would not be able to sufficiently mitigate for this impact. Exmo_20 is in conflict with paragraph 2.10 of the Local Plan and objective 8 to “protect and enhance our outstanding natural environment and support an increase in biodiversity”. The site is teeming with wildlife (bats, birds, foxes, deer, badgers), insects, flowers and mature trees, as well as being adjacent to SAC/SPA/SSSI locations. The scale of the proposed development (700 + houses) would not allow these adverse environmental impacts (biodiversity and carbon emissions) to be mitigated onsite or through alternative sites for Biodiversity Net Gain and NetZero obligations. Exmo_20 is in conflict with paragraph 13.23 of the Local Plan, which recognises that East Devon has a fragmented landscape of natural habitat and need to maintain habitat connectivity for its biodiversity. The Exmo_20 area connects habitats and provides wildlife corridors between the Pebblebed Heaths and the southern woodlands. We often see wildlife traverse our property and the adjacent fields and woodlands. Our property adjacent to the proposed Exmo_20 has bat roosting, evidence of badger activity and frequent deer transiting up and down the stream. Previous ecological studies are available if required. Moreover, the site lies within the 'Strategic Nature Area' (SNA 368) on the Nature Recovery Network part of the Local Nature Recovery Strategy, which would be entirely disrupted by development within Exmo_20. Finally, the designation of the East Devon Heaths SPA is based on qualifying features / species such as the Nightjar which has a range of 7Km from nesting to feeding grounds. Loss of foraging habitat or disruption of routes to feeding areas could undermine the conservation objectives of the SPA. Exmo_20 is in conflict with paragraph 13.9 of the Local Plan which aims to protect irreplaceable habitats and important features. The proposed site contains the pebblebed heaths, significant numbers of mature trees, important waterways and long-standing hedgerows that would be “technically very difficult (or take significant time) to restore, re-create or replace once destroyed” (National Planning Policy Framework). Exmo_20 is in conflict with OL01 which prohibits development that would “harm the aesthetic and perceptual factors such as “tranquillity, wildness and dark skies”. The location of the site, its scale and the added vehicle traffic along B3179 would damage all of these important features of this rural location on the outskirts of Exmouth. Notably, the pebblebed heath (SPA/SAC/SSSI) and St John in the Wilderness church would be adversely impacted by the loss of dark skies, tranquillity and wilderness. Our property adjacent to the proposed Exmo_20 has approximately 1 acre of mature wildflower meadow, bat roosting, evidence of badger activity with deer transiting up and down the stream. Previous ecological studies are available if required.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Exmo_20 has rightly been excluded from previous Local Plans for Exmouth and was deemed “not suitable or achievable” at site sifting stage for the current local plan (HELAA Stage 2). It was never considered a ‘preferred’ or ‘2nd choice’ site and was omitted from Regulation 18 consultations with Devon County Council. This is in direct contravention of PCPA 2004 Section 33A

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Louisa Owen

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Exmo_20 has rightly been excluded from previous Local Plans for Exmouth and was deemed “not suitable or achievable” at site sifting stage for the current local plan (HELAA Stage 2). It was never considered a ‘preferred’ or ‘2nd choice’ site and was omitted from Regulation 18 consultations. Under pressure from councillors in other wards (Lypstone most notably), the site went from 'ongoing assessment' to 'allocated' on 3rd Sept 2024 and no further consideration or representation was permitted to the public or the strategic planning committee despite the assessment not being complete. This is in direct contravention of PCPA 2004

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: COALESCENCE BETWEEN BUDLEIGH AND EXMOUTH Submit this under Chapter 5 - Policy SD01. Select ‘No’ to being sound. Allocation of Exmo_20 is in conflict with policy OL05 as it encourages settlement coalescence. The main access point to Exmo_20 is 4 miles from the centre of Exmouth and only 2.2 miles from the centre of Budleigh Salterton, making Budleigh significantly more accessible to the development. The High Street, Doctor’s surgery, primary school, beach etc in Budleigh would be the most accessible and obvious choices for residents of Exmo_20. Currently Exmouth and Budleigh are separated in terms of functionality but this development would merge the two, with residents living in one town whilst relying on day-to-day services and infrastructure of the other.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Exmo_20 has rightly been excluded from previous Local Plans for Exmouth and was deemed “not suitable or achievable” at site sifting stage for the current local plan (HELAA Stage 2). Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Exmo_20 has rightly been excluded from previous Local Plans for Exmouth and was deemed “not suitable or achievable” at site sifting stage for the current local plan (HELAA Stage 2). It was never considered a ‘preferred’ or ‘2nd choice’ site and was omitted from Regulation 18 consultations. Under pressure from councillors in other wards (Lympstone most notably), the site went from 'ongoing assessment' to 'allocated' on 3rd Sept 2024 and no further consideration or representation was permitted to the public or the strategic planning committee despite the assessment not being complete. This is in direct contravention of PCPA 2004.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Exmo_20 needs to be removed from allocation in the Local Plan as legal compliance cannot be re-gained retrospectively.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
UNSUSTAINABLE LOCATION

1. Allocation Exmo_20 is in conflict with policy SP01. Although Exmouth is a tier 1 town, Exmo_20 is 4 miles by car from Exmouth town centre and detached from it; it cannot be considered to be a development in Exmouth. New development is closer to neighbouring towns & villages and therefore not development at the principal centre of Exmouth.

2. Exmouth_20 is in conflict with Local Plan paragraph 11.6, which suggests new developments within 800m of key services and facilities should be feasible in larger settlements and developments. This is not the case for current housing surrounding the proposed Exmo_20 site and would not be the case for any new development in that area. The only facility within walking distance currently is Bassets Farm primary school (and Exmo_20 would be further away from this). No other facilities or services (shops, vets, doctors, dentists, garages) are within 800m so walking is not an option. Nor are the cycling routes safe enough to allow from this mode of transport from the area.

3. Exmo_20 is also in conflict with Local Plan paragraph 3.34 which assumes that Tier 1 settlements provide sufficient existing infrastructure and services. This is not the case in Exmouth which has well established limitations in critical services including the secondary school, sewage infrastructure and doctors and dentists. The proposed development would not address these key deficiencies in local infrastructure and services.

4. Exmo_20 is in conflict with policy TR01, TR03, Local Plan paragraph 11.2 and the National Planning Policy Framework which requires East Devon District Council to focus “significant development on sustainable locations that reduce travel needs and offer transport choices”. This planned location is more than 1 - 4 miles from critical central infrastructure (including local employment and the train station). Residents will be reliant on car travel (which will add a significant burden with over 700 houses proposed), with access routes into and out of the site requiring people to travel around the site before heading into Exmouth town centre. The site is not well connected to existing walking, cycling and public transport links that are already deficient for the surrounding areas and hampered by surrounding roads that are unsafe for cycling (Dinan, Salterton and Outer Ting Tong). Providing these within the site would not address issues of connectivity to the rest of Exmouth. Those without access to a car, particularly younger and older generations, will find living in this location challenging and exclusionary. In accordance with TR03, this would mean that even if Exmo_20 was included in the Local Plan, planning permission would not be granted because the development cannot feasibly mitigate for significant increases in vehicle movements particularly given the proposed scale of development.

5. Exmo_20 is in conflict with Local Plan paragraph 2.6 which states that only modest and sensitively planned development will be supported to ensure Rural East Devon retains its outstanding charm and character. This Exmo_20 is the among the most rural locations in Exmouth and this development is not modest or sensitive. The proposal put forward by the land-owners and developers for this site is false impression of a 700 house site, and is not in keeping with their track-record on development in Exmouth (e.g., Goodmores is not in keeping with a charming Rural East Devon).

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Exmo_20 has rightly been excluded from previous Local Plans for Exmouth and was deemed “not suitable or achievable” at site sifting stage for the current local plan (HELAA Stage 2). It was never considered a ‘preferred’ or ‘2nd choice’ site and was omitted from Regulation 18 consultations with Devon County Council. This is in direct contravention of PCPA 2004 Section 33A.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Because I do not trust the consultation and planning processes as they have evolved so far. I object to Exmo_20 inclusion on multiple grounds and believe that councillors who went against the advise of planning officers did so without due concern for policy consistency or legal requirements for legal compliance and duty to co-operate.

Full name: Janet Palmer

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA). Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy.

? Exmo_20 would destroy the “tranquillity, wildness and dark skies” of the countryside, which is contrary to POLICY OL01.

? Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9

? The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04.

? Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02.

? Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

? Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

? The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

?

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: n/a

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I fundamentally oppose the continual addition of substantial expensive housing developments on green field sites on the edge of Exmouth. There are many empty buildings in the centre town that could be redeveloped to provide the affordable housing required by local people. It is also clear that the amenities within Exmouth are at breaking point, especially sewerage and significant additional housing will only exasperate the current shameful situation. There are large businesses in locations like Withycombe and Pound Lane that should be relocated and replaced with affordable housing so that large, dangerous vehicles used by and delivering to these businesses are not sharing narrow roads with children walking to and from school, etc. if additional housing on the edge of Exmouth is unavoidable, care must be taken to retain green space within the town, not cramming in new houses into every corner possible, and developing additional parks, and safe cycle ways and walk ways.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Simon Pardoe

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_17 is on National Landscape land - this would set a terrible precedent

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_17 from plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Ivan Parker

Other party name (if relevant): Richard Parker

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 should be located elsewhere where it would cause less or no harm to the Pebblebed Heaths.(SAC/SPA). Developing Exmo_20 is contrary to POLICY PB01 of the local plan and at variance with the mitigation strategy. Exmo_20 would destroy the "tranquility, wildness and dark skies" of the countryside which is contrary to POLICY OL01 Developing Exmo_20 would destroy wildlife corridors and fragment and isolate habitats contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, mature and ancient trees and species rich hedgerows throughout the site, contrary to PARAGRAPH 13.9

The Habitats Regulations assessment (30.01.25) confirms that there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to ... air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 conflicts with POLICY OL09 and POLICY PB04.

St. John's in the Wilderness is an ancient oasis of calm on the edge of the town. Exmo_20 would destroy this, drastically altering the peaceful setting which currently exists. This is contrary to POLICY HE02.

Exmo_20 is on the rainwater catchment area of Withycombe Brook. In the 1960s the area of Exmouth known as The Collony, parts of Exeter Road and the lower parts of adjacent roads such as Withcombe Road and Park Road were flooded twice in quick succession, causing much damage and loss. This flooding was substantially caused by

the run off of surface water down the Withycombe Brook valley.Exmo_20 would exacerbate the flood risk which already exists. This is in conflict with POLICY AR01B

Exmo_20 is isolated and people would have to travel much further than 800m to access existing key services and facilities, contrar to PARAGRAPH 11.6 It is too far from any town centre and too steep for people to choose eslking or cycling as their mode of transport. This is contrary to POLICY TR01 and it would increase reliance on car travel, thus increasing traffic congestion, in conflict with PARAGRAPH 11.2

The main access point to Exmo_20 is much closer to Budleigh Salterton than it is to Exmouth, making Budleigh its most convenient and accessible town so the services and infrastructure of Budleigh such as shops, Doctors leisure and sporting facilities would be the obvious first choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth contrary to POLICY OL05 of the Local Plan,

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Ideally Exmo_20 should be removed from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Sian Parker

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA). Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy.

? Exmo_20 would destroy the “tranquillity, wildness and dark skies” of the countryside, which is contrary to POLICY OL01.

? Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9

? The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04.

? Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02.

? Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

? Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

? The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Do not access site via Southern Wood. Southern and Meadow view road are not adequate enough to maintain the volume of increased traffic.

The recent impact of temporary traffic lights when gas was being updated caused congestion from Dinan way entrance and into meadowview, tailing back and around meadowview road and that was with just the number of cars that streets have now.

The removal of all trees from the brook area of Southern Wood will be a breach of the Forestry commission license.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: The direct effect to us as residents.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Development of Exmo_20 on heavy clay subsoil with ineffective soakaways, would exacerbate the already identified downstream flood risk along Withycombe Brook through Exmouth, which is already under additional pressure from climate change. This is in conflict with POLICY AR01B. ? Exmo_20 would increase the need for car travel, contrary to Figure 7 – the energy hierarchy, and increase traffic congestion, in conflict with PARAGRAPH 11.2. The isolated location provides unsustainable development as residents would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre to use walking or cycling as their choice of transport. This is contrary to POLICY TR01. An alternative site to Exmo_20 for housing allocation should be selected, one which was deemed available, achievable & suitable in the HELAA. Exmo_20 would cause harm to the adjacent Pebblebed Heaths (SSSI/SAC/SPA/NNR) due to Exmo_20 being a supporting foraging habitat. Allocating Exmo_20 is contrary to the HELAA, the Site Selection Methodology & POLICY PB01 of the local plan and not in accordance with the Mitigation Hierarchy to select avoidance over mitigation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan Do not access the site via the B3179 Do not access the site via Southern Wood Revert to Exmo_20b as previously proposed.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

- The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA). Exm_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy.

- ??Exmo_20 would destroy the "tranquillity, wildness and dark skies" of the countryside, which is contrary to POLICY OL01.

- Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9. The Habitats Regulations assessment (30.01.25) confirms that there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality" (East Devon Pebblebed Heaths SAC/SPA).

- EXM_20 is in conflict with POLICY OL09 and POLICY PB04.

- EXM_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Withycombe. This is in conflict with POLICY ARO1B. I am also concerned about the sewage situation as the sewers are already struggling leading to illegal discharges into the rivers and sea.

- Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. The one lane road through Woodbury will not cope with this level of traffic. It is unsustainable development. It is isolated and people would

need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

- The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents. It is proposed as an Exmouth development but in reality will detrimentally impact Budleigh and Woodbury.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Significantly reduce the size of the development proposed, and increase local infrastructure/ roads/ sewers to cope with the increased pressures. The entrance to the site should also be repositioned away from Pebblebedheaths.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To oppose the build, of the residential housing and the destruction of a cul-de-sac, as a through road? LOCAL AUTHORITY *** Personal details have been removed ***

DATE: 9th March 2025

Dear Sir

I am writing to object to the planning application ref: EXMO20a/20b St Johns, concerning the proposed new housing scheme, of (700 homes) with site access through Southernwood, (currently a Cul-De-Sac) and Meadow View Road. Having been at 1 Southernwood since July 1994, we feel that the planned access through the Cul-de-sac will have a detrimental impact on Lower Veiges Plantation, mainly on the wildlife in this area, covered under the Wildlife Countryside Act 1981, the habitat of various protected species in this area.

So we wish to object to the aforementioned application based on the following grounds.....

Wild Orchids “The Wildlife and Countryside Act of 1981 protects wild orchids in the UK under Section 13, which makes it illegal to intentionally uproot or destroy any wild plant without permission”

Yellowhammers Protected under the Wildlife and Countryside Act 1981 “Conservation status, Yellowhammers are a UK Birds of Conservation Concern Red List species. Their population has declined by 54% between 1970 and 2015. This is due to a number of factors, including the removal of hedgerows, the loss of winter stubbles, and the efficiency of modern farming machinery”

Otters Protected under the Wildlife & Countryside Act 1981, plus Conservation of Habitats and Species Regulations 2017 – “Planning authorities must consider the conservation of protected species and habitats when reviewing planning applications.

Depending on the potential impact of the development, the planning authority may require a survey to be undertaken”

Bats - in the UK are protected by law as European protected species (EPS) Legal protection- Legislation dictates that any structures or place which a bats use for shelter or protection are protected from damage or destruction whether occupied or not. This legislation has been incorporated into planning policies. This means that planning authorities have a legal obligation to consider whether bats are likely to be affected by a proposed development.

Ring Necked Parakeets – Protected by the Wildlife & Countryside Act 1981, these birds have been seen roosting and flying the with many magpies, they are now breeding successfully in the Veiges Plantation area This is just a very small list of animal/plants on the protected list to be found in the vicinity of Southernwood brook. Cul-de-sacs were designed for a small number of properties to enjoy quiet, safe area for outside play for children with low vehicle emissions, low traffic and most of all low traffic noise, this was the main decision in our choice for buying 1 Southernwood. The use of access through Southernwood (currently a Cul-de-sac) would increase: Excess pollution, excess noise, road surface damage, parking restrictions, a dangerous area for residents and dog walkers, desecration of the wildlife and the brook, loss of privacy, highway safety, nature conservation The residents and community residing under the proposed housing scheme feel strongly that this extensive housing development will also be affected due to the lack of infrastructure missing from Exmouth, SWW unable to support the area, due to the continuous failure of the current waste pumping stations, no fully managed Police Station for the excess crime that will incur, failure for new Dr surgeries, and waiting times for appointments will increase, we have no hospital, a problem with the NHS dental system, and most of all a necessity for a new infant and junior schools, not forgetting more nursery's for the 0-5 years to now accommodate the Governments free early years placements.

Regards *** Personal details have been removed ***

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

RESIDENT'S RESPONSE TO EAST DEVON LOCAL PLAN – 2020-2042 The East Devon Local Plan 2020-2042 document is an impressive piece of work in terms of scope and presentation. At 270 pages long this document is quite a challenging read for residents. I have concerns about some aspects that are woven into the sections on development in towns and villages, sustainable transport and landscape as they apply to the Exmouth area. The total number of houses to be allocated to East Devon is quite staggering - 2634 houses for Exmouth and Lympstone. The Plan does not clearly articulate why so many houses are required. It may be the new government policy to increase housing supply but there is no evidence of the council challenging the figures. Based on previous government's housing calculations that were applied around 15 years ago these must be considered as is suspect. The proposals for development at the West End and the possibility of a new community towards the Airport/Cranbrook makes sense but the worrying issue is the unrealistic plans for local communities and degradation of open countryside. Such an exponential increase in housing will be to the detriment of existing residents who will see their quality of life significantly degraded. The shortcomings of the A376 linking the Exmouth area to the M5 motorway and Exeter appear to have been omitted, as this issue has been for the past 50 years. This road is quite inadequate for the traffic flows resulting from current exponential housing developments, before additional transport resulting from proposed developments takes to the roads. It is amazing that the Highways Department in DCC continues to support housing development proposals. The prospect of not being able to do anything about this key transport artery should halt future major housing development in the Exmouth area apart from minor infill sites until road access is improved. Some of the issues raised here are equally applicable to encroachment into the green belt and the open countryside in other locations in East Devon. As a resident in Lympstone parish my focus is primarily on site Lympstone_07 because there is considerable history linked to this site going back some 15 years. It is an example of how the council has chosen to bypass the long-standing views of residents, the Lympstone Neighbourhood Plan and a previous ruling by the Planning Inspectorate in 2015. Site Lymp_07 In selecting this site

as suitable for Housing and Employment, East Devon District Council may have misinterpreted the provision of the National Planning Policy Framework (NPPF). Although this document was updated with minor changes by the incoming Labour Government, it did not change the protections afforded to green belt and development in open countryside. The site is not within the defined settlement boundary and is an example of inappropriate development. This site has been the subject of a number of planning applications, all of which were turned down during the period ca. 2010 to 2015. In this respect, the arguments against development have been well articulated and available in the public record. It is appropriate at this stage of the EDLP process to reinforce why the council should not have selected this particular site as suitable for Housing and Employment. The reasons are:

- **Location.** Lymestone_07 sits in the middle of the green wedge between Exmouth and Lymestone Village. It therefore falls into the category of 'open countryside'. The NPPF is very specific on development in the green wedge. In no way can this site be considered as grey-belt, which might have permitted the council to designate this as a site for development. By including this site as effectively in Exmouth the council is using this as a subterfuge to boost the housing totals for Exmouth.
- **Land Quality** - the fields are classified as Grade 1 Agricultural Land. These are the only tracts of land with this categorization remaining in the Exmouth area. Dating back to the tithe maps of the 19th century, the land has been used for arable crop -production such as barley, hay crops, pasture for stock-rearing and latterly maize; it has been cropped with maize for the past decade. It is not 'only just used for maize', as stated by a contributor at the strategic planning meeting, suggesting that this is not a valuable agricultural land. Maize is grown because it comes second in value to wheat crops. For this reason, the land owner has stipulated that the farmer who manages the land must grow maize exclusively. Were this directive not in force, the land could be used for wheat and barley as happens of the adjacent field to the north of the site boundary, and be subject to a crop rotation pattern which is best farming practice. An attachment (1) demonstrates the versatility of the land, a factor that reinforces why it should continue as productive agricultural land, rather than having houses planted in it. In the context of UK food security, this type of agricultural land should not be used for housing, particularly when the EDDC had other option of inferior land offered up by landowners for consideration. Environmental and Sustainability Versatile and very productive land. Conflict with 3.35 -3.37 Grade 1 agricultural Land
- **Environment.** Situated on the watershed above the Watton Valley, Site Lymestone _07 sits atop the watershed draining down the south flank of the valley. These fields hold a significant amount of water which, if built on, will impact flows into the Watton Brook in times of heavy rainfall. These events are increasing in frequency and intensity over the past few years and will continue with increased infrequency with climate change.

Images at attachment 2 illustrate the amount of water that accumulates on the fields and adjacent East Devon Way that passes between two of the fields during persistent heavy rain. Being on a high point, the site used to be visible from all directions. The development company that owns the land screened the fields with trees some 10 years ago to deal with the issue of visibility commented on by the Planning Inspector's report. The outstanding views over the Exe Estuary towards the Hadon Hills and the high ground north of Exeter are illustrated in the panorama at attachment 1. The trees are not protected ancient woodland and inevitably the narrow bands of conifers will be harvested if the site is developed in order to afford outstanding views to the high-value properties that will inevitably cover the site. The land functions as a conduit for wildlife, such as deer, badgers and of course foxes as illustrated in attachment 3.

- Sustainability. The site will not score highly for sustainability. There will be significant reliance on cars as residents go about their daily business. The site has been earmarked as having potential for 100 houses. This will result in somewhere in the order of 150 vehicles which will add to the flows along the A376, not including the vehicles that will provide essential services. It is wishful thinking that people will abandon their cars and opt for more environmentally means of transport to commute, shop, take children to school and go about other daily business - it just won't happen. Topographically, the site is not ideal for those of a less energetic disposition. It is 2 miles from Lymington Village and Exmouth respectively. The site is reached in all directions by a gradient that increases from sea level to 150 feet. Typical of roads in Devon some of the gradients are gradual, interspersed with more challenging sections, particularly for cyclists. A Stagecoach bus route passes along the A376 adjacent to the site in theory every 20 minutes. The reality is that there are frequent delays due to volume of traffic on this road, particularly during rush-hour. This unreliability, combined with a time-challenged younger population is not conducive to persuading residents to rely on this service for commuting, school runs and specific appointments. Site Exmo_23 This site is also located in the green wedge and many of comments made in relation to Lymington_07 apply. This is also a site that has been the subject of several planning applications that have been turned down, so the key objections to development are well documented. Adjacent to the National Trust land at Lower Halsdown Farm, any development would not be in keeping with the grain of existing properties in Courtlands Lane and will be visible from the south westerly direction, the coastal preservation zone, and will undermine the guarantees of the Coastal Preservation Zone and the Devon Landscape Assessment. Development will significantly increase traffic movement along a narrow country lane which is already inadequate for the volume and speed of vehicles using it and it affects the safety of residents and pedestrians using the East Devon Way. In the light of these issues that have been somewhat glossed over to justify the selection of these controversial sites, it is hoped that the Inspector will have a different perspective when he examines the detail relating to Lymington_07 and Exmo_23, - hopefully backed

up by a site-visit. Sustainability and Transport - Infrastructure A resident in Exmouth area for 50 years, in that time I have observed housing spill into the open countryside. This has not been in parallel with improvements in infrastructure. A major factor that should have inhibited development is the inadequacy of the roads radiating from Exmouth, particularly the A376. (I have failed to find a specific section relating to the A376 in this Plan using a word search, but I concede that it may be covered in a less transparent manner.) It is not possible to make any improvements to the road between the edge of Exmouth and Clyst St George. It is puzzling why the DCC Highways Department has never ruled that more housing should not be approved particularly in the context of the number of houses being proposed by the current plan. Assuming that every new house will have 1.5 cars this will lead to a significant number of vehicles on the roads. There are insufficient local employment opportunities for the number of houses proposed, so most people will commute to Exeter and other location in Devon and west Somerset. The topography of the Exmouth area persuades people to use their cars rather than use other means of transport. Other aspects of infrastructure require attention before any more development occurs. The sewage system is quite inadequate as witnessed over the past 9 months. Schools are under pressure as are the medical facilities. It may be relatively easy to construct the infrastructure but the means to find enough suitably qualified professional staff is much more challenging. Conclusion With proposals to expand Cranbrook and the prospect of a new community it should be unnecessary to approve development in the open countryside in the vicinity of towns and villages in East Devon. The number of additional houses proposed is quite extraordinary and most residents are already concerned about existing development and the impact on infrastructure, particularly the very unsatisfactory and overwhelmed road links. The council must resist pressure from developers who I suspect have already exerted pressure on the council to include the controversial sites. Once valuable agricultural land is built on it is lost forever.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctors, School, beach, etc.) would be the most convenient choice for residents of Exmo_20. This undermines the settlement hierarchy and would lead to coalescence of Budleigh and Exmouth, contrary to POLIC OL05 of the Local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan.

Full name: Christine Pearce

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 could and should be located at an alternative site where it would cause no harm to the Pebblebed Heath(SAC/SPA).Developing Exmo_20 is contrary to Policy PB01 of the local plan and not in accordance with the mitigation strategy. It would fragment and destroy habitats and wildlife corridors ,contrary to Paragraph 13.23 of the local plan. Exmo_20 would increase the amount of traffic ,causing congestion.People would need to travel much further to existing key services and facilities,contrary to paragraph 11.6.The infrastructure is not there for schools,GPS etc . The Main Access point is in a dangerous position.No buses go this way.Everyone working in Exeter will drive through Woodbury causing a major increase in traffic and pollution.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This proposed development will cause harm to the countryside, the Pebbled heaths and I believe it is not in accordance with the strategy set out in Policy PB01. It will also ruin the 'dark skies' of the area and will destroy veteran trees, wildlife habitats and the hedgerows which are so essential to resident wildlife and air quality which I believe is contrary to Paragraph 13.9 Exmo_20 will increase traffic congestion on an already heavily used country road which is not suitable for the traffic it already has to carry. The services and infrastructure such as doctors, schools, and public transport will be insufficient for the extremely heavy load that this proposed development will impose on the area. Budleigh Salterton will be heavily affected and I believe the services the town has will be put at breaking point. The B3179 is the only road to get to Woodbury, Woodbury Salterton and Exeter and the Idea that cycling and walking routes would be developed is ludicrous considering that the majority of residents in Budleigh Salterton and over retirement age and cycling up a hill to get to key services is unacceptable.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: My suggestion is that Exmo_20 be either removed from the plan or the size of the Exmo_20 be reduced dramatically or change the B3179 as the access. I also believe that a previous proposal of Exmo_20b would be preferable.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I wish to see how Local Government discusses these proposals.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Paragraph 2.9 refers to protecting the environment yet figure 3 shows over 1,400 new homes planned for Exmouth where existing infrastructure is already failing resulting in continual sewage overflows. This inconsistency in the vision means the vision is undermined and flawed from the outset. The vision needs to include specific reference to new sewage infrastructure as without that the situation that happened at Cranbrook will repeat.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Include a new 2.9 subsection a to reference requirement for upgrade to existing and provision of new sewage infrastructure and explain how the overdevelopment in Exmouth will be delivered without choking the environment and resources.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: No ti does not set out just how essential cooperation with the water authorities is. Without a requirement to deliver updated infrastructure hardwired into the vision the existing dire situation with sewage will become completely

untenable. Simply put NO houses can be built without this being delivered first and the plan MUST reflect this throughout. Anything less is a derogation of duty.

?EXMO_20

LOCATION ISSUES The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh it's most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctors, School, beach etc) would be the preferred choice for residents of Exmo_20. This undermines the settlement hierarchy and would lead to coalescence of Budleigh & Exmouth, contrary to POLICY OL05 of the Local Plan.

An alternative site to Exmo_20 for housing allocation should be selected, one which was deemed available, achievable & suitable in the HELAA. Exmo_20 would cause harm to the adjacent Pebblebed Heaths (SSSI/SAC/SPA/NNR) due to Exmo_20 being a supporting foraging habitat. Allocating Exmo_20 is contrary to the HELAA, the Site Selection Methodology & POLICY PB01 of the local plan and not in accordance with the Mitigation Hierarchy to select avoidance over mitigation.

NATURAL HABITATS Exmo_20 would have a detrimental effect on this open countryside site and the adjacent internationally designated wildlife sites, eliminating the "tranquility, wildness and dark skies", which is contrary to POLICY OL01.

Exmo_20 development would be in conflict with the Strategic Nature Area 368, fragmenting and isolating habitats and destroy wildlife corridors, contrary to

PARAGRAPH 13.23 of the Local Plan. It would cause harm to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9.

Exmo_20 is in conflict with POLICYOL09 and POLICYPB04 as the Habitats Regulations Assessment (30.01.25) states that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA) such that the Plan fails the integrity test. The main site access proposed is opposite the SAC/SPA.

VEHICLE ACCESS AND INCREASED TRAFFIC FLOW Exmo_20 would increase the need for car travel, contrary to Figure7–the energy hierarchy, and increase traffic congestion, in conflict with PARAGRAPH 11.2. The isolated location provides unsustainable development as residents would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

FLOOD RISK Development of Expo_20 on heavy clay subsoil with ineffective soakaways would exacerbate the already identified down stream flood risk . This is in conflict with POLICY AR018. This Area (Withycombe Brook through to Exmouth, which is already under the pressures. of climate changes.

HERITAGE PROTECTION Exmo_20 would cause harm to the heritage assets at this Saxon/Norman/ Medieval settlement, most significantly St John in the Wilderness Grade II* listed church, eroding the attractive rural setting for worship & burials which currently exists. This is contrary to POLICY HE02.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Expo_20 from the local plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Jackey Phillips

Proposal:

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Exmouth already struggles with infrastructure. Drainage and other services, GPs, dentists and the availability of local shops, etc. Until and unless this is rectified to meet current needs the introduction of an additional 1,450 will only make an already poor situation worse.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Improve local infrastructure, including drainage, local shops and amenities, schools, dentists and GPs ahead of any future development.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: It doesn't seem to matter how or when objections are raised, still the push for more housing continues, whether it will work for the existing community or not.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: helen playfair

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This is a site of historical and environmental significance. it would cause significant permanent damage to the surrounding protected countryside as it is immediately next to the boundary. this will bring significant increase in traffic, pollution and noise to this area and the access road and infrastructure cannot support this. there is already significant congestion from increasing traffic along this road which will impact on pinch points including woodbury, darts farm, clyst st mary and sandy park traffic budleigh salterton is the closest town and cannot support this size new development. it will negatively impact st john in the wood historical sites this development would be much better placed on an accessible piece of land closer to the main routes out of devon

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: completely remove Exmo_20 from the local plan as it will devastate the locality

Full name: Helen Plumridge

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposal at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebbled Heaths (SAC/SPA). Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy,

Exmo_20 would destroy the "tranquility, wilderness and dark skies" of the countryside, which is contrary to POLICY OL01.

Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, and veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9.

The Habitats Regulation Assessment (30.1.25) confirms that there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to....air quality (East Devon Pebbled Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04.

Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02.

Exmou_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Withycombe. This is in conflict with POLICY AR01B.

Exmou_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

The main access point of Exmou_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath.

I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

Please, please take Exmouth residents opinions into consideration. We need your support.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: With regards to development EXMO_20, the main access appears to be along the B3179. This is at the very top side of Exmouth, meaning that residents would need to double back down into Exmouth via St Johns Road, Marley Road or Hulham Road to reach all services in Exmouth. Indeed the services in Budleigh are actually closer and would likely become the preferred choice for residents. This will likely bring the two towns even closer together which is contrary to Policy OL05 of the local plan.

EXMO_20 is literally across the B3179 where the SSSI Pebblebed heaths start. This would be contrary to the HELAA, the site selection methodology and policy PB01 of the local plan.

EXMO_20 wraps around St John in the Wilderness grade II* listed church which will degrade its rural setting for worship and burials contrary to policy HE02

The land designated for EXMO_20 occupies the highest parts of Exmouth and as stated above borders onto Withycombe Raleigh Common/Woodbury Common. The development of 700+ homes will eliminate the "tranquility, wildness and dark skies" which is contrary to policy OL01

EXMO_20 will break apart habitat and wildlife corridors that exist between the land to the east of the development and the woodland (Big Wood) to the west of St Johns Road, and of course the Common to the north. This is contrary to paragraph 13.9

EXMO_20 conflicts with policy OL09 and policy PB04 as the habitats regulations assessment dated 30th January 2025 states that there is "currently not sufficient certainty to rule out adverse effects in an integrity in relation to..air quality (East Devon Pebblebed Heaths SAC/SPA) such that the plan fails the integrity test. The proposed main site access is opposite that SAC/SPA.

It is understood that the subsoil underneath the majority of EXMO_20 is heavy clay, which will not provide adequate drainage for rainwater. This is likely to cause potential flooding via Withycombe Brook, which has already been identified as under pressure. This conflicts with policy AR01B

As already stated EXMO_20 is remote from the main town of Exmouth, with its main access on the B3179. This can only increase traffic congestion on the routes stated above because there is no public transport to that area of Exmouth. Few residents will make use of sustainable travel such as walking or cycling, not just because of distance to services, but the fact that it's uphill! There are no pavements or cycle paths on the immediate access routes and the B3179 in that area is a fast road. This can already be evidenced by the number of cars that park at the football pitches opposite during matches. Cars can often be seen parking on the visibility splay or even the road. These are all contrary to paragraph 11.2, 11.6 and policy TR01.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from the local plan, reduce it in size, nearer the main town, with access lower down. Revert to EXMO_20b as previously proposed.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The

access point of Exmo_20 is much closer to Budleigh Salterton than Exmouth, this makes Budleigh the most accessible and convenient town. The services and infrastructure of Budleigh are already overstretched(the Doctors, High Street, School etc) and would be the obvious choice of the residents of Exmo_20. this would undermine the settlement hierarchy and would lead to the coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local plan. An alternative site to Exmo_20 for housing allocation should be selected, one which is deemed available, achievable and suitable in the HELAA. Exmo_20 would also cause harm to the adjacent Pebble bed Heaths(SSSI/SAC/SPA/NNR) due to Exmo_20 being a supporting foraging habitat. Developing Exmo_20 is contrary to POLICY PD01 of the local plan and not in accordance with the mitigation strategy. Exmo_20 would also cause harm to heritage assets. this is in contrary to POLICY HE02. Nearby wildlife sites would be adversely affected and destroy the " tranquillity, wildness and dark skies " of the countryside contrary to POLICY OL01. Exm0_20 development would also be in conflict with the Strategic Nature Area 368, fragmenting and isolating habitats and destroying wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would cause harm to irreplaceable habitats, veteran trees, and species rich hedgerows across the site, contrary to PARAGRAPH 13.9. Exmo_20 is in conflict with POLICY OL09 and POLICY PB04 as the Habitats Regulations Assessment (30.01.25) states that there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to Air quality(East Devon Pebblebed Heaths SAC/SPA) such that the plan fails the integrity test. Development of Exmo_20 on heavy clay subsoil with ineffective soakaways would exacerbate the already identified downstream flood risk along Withycombe Brook through Exmouth, which is already beyond its design capacity. this is in direct conflict with POLICY AR01B. Exmo_20 would also increase the need for vehicle travel and increase traffic congestion, in conflict with PARAGRAPH 11.2 This isolated location is unsustainable development as people would need to travel much further than 800m to

existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far(and to steep) from any town centre to use walking or cycling as their choice of transport . this is contrary to OLICYTR01.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Therefore remove Exmo_20 from the local plan and revert to Exmo_20b as previously proposed.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 would put pressure on the area's already failing and inadequate infrastructure. It would increase the need for travel by car and add to the already congested roads in conflict with PARAGRAPH 11.2. It is isolated and unsustainable development. Residents would need to travel in excess of 800m to access key services and facilities, contrary to PARAGRAPH 11.6. Walking/cycling are not feasible options due to both distance and terrain from any town centre. This is contrary to POLICY OL05 of the local plan.

Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay thus making soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9.

St John in the Wilderness Grade II listed church and churchyard sits in an oasis of tranquillity for worship which currently exists for the congregation. Exmo_20 would have immense negative impact on this. This is contrary to POLICY HE 02.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_08 & Exmo_16 goes against policy OL04 which states that the “ visual integrity , identity and scenic quality should be preserved”. This development would impact on the Maer valley which previously has been identified as an important green space corridor.

In Chapter 13 – Biodiversity states the biodiversity or wildlife value is greater than before the site was developed. Exmo_08 & 16 would go against this policy as development would reduce biodiversity. The land in question frequently has wildlife species including deer, foxes, and a wide diversity of birdlife.

Exmo_08 & Exmo_16 goes against Policy OL10 which aims to “conserve and protect the highest grade of agricultural land” as it would develop on a site of high quality agricultural land. In the Chapter - Our Outstanding Landscape the policy is very clear that the loss of high quality land should be resisted.

In respect of Exmo_08 and Exmo_16 (combined) it is stated that the preferred access would be off Parlour Meadow with a less preferred option of Elm Lane. Currently there is often severe traffic congestion on and around the main access road leading into Engineers Way / Parlour Meadow development. This access road (Pankhurst Close) provides access to numerous businesses including a scrap metal merchant, builders merchant, car repair workshop, printers, scaffolding company and joinery workshop along with a number of other businesses.

It is our opinion that providing access to another circa 45 dwellings would further increase the chaos that ensues at peak times of the day. This access would need to cope with not only the increase in cars for the houses but also the service vehicular access, delivery and lorries requiring access to the site.

As a result we recommend that other access options should be explored such as improvements to Elm Lane to enable the lane to be considered as a viable option.

Exmo_08 & Exmo_16 would go against the Policy TR01: Prioritising walking, wheeling, cycling and public transport. Due to the topography of the local area, residents are more likely to use their cars to access the local shops. The nearest convenience store is at Littleham Cross and this is already an area where there is minimal parking with cars frequently parked on double yellow lines at / near the junction.

There is a potential of increased flood risk with development of Exmo_08 & 16 due to increased run off from the site, which will impact on Littleham brook, going against Policy AR01.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The main access point to the site area Exmo_20 is much closer to Budleigh Salterton than Exmouth. This means Budleigh is the most convenient and accessible town for future residents of the development. The future residents of Exmo_20 would therefore choose to use the services (Doctors, High Street shops, Schools, parks and beaches) in Budleigh and this would undermine the settlement hierarchy and would lead to the merging of Budleigh and Exmouth which is contrary to Policy OL05 of the Local Plan. An alternative site to Exmo_20 for housing allocation should be selected, one which is deemed available, achievable & suitable in the HELAA. Exmo_20 would cause harm to the adjacent Pebblebed Heaths (SSSI/SAC/SPA/NNR) due to it being a supporting foraging habitat. Developing Exmo_20 is contrary to policy PB01 of the Local Plan and not in accordance with the mitigation strategy. Exmo_20 would cause harm to the heritage assets, most notably St John in the Wilderness a Grade 2* listed church and church yard, drastically altering the attractive rural setting for worship, weddings and burials which currently exist. This is contrary to Policy HE02 Exmo_20 would have a very detrimental effect on the adjacent designated wildlife sites and destroy the "tranquility, wildness and dark skies" of the countryside which is contrary to Policy OL01. Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Withycombe. This is in conflict with POLICY ARO1B. * ??Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01. Exmo_20 proposes the development of 700 homes so would add another 2500 to 3000 people to the local population. The schools and doctors surgeries serving the town are

already overwhelmed by demand for services . Where will the new residents go to school or get to see a doctor?

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Exmo_20 should be removed from the Local Plan as a potential housing site for all the reasons set out in 3B above

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: paul jenkins

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This part of Devon currently fails to support the current housing and residents in terms of inadequate infrastructure - The road system , and road network around the development would grind to a halt, the highways cannot maintain the current network with low traffic volumes. It pure insanity to consider dropping 700 houses in the middle of this fragile road system. It has been well documented the current sewage system in and around Exmouth/Budleigh cannot cope, with spills into the sea together with constant sewage back ups in houses and flooding a regular occurrence. Again how can any sane council or developer consider the addition of 700 new houses linked to an already ' not fit for purpose ' sewage system would be a good idea or worthy of approval. This proposal would also : Harm protected heath and woodland impact on wildlife , deer activity , bird life, insects, wild bee colonies , Adder and Reptiles. Destruction of historic and ancient trees , hedgerows , and habitat. Local services in terms of schools , Gp surgeries are not able to cope with current workloads ,how and where would potentially over 1500 new residents be able to obtain these services - there is no extension of schools or other necessary infrastructure policies in place to cope or deal with such a significant increase of the local population.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: There is no modification that would make this proposal workable without a multi million upgrade of the sewage system , local services and road network. There is no funding available for

the above and unless the developer as part of a part 36 agreement is prepared to submit a £30m to £40m contribution to cover this shortfall in services/infrastructure and local services it has no credibility and should be rejected.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: please see previous comments

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Yes, because out of control development where no investment to the wider area in terms of infrastructure improvements to accommodate new residential expansion needs to be stopped

Full name: Douglas Kenny

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The main access point of Exmo 20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh it's most convenient accessible town. The services and infrastructure of Budleigh (shops, Doctor's, school, beach ect) would be the preferred choice for residents of Exmo 20. This undermines the settlement hierarchy and would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the Local Plan.

Exmo 20 would increase the need for car travel and and increase traffic congestion, in conflict with PARAGRAPH 11.2. The isolated location is unsustainable devepopment as people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH11.6. It is too far (and too steep) from any town centre to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

1. Do not access Exmo 20 area from the B3179.
2. Access to the site should be off of Dinan Way which would give safer and a more direct to the A376 Exeter Road.
3. Reduce the size of Exmo 20

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Tom Kinnersley

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo 20 is in conflict with OL05. From its access point the centre of Budleigh Salterton is half the distance to Exmouth and it is inevitable that the facilities there will be used in preference to Exmouth. A development of this size would both lead to and encourage coalescence.

Full name: Tom Kinnersley

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo 20 is in conflict with paragraph 11.2 of the local plan. It is so isolated that car use would be essential thus increasing traffic. It is also contrary to 11.6 because it is nowhere near services and facilities. Walking and cycling could not possibly be the choice of transport - contrary to Policy TR 01.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce the size of Exmo 20, do not access the site from the B3179 and find a way to reduce the distance to Exmouth town centre.

Full name: Tom Kinnersley

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo 20 is in conflict with policy SP01. Exmo 20 is completely detached from Exmouth and cannot be considered to be a development of a tier 1 town

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert to Exmo 20b as previously proposed

Full name: Mrs Helen Lester

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I believe that the proposed development of site EXMO_17, which by its very nature will mean an extension of Exmouth eastward on the currently undeveloped East Devon National Landscape (formerly AONB) towards Budleigh Salterton. Inclusion of EXMO_17 in the East Devon District Council Local Plan fundamentally fails the "Consistent with national policy" soundness test due to severe conflicts with statutory protections, national planning policy, and local policy obligations.

1. Direct Conflict with National Planning Policy Framework (NPPF) The National Planning Policy Framework (NPPF) provides unequivocal legal protection for National Landscapes: Paragraph 176: The highest level of protection must be given to conserving and enhancing landscape and scenic beauty in National Landscapes. Development should be strictly limited in these areas. The proposed extension fundamentally contradicts this principle, as it represents large-scale urban encroachment into a protected landscape. Paragraph 177: Major development in a National Landscape should be refused unless it passes exceptional circumstances tests and is in the public interest. This proposal fails every test: No overriding need: Housing or economic growth objectives do not constitute exceptional circumstances, particularly when alternative sites exist outside protected areas. Alternative locations exist: Other areas within East Devon can accommodate growth without violating protected land status. Severe environmental and landscape harm: The development irreversibly damages the area's ecological integrity, scenic character, and ecosystem services. Legal Precedent: High Court rulings have consistently upheld AONB/National Landscape protections, ruling that "economic development" or "housing targets" do not override statutory protection. The approval of this proposal would invite an immediate legal challenge.

2. Breach of Statutory Duty Under the Countryside and Rights of Way Act 2000 (CROW Act, Section 85) Section 85 of the CROW Act places a mandatory legal duty on public authorities to conserve and enhance the natural beauty of National Landscapes. Any decision that fails to give "great weight" to protection is unlawful. By approving this proposal, East Devon District Council would be in breach of this duty, making the plan legally indefensible and subject to judicial review.

3. Direct Contradiction of the East Devon Local Plan and Policy Framework The proposed extension also fails to comply with East Devon's own planning policies, making it internally inconsistent and thus unsound: Strategy 46: Landscape Conservation and Enhancement and AONBs Requires that development must enhance, not harm, the special qualities of National Landscapes. The proposal would cause irreversible harm, violating this policy outright. Policy D1: Design and Local Distinctiveness Development must respect and protect local landscape character. The urban expansion into protected countryside undermines the distinctive rural and coastal identity of Budleigh Salterton and its surroundings. Urban Sprawl Prevention & Settlement Separation The merging of Exmouth and Budleigh Salterton is a serious planning concern. National and local policy explicitly protect the distinctiveness of settlements, ensuring they are not lost to uncontrolled expansion.

4. Environmental Destruction and Irreversible Harm The East Devon National Landscape is one of the most ecologically valuable and visually iconic landscapes in the UK. Development would result in: Biodiversity loss: This area hosts legally protected species and priority habitats under the Wildlife and Countryside Act 1981 and the UK Biodiversity Action Plan. Destruction of irreplaceable ecosystems: The undeveloped land acts as a natural carbon sink, floodplain, and wildlife corridor. Increased climate risk: Removing these natural defences increases flood risk, reduces climate resilience, and worsens ecological degradation.

5. Legal Risk of Judicial Review and Government Intervention This proposal is legally indefensible. If included in the Local Plan: It is highly likely to be legally challenged under the CROW Act and NPPF non-compliance. Past judicial reviews have struck down developments in National Landscapes where local authorities failed to provide a lawful justification. Conclusion: The Local Plan is Unsound and Legally Indefensible This proposal directly contradicts national policy, breaches statutory duties, violates East Devon's own Local Plan, and would likely be overturned in court. To remain legally compliant, policy-consistent, and defensible, East Devon District Council must exclude this proposal from the Local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: EDDC should not pursue development in EXMO_17 because they would breach planning law and ultimately would end up in years of litigation and only the Government has the power to change planning law, not EDDC.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Jacqueline Lock

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.:

Planning officer advised strategic planning committee exmo_20 was not suitable to be included in the local plan and gave good reasons for his recommendation Eagle Investments gave a presentation to the strategic planning committee on how Exmo_20 could be developed. Members of the committee from Lympstone recommended putting aside planning officers recommendation. Eagle investments are property developers who have built at Lympstone and advised strategic planning committee how the site Exmo_20 could be developed Sewage Infrastructure is already at Breaking point

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: These sites need removing from the draft local plan

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

These sites need removing from the local plan as will have a destructive impact on local businesses connected to tourism as these developments will destroy the beauty of the area and be detrimental to the local environment this will have an impact on jobs in tourism and related industries that local towns depend on. It will also chip away at the green fields beauty of the local area that also contributes to tourism into the East Devon

area as a whole, So not meeting need for jobs in tourism and not meeting other areas need for jobs in tourism The sites should not have been included as they are near Pebble bed Heaths and Bystock lake and other areas of scientific interest In the case of exmo_20 the Planning officer recommended that the site was unsuitable for development with sound reasons this advice needs to be followed and the site should not have been included in the draft plan

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: These sites need removing from the draft local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Both sites are damaging to the environment and if developed reduce the natural beauty of the local area also will lead to increased footfall on Woodbury common and Bystock lakes Sewage infrastructure is already breaking down and insufficient for existing housing. Road access at Exmo_20 is onto the narrow road into Budleigh and access to the site is difficult Developments will increase traffic on the roads into Budleigh. Re Exmo_17 Traffic has already visibly increased on the Salterton Road with developments such as Plumb Park, The road into Budleigh from Exmo_20 is narrow with many hazards for instance there is a very tight corner at Inner Ting Tong this road is not suitable for heavy traffic flows Both sites reduce the green land between Budleigh and Exmouth

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Katherine Louise McDermott-Darley

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proposal would lead to merged conurbation of Budleigh and Exmouth which is contrary to Policy OL05 of the Local Plan. Geographically and taking into account the minor road infrastructure, the main access point of Exmo_20 is closer to Budleigh Salterton than Exmouth. The already over-stretched local services and infrastructure would be the closest and preferred choice for residents and create an overburdened of demand on for example, the Doctor's surgery, underfunded primary school, public toilets, sewage systems, aggravated in the holiday season by incomers.

An alternative location for housing allocation should be selected, one which is available, sustainable and suitable in the HELAA. The harm to the Pebblebed Heaths and rare and protected habitats is contrary to Policy PB01 of the local plan. Exmo_20b would cause harm to the heritage assets, most significantly St John in the Wilderness Grade II listed church and churchyard, drastically altering the attractive rural environment for worship and spiritual retreat. This is contrary to Policy HE02. Flood risk and fire hazards would be increased. The soak away system is already inadequate in current climate conditions with increased rainfall and intermittent drought. The impact on car pollution, congestion and accidents to pedestrians, walkers and cyclist would undermine the recreational attraction of this outstanding beautiful natural landscape. Increased traffic congestion would inevitably ensure contrary to Policy TR01.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan and ensure that traffic volumes along the B3179 and not increased.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: John Miller

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less harm to the Pebblebed heatjs {SAC/SPA} Developing Exmo_20 is contrary to the local plan and not in accordance with the mitigation strategy. Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with Paragraph 11.2. It is unsustainable development and people would need to travel much further than 800m to existing key services and facilities, contrary to Paragraph 11.6. It is too far and too steep from any town centre to use walking or cycling as their choice of transport. This is contrary to Policy TR01.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Michael Newby

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: ?

The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA).

Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy.

? Exmo_20 would destroy the “tranquillity, wildness and dark skies” of the countryside, which is contrary to POLICY OL01.

? Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9

? The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04.

? Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02.

? Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

? Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

? The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan,

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To voice my strong objection to the plan on the grounds

that it will gravely damage the natural environment in St John's Road leading to the Pebblebed Heaths, to the rural setting of this area of Exmouth, and to the peaceful location of the church of St John in the Wilderness. It will cause noise and light pollution. It will impossibly increase traffic on a narrow road. It will cause irreparable damage to this precious part of Exmouth, spoiling part of the town's 'green lung' and, in the process, eroding the offer it makes to one of Exmouth's principal income streams - tourism. People come here for the combination of seaside and unspoiled green environment and not to visit another housing estate.

Full name: Jean Quinn

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctors' surgery, School, beach etc) would be the preferred choice for residents of Exmo_20. This undermines the settlement hierarchy and would lead to the coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the Local Plan. Exmo_20 would increase the need for car travel, contrary to Figure 7- the energy hierarchy- and increase traffic congestion, in conflict with PARAGRAPH 11.2. The isolated location provides unsustainable development as residents would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Shane Rabik

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site Exmo_20 is in conflict with policy OL05 of The Local Plan.

The main access point for this site is via the B3179. Which means that residents will have to travel between 4.2 and 4.3 miles to get to the centre of Exmouth, whereas the centre of Budleigh Salterton is only 2.2 miles.

This makes Budleigh Salterton significantly more accessible to the residents of this development for key facilities/services.

Currently Exmouth and Budleigh are separated in terms of functionality but this development would effectively merge the two, with residents living in one town whilst relying on day-to-day services and infrastructure of the other.

This is also a large site, so is Budleigh ready for this sudden increased demand?

(POLICY OL05: This policy stated that development will not be permitted if it could lead to or encourage settlement coalescence).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Shane Rabik

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site Exmo_20 is in conflict with policy HE02 of The Local Plan - Development at this site will encircle the Grade II* listed St. John in the Wilderness Church and will have significant adverse effects on the remoteness and tranquillity that is so unique to this church and its surroundings.

This development will result in the loss of a unique peaceful and tranquil setting, not only for the congregation, but also the numerous visitors that come to pay their respect's to their relatives in the churchyard, and also those that visit the area to see the church and its settings. (POLICY HE02 states that proposals for development will be expected to be sympathetic to listed buildings and their settings).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Shane Rabik

Proposal:

5. Development in the Towns and Villages

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site Exmo_20 is in conflict with policy OLO1 of The Local Plan.

The site is noted for its dark skies, tranquillity and wildness.

The proposed site will encircle the Grade 1[*] listed St John is the Wilderness Church and churchyard, which will result in its tranquillity, remoteness and dark skies being lost forever, regardless of any buffer zone being provided.

Along with the new light from the proposed housing development itself, and with the main access for the site being onto the B3179, which is directly opposite the SPA/SAC/SSSI, this would cause a significant flow of car headlights destroying the darkness across the entire length of the site and all shining directly onto the Pebblebed Heaths as vehicles exit the site.

POLICY OL01 states that development will only be permitted where it would not harm the aesthetic and perceptual factors such as "tranquillity, wildness and dark skies").

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Shane Rabik

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site Exmo_20 is in conflict with paragraph 13.23. of The Local Plan

The whole of this site lies within an identified 'Strategic Nature Area' (SNA 368) on the Nature Recovery Network.

Of particular note is the Nightjar, a qualifying feature of the East Devon Heaths SPA, and studies show that these fly up to 7km from nesting sites to feed at night.

Loss of foraging habitat or disruption of routes to feeding areas could undermine the conservation objectives of this SPA.

This site provides a means of connecting habitats and wildlife corridors between the Pebblebed Heaths at the north of the site through to the woodland at the south and beyond, all of which would be adversely impacted by the development of this site.

The amount and variety of wildlife that utilises this land and the nearby SSSI Pebblebed Heaths is amazing, and will be lost if this site is developed.

(PARAGRAPH 13.23. The Local plan states that East Devon has diverse but fragmented habitats and aims to enhance biodiversity increasing habitat areas and connecting isolated habitats).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Shane Rabik

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site Exmo_20 is in conflict with policy PB04 of The Local Plan.

The Habitats Regulations Assessment (dated 30.01.25) highlights that there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA)."

With the majority of the traffic from this site going via the B3179 which runs along the edge of the SSSI Pebblebed Heaths (SAC/SPA), the emissions/pollution created will undoubtedly have a 'negative' impact on the air quality in this area.

(POLICYPB04 states that proposed plans must not affect the integrity of sites protected under the Conservation of Habitats and Species Regulations 2017 (including SAC/SPA)).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Shane Rabik

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site Exmo_20 is in conflict with policy OL09 of The Local Plan.

The The Habitats Regulations Assessment (dated 30.01.25) confirms that there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA)".

The main access point for this site is via the B3179 which runs along the edge of the SSSI Pebblebed Heaths.

This will lead to an increase in emissions due to the increase in traffic, which will also have a huge 'negative' impact on the air quality.

(Policy OL09 states that "permission will not be granted for development which would result in pollution that cannot be adequately mitigated").

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Continuity and Accountability

Full name: Shane Rabik

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocating Exmo_20 is in conflict with policy PB01 of The Local Plan and is not in accordance with the mitigation strategy.

The number of houses being proposed at this site will cause considerable harm to the SSSI Pebblebed Heaths .

There must be numerous alternative sites that could accommodate the housing requirement which would cause less or no harm to the SSSI Pebblebed Heaths (SAC/SPA).

(Policy PB01 states that development proposals that would cause a direct or indirect adverse effect upon internationally and nationally designated sites will not be permitted unless they cannot be located on alternative sites that would cause less or no harm).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Continuity and Accountability

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 is in conflict with policy TRO3, and figure 7 in the Local Plan.

No new sustainable travel arrangements have been proposed for this site that are viable.

The site will not promote walking/cycling due to the fact that it slopes steeply from North to South.

The main access point onto the B3179 for this development will generate major amounts of vehicle movements just to access services within Exmouth and the neighbouring villages. This will also lead to an increase in travel to and from the main towns/cities, and access to the main route out of the area via the M5.

(POLICY TRO3 states that where development is likely to generate significant amounts of vehicle movements planning permission will not be granted unless they can identify measures to secure new sustainable travel arrangements, taking into account (amongst other things) the scale of development and the availability of public transport, and walking and cycling opportunities).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site Exmo_20 is in conflict with paragraph

3.34 of The Local Plan

This site will not add any crucial infrastructure such as a secondary school, doctors surgery, of dentists surgery.

Its will only add to an already creaking infrastructure.

In addition to this, its will also increase the pressure on our sewage system, which already has major issues and is regularly closing down our beaches and areas on the Maer.

This has been highlighted several times on national news and via the press.

How long before Exmouth becomes a place to avoid?

(PARAGRAPH 3.34 states that by directing growth to the tier 1-4 settlements their approach ensures development is concentrated in areas with existing infrastructure and services).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Continuity and Accountability

Full name: Shane Rabik

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site Exmo_20 is in conflict with The Draft Local Plan which states that the access point for the majority of this site (if not all) be at the North of the site via the B3179.

This access point is approximately 4.3 miles from the centre of Exmouth and onto an already congested road that also is the main route in and out of Budleigh Salterton.

This is a busy route on a daily basis, and gets even worse in the holiday seasons. This will result in increased car travel requirements for the majority (if not all) of the site.

This proposed site is the largest in Exmouth, and its location does not promote less travel, nor will it do anything to reduce traffic congestion in and out of Exmouth.

This site cannot be classed as sustainable. (Paragraph 11.2 of The Local Plan promotes focusing significant development at locations which are, or can be made sustainable, through limiting the need to travel and reduce traffic congestion).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Continuity and Accountability

Full name: Shane Rabik

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site Exmo_20 is in conflict with policy TRO1.

This site slopes steeply from North to South, walking and/or cycling will not be the first choice of transport from this site for people to do their shopping/ work/ school run etc. as the distances are too far.

The provision of walking routes, cycle paths or public transport will not alleviate the amount of car journeys this development would generate, especially taking into account the fact that the site topography, and the distance people will have to travel to access essential services/facilities.

(POLICY TRO1 proposes that walking, wheeling, cycling and public transport should be the natural first choice and that walking and cycling routes must be prioritised in new development).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Continuity and Accountability

Full name: Shane Rabik

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: In my consideration it is not sound as this site slopes steeply downhill from the North to the South.

Regardless of what the developer says, this will not promote walking and cycling. Key services and facilities for the bulk of this site are not within the stated 800m (approx 10 mins walk).

The likelihood is that residents will need to drive over two miles (via the B3179) to access them within Exmouth or neighbouring towns/villages.

Who walks to do their main shopping, visit the doctors, dentists, etc?

This site is too isolated to be sustainable.

(Studies cited in the Local Plan show that people prefer to walk if their journey is not further than 800m/10 minutes walking each way)).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Continuity and Accountability

Full name: Shane Rabik

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site Exmo_20 is in conflict with policy SP01. This site cannot be seen as promoting the most significant levels of development as the principal centre of Exmouth.

This is the largest proposed development for Exmouth, yet the main access point for this site is via the B3179, which makes Budleigh Salterton town centre (at 2.2 miles away) over 2 miles closer than Exmouth Town centre.

This site cannot be considered to be a development in Exmouth and is an unsustainable location. (POLICY SP01 proposes to promote the most significant levels of development at the principal centre of Exmouth).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: In my consideration it is not sound due to a direct contradiction with The Environment Act 2021, within which there is a stated commitment to conserve and enhance the habitat and wildlife of our natural environment, Natural habitats and biodiversity; flora and fauna, and to Ensure current, and potential future, habitat connectivity is not compromised.

Allocation of Exmo_20, a supporting habitat for foraging Nightjars would be contrary to this.

Furthermore Exmo_20 is located on the SNA 368 which is being allocated as a site with the Devon Local Nature Recovery Network (LNRS) as required by the Environment Act 2021, so allocation would be in conflict with this strategy of conserving and enhancing the habitat and wildlife of our natural environment.

Other sites, shown as preferred within the Agenda for the 3rd September Strategic Planning Committee meeting should be selected for allocation as an alternative to Exmo_20

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: An alternative site to Exmo_20 for housing allocation should be selected, as Exmo_20 would cause harm to the adjacent Pebblebed Heaths (SSSI /SAC /SPA /NNR) due to Exmo_20 being a supporting foraging habitat.

Allocating Exmo_20 is contrary to the HELAA, the Site Selection Methodology & POLICY PB01 of the local plan and not in accordance with the Mitigation Hierarchy to select avoidance over mitigation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Continuity and Accountability

Full name: Shane Rabik

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Contrary to POLICY OLO5 of the local plan, this project would lead to coalescence of Budleigh Salterton and Exmouth.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: For the sake of continuity and accountability

Full name: Su Randell

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The main access point of Exmouth-20 is significantly closer to Budleigh than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh, shops, school, doctors etc would be the preferred choice for residents of Exmouth-20. This undermines the settlement hierarchy and would lead to coaxes of Budleigh and Exmouth contrary to POLICY OLO5 of the Local Plan. An alternative site for Exmouth-20 should be selected, one which was deemed available, achievable and suitable in the HELAA. Exmo-20 would cause harm to the adjacent Pebblebed Heaths (SSSI/SAC/SPA/NNR) due to Exmouth-20 being a supporting foraging habitat. Developing Exmo-20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy. Exmo-20 would cause harm to the heritage assets, most significantly St John in the Wilderness Grade 11* listed church and churchyard, drastically altering the attractive rural setting for worship and burials which currently exists. This is contrary to POLICY HEO2. Exmo-20 would have a detrimental effect on the adjacent designated wildlife sites and destroy the “tranquility, wildness and dark skies “ of the countryside, which is contrary to POLICY OLO1 Exmo-20 development would be in conflict with the strategic Nature Area 368, fragmenting and isolating habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.9 Exmo-20 is in conflict with POLICY OLO9 and POLICY PB04 as the Habitats Regulations Assessment (30.01.25) states that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed HeathsSAC/SPA) such that the plan fails the integrity test Development of Exmo-20 on heavy clay subsoil with ineffective soakaways, would exacerbate the already identified downstream flood risk along Withycombe Brook through Exmouth which is already beyond its design capacity. This is in conflict with POLICY ARO1B Exmo-20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. The isolated location is unsustainable development as people would need to travel much further than 800m to existing key services and facilities, contrary to

PARAGRAPH 11.6. It is too far and too steep from any town centre to use walking or cycling as their choice of transport. This is contrary to POLICY TRO1.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo-20 from the local plan Do not access the site via the B3179 or Southern Wood.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The NPPF (188) states that “Plans must distinguish between the hierarchy of international, national and locally designated sites”. The Pebblebed Heaths are amongst the most important conservation sites in Europe. European sites have the benefit of the highest level of legislative protection for biodiversity, and there are also specific duties in terms of avoiding deterioration of habitats and species for which sites are designated or classified, that all public bodies are required to adhere. The Pebblebed Heaths are amongst the most important conservation sites in Europe, classified as a Special Protection Area for the UK population of breeding nightjar and Dartford Warbler, and Exmo_20 is functionally linked land; a supporting habitat for the foraging nightjar. Studies show that these fly from nesting sites to feed at night, and loss of foraging habitat or disruption of routes to feeding areas could undermine the conservation objectives of the SPA. Allocation of Exmo_20 is in conflict with the NPPF (188), Local Plan policy PB01 and paragraph 13.23.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is complete conflict to The Local Plan policy OL01 which states that development will only be permitted where...it will protect and enhance valued landscape attributes and special features and qualities, including aesthetic and perceptual factors such as tranquility, wildness and dark skies. Adjacent to the Pebblebed Heaths(SPA/SAC/SSSI) the dark skies, wildness and tranquility are not only aesthetic and perceptual factors but vital conditions for the wildlife on the Heaths for which Exmo_20 provides a supporting habitat. Allocation of Exmo-20 would have a detrimental effect on this habitat which is a Strategic Nature Area, (SNA368) part of the on Devon Local Nature Recovery Network, and provides a wildlife corridor and stepping stone for wildlife on the double designated Pebblebed Heaths. The dark skies and tranquility are a valued landscape attribute of Exmo_20, both perceptually and functionally and would be destroyed by allocation of the site.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Local Plan states that “primary vehicle access to the site, serving the large majority/bulk of development will be from the B3179 to the north”, meaning that the vehicular access point to Exmo_20 is closer to Budleigh Salterton (2.3 miles and Woodbury (3.4 miles) than it is to Exmouth(4 miles). From this point it is both closer and faster to drive to the town centre in Budleigh than to the town centre in Exmouth which would result in residents relying primarily on Budleigh for key infrastructure and services (high street/GP/primary school etc). Budleigh is a tier 2 town and could not support this. Policy OL05 of The Local Plan states that development would not be permitted if it could lead to coalescence. Allocation of Exmo_20 would lead to functional coalescence of Exmouth and Budleigh Salterton. Paragraph 3.34 of The Local Plan states that by directing growth to the tier 1-4 settlements their approach ensures development is concentrated in areas with existing infrastructure and services. Allocation of Exmo_20 is contrary to this; despite being labelled as an Exmouth site the reality is that the increase in population (expected 2000+) will be supported by Budleigh, a tier 3 settlement. Exmouth Community College is the catchment secondary school for both Exmouth and Budleigh and does not have capacity for a large increase in population, nor the physical space to enlarge and expand. Numerous children from Exmouth have been unable to secure a place there due to insufficient capacity and have had to travel to Cranbrook for secondary education. Existing sewerage systems in both Budleigh and Exmouth are wholly inadequate for the current population. The Local Plan is unsound; allocation of Exmo_20 is contrary to Policy OL05 and paragraph 3.34 of the Local Plan, contrary to NPPF 129c in failing to consider existing infrastructure problems and would result in a significant increase in “the unrestricted sprawl of large built-up areas”, something the NPPF specifies should be avoided (NPPF 143 a,b and c).

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo-20 conflicts with NPPF 77 which outlines how large numbers of homes can best be achieved through new settlements or significant extensions to existing villages and towns which should be well located, supported by the necessary infrastructure and facilities (including a genuine choice of transport modes). Exmo_20 is neither a new settlement nor an extension to an existing town, it would be an isolated housing development. The NPPF then clarifies that “when considering edge of centre and out of centre proposals, preference should be given to accessible sites which are well connected to the town centre” (NPPF 92). Exmo_20 is inaccessible and poorly connected to the town centre; Exmouth is a minimum of 4 miles by car from the proposed housing (and necessitates a circuitous car journey), up a steep hill and without cycle paths. It would be a development detached from the town without feasible connection to Exmouth. As such allocation of Exmo_20 is unsound and it should be removed from the local plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Billy Reed

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 conflicts entirely with both the Local Plan and the NPPF. It is significant development in a location which would increase the need to travel, cannot offer a genuine choice of sustainable travel modes and would significantly increase congestion and emissions - all contrary to both chapter 9 of the NPPF and Chapter 11 of The Local Plan. Walking and cycling are not viable choices - the centre of the site is over an hour's walk at brisk pace to access the town centre/sports centre/train station/secondary school etc. and the topography makes walking as a primary choice unrealistic. Studies referenced in the Local Plan (HCO-002, evidence library) show that people are most likely to walk if their journey is not further than 10 minutes walk each way, beyond the distance of 1 mile cars are the dominant mode of travel and that beyond 2 miles trips on foot are few. Walking from is not a sustainable travel mode from Exmo_20. Both proposed access points lead to busy roads without any cycle paths so although cycle paths can be provided within the development cycling is not a safe or viable option to access anywhere outside of the site. Cycling is not a sustainable travel mode from Exmo_20. Travel from Exmo_20 would be by private car, yet the main (if not only) vehicular access to the site is proposed at the B3179, 4 miles away from Exmouth town centre - and the most distant point to the town from the whole site of Exmo_20. Furthermore due to the legal requirement that no residential dwellings can be built within a minimum distance of 400m from East Devon Pebblebed Heaths (SPA/SAC/SSSI), residents would be forced to drive between 0.4km and 0.8km in the opposite direction to Exmouth from their home just to reach the site entrance, resulting in not only more car journeys but also requiring cars to travel more miles, thus increasing both congestion and emissions. This lack of sustainable transport increases social exclusion for those without car access, such as young people, older people, those with disabilities, and low income households (Local Plan paragraph 11.3). The Local Plan also proposes that it is feasible for larger developments to be within 800m of key services and facilities yet the majority of site Exmo_20, one of the largest proposed

developments, will not be within 800m of any key services or facilities. Allocation of Exmo_20 is in conflict with policies TR01, TR03, paragraphs 11.2, 11.3, 11.4, 11.6 and figure 7 of the Local plan, therefore allocation of Exmo_20 is unsound

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

This lack of sustainable transport increases social exclusion for those without car access, such as young people, older people, those with disabilities, and low income households (Local Plan paragraph 11.3). The Local Plan also proposes that it is feasible for larger developments to be within 800m of key services and facilities yet the majority of site Exmo_20, one of the largest proposed

developments, will not be within 800m of any key services or facilities. Allocation of Exmo_20 is in conflict with policies TR01, TR03, paragraphs 11.2, 11.3, 11.4, 11.6 and figure 7 of the Local plan, therefore allocation of Exmo_20 is unsound.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan, or reduce it dramatically and revert to allocating 150 homes at Exmo_20b.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Cora Reece

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to Pebblebed Heaths (SAC/SPA). Developing Exmo_20 is contrary to Policy PB01 of the local plan and not in accordance with the mitigation strategy.

Exmo_20 would destroy the 'tranquility, wildness and dark skies' of the countryside which is contrary to policy OL01.

Exmo_20 development is detrimental to the mental health and wellbeing of the public at large as well as local residents who benefit from wide open spaces and wildlife in this area.

The proposal is in conflict with local habitats and wildlife contrary to policy OL09 and PB04.

The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient accessible town. This would lead to coalescence of Budleigh and Exmouth contrary to policy OL05 and TR01.

The proposed development of Exmo_20 signals a permanent loss of agricultural land and food production for swathes of countryside in the local and immediate area. This appears to be in disregard to the other issues already outlined as above.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: As a local resident I have concerns about the changes to the immediate area of where I live and the impact/ affect this will have on my lifestyle.

Full name: Sally Regan

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

Full name: Robert Richards

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heath (SAC/SPA). Developing Exmo-20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy. EXMO-20 would destroy the "tranquility,wildness and dark skies" of the countryside, which is contrary to POLICY 0L01. Developing EXMO-20 would fragment and isolate habitats and destroy wildlife corridors,contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9. The Habitats Regulations assessment (30.01.25) confirms that there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to....air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo-20 is in conflict with POLICY PB04. Exmo-20 would have significant adverse effects on St. John in the Wilderness Grade 11 listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02. Exmo-20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY ARO1B. Exmo-20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6 It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01. The main access point to Exmo-20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh it's most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctors, school, beach etc) would be the obvious choice for residents of

Exmo-20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY 0L05 of the local plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo-20 from the Local Plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Pauline Ann Richards

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA). Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy.

Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan.

The proposed site should not be accessed via the increasingly busy B3179. This road is narrow and already large lorries using this road are unable to stay on their side of the white lines, frequently causing difficulties to oncoming traffic.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Courtney Richards

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA). Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy.

Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

? Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

? The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

1. Remove Exmo_20 from the local plan
2. The proposed site should not be accessed from the B3179. This road is not very wide and large vehicles already drive out over the white line. Any increase in traffic will add to this already dangerous piece of road

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Courtney Richards

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This development would cause harm to the Pebblebed Heaths and Exmo_20 is contrary to Policy PB01 of the Local Plan. Areas at the bottom of the site are at risk of flooding. This development will increase the likelihood of flooding in areas lower than the proposed site contrary to Policy AR01B. Budleigh Salterton could not cope (doctors, schools etc) with the great influx of people given the proposed access site is closer to Budleigh Salterton than Exmouth

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The proposed site should not be accessed via the B3179. 1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns. Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner. A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath. future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The main access point of Exmo 20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Drs, school, beach et cetera) would be the preferred choice for residents of EXMO20. The infrastructure of Budleigh (High Street, doctors, school, beach etc.) This undermines the settlement hierarchy and would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local plan.

An alternative site to Exmo 20 housing allocation should be selected, one which was deemed available, achievable and suitable in the HELAA. Exmo 20 would cause harm to the adjacent pebble bed heaths (SSS1/SAC/SPA/NNR) due to Exmo 20 being a supporting foraging habitat. Allocating Exmo 20 is contrary to the HELAA, the site selection methodology and Policy PB01 of the local plan and not in accordance with the mitigation hierarchy to select avoidance over mitigation.

Exmo 20 would cause harm to the heritage assets as this Saxon Norman Medieval settlement most significantly St John in the wilderness grade 11 listed church, eroding the attractive rural setting for worship and burials which currently exists. This is contrary to policy HE02.

Exmo 20 would have a detrimental effect on this open countryside site and the adjacent internationally designated wildlife sites, eliminating the tranquility, wildness and dark skies, which is contrary to policy OL01. Exmo 20 development would be in conflict with the strategic nature area 368, fragmenting and isolating habitats and destroy wildlife corridors, contrary to paragraph 13.23 of the local plan. It would cause

harm to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to paragraph 13.9. Exmo 20 is in conflict with policy 0L09 and policy PB04 as the habitats regulations assessment 30th of January 25 states that there is currently not sufficient certainty to rule out adverse affects in integrity in relation to air quality (East Devon pebblebed Heaths SAC/SPA such that the plan fails the integrity test. The main site access proposed is opposite the SAC/ SPA.

Development of Exmo 20 on heavy clay subsoil with ineffective soakaways would exacerbate the already identified downstream flood risk along Withycombe Brook through Exmouth, which is already under additional pressure from climate change. This is in conflict with policy AR01B.

Exmo20 would increase the need for car travel, contrary to figure 7 – the energy hierarchy and increase traffic congestion, in conflict with paragraph 11.2. The isolated location provides unsustainable development as residents would need to travel much further than 800 m to existing key services and facilities, contrary to paragraph 11.6. it is too far and too steep from any town centre to use walking or cycling as their choice of transport. This is contrary to Policy TR01.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Exmo 20 is in conflict with SP01. Exmouth (a Tier 1 town) is totally unsuitable for further growth, The centre of the town is wedged in by the coast and River Exe to the South and West and the sprawl of the town already to the North and East is running up to the escarpment formed by Woodbury Common (the Pebblebed Heaths) and closing in on neighbouring towns and villages, Any development here will be too far from the significant infrastructure of Exmouth and unsustainable!

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: No modification will make it legally compliant

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Totally unsuitable location, Transport of choice for residents of housing in the Southern area of the site seeking access to the Centre of Exmouth will have to drive a significant further distance in order to Exit to the East onto B3179 - the identified exit from the development (excluding the strip of 400m mandatory buffer zone). This will necessitate substantial further "car miles". Walking will be necessary to access even improved bus services and the topography will militate against cycle access.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: There are none

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Exmouth is already deficient in infrastructure for its existing population. There is a need for additional Doctors surgeries and, particularly, dentists. The existing sewerage system is already demonstrably inadequate (Discharges into the Sea, beach closed for swimming regularly and regular features on National news outlets

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Neill Robson

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

? The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 could and should be located on an alternative site, one which was deemed available, achievable and suitable in the HELAA. Exmo_20 would cause harm to the adjacent Pebblebed Heath (SSSI/SAC/SPA/NNR) due to Exmo_20 being a supporting foraging lhabitat. Allocating Exmo_20 is contrary to the HELAA,the Site Selection Methodoligy & POLICY PB01 of the local plan and not in accordance with the Mitigation Hierarchy to select avoidance over mitigation.

Exmo_20 would destroy the “the tranquillity, wildness and dark skies” of the countryside, which is contrary to POLICY OL01.

Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the LOCAL PLAN. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9

The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04.

Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified downstream flood risk along Withycombe

Brook through Exmouth, which is already under additional pressure from climate change. This is in conflict with POLICY AR01B.

Exmo_20 would increase the need for car travel, contrary to figure 7 - the energy hierarchy, and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctors, School, beach, etc.) would be the preferred choice for residents of Exmo_20. This undermines the settlement hierarchy and would lead to the coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the Local Plan.

Exmo_20 would have significant adverse effects on St. John In The Wilderness Grade II listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02..

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This site would cause harm to the Pebblebed Heathlands (SAC/SPA). Developing this site is contrary to POLICY PBO1 of the local plan and with the mitigation strategy. Exmo_20 would be very detrimental to the 'tranquillity, wildness and darkness of night skies' of the countryside which is contrary to POLICY OLO1. Developing this site (Exmo_20) would break up and isolate wildlife habitats and destroy corridors, all of which are contrary to PARAGRAPH 13.9 of the local plan. It would harm irreplaceable habitats, ancient trees and hedgerows which act as natural corridors for wildlife and which are rich in a variety of species, contrary to PARAGRAPH 13.9. The habitat regulations assessment (30.01.25) confirms that there is 'currently not sufficient certainty to rule out adverse effects in integrity to.....air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OLO9 and POLICY PBO4. Development of Exmo_20 would have a detrimental effect on St. Johns In The Wilderness Grade II listed church and churchyard, and spoiling the peaceful setting for worship, contrary to POLICY HE02. Exmo_20 would increase the water run-off through the natural stream and from a heavy clay soil, increasing the flood risk of the already identified in Withycombe contrary to POLICY AR01B. The proposed site of Exmo_20 would increase vehicle travel beyond the 800m to key services and facilities, contrary to POLICY TR01. The main access point to Exmo_20 is closer to Budleigh Salterton than to Exmouth. The services and infrastructure of Budleigh Salterton would put under a greater strain than unfair strain that has not been properly considered. This would be contrary to POLICY OL05 of the LOCAL PLAN as it would lead to a blending together of the two discrete towns.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan, or at the very least reduce its scale. Do not have vehicle access via the B3179. Revert to Exmo_20b as previously proposed.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: As a stakeholder I am anxious to see the democratic system, with all its transparency, in action.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wish to register my objection to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns. The old railway line is a well used cycle and footpath that enables Exmouth and Budleigh residents to exercise in a rural environment. We have also noted a number of disabled people using the path with their mobility scooters.

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath.

I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

We hope you will reconsider these building plans.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20: Although the plan mentions Exmouth, this new development is much nearer to Budleigh Salterton. I am completely against this large amount of houses producing more than 1,400 people plus many cars - possibly two per household - and of course many children. There is one school in Budleigh - full. One Doctor's surgery and it incredibly hard to get an appointment at the best of times, let alone if there are many extra people. The B3179 road is narrow, winding and as are other roads in the area, and not suitable for extra traffic. Parking in Budleigh is hard to find and there are not many buses. I spoke to some shop owners who are not keen on the proposals and say it won't make much difference to their businesses. So many people shop on line, go to Tesco and Lidl and don't use local shops at all. I want to know how many 'affordable' houses are in the proposal - we need cheaper houses and not just the expensive properties. There is already a large housing area at Goodmores Farm on the edge of Exmouth, leading onto small roads. What about infrastructure??

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA). Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy.

? Exmo_20 would destroy the “tranquillity, wildness and dark skies” of the countryside, which is contrary to POLICY OL01.

? Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9

? The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04.

? Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02.

? Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

? Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

? The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To remove Exmo20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: so we get to air our views

Full name: Jacqueline Jane Ruhlig

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Main access point of Exmo _20 significantly closer to Budleigh than Exmouth, making Budleigh its most convenient and accessible town. Services & infrastructure of Budleigh would be the preferred choice for residents of Exmo_20. Would lead to the merging together of Budleigh & Exmouth, contrary to Policy OLO5 of the local plan. Exmo _20 would cause harm to the heritage assets, most significantly St John in the Wilnernesss Grade 11 listed church & churchyard, drastically changing the attractive rural setting for worship & burials which currently exists. This is contrary to POLICY HE02. EXMO-20 would have a detrimental effect on the adjacent designated wildlife sites and destroy the "tranquility, wildness and dark skies" of the countryside, which is contrary to POLICY OLO1.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce size of EXMO-20 or REMOVE it from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Lin Salter

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath. This shared path is a wonderful amenity and was originally constructed as Councils had to provide cycle paths, but now you don't care about it or its users.

I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 development would be in conflict with the Strategic Nature Area 368, fragmenting and isolating habitats and destroying wildlife corridors, contrary to paragraph 13.23 of the Local Plan. As well as causing harm to irreplaceable habitats, veteran trees and species rich hedgerows contrary to paragraph 13.9.

The heavy clay subsoil with ineffective soakaways would exacerbate the already identified downstream flood risk along Withycombe Brook through Exmouth (already under pressure from climate change) which conflicts with policy AR01B.

In addition, the Exmo_20 development would increase the need for car travel, contrary to Figure 7 and conflict with paragraph 11.2 The isolated location would mean residents would need to travel much further than 800m to existing key services and facilities which is contrary to paragraph 11.6. The location is also too far and too steep from any town centre to use walking or cycling as a main choice of transport for most people which is contrary to policy TR01.

I also believe that with the almost 200 houses currently being built up the road from this proposed site (Exmo_20) at the new Goodmores development, Exmouth does not have the jobs, dentists, GPs or school spaces to support an additional 700 households. Buses and trains to Exeter are frequently delayed or full and the roads are busy and not well maintained (potholes) due to the constant use. Add to this the additional pressures from students visiting from the language schools and Sandy Bay from spring - summer, that is a lot of people in a town that is already buckling under inadequate sewage infrastructure with regular raw sewage leaks and problems with drainage.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To remove the Exmo_20 site from the Local Plan altogether. Alternatively, reducing the size of Exmo_20 and removing the access to the site via Southern Wood would reduce some of the issues above, but not solve them.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Sandra C Satterly

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: the main access point of Exmo_20 is significantly closer to Budleigh Salterton than it is to Exmouth thus making Budleigh Salterton the most convenient and accessible town. The services and infrastructure of Budleigh Salterton (the High Street, Doctors, School, beach etc) would be the preferred choice for residents of Exmo_20. This undermines the settlement hierarchy and would lead to coalescence of Budleigh salter ton & Exmouth, contrary to POLICY OL05 of the local Plan.

An alternative site to Exmo_20 for housing allocation should be selected, one which was deemed available, achievable & suitable in the HELAA. Exmo_20 would cause harm to the adjacent Pebblebeds Heaths (SSSI/SAC/SPA/NNR) due to Exmo_20 being a supporting foraging habitat. Allocating Exmo_20 is contrary to the HELAA, the Site Selection Methodology & POLICY PB01 of the local plan and not in accordance with the Mitigation Hierarchy to select avoidance over mitigation.

Exmo_20 would cause harm to the heritage assets at this Saxon/Norman/Medieval settlement, most significantly St John in the Wilderness Grade II* listed church, eroding the attractive rural setting for worship & burials which currently exists. This is contrary to POLICY HE02.

Exmo_20 would have a detrimental effect on this open countryside and the adjacent internationally designated wildlife sites, eliminating the "tranquility, wildness and dark skies", which is contrary to POLICY OL01.

Exmo_20 development would be in conflict with the Strategic Nature Area 368, fragmenting and isolating habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the local Plan. It would cause harm to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9.

Exmo_20 is in conflict with POLICY OL09 and POLICY PB04 as the Habitats Regulations Assessment (30.01.25) states that there is "currently not sufficient certainty to rule out adverse effects in Integrity in relation to ...air quality (East Devon Pebblebed Heaths SAC/SPA) such that the Plan fails the integrity test. The main site access proposed is opposite the SAC/SPA.

Development of Exmo_20 on heavy clay subsoil with ineffective soakaways, would exacerbate the already identified downstream flood risk along Withycombe Brook through Exmouth, which is already under additional pressure from climate change. This is in conflict with POLICY AR01B.

Exmo_20 would increase the need for car travel, contrary to Figure 7 - the energy hierarchy, and increase traffic congestion, in conflict with PARAGRAPH 11.2. The isolated location provides unsustainable development as residents would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre to use walking or cycling as their choice of transport. This is contrary to POLICY TR01

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Do not access the site via Southern Wood.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Nigel Savery

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 and its development is contrary to * Policy PB01 and is not in accordance with the mitigation strategy. Exmo_20 should be located on an alternative site so there is less harm to the pebbled heaths. Exmo_20 would harm the wilderness, dark skies and peacefulness of the area which is contrary to *Policy OL01. EXmo_20 would destroy wildlife habitats and their corridors contrary to Paragraph 13.23. it would kill habitats, trees, heather rows never to be seen or replaced again so is contrary to *Paragraph 13.9. *The habitats regulations assessment of 30.01.25 confirms that there is currently not sufficient certainty to *RULE OUT adverse effects in integrity in relation to the air quality regarding the Devon pebbled heath *SAC/SPA. Exmo_20 and it is in conflict with Policy OL09 and *Policy PB04. EXmo_20 would have adverse effect on Grade 11 listed St John's church which is a peaceful place of worship and its setting this is contrary to *Policy HE02. Exmo_20 is a catchment area of rainwater for Exmouth and most of the Withycombe brook. Exmo_20 would be built on heavy claymaking soakaways ineffective therefore allowing water to flow and possibly flood which is in conflict with *Policy AR01B. Exmo_20 would cause more traffic in an already congested area with bad road access to Exmouth and Budleigh, Access to the site will not work and would need rethinking. to suggest people will ride or walk into town is a joke, people use cars. contrary to *Policy TR01. Not enough Shops, need a large supermarket to rival Tesco. not enough Doctors, Schools the area would be over run, which is contrary to *Policy OL05.

The services and infrastructure of Budleigh (Doctors/dentists, schools, high street, beach etc) would be the preferred choice for new residents of Exmo_20. This undermines the settlement hierarchy and would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the Local Plan. In addition, the sewage and waste water systems are already failing to cope, this development would make an already unacceptable situation worse

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Rebecca Shand

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I

don't normally get involved with building plans as I understand that folks need somewhere to live - but this too much, too big and impractical.

I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath.

I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

Please consider the impact this would have on land that is historically and environmentally important and reject this application. Not on your watch, as they say.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The services and infrastructure of Budleigh Salterton are insufficient to cope with this development. Budleigh being closer to the access point than Exmouth. The plan would cause significant harm to the pebblebed heaths against the SSS, SAC, SPA & NNR as its a significant foraging habitat, contrary to Policy PB01. It would cause harm to irreplaceable habitats, trees and hedgerows. Car travel and congestion would be increased, and the B3179 often has accidents as road entrances are on bends and difficult to access.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo 20 from the local plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA). Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy. ? Exmo_20 would destroy the “tranquility, wildness and dark skies” of the countryside, which is contrary to POLICY OL01. ? Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9. ? The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04. ? Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02. ? Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Withycombe. This is in conflict with POLICY AR01B. ? Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01. ? The main access point of Exmo 20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach

etc) would be the obvious choice for residents of Exmo 20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Sara Shaw

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth. The Services and infrastructure of Budleigh (High Street, GP Surgery, School and the Beach) would be compromised. This contravenes Policy OL05 of the local plan.

Exmo_20 development contravenes Policy PB01.

Exmo_20 would cause harm to the heritage assets including St John In the Wilderness Grade II listed Church and Churchyards. This is contrary to Policy HE02.

Exmo_20 would have a detrimental effect on designated wildlife sites. Contrary to Policy OL01.

Exmo_20 development would be in direct conflict with the Strategic Nature Area 368.

Exmo_20 would be in direct conflict with Policy OL09, and PB04.

Exmo_20 Development on heavy subsoil with ineffective soakaways, would exacerbate the already identified downstream flood risk. Conflict with Policy AR01B.

Exmo_20 would increase the need for car travel, increasing traffic congestion. The isolation of the Development would mean people travelling much further to access key services. It is too far and steep from any Town to be cycled or walked. Contrary to Policy TR01.

Remove Exmo_20 from The Local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from The Local Plan.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The procedure for approving the site selections and the draft regulation 19 draft Local Plan relies on the Strategic Planning Committee (SPC) performing in accordance with the councillor Code of conduct and Code of practice for councillors and officers dealing with planning matters. There have been multiple occasions where proceeding appears to have not been in accordance with protocol. Firstly Councillor Ben Ingham's behaviour on 3rd September 2024 and 29th October 2024 is currently under investigation for breaches of the Code of conduct. It has been acknowledge by the EDDC monitoring officer that he breached the Code of practice on 3rd September 2024 by speaking regarding Lymp_07, then taking part in debate, then voting, then not ensuring his actions were recorded suitably. Of note is the complete omission of him speaking to the committee from the meeting's minutes. The significance of these episodes is that the Councillor's conduct potentially influence the Lymp_07 vote and due to the sequential way the site allocations were considered, had implications for all subsequent decisions, as mentioned by the Chair, Councillor Todd Olive, immediately after the Lymp_07 vote, stating, "and we now have 100 more houses to find". The decision making process is potentially not sound and not lawful.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The site selection process for all SD01 site allocations needs to be rerun

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 site is located adjacent to the Pebblebeds Heath, designated as the most significant wildlife site in the south-west, being the only double internationally designated SAC & SPA land based site, and also being a SSSI, NNR and part of the National Landscape. The maps used for the site selection process [attached] include multiple designations from national, county level and local authority level, but omit these SAC & SPA international designations. The LPA must provide all the relevant information so that informed decision can be made. With the above in mind, it is clear that decision makers, such as the Strategic Planning Committee could have been misinformed, relying on incorrect information to form opinions, such that their judgement was unjustified and therefore not sound.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 and select alternative sites that will not have a likely significant effect on the Pebblebeds Heath SAC / SPA and will not required significant mitigation.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am concerned regarding EDDC's cavalier attitude

towards development adjacent to the Pebblebeds Heath and their ability to undertake their duty as the "competent authority" under the Habitats Regulations.

Full name: Thomas Shillitoe

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Resubmitting due to ongoing issues with commonplace: The Regulation 19 Draft Local plan voted for on 11th December 2024 had no Habitats Regulations Assessment (HRA). This is the plan that was used for the Regulation 19 process, please note that minor amendments were made subsequently and agreed on 3rd February 2025, but the vote on that day was strictly for the amendments, not the Regulation 19 Draft Local plan agreed on 11th December 2024. The HRA was published by Footprint Ecology on 30th January 2025. This HRA stated that the draft Local Plan had an inherent conflict. This needed to be address for the plan not only to be deemed sound but also legally compliant. Clearly as the LPA had agreed to proceed with the Regulation 19 Draft Local plan on 11th December 2024, there was no option to address this, in fact the entire Regulation 19 Draft Local was not informed by the HRA, rather that the LPA expected the HRA to support the Plan, as Matt Dickins states in his email dated 4th December 2024 [Dickins email attached] “We will be having an assessment under the Habitat Regulations produced for us in support of the plan”. Throughout the Local Plan preparation process, EDDC, as the ‘competent authority’ have demonstrated a widespread cavalier attitude, or a fundamental misunderstanding, regarding their obligations under the Conservation of Habitats and Species Regulations. The HRA should have informed the decision making and must not show conflict prior to progressing to Regulation 19 publication. By producing the HRA after agreeing the Regulation 19 Draft Local plan, the LPA have possibly erred in law. The NPPF states “Significant adverse impacts on these [environmental] objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued.” Which is part of the Mitigation Hierarchy, which does not appear to have been applied to the site selection process. I was concerned of the lack of consultation with Natural England regarding the allocation of Exmo_20, as until the 3rd September 2024 it was not proposed to be allocated (and owing to the fact it failed the HELAA assessment, in accordance with the Site Selection Methodology May 2022,

could never be). A freedom of information request was made to Natural England, who confirmed that they had at no point been consulted regarding Exmo_20 being allocated [attached FOI NE] therefore EDDC have failed with their Duty to Co-operate obligation. Please note that this observation is for one site with one statutory body, so it is possible that non compliance with Section 33A of the PCPA 2004 and Section 18 of the The Town and Country Planning (Local Planning) (England) Regulations 2012 is applicable to multiple site allocations and multiple statutory bodies. On 4th February, despite the HRA published on 30th January stating under 9.9 “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.”, Ed Freeman advised the SPC councillors that “we are satisfied it can be mitigated”, based on conversations he has had. After the meeting I emailed Ed Freeman to ask for evidence to back up the assertion he gave to the SPC, but he replied stating “I do not intend to respond to these messages or future messages on these matters” [Freeman emails attached]. I feel the SPC were misled by Ed Freeman assertion upon which he has provided no foundation or evidence to substantiate his claim. Furthermore, having a Plan in conflict with the HRA makes it not sound and not lawful and the Plan should not have progressed to Regulation 19 publication stage. The Procedure Guide for Local Plan Examinations states: Section 1. The LPA should rigorously assess the plan before it is published under Regulation 19 to ensure that, in their view, it is sound and meets all the necessary legal requirements. Procedure Guide for Local Plan Examinations - GOV.UK

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan and select sites giving consideration to the mitigation hierarchy.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Resubmitting due to ongoing issues with commonplace: The Regulation 19 Draft Local

plan voted for on 11th December 2024 had no Habitats Regulations Assessment (HRA). This is the plan that was used for the Regulation 19 process, please note that minor amendments were made subsequently and agreed on 3rd February 2025, but the vote on that day was strictly for the amendments, not the Regulation 19 Draft Local plan agreed on 11th December 2024. obligations under the Conservation of Habitats and Species Regulations. The HRA should have informed the decision making and must not show conflict prior to progressing to Regulation 19 publication. By producing the HRA after agreeing the Regulation 19 Draft Local plan, the LPA have possibly erred in law. The NPPF states “Significant adverse impacts on these [environmental] objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued.” Which is part of the Mitigation Hierarchy, which does not appear to have been applied to the site selection process. I was concerned of the lack of consultation with Natural England regarding the allocation of Exmo_20, as until the 3rd September 2024 it was not proposed to be allocated (and owing to the fact it failed the HELAA assessment, in accordance with the Site Selection Methodology May 2022, could never be). A freedom of information request was made to Natural England, who confirmed that they had at no point been consulted regarding Exmo_20 being allocated [attached FOI NE] therefore EDDC have failed with their Duty to Co-operate obligation. Please note that this observation is for one site with one statutory body, so it is possible that non compliance with Section 33A of the PCPA 2004 and Section 18 of the The Town and Country Planning (Local Planning) (England) Regulations 2012 is applicable to multiple site allocations and multiple statutory bodies. On 4th February, despite the HRA published on 30th January stating under 9.9 “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.”, Ed Freeman advised the SPC councillors that “we are satisfied it can be mitigated”, based on conversations he has had. After the meeting I emailed Ed Freeman to ask for evidence to back up the assertion he gave to the SPC, but he replied stating “I do not intend to respond to these messages or future messages on these matters” [Freeman emails attached]. I feel the SPC were misled by Ed Freeman assertion upon which he has provided no foundation or evidence to substantiate his claim. Furthermore, having a Plan in conflict with the HRA makes it not sound and not lawful and the Plan should not have progressed to Regulation 19 publication stage. The Procedure Guide for Local Plan Examinations states: Section 1. The LPA should rigorously assess the plan before it is published under Regulation 19 to ensure that, in their view, it is sound and meets all the necessary legal requirements. Procedure Guide for Local Plan Examinations - GOV.UK

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: As EDDC have not demonstrated they understand their duty as the "competent authority" under the Habitats Regulations

Full name: Thomas Shillitoe

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: As a local resident I have had no opportunity to object to the proposed allocation. Every consultation and document seen shows Exmo_20 as rejected and not to be allocated, ever since it was deemed “not suitable or achievable” at HELAA stage. This is a breach of the LPA’s duty to co-operate. Under the Town and Country Planning (Local Planning) (England) Regulations 2012, LPAs must engage with relevant stakeholders, including town and parish councils, as part of the Duty to Cooperate and the public consultation process. Key points include:

1. Duty to Cooperate – LPAs must engage with local councils and other statutory bodies in plan-making.
2. Regulation 18 Consultation – Early-stage consultation where town councils can provide input.
3. Regulation 19 Consultation – Formal publication of the draft plan, where the town council can submit representations before it goes to examination. Section 18 of the Regulations state: 18.—(1) A local planning authority must— (a)notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (b)invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (2) The bodies or persons referred to in paragraph (1) are— (a)such of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan; (b)such of the general consultation bodies as the local planning authority consider appropriate; and (c)such residents or other persons carrying on business in the local planning authority's area from which the local planning authority consider it appropriate to invite representations.

Taking into account that from the main site access point of Exmo_20 the nearest town centre is Budleigh Salterton, the nearest Primary School is in Budleigh Salterton and the nearest doctors is in Budleigh Salterton, I cannot see why EDDC determined that Budleigh Salterton was not “relevant” to the proposed Exmo_20 allocation so did not consult the Town Council. This is a breach of the LPA’s duty to co-operate.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure I have a formal opportunity to object to the proposed allocation of Exmo_20, as there has not been no opportunity yet.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Resubmitting due to ongoing issues with commonplace: The three tests of the HELAA are of availability, suitability and achievability. The site was deemed available, however this is a false statement, it was unquestionably not and it appears no checking was undertaken by the LPA to confirm that the 'Call for Site' submission was factually correct. The submission covers two land owners (redacted information), however, the site included multiple properties outside of the submitter's noted ownership and control, none of which have given consent or been notified that their property is included for allocation. The owners of the properties, including the church and multiple privately owned dwellings have confirmed their property is not available. This false claim of availability was raised by an owner, Mr Winn, in August 2022 [emails attached] and not addressed, and I raised this after the site was allocated on 3rd September 2024 (notably with EDDC stating no reconsideration of allocated sites permitted). Matt Dickins (EDDC Planning Policy) confirmed by email to me [attached] that no ownership checks were done prior to the vote to allocate, stating: "The large numbers of paper that have been going to committee have been prepared over several weeks and have drawn on data and information that has been logged in records over a longer period. We lack the resources to scrutinise every record in full detail and up to a point have to rely on third party submissions. Site 20, in total, was favoured by committee as a potential allocation, rather than being an officer recommendation, and as such we as officers, until committee endorsement, had not explicitly examined all site aspects in full detail, rather we were drawing on information held in records. We do not have signed papers from all landowners that they all wish to bring development forward, rather we are working on the basis that Eagle Investments (or under subsidiary or partner company or organisation names and their agents) are acting for and on behalf of all landowners."

This confirms that the HELAA process relating to ‘availability’ is unjustified and of no merit and the LPA have displayed a cavalier attitude to checking availability, contrary to the HELAA methodology 5.16. The conclusion of HELAA for Exmo_20 should have been “not available, not suitable & not achievable.”

It is worth noting that the SPC councillors on 3rd September 2024 were evidently attracted by the apparent size of this site shown on the map to deliver significant housing numbers, again demonstrating how the incorrect information provided by the Planning Policy team was misleading. The Planning Policy team knew that the site was not available [Mr Winn’s email dated 14.08.22 attached], yet presented it that it was, this is unlawful.

The site as shown on p.326 of the February 2025 Publication draft Local Plan Sustainability Appraisal shows the Exmo_20 site which is evidently not available, for the LPA to present it as available is unsound and unlawful.

The LPA failed in its duty to co-operate, as by EDDC considering and allocating this site, there were relevant stakeholders, such as Mr Winn, that were at no point made aware that their land has been allocated and still to date have not been consulted or notified.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The site allocation Exmo_20 must be removed from the Local Plan and sites that were stated as preferred in the agenda of the 3rd September 2024 Strategic Planning Committee meeting allocated as alternative sites.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Resubmitting due to ongoing issues with commonplace: The three tests of the HELAA are of availability, suitability and achievability. Submitting again due to ongoing Commonplace issues: EDDC have tried to change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process [attached]. After 11th December 2024 (the date the draft local plan was approved to proceed to regulation 19 publication) this was amended and this December 2024 amended version put in the evidence library for the Regulation 19 consultation. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below:

- Stage 2: Site Sifting 1.8 Following the ‘long list’ of sites identified in Stage 1, a ‘sifting’ process will be carried out to ensure that only ‘reasonable alternatives’ are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below.
- criteria a) Site is assessed as ‘suitable, available and achievable’ in the HELAA6
- Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. The revised December 2024 version, not used but presented in the evidence library (the only version present), has been amended to ensure the Site Selection Methodology evidence document does not show conflict with the Reg19 draft Local Plan, specifically the Exmo_20 allocation.

Revised December 2024 version amendments noted:

- Stage 2: Site Sifting 1.7 Following the ‘long list’ of sites identified in Stage 1, a ‘sifting’ process will be carried out to ensure that only ‘reasonable alternatives’ are considered further (see figure 2). Only sites which meet criteria a), b) and c) are carried forward to Stage 3. In exceptional circumstances, sites may continue to Stage 3 even if

they fail to meet the sifting criteria – such cases will be clearly justified. This could include potential gypsy and traveller site allocations, which are often located in the countryside. Similarly, some sites may pass the site sifting criteria but may not be considered a ‘reasonable alternative’ for other reasons and therefore should not be assessed at Stage 3 – again, this will need to be clearly justified on a site-specific basis.

- Subtext point 6 from May 2022 version deleted.

As the HELAA methodology is a key early stage of plan development based on broad planning policy context derived from the NPPF, to insert a clause that trumps the HELAA conclusions in essence is a clause to trump the NPPF. Therefore sites, such as Exmo_20 that were deemed “not suitable or achievable” in the HELAA process but are now allocated, cannot be considered ‘justified’, ‘effective’ or ‘consistent with national policy’ and the Plan is therefore not sound.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the site allocations and select alternatives from those shown as preferred in the agenda for 3rd September 2024 Strategic Planning Committee meeting.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To understand how a site that is not suitable or achievable for development (HELAA) can be considered to be able to deliver significant levels of development, as to date the LPA have not demonstrated how this contradiction will be overcome.

Full name: Thomas Shillitoe

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The allocation of Exmo_20 with SD01 is unsound & not legally compliant and the LPA failed in their duty to co-operate in the process of allocating this site.

Firstly, Exmo_20 was deemed available but not suitable or achievable in the HELAA process, as shown in HELAA Appendix E(v)1. On 3rd September this site was selected as allocated by the Strategic Planning Committee, despite the fact that there was no justifiable way, based on the May '22 Site Selection Methodology (attached) it could be. The Draft Local Plan was approved to progress to Regulation 19 consultation stage by the Strategic Planning Committee on 11th December 2024 with Exmo_20 allocated.

At some in December, after the publication of the new NPPF on 12th December, the Site Selection Methodology and this December 2024 version that is loaded into the Evidence Library as the "Site Selection Methodology", with no mention of the one that was used for the Regulation 18 stage. There appears to be no formal discussion or approval process for the revised "Site selection Methodology" and it appears that the supporting evidence has been altered to suit the draft Local Plan, which would be unlawful. The original May '22 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below:

- Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below.
- criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6

- Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. The revised Dec24 version, not used but presented in the evidence library (the only version present), has been amended to ensure the Site Selection Methodology evidence document does not show conflict with the Reg19 draft Local Plan, specifically the Exmo_20 allocation.

Revised Dec24 version amendments noted:

- Stage 2: Site Sifting 1.7 Following the ‘long list’ of sites identified in Stage 1, a ‘sifting’ process will be carried out to ensure that only ‘reasonable alternatives’ are considered further (see figure 2). Only sites which meet criteria a), b) and c) are carried forward to Stage 3. In exceptional circumstances, sites may continue to Stage 3 even if they fail to meet the sifting criteria – such cases will be clearly justified. This could include potential gypsy and traveller site allocations, which are often located in the countryside. Similarly, some sites may pass the site sifting criteria but may not be considered a ‘reasonable alternative’ for other reasons and therefore should not be assessed at Stage 3 – again, this will need to be clearly justified on a site-specific basis.
- Subtext point 6 from May22 version deleted. Furthermore, the Sustainability Appraisal is incorrect and misleading, stating that Exmo_20 was deemed “Available, suitable & achievable” in the HELAA process. The Site Selection Report - Exmouth (February 2025) omits Exmo_20 from the paragraph 1.7 list of site which did not pass site sifting. This report summarises "to pass site sifting and therefore be considered as a potential allocation, the site should be identified as suitable, available, achievable in the HELAA".

Because the site failed site sifting and was not preferred or alternative/second choice, it missed significant consideration or consultation through the Regulation 18 stage therefore the LPA failed in their duty to co-operate in the process of allocating this site.

With the above in mind, it is clear that decision makers, such as the SPC could have been misinformed, relying on incorrect information to form opinions, such that their judgement was unjustified and therefore unsound. Amending supporting evidence documents is unlawful.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if

you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove the allocation of Exmo_20 from the Local Plan. Other sites, shown as preferred within the Agenda for the 3rd September 2024 Strategic Planning Committee meeting should be selected for allocation as an alternative to Exmo_20.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 with SD01 is unsound & not legally compliant and the LPA failed in their duty to co-operate in the process of allocating this site.

Firstly, Exmo_20 was deemed available but not suitable or achievable in the HELAA process, as shown in HELAA Appendix E(v)1. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below.
- criteria a) Site is assessed as ‘suitable, available and achievable’ in the HELAA6
- Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. The revised Dec24 version, not used but presented in the evidence library (the only version present), has been amended to ensure the Site Selection Methodology evidence document does not show conflict with the Reg19 draft Local Plan, specifically the Exmo_20 allocation.

Revised Dec24 version amendments noted:

- Stage 2: Site Sifting 1.7 Following the ‘long list’ of sites identified in Stage 1, a ‘sifting’ process will be carried out to ensure that only ‘reasonable alternatives’ are considered further (see figure 2). Only sites which meet criteria a), b) and c) are carried forward to Stage 3. In exceptional circumstances, sites may continue to Stage 3 even if they fail to meet the sifting criteria – such cases will be clearly justified. This could include potential gypsy and traveller site allocations, which are often located in the countryside. Similarly, some sites may pass the site sifting criteria but may not be considered a ‘reasonable alternative’ for other reasons and therefore should not be assessed at Stage 3 – again, this will need to be clearly justified on a site-specific basis.
- Subtext point 6 from May22 version deleted. Furthermore, the Sustainability Appraisal is incorrect and misleading, stating that Exmo_20 was deemed “Available, suitable & achievable” in the HELAA process. The Site Selection Report - Exmouth (February 2025) omits Exmo_20 from the paragraph 1.7 list of site which did not pass site sifting. This report summarises "to pass site sifting and therefore be considered as a potential allocation, the site should be identified as suitable, available, achievable in the HELAA".

Because the site failed site sifting and was not preferred or alternative/second choice, it missed significant consideration or consultation through the Regulation 18 stage therefore the LPA failed in their duty to co-operate in the process of allocating this site.

With the above in mind, it is clear that decision makers, such as the SPC could have been misinformed, relying on incorrect information to form opinions, such that their judgement was unjustified and therefore unsound. Amending supporting evidence documents is unlawful.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure the unreasonable behaviour of the LPA is adequately considered.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: As a resident of Exmouth I have strong objections to the proposal to build over 400 houses on the eastern edge of Exmouth. Firstly the area is protected by National Landscape status, being truly an area of outstanding beauty, and its expedient acquisition will be greatly regretted. Secondly, there is already inadequate infrastructure for a growing town which is notorious for its overwhelmed sewage system and single-carriageway road from the M5. My chief concern however is that, if the development is primarily aimed at addressing the housing problem, it will fail in this intention because the location in AONB/NL land will inevitably attract "high-end" buyers who will require appropriately sized and equipped properties. Is the "housing problem" connected to £500k+ buyers? No, I don't believe it is - it's about lower-income families and 1st-time buyers who could never aspire to own a property such as the ones which EDDC plan to have built on this prime green space. This whole shameful proposal will do nothing for the most needy families. It may be remembered more as a cash grab by Clinton Estates, who must have rubbed their hands with glee when they heard about the plan.

Allocation Exmo_20 is in conflict with paragraph 3.30. The settlement boundary around Exmouth has been extended to include not only the land which housing will be built on but also to include the 400m buffer zone adjoining the Pebblebed Heaths, therefore defining this land as acceptable for development. Although housing cannot be built on the buffer zone, by including it within the settlement boundary it is available for other kinds of development. This is contradictory to the precautionary approach as the plan fails to robustly protect against adverse effects of recreational use etc on the Pebblebed Heaths.

Allocation of Exmo_20 is in conflict with policy OL05. The main access point to Exmo_20 is 4 miles from the centre of Exmouth and only 2.2 miles from the centre of Budleigh Salterton, making Budleigh significantly more accessible to the development. The access arrangement for the site leads naturally down the road into Budleigh Salterton High Street whereas to get into Exmouth means travelling twice the distance and having to go around the edge of Exmouth to get back down into it. The High Street, Doctor's surgery, primary school, beach etc in Budleigh would be the most accessible and obvious choices for residents of Exmo_20. Currently Exmouth and Budleigh are separated in terms of functionality but this development would merge the two, (as has already happened with Topsham and the Exeter suburbs)with residents living in one town whilst relying on day-to-day services and infrastructure of the other.

ALLOCATION OF Exmo_20 is in conflict with policy OL01. The site is distinctive for its dark skies, tranquillity and wildness. In addition to light from the housing development itself, the main site access point being at the B3179, directly opposite the SPA/SAC/SSSI would cause a significant flow of car headlights destroying the darkness across the entire length of the site and all shining directly onto the Heaths as vehicles exit the site. The area around St John in the Wilderness church is characterised by dark skies and a strong sense of remoteness and tranquillity, a 'wilderness' setting integral to the grade II* listed church which would be harmed by having a housing development encircling it, regardless of a buffer zone being left.

ALLOCATION OF Exmo_20 is in conflict with paragraph 13.9. The NATIONAL PLANNING POLICY FRAMEWORK defines 'irreplaceable habitat' as "habitats which would be technically very difficult (or take a significant time) to restore, recreate or replace once destroyed". Exmo_20 will cause loss of irreplaceable habitats. It has a great number of mature trees, many of which show signs of veteranisation. These provide unique micro habitats and their loss cannot simply be mitigated by planting new trees. Exmo_20 also contains many long- established hedgerows across the site, the lengths of which are considerable. The trees and hedgerows have high intrinsic biodiversity value providing habitats and wildlife corridors, and although space can be left around them, degradation and fragmentation of habitat is unavoidable. Nightjar are a qualifying feature of the East Devon Heaths SPA, and studies show that these fly up to 7km from nesting sites to feed at night. Loss of foraging habitat or disruption of routes to feeding areas could undermine the conservation objectives of the SPA. Exmo_20 lies within an identified 'Strategic Nature Area' (SNA 368) on the Nature Recovery Network, part of the Local Nature Recovery Strategy aimed at combining existing wildlife sites and extending habitats. It provides connecting habitats and wildlife corridors between the Pebblebed Heaths at the north of the site through to the woodland at the south and beyond, all of which would be severely impacted by the development of Exmo_20.

ALLOCATION OF Exmo_20 is in conflict with policy TR03, and figure 7 in the Local Plan. Due to Exmo_20's restricted access arrangements, the development would generate significant amounts of vehicle movements just to access services within Exmouth and the neighbouring settlements using the B3179. Due to the site's steep topography and remote location from services, any walking or cycling routes will provide limited viable alternative options to using a car. The local plan notes that congestion is a particular issue in Western East Devon, and with this site having no access to Dinan Way and the A376, the significant amounts of vehicle movements from this site will be on rural B roads, locally notorious for being congested and substandard, with a high vehicular accident rate.

ALLOCATION OF Exmo_20 is in conflict with paragraph 3.34: despite being a tier 1 settlement Exmouth does not have sufficient infrastructure and services for the existing population. Even if the proposed development brings financial contributions towards infrastructure etc it will not add another Doctors surgery or dentist - both of which are already insufficient for the current population of Exmouth. Neither will it provide another secondary school - within the last 3 years numerous children have had to travel to Cranbrook for secondary school provision due to there being no capacity at Exmouth Community College. The existing sewerage system in Exmouth is so inadequate that sewage is discharged into the sea on a very regular basis and the beach is often closed for swimming. Exmouth's problem with sewerage has been featured on national news several times, highlighting the scale of the problem it has; which is detrimental to a town reliant on visitors in the summer.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with paragraph 11.2. It will increase travel needs and necessitate cars to take longer routes. Housing is proposed at the southern end of the site whereas the main vehicular access point is at the very northern edge of the site, adjacent to the Pebblebed Heath (SAC/SPA/SSSI). Due to the mandatory 400m buffer zone to SAC/SPA/SSSI no housing is permitted within the top 400m, resulting in a very minimum of 0.5km drive just to get from the site entrance to the housing. This would result in at least 1km of 'on site' driving every time you went out anywhere and returned home. In addition to this, from the B3179 site entrance you need to drive 'around and back down' (4.0-4.3 miles) to get into Exmouth centre. Exmo_20 would increase travel needs resulting in an increased number of car journeys and requiring cars to travel more miles thereby emitting more co2.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with policy TR01. Walking or cycling will not be the first choice of transport from this site for people to do their shopping/ work/ school run etc because the distance is too great. Studies cited in the Local Plan show that most people prefer to walk if their destination is within 0.5 miles, that beyond the distance of 1 mile cars are the dominant mode of travel and that beyond 2 miles trips on foot are few. Exmo_20 is significantly further than 0.5 miles or even 1 mile from essential infrastructure and services therefore walking or cycling as first choice of transport is unviable. Providing walking routes, cycle paths or public transport will do little to reduce the amount of car journeys this development would generate because the steep local topography and distance to access essential infrastructure and services is too far. It will also be a difficult location for those without car access and cause social exclusion and hardship.

ALLOCATION OF Exmo_20 in my opinion is in conflict with policy SP01. Although Exmouth is a tier 1 town, Exmo_20 is 4 miles by car from Exmouth town centre and detached from it; it cannot be considered to be a development in Exmouth. Exmouth is totally unsuitable for further significant growth. It is on a peninsula, wedged between the river Exe and the coast. The town centre is at the south end of the peninsula making 360degree development impossible and with the large amount of existing development already sprawled a long distance from the town centre, any new development is closer to neighbouring towns & villages and therefore not development at the principal centre of Exmouth. Any development here will be a long distance from the town such that it is an unsustainable location.

Allocation of Exmo_20 is in conflict with policy AR01(B). The site sits upstream of Exmouth on the main rainwater catchment area of Withycombe Brook. The subsoil is heavy clay, the impermeable nature of which makes soakaways ineffective and the land is often waterlogged. Building on this steep site would significantly exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Withycomb, where the water level has risen significantly over the last few years due to already increased building at the top of Dinan Way with no effective run-off.

Allocation Exmo_20 is in conflict with paragraph 3.30. The settlement boundary around Exmouth has been extended to include not only the land which housing will be built on but also to include the 400m buffer zone adjoining the Pebblebed Heaths, therefore defining this land as acceptable for development. Although housing cannot be built on the buffer zone, by including it within the settlement boundary it is available for other kinds of development. This is contradictory to the precautionary approach as the plan fails to robustly protect against adverse effects of recreational use etc on the Pebblebed Heaths, leading to a significant erosion of our habitat.

Allocation of Exmo_20 is in conflict with policy OL05. The main access point to Exmo_20 is 4 miles from the centre of Exmouth and only 2.2 miles from the centre of Budleigh Salterton, making Budleigh significantly more accessible to the development. The access arrangement for the site leads naturally down the road into Budleigh Salterton High Street whereas to get into Exmouth means travelling twice the distance and having to go around the edge of Exmouth to get back down into it. The High Street, Doctor's surgery, primary school, beach etc in Budleigh would be the most accessible and obvious choices for residents of Exmo_20. Currently Exmouth and Budleigh are separated in terms of functionality but this development would merge the two, with residents living in one town whilst relying on day-to-day services and infrastructure of the other. Parking in Budleigh Salterton is already at a premium.

ALLOCATION OF Exmo_20 is in conflict with policy OL01. The site is distinctive for its dark skies, tranquillity and wildness. In addition to light from the housing development itself, the main site access point being at the B3179, directly opposite the SPA/SAC/SSSI would cause a significant flow of car headlights destroying the darkness across the entire length of the site and all shining directly onto the Heaths as vehicles exit the site. The area around St John in the Wilderness church is characterised by dark skies and a strong sense of remoteness and tranquillity, a 'wilderness' setting integral to the grade II* listed church which would be harmed by having a housing development encircling it, regardless of a buffer zone being left.

ALLOCATION OF Exmo_20 is in conflict with paragraph 13.9. The NATIONAL PLANNING POLICY FRAMEWORK defines 'irreplaceable habitat' as "habitats which would be technically very difficult (or take a significant time) to restore, recreate or replace once destroyed". Exmo_20 will cause loss of irreplaceable habitats. It has a great number of mature trees, many of which show signs of veteranisation. These provide unique micro habitats and their loss cannot simply be mitigated by planting new trees. Exmo_20 also contains many long- established hedgerows across the site, the lengths of which are considerable. The trees and hedgerows have high intrinsic biodiversity value providing habitats and wildlife corridors, and although space can be left around them, degradation and fragmentation of habitat is unavoidable. Nightjar are a qualifying feature of the East Devon Heaths SPA, and studies show that these fly up to 7km from nesting sites to feed at night. Loss of foraging habitat or disruption of routes to feeding areas could undermine the conservation objectives of the SPA. Exmo_20 lies within an identified 'Strategic Nature Area' (SNA 368) on the Nature Recovery Network, part of the Local Nature Recovery Strategy aimed at combining existing wildlife sites and extending habitats. It provides connecting habitats and wildlife corridors between the Pebblebed Heaths at the north of the site through to the woodland at the south and beyond, all of which would be adversely impacted by the development of Exmo_20

ALLOCATION OF Exmo_20 is in conflict with policy TR03, and figure 7 in the Local Plan. Due to Exmo_20's restricted access arrangements, the development would generate significant amounts of vehicle movements just to access services within Exmouth and the neighbouring settlements using the B3179. Due to the site's steep topography and remote location from services, any walking or cycling routes will provide limited viable alternative options to using a car. The local plan notes that congestion is a particular issue in Western East Devon, and with this site having no access to Dinan Way and the A376, the significant amounts of vehicle movements from this site will be on rural B roads, locally notorious for being congested and substandard, the B3179 probably one of the worst maintained roads in the county.

ALLOCATION OF Exmo_20 is in conflict with paragraph 3.34: despite being a tier 1 settlement Exmouth does not have sufficient infrastructure and services for the existing population. Even if the proposed development brings financial contributions towards infrastructure etc it will not add another Doctors surgery or dentist - both of which are already insufficient for the current population of Exmouth. Neither will it provide another secondary school - within the last 3 years numerous children have had to travel to Cranbrook for secondary school provision due to there being no capacity at Exmouth Community College. The existing sewerage system in Exmouth is so inadequate that sewage is discharged into the sea on a very regular basis and the beach is often closed for swimming. Exmouth's problem with sewerage has been featured on national news several times, highlighting the scale of the problem it has, with raw sewage being tankered hourly for many weeks only a few months ago.

ALLOCATION OF Exmo_20 is in conflict with paragraph 11.2. It will increase travel needs and necessitate cars to take longer routes. Housing is proposed at the southern end of the site whereas the main vehicular access point is at the very northern edge of the site, adjacent to the Pebblebed Heath (SAC/SPA/SSSI). Due to the mandatory 400m buffer zone to SAC/SPA/SSSI no housing is permitted within the top 400m, resulting in a very minimum of 0.5km drive just to get from the site entrance to the housing. This would result in at least 1km of 'on site' driving every time you went out anywhere and returned home. In addition to this, from the B3179 site entrance you need to drive 'around and back down' (4.0-4.3 miles) to get into Exmouth centre. Exmo_20 would increase travel needs resulting in an increased number of car journeys and requiring cars to travel more miles.

vALLOCATION OF Exmo_20 is in conflict with policy TR01. Walking or cycling will not be the first choice of transport from this site for people to do their shopping/ work/ school run etc because the distance is too great. Studies cited in the Local Plan show that most people prefer to walk if their destination is within 0.5 miles, that beyond the distance of 1 mile cars are the dominant mode of travel and that beyond 2 miles trips on foot are few and mainly for pleasure or exercise not to convey goods. Exmo_20 is significantly further than 0.5 miles or even 1 mile from essential infrastructure and services therefore walking or cycling as first choice of transport is unviable. Providing walking routes, cycle paths or public transport will do little to reduce the amount of car journeys this development would generate because the steep local topography and distance to access essential infrastructure and services is too far. It will also be a difficult location for those without car access and cause social exclusion.

ALLOCATION OF Exmo_20 is in conflict with policy SP01. Although Exmouth is a tier 1 town, Exmo_20 is 4 miles by car from Exmouth town centre and detached from it; it cannot be considered to be a development in Exmouth. Exmouth is totally unsuitable for further significant growth. It is on a peninsula, wedged between the river Exe and the coast with only two roads in and out. The town centre is at the south end of the peninsula making 360degree development impossible and with the large amount of existing development already sprawled a long distance from the town centre, any new development is closer to neighbouring towns & villages and therefore not development at the principal centre of Exmouth. Any development on the EXMO20 site will be a long distance from the town such that it is an unsustainable location.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Introduction This development would destroy the natural beauty of the approach to Budleigh with its extensive views across the fields to the sea. It would impact on nature in the surroundings areas - nesting nightjars at Pebble bed heaths; noise and light pollution at our beautiful Bystock ponds and heathland. We are supposed to be giving nature a chance not destroying it further. Infill and use brown field sites - build homes for essential workers within existing communities where people can walk and cycle to local facilities.

Objections with reasons

The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh it's most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctors, School, beach etc) would be the preferred choice for residents of Exmo_20. This undermines the settlement hierarchy and would lead to coalescence of Budleigh & Exmouth, contrary to POLICY OL05 of the Local Plan. ? An alternative site to Exmo_20 for housing allocation should be selected, one which was deemed available, achievable & suitable in the HELAA. Exmo_20 would cause harm to the adjacent Pebblebed Heaths (SSSI/SAC/SPA/NNR) due to Exmo_20 being a supporting foraging habitat. Allocating Exmo_20 is contrary to the HELAA, the Site Selection Methodology & POLICY PB01 of the local plan and not in accordance with the Mitigation Hierarchy to select avoidance over mitigation. ?

Exmo_20 would cause harm to the heritage assets at this Saxon/Norman/ Medieval settlement, most significantly St John in the Wilderness Grade II* listed church, eroding the attractive rural setting for worship & burials.

Exmo_20 development would be in conflict with the Strategic Nature Area 368, fragmenting and isolating habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would cause harm to irreplaceable habitats, veteran trees and species rich hedgerows across the site contrary to paragraph 13.9

Exmo_20 would have a detrimental effect on this open countryside site and the adjacent internationally designated wildlife sites, eliminating the “tranquility, wildness and dark skies”, which is contrary to POLICY OL01. ? Exmo_20 development would be in conflict with the Strategic Nature Area 368, fragmenting and isolating habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would cause harm to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9. Exmo_20 is in conflict with POLICY OL09 and POLICY PB04 as the Habitats Regulations Assessment (30.01.25) states that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA) such that the Plan fails the integrity test. The main site access proposed is opposite the SAC/SPA. ? Development of Exmo_20 on heavy clay subsoil with ineffective soakaways, would exacerbate the already identified downstream flood risk along Withycombe Brook through Exmouth, which is already under additional pressure from climate change. This is in conflict with POLICY AR01B. Exmo_20 would increase the need for car travel, contrary to Figure 7 – the energy hierarchy, and increase traffic congestion, in conflict with PARAGRAPH 11.2. The isolated location provides unsustainable development as residents would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre to use walking or cycling as their choice of transport. This is contrary to POLICY TR01. ?

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo-20 from the local plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I consider this planning to be contrary to the character of East Devon and shows lack of knowledge and expertise from those on the planning committee.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath.

I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Too far from all services. No public transport nearby so increased use of cars because hilly and E.D. population is older than many places.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Inadequate infrastructure, medical services, schools, public transport, sewage

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: It will permanently damage the countryside including the Pebblebed Heaths which have rare species i.e. nightjars. There are supposed to be connecting wildlife corridors and these are already being built over. Extra lights at night will be harmful, i.e. car headlights. Mature trees hedgerows etc will be permanently damaged and not quickly replaced. One settlement is not supposed to be joined to another and Exmouth and Budleigh Salterton will be. Roads are already congested and this will make it much worse. Medical services are already overstretched, schools are not adequate, there will be greater flood risk and the sewage disposal is already poor and not easily improved.. There has been a lack of consultation and I think this is not legally compliant.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo20 Will cause harm to heritage assets including St John in the Wilderness a grade 2 listed church eroding the purpose of this site. Exmo20 will have a detrimental effect on the Pebble bed heathland, also in contrary to Policy OL01 and strategic nature area 368. Development of Exmo20 on heavy clay sub soil will exacerbate downstream flood risk via Withycombe brook which is already beyond its design capacity therefore in conflict with policy AR01B. There is no capacity to cope with extra run off water and sewage, until these points are in place there should be no further planning applications passed.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo 20 from the local plan, site should not have access via B3179 or southern wood as neither options could cope with higher levels of traffic in particular around rush hour traffic.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Mr Graham Smith

Proposal:

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: ?

The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA).

Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy. ? Exmo_20 would destroy the “tranquillity, wildness and dark skies” of the countryside, which is contrary to POLICY OL01. ? Developing

Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9

? The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04. ? Exmo_20 would have significant adverse effects on St John in the

Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to

POLICY HE02. ? Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying

land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B. ? Exmo_20 would increase the need for car travel and increase traffic

congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key

services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is

contrary to POLICY TR01. ? The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor’s, school, beach

etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Full name: Lisa Blood Smyth

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. the services and infrastructure of Budleigh (High Street, Doctors, School, beach etc) would be the preferred choice for residents of Exmo_20. This undermines the settlement hierarchy and would lead to coalescence of Budleigh & Exmouth, contrary to POLICY OL05 of the Local Plan.

An alternative site to Exmo_20 for housing allocation should be selected, one which was deemed available, achievable & suitable in the HELAA. Exmo_20 would cause harm to the adjacent Pebblebed Heaths (SSSI/SAC/SPA/NNR) due to Exmo_20 being a supporting foraging habitat. Allocating Exmo_20 is contrary to the HELAA, the Site Selection Methodology & POLICY PB01 of the local plan and not in accordance with the Mitigation Hierarchy to select avoidance over mitigation.

Exmo_20 would cause harm to the heritage assets at this Saxon/Norman/Medieval settlement, most significantly St John in the Wilderness Grade II* listed church, eroding the attractive rural setting for worship & burials which currently exists. This is contrary to POLICY HE02.

Exmo_20 would have a detrimental effect on this open countryside site and the adjacent internationally designated wildlife sites, eliminating the "tranquility, wildness and dark skies" which is contrary to POLICY OL01.

Exmo_20 development would be in conflict with the Strategic Nature Area 368, fragmenting and isolating habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would cause harm to the irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9.

Exmo_20 is in conflict with POLICY OL09 and POLICY PB04 as the Habitats Regulations Assessment (30.01.25) states that there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to air quality (East Devon Pebblebed Heaths SAC/SPA) such that the Plan fails the integrity test. The main site access proposed is opposite the SAC/SPA.

Development of Exmo_20 on heavy clay subsoil with ineffective soakaways, would exacerbate the already identified downstream flood risk along Withycombe Brook through Exmouth, which is already under additional pressure from climate change. This is in conflict with POLICY AR01B.

Exmo_20 would increase the need for car travel, contrary to Figure 7 - the energy hierarchy, and increase traffic congestion, in conflict with PARAGRAPH 11.2. The isolated location provides unsustainable development as residents would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath.

In addition, the local infrastructure is already stretched beyond capacity, especially in terms of the roads and our woefully inadequate sewage system.

I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I'm writing to express my major concerns about the plans to build 700 houses along St John's Road (Exmo-20). Currently and historically this area provides a natural boundary along the edge of Exmouth, with unique environmental value.

The road system, our woefully inadequate sewage system and infrastructure in terms of educational and health services is not fit for purpose. I regularly use this area as a pedestrian, including walking up to the churchyard at St John's where my parents are buried. Already, I take my life into my hands crossing Dinan Way and traffic issues will become much worse with the new road. The cars from 700 new houses will add to this, not least because people will be entirely dependent on cars to get anywhere.

I'm not opposed to new development in principle. I hope the new road will deliver what it has been promised in spite of the fact that it will impact on me in terms of traffic noise levels. However, there is nothing in these proposed plans that convinces me that this is just another opportunity for developers to make lots of money, selling expensive houses to people moving into the area, delivering nothing that is needed by local people.

I write with hope rather than optimism. I don't believe that the views of local people will be taken into account, and will be dismissed as nimbyism. However, the least I can do is voice my concerns, to stand up for what will be lost forever in our beautiful town.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17.

Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale buildings on it.

If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise.

The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath. This is enjoyed by many local people and visitors alike.

I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people living there would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. The development is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01. The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High St, doctors, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the Local Plan. Importantly the development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths (SAC/SPA). Developing Exmo_20 is contrary to POLICY PB01 of the Local Plan and not in accordance with the mitigation strategy. It would fragment and isolate habitats and destroy Wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Radically reduce the size of Exmo_20 or revert to Exmo_20b as previously proposed.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: All Exmouth people, including those who can't travel, need to see fields, open spaces and wild animals locally (within walking distance.) Exmo_20 would increase the need for car travel, increase traffic congestion, in conflict with PARAGRAPH 11.2. Too much concrete, roads and houses, all cramping roads, which is currently bad. (Potholes not being managed.) The Town is already full, and too busy. Holiday makers, visitors, traffic jammers, accidents, crime, vandalism and antisocial behaviour, More housing will further escalate the problem, and more strain on locals. It is an unsustainable development. Too isolated, people would need to travel much further than 800m to existing key services and facilities contrary to PARAGRAPH 11.6. Too far from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01. Exmo_20 closer to Budleigh Salterton than Exmouth, Budleigh is the most convenient and accessible town. Services and infrastructure of Budleigh (Shops, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan. We fear the collapse of Exmouth's popularity, by changing the layout that people from the city's come to visit and appreciate. The value of the land is priceless as it is. Protect it, or it will be gone. We need to appreciate the land which has its beauty naturally, adds true value to the look and health of Exmouth.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I have local knowledge.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Look at the land, take a breath of the air and listen to the lovely sounds of the birds. Birds of prey, bats, foxes, badgers, deer, woodpeckers, hedgehogs, bullfinches, house sparrows, already live on the land. Sharing it with sheep and horses. All that will be gone if this housing goes through. Killing a lot of Exmouth animal residents, which when you stop, watch and get to know, are priceless. The ratio of domestic cats and wildlife would be unbalanced, killing the wildlife. The Habitats Regulations assessment (30.01.25) “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04. Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. Conflicting POLICY AR01B.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Local voice.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 proposed development should be at an alternative site, stopping any harm to the Pebblebed Heaths (SAC/SPA).

Developing Exmo_20 is contrary to POLICY PB01 local plan and isn't in accordance with the mitigation strategy.

I believe Exmo_20 would destroy the “tranquillity, wildness and dark skies” of the countryside, contrary to POLICY OL01.

Exmo_20 fragments and isolates habitats, destroying wildlife corridors, contrary to PARAGRAPH 13.23 Local Plan. Also being detrimental to habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Exmo_20 should be removed from the Local Plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I local person such as myself can personally explain why Exmo_20 needs removing from proposals.

Full name: Dr Richard Stewart

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I think the proposed development at Exmo_20 should be located on an alternative site so it doesn't affect the pebble bed heaths (SAC/SPA). I believe that Exmo_20 is contrary to POLICY PB01 of the local plan and doesn't appear in line with the mitigation strategy. Exmo_20 would destroy the tranquility, wildness and dark skies of the countryside contrary to Policy OL01, in particular is adjacent to areas used by nightjars for feeding and display - a nocturnal and rare bird species well known to be adversely affected by additional lighting. Exmo_20 would affect wildlife corridors and be detrimental to irreplaceable habitats, trees and species rich hedgerows and be adjacent to the very special Bystock Pools nature reserve - a unique wildlife haven and habitat. I believe that Exmo_20 would adversely affect water drainage and increase flood risk on low lying land. It would also increase traffic congestion, and due to its location would adversely increase the pressure on local services in Budleigh Salterton contrary to Paragraph 11.6.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan. If not, reduce the size of Exmo_20 and do not access the site via to B3179 or via Southern Wood.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Paul Stock

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with policy TR03, and figure 7 in the Local Plan. Due to Exmo_20's restricted access arrangements, the development would generate significant amounts of vehicle movements just to access services within Exmouth and the neighbouring settlements using the B3179. Due to the site's steep topography and remote location from services, any walking or cycling routes will provide limited viable alternative options to using a car. The local plan notes that congestion is a particular issue in Western East Devon, and with this site having no access to Dinan Way and the A376, the significant amounts of vehicle movements from this site will be on rural B roads, locally notorious for being congested and substandard.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: · Remove Exmo_20 from the Local Plan, · Reduce the size of Exmo_20, · Do not access the site via the B3179, · Do not access the site via Southern Wood,

· Revert to Exmo_20b as previously proposed. THIS SEEMS THE MOST APPROPRIATE, AS IT WAS THE INITIAL RECOMMENDATION.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Paul Stock

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with paragraph 13.9. The NATIONAL PLANNING POLICY FRAMEWORK defines 'irreplaceable habitat' as "habitats which would be technically very difficult (or take a significant time) to restore, recreate or replace once destroyed". Exmo_20 will cause loss of irreplaceable habitats. It has a great number of mature trees, many of which show signs of veteranisation. These provide unique micro habitats and their loss cannot

simply be mitigated by planting new trees. Exmo_20 also contains many long-established hedgerows across the site, the lengths of which are considerable.

The trees and hedgerows have high intrinsic biodiversity value providing habitats and wildlife corridors, and although space can be left around them, degradation and fragmentation of habitat is unavoidable. Nightjar are a qualifying feature of the East Devon Heaths SPA, and studies show that these fly up to 7km from nesting sites to feed at night. Loss of foraging habitat or disruption of routes to feeding areas could undermine the conservation objectives of the SPA. Exmo_20 lies within an identified 'Strategic Nature Area' (SNA 368) on the Nature Recovery Network, part of the Local Nature Recovery Strategy aimed at combining existing wildlife sites and extending habitats. It provides connecting habitats and wildlife corridors between the Pebblebed Heaths at the north of the site through to the woodland at the south and beyond, all of which would be adversely impacted by the development of Exmo_20.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with policy OL01. The site is distinctive for its dark skies, tranquillity and wildness. In addition to light from the housing development itself, the main site access point being at the B3179, directly opposite the SPA/SAC/SSSI would cause a significant flow of car headlights destroying the darkness across the entire length of the site and all shining directly onto the Heaths as vehicles exit the site. The area around St John in the Wilderness church is characterised by dark skies and a strong sense of remoteness and tranquillity, a 'wilderness' setting integral to the grade II* listed church which would be harmed by having a housing development encircling it, regardless of a buffer zone being left.

Please be as precise as possible.: The plan making process has not been in accordance with NPPF Chapter 3. Exmo_20 was deemed "not suitable or achievable" at site sifting stage (HELAA stager 2). It has never been either preferred or 2nd choice therefore the site was omitted from regulation 18 consultations. On 3/9/24 the site went from 'ongoing assessment' to 'allocated 'and no further consideration or representation was permitted to the public or the strategic planning committee despite the assessment not being complete. It appears to be misleading and of an underhand nature that the status was suddenly changed without opportunity for representation.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Paul Stock

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with policy AR01(B). The site sits upstream of Exmouth on the main rainwater catchment area of Withycombe Brook. The subsoil is heavy clay, the impermeable nature of which makes soakaways ineffective and the land is often waterlogged. Building on this steep site would significantly exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Withycombe.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation Exmo_20 is in conflict with paragraph 3.30. The settlement boundary around Exmouth has been extended to include not only the land which housing will be built on but also to include the 400m buffer zone adjoining the Pebblebed Heaths, therefore defining this land as acceptable for development. Although housing cannot be built on the buffer zone, by including it within the settlement boundary it is available for other kinds of development. This is contradictory to the precautionary approach as the plan fails to robustly protect against adverse effects of recreational use etc on the Pebblebed Heaths.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with policy OL05. The main access point to Exmo_20 is 4 miles from the centre of Exmouth and only 2.2 miles from the centre of Budleigh Salterton, making Budleigh significantly more accessible to the development. The access arrangement for the site leads naturally down the road into Budleigh Salterton High Street whereas to get into Exmouth means travelling twice the distance and having to go around the edge of Exmouth to get back down into it. The High Street, Doctor's surgery, primary school, beach etc in Budleigh would be the most accessible and obvious choices for residents of Exmo_20. Currently Exmouth and Budleigh are separated in terms of functionality but this development would merge the two, with residents living in one town whilst relying on day-to-day services and infrastructure of the other. This does not fit in with the overall plan's objectives.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

ALLOCATION OF Exmo_20 is in conflict with policy TR03, and figure 7 in the Local Plan. Due to Exmo_20's restricted access arrangements, the development would generate significant amounts of vehicle movements just to access services within Exmouth and the neighbouring settlements using the B3179. Due to the site's steep topography and remote location from services, any walking or cycling routes will provide limited viable alternative options to using a car. The local plan notes that congestion is a particular issue in Western East Devon, and with this site having no access to Dinan Way and the A376, the significant amounts of vehicle movements from this site will be on rural B roads, locally notorious for being congested and substandard.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with paragraph 3.34: despite being a tier 1 settlement Exmouth does not have sufficient infrastructure and services for the existing population. Even if the proposed development brings financial contributions towards infrastructure etc it will not add another Doctors surgery or dentist - both of which are already insufficient for the current population of Exmouth. Neither will it provide another secondary school - within the last 3 years numerous children have had to travel to Cranbrook for secondary school provision due to there being no capacity at Exmouth Community College. The existing sewerage system in Exmouth is so inadequate that sewage is discharged into the sea on a very regular basis and the beach is often closed for swimming. Exmouth's problem with sewerage has been featured on national news several times, highlighting the scale of the massive problem it has.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with paragraph 11.2. It will increase travel needs and necessitate cars to take longer routes. Housing is proposed at the southern end of the site whereas the main vehicular access point is at the very northern edge of the site, adjacent to the Pebblebed Heath (SAC/SPA/SSSI). Due to the mandatory 400m buffer zone to SAC/SPA/SSSI no housing is permitted within the top 400m, resulting in a very minimum of

0.5km drive just to get from the site entrance to the housing. This would result in at least 1km of 'on site' driving every time you went out anywhere and returned home. In addition to this, from the B3179 site entrance you need to drive 'around and back down' (4.0-4.3 miles) to get into Exmouth centre. Exmo_20 would increase travel needs resulting in an increased number of car journeys and requiring cars to travel more miles.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with policy TR01. Walking or cycling will not be the first choice of transport from this site for people to do their shopping/ work/ school run etc because the distance is too great. Studies cited in the Local Plan show that most people prefer to walk if their destination is within 0.5 miles, that beyond the distance of 1 mile cars are the dominant mode of travel and that beyond 2 miles trips on foot are few. Exmo_20 is significantly further than 0.5 miles or even 1 mile from essential infrastructure and services therefore walking or cycling as first choice of transport is unviable. Providing walking routes, cycle paths or public transport will do little to reduce the amount of car journeys this development would generate because the steep local topography and distance to access essential infrastructure and services is too far. It will also be a difficult location for those without car access and may well cause social exclusion.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

ALLOCATION OF Exmo_20 is in conflict with paragraph 11.6. It is a 'larger' development and most of the site is not within 800m (approx 10 mins walk) of any existing key services and facilities. There are no plans to provide significant key services on site so residents will likely need to drive over two miles (via the B3179) to access them within Exmouth or neighbouring settlements such as Woodbury or Budleigh Salterton.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Paul Stock

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with policy SP01. Although Exmouth is a tier 1 town, Exmo_20 is 4 miles by car from Exmouth town centre and detached from it; it cannot be considered to be a development in Exmouth. Exmouth is totally unsuitable for further significant growth. It is on a peninsula, wedged between the river Exe and the coast. The town centre is at the south end of the peninsula making 360degree development impossible and with the large amount of existing development already sprawled a long distance from the town centre, any new development is closer to neighbouring towns & villages (e.g. Budleigh Salterton) and therefore not development at the principal centre of Exmouth. Any development here will be a long distance from the town such that it is an unsustainable location.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath. I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA). Developing Exmouth_20 is contrary to Policy PB01 of the local plan and not in accordance with the mitigation strategy.

Exmo_20 would destroy the “tranquility, wildness and dark skies” of the countryside, which is contrary to POLICY OL01.

Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9.

The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04.

Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02.

Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Withycombe. This is in conflict with POLICY AR01B.

Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

The main access point of Exmo 20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo 20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo 20 from Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: ?

The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA).

Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy.

? Exmo_20 would destroy the “tranquillity, wildness and dark skies” of the countryside, which is contrary to POLICY OL01.

? Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9

? The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04.

? Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02.

? Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

? Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

? The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: ? Remove Exmo_20 from the Local Plan,

? Reduce the size of Exmo_20,

? Do not access the site via the B3179,

? Do not access the site via Southern Wood,

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: It's too important to ignore

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

Who owns this land? If it is National Trust then it belongs to the people whose wishes and opinions should be addressed.

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath.

Exmouth has been continually reported in 2024 as one of the most polluted towns on the coast. The red flag closing the beach area due to the dangers of sewage on the beach and in the sea was disgraceful. More housing leads to more sewage and other services.

Can the Council explain where and how the network of SW Water supply and disposal of water and waste can be maintained for the proposed building on such a massive scale in our town?

I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Ref page 78 of the draft local plan-Vehicular access: I have concerns about what mechanisms will be put in place to prevent private cars from the upper site accessing roads where public transport buses will use to travel through southern wood and into meadow view road, therefore the whole site will be accessible by car through these two already congested roads, the on street parking in these roads with private vehicles is heavy, with cars parked on pavements through many areas, pedestrian access with prams and mobility scooters are forced into the road to pass. Buses through meadow view and southern wood will be difficult to progress with cars parked on both sides making it very narrow.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Attending hearing session(s) is vitally important, I believe, as I reside in one of the access roads on the southern boundary it is in my best interest to be present at such a hearing.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Health and well-being. In terms of health and well-being, the NPPF emphasises the importance of creating healthy and sustainable communities. The lack of school places , GP surgeries and additional cars on our heavily congested roads through the town (s) highlight the unattainable nature of the site for both people and climate, contravening the EDDC's own Climate Emergency Action Plan and pledge to achieve carbon neutral council by 2040. This application fails to address these important points

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: This proposed development highlights Southern Wood as an access road, (outside our front door) that greatly impacts and intrinsically affects our health and wellbeing, why I believe our views should be heard.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: ?

The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA).

Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy.

? Exmo_20 would destroy the “tranquillity, wildness and dark skies” of the countryside, which is contrary to POLICY OL01.

? Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9

? The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04.

? Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02.

? Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

? Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

? The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I believe that it is an inappropriate access to the site from Southern Wood via Dinan Way via Meadowview Road, it is too convoluted, causing real time problems entering and exiting the proposed development Exmo-20 site.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo 20 could and should be located on an alternative site where it would cause less or no harm to the Pebble bed Heath (sac/spa). Developing Exmo 20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy.

Exmo 20 would destroy the tranquility wildness and dark skies of the countryside which is contrary to POLICY OL01

Developing Exmo 20 would fragment and isolate habitats and destroy wildlife corridors contrary to PARAGRAPH 13.23 of the local plan. It would be detrimental to irreplaceable habitats, veterinary trees and species rich hedgerows across the site contrary to paragraph 13.9.

The habitats regulations assessment (30.01.25) confirms that there is currently not sufficient certainty to rule out adverse effects on st john in the wilderness grade 2 listed church and church yard drastically altering the peaceful setting for worship which currently exists. This is contrary to POLICY HE02 .

Exmo 20 is upstream of Exmouth on the main rainwater catchment area of Withycombe brook on a sub soil of heavy clay which makes soak ways ineffective. It would

exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

Exmo 20 would increase the need for car travel and increase traffic congestion, in conflict with paragraph 11.2. It is unsuitable development it is isolated and people would need to travel much further than 800 m to existing key services and facilities, contrary to paragraph 11.6. It is too far and too steep from any town centre for people to use walking or cycling as a mode of transport. This is contrary to POLICY TR01.

The main access point to Exmo 20 is significantly closer to Budleigh salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and Infrastructure of Budleigh, high street, doctors, schools, dentists, beach etc would be the obvious choice for residents of Exmo 20 this would lead to the coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo 20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Lisa Thomas-Jenkins

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: An alternative location should be used so that the pebble bed heath (SAC/SPA) should not be harmed. Developing Exmo_20 contradicts Policy PB01 of the local plan and is not in accordance with the mitigation strategy.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert to Exmo_20b as previously proposed.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath.

I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: LYM 07 is another inappropriate designation, lying in the flood catchment Wotton Brook and contravening policy OL03 stating no development should occur in coastal preservation areas.

It will also contravene policy OL05 causing coalescence with Exmouth

Policy 13.23 describes the importance of connected wildlife corridors and not fragmenting habitats. This area designation would effectively compromise this policy. It lies in an area of veteran trees and special hedgerow.

The development would also create additional traffic. Car ownership and usage in Devon is prolific and behaviours ingrained. People will drive to and from this development and not use more active travel methods.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The site within the respondent's ownership is shown on the Exmouth Inset Map forming part of the Reg. 19 Consultation. It lies to the west and north of Housing allocation site Lymp_07 between that site and the north-south section of Cortlands Lane. On the extract below it is immediately to the west of the letter 'L' of Lymp_07

In the previous Reg.18 version the Lymp_07 site and nearby Exmo_23 sites formed a larger Lymp_07 which was identified as a 'Second Choice' Housing Site.

The site is previously developed land, and the land edged red on the map above benefits from a Certificate of lawful Existing Use (March 2021) for the servicing and sale of motor vehicles. The land edged red comprises some 0.8ha of wider 1.75ha land parcel. The site was the subject of an unsuccessful appeal against refusal of PiP (APP/U1105/W/21/3285255) in April 2022. In making that decision the Inspector concluded, in the following terms, that potentially development would not have an adverse on the Green Wedge designation: " If, for argument's sake, dwellings were to be delivered in the approximate location and of the approximate scale of the existing garage structures, the scheme would likely have no additional impact upon the purposes of the Green Wedge designation." The determinative factors were the Inspector's judgement as to whether the site was problematic in respect of accessibility and whether it would give rise to 'Isolated' development in the countryside. He commented: "In this case, the site is a not inconsiderable walk to the range of services within Lympstone. The connecting roads undulate, turn sharply and are largely bereft of dedicated pedestrian space and street lighting. The route to the nearest bus stops and the small shop at the adjacent petrol station is shorter but similar. On this basis, whilst walking or cycling may be an option for some in some instances, I do not consider that the locational tests set out within Policy 2 of the LNP and Policy TC2 of the EDLP would be met." and: " Whether a proposal is or is not isolated is a matter of planning judgment. The site is clearly well away from Lympstone in an area explicitly identified to provide

visual separation between the two distinct settlements of Lympstone and Exmouth. The properties around the site read as a sporadic smattering of houses within the Green Wedge. As such, they do not appear to form a village or even a smaller settlement. For these reasons, in my judgment the site is also isolated in the Framework's terms." The draft plan includes planned material changes in circumstances which justify reconsideration of these issues. The adjacent 10 Hectares of land to the north of Courtlands Lane between the site and Exmouth Road was identified in the HELAA and the consultation drafts of the EDDC Local Plan 2020-2042 as 'Second Choice' Residential Site Lymp_07 with a capacity of 150 units in the regulation 18. Version. It has since become 'Housing and Employment' site Lymp_07 expected to provide 100 residential units, employment floorspace and sports pitches in the regulation 19. Version, demonstrating that the LPA is committed to ending its 'Isolation'. The Highway authority also suggest the same land is safeguarded in connection with the extension of Dinan Way. The Consultation drafts also designate land on the south side of Courtlands Lane, falling within first Lymp_07 (Reg 18) and subsequently as stand alone residential site Exmo_23 (Reg 19) suitable for 12 dwellings. That site is currently the subject of an application for planning permission. The connectivity of the site will therefore be significantly improved and its isolation ended by the planned connections set out in draft Policy SD01 in relation to the designation of sites Lymp_07 and Exmo_23 including the use of the area immediately to the south as sports pitches and recreation grounds as stated in Policy SD01 - "There should also be safe off-street pedestrian and cycle access that provides for east-west movement through the area for existing and future users linking into adjacent areas such as Lympstone Manor and allocated site Exmo_23." The 2022 Inspector's findings with regard to isolation and unsafe access can no longer carry the same weight. The Nursery Garage site subject to the Certificate of Lawful Existing Use can, as acknowledged by the Inspector, be developed with low density housing without adversely affecting the Green Wedge. Furthermore the owner has the benefit of an additional parcel of open land to the east on which improvements to Biodiversity can be effected in order to achieve on-site BNG, and frontage land on Courtlands Lane between the entrance driveway and the southern boundary, falling outside the CLEUD red line. These areas together provide further potential by way of CIL or S.106 contributions for the landowner to assist in achieving the improved connectivity sought to enable development of site Lymp_07. This could, for example include part of a pedestrian route from Lymp_07 to Courtlands Lane and a footway and vehicle passing place on the western boundary.

Given these circumstances the site has been submitted for inclusion on the Council's register of Brownfield Land. It should therefore be regarded as a developable site, capable of providing five or more dwellings in the context of the development plan.

Conclusion

- The respondents object to the general approach to housing allocation in the Regulation 19. Consultation which does not meaningfully address the requirements of emerging Government Policy and approach to the delivery of housing.
- The Respondents object to the failure of the Regulation 19. version of the plan to give full and proper consideration to the deliverability of the projected housing land allocations therein in the context of the statutory requirement to provide BNG uplift in the context of development proposals.
- The respondents consider the LPAs approach should support and identify housing delivery on smaller brownfield sites including Nursery Garage which are demonstrably deliverable, sustainable, accessible and ready for development, as part of their Housing Land Identification.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Land at St John's Exmo – 20 Proposing – A Social and community facilities B Around 700 new homes; and C At least 2 Hectares of employment land. Not sound – as not justified – ‘Our chosen strategies and policies should be based on solid evidence and should be the most appropriate when compared to other options we could have chosen.’ This site was considered at the meeting of the Strategic Planning Committee on 3 September 2024 with an officer recommendation not to allocate the site for development with the main issues being infrastructure problems due to securing suitable access, impact on the landscape, impact on the historic environment; particularly centred on the area surrounding the Church of St John's in the Wilderness and ecology reasons due to the substantial areas of woodland within the site. Members chose not to accept Officer advice and decided to allocate this site in favour of other sites which were deemed to be suitable for development as recommended by officers in the same report. It was evident from the meeting that Members had not visited the site to assess its suitability for development even though this is one of the largest, if not the largest site allocation in the plan apart from the new town allocations. It appeared from the meeting that the reason for choosing this site was purely political and not substantiated by sound planning reasons to justify development. Access to the site would be a major problem due to the existing road network both within and surrounding the site. The only feasible means of access to the site would be from the B3179 to the northeast of the site, however, this could not be considered to be sustainable given the location and its relationship with the town centre of Exmouth. The site adjoins the East Devon National Landscape and the East Devon Pebble Bed Heaths SSSI to the northeast and a substantial part of the site falls within the 400m exclusion zone for development adjacent to the SSSI. The site is on rising land to the northeast of Exmouth and its development would have a significant detrimental impact on the landscape of the area. The woodlands within the site, some of which are protected by Tree Preservation Orders provide habitat for considerable wildlife and the development of the site would result in

having a significant detrimental impact on the ecology of the area. The Historical core of area surrounding the Church of St John in the Wilderness would be severely impacted resulting in substantial harm to the designated heritage assets of the area. The development is likely to cause problems of flooding due to increased surface water run-off into the nearby Withy Brook. The allocation of employment land within the site appears to be completely ad hoc in terms of its relationship to existing employment sites and appears to have been included as an afterthought to assist with meeting target allocations. Land for employment uses should be directed to the expansion of existing employment sites in Exmouth; for example, there is available land in the vicinity of the existing business park at Liverton. The Foreword to the Plan states that ‘East Devon is an Outstanding Place’, however, there is a total disregard to that statement in considering this site for development, as it would result in destroying a beautiful part of the East Devon countryside. Proposing this site for development is not sound, as it is clearly not the most appropriate site for development when compared to other options which could have been chosen. The site is not appropriate for development at all and to include the allocation of this site as one of the largest sites for development in East Devon has to be seen a total disregard for the significant qualities of the area and how this area contributes to making East Devon an outstanding place.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath.

I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

Full name: Peter Trudgill

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh the most convenient accessible town, with their amenities the preferred choice for residents of Exmo_20. This undermines the settlement hierarchy and would lead to coalescence of Budleigh & Exmouth, contrary to POLICY OL05 of the local plan.

An alternative site to Exmo_20 for housing allocation should be selected. One deemed suitable, achievable & available in the HELAA. Exmo_20 would cause harm to adjacent pebblebed heaths (SSSI/SAC/SPA/NNR) due to Exmo_20 being a supporting foraging habitat. Developing Exmo_20 is contrary to POLICY PB01 of local plan and not in accordance with the mitigation strategy.

Exmo_20 would cause harm to heritage assets, like St John in the Wilderness grade II listed church and churchyard, drastically altering the attractive rural setting which currently exists - contrary to POLICY HE02 Contrary to POLICY OL01, tranquility, wildness and dark skies would be destroyed and adjacent designated wildlife sites would be detrimentally affected. Exmo_20 development would be in conflict with Strategic Nature Area 368, fragmented and isolating habitats & destroy wildlife corridors, contrary to paragraph 13.23 of the Local Plan. It would cause harm to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to paragraph 13.9 Exmo_20 also in conflict with POLICY OL09 and POLICY PB04 as the habitats regulations assessment (30.1.25) states that there is "currently not sufficient certainty to rule out adverse affects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA) such that the Plan fails the integrity test Development of Exmo_20 on heavy clay subsoil, with ineffective soakaway would

exacerbate the already identified downstream flood risk along Withycombe Brook through Exmouth, which is already beyond its design capacity. This is in conflict with POLICY AR01B Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with Paragraph 11.2. The isolated location is unsustainable development so people would need to travel much further than 800m to existing key services and facilities, contrary to Paragraph 11.6. It is too far (& too steep) from any town centre to use walking or cycling as their choice of transport. This is contrary to POLICY TR01

In conclusion - that stretch of road across the common between Exmouth and Budleigh is crucial to maintain the rural attractiveness, existing habitats and wildlife, the nearby local businesses and reservoir in this AONB.

Until the sewerage, facilities and infrastructure is in place, no proposal of this size should be considered.

The sewerage system cannot cope as it is.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The housing development etc proposed at Exmo_20 could and should be located somewhere else where it would cause less or no harm to the Pebblebed Heaths (SAC/SPA). Developing Exmo_20 as proposed is contrary to the Policy PB01 of the local plan and not in accordance with the mitigation strategy. The peacefulness, “wildness and dark skies” of the countryside would be ruined which is against POLICY OL01. Wildlife is crucial and this development would split wildlife corridors and isolate habitats contrary to PARAGRAPH 13.23. Old trees and hedgerows cannot be replaced and it would be contrast to PARAGRAPH 13.9. The habitats regulation assessment from Jan 25 confirms that there may be adverse effects to air quality. Exmo_20 is in conflict with POLICY OL09 and POLICY PB04. There would be a flooding risk in conflict with POLICY AR01B. Exmo_20 would increase the need for car travel and make traffic congestion worse as it is isolated and further than 800m to existing services which are already busy such as GP and dentist. The main way of getting to Exmo_20 is much closer to Budleigh Salterton than Exmouth making it the town of choice for new residents there. The services wouldn’t cope but also Budleigh and Exmouth would effectively coalesce, contrary to POLICY OL05 of the local plan. Exmo_20 is contrary to policy in so many areas.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20

from the local plan to ensure services, wildlife, traffic, air quality and the Pebblebed Heaths are protected.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: “Policy 23 - Infrastructure Delivery: This policy outlines the requirement for necessary infrastructure, including wastewater management systems, to be in place to support new developments. It ensures that housing growth is aligned with the capacity of existing or planned infrastructure to prevent overloading of systems.

Policy OL09: Control of pollution Permission will not be granted for development which would result in pollution that cannot be adequately mitigated. This will include: A. Pollution of the environment by gas or particulates, including: smell, fumes, dust, grit, smoke and soot; B. Pollution of surface or underground waters, for example by untreated sewage, including discharges to:

1. Rivers, other watercourses, water bodies and wetlands;
2. Water gathering grounds including water catchment areas, aquifers and groundwater protection areas;
3. Harbours, estuaries or the sea;”

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove SDO1 development within Exmouth, Maer Lane STW catchment from the Local Plan. Even if to be addressed by SWW, Ofwat processes meant that such improvements cannot be completed within 8 years. To allow development of these locations prior to infrastructure expansion is to knowingly enable, create, add to sewage pollution of Exmouth river, sea and streams.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

"The proposed housing allocations in Exmouth ... A town currently with insufficient sewerage infrastructure, demonstrably broken sewage network and demonstrably under capacity of the sewage treatment facility so without economically unviable investment for a site, the allocations would be contrary to POLICY SP07 & SP08 (and associated paragraphs) of the local plan."

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

The policy does not take into account the already acknowledge failure of the sewage network infrastructure and overwhelmed treatment capacity of the Maer Lane sewage treatment works. The policy does not even refer to the many issues that all acknowledge. EDDC have issued notice of a "civil emergency" and a "vote of no confidence in SWW" because of the nationally publicised sewage infrastructure failures across Exmouth from 2019 to 2025. To not even acknowledge this issue, despite EDDCs clear knowledge of the problems is highly irresponsible.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I would like to voice my strong objection to these proposed developments which would be built in a rural area on productive farmland and adjacent to the historic settlement of St John's in the Wilderness

> Exmouth is already one of the largest towns in Devon and SWW, as we know from the many news reports are finding it impossible to prevent large and regular raw sewage spills into the sea around Exmouth and Budleigh Salterton.

> Further significant development will only make that worse meaning that the local coastline and sea, one of the big attractions for tourists visiting this area and providing an essential income, will become unusable. Fishing and shellfish collection both commercial and leisure based will inevitably be severely impacted without mentioning the health impacts.

> The local infrastructure in Budleigh which will be the closest town to the development, is not sufficiently developed to cope with this large increase in population and will be overwhelmed. There is no major road between Exmouth or Budleigh and the M5. The B3179 has already become dangerously busy with large articulated trucks inappropriately using it to avoid the building congestion on the A376. These 2 roads were never intended to cope with the already massive traffic flow which will only increase with this proposed development.

> Until very recently this land had two protections to prevent building: National Landscape and Coastal Preservation Area.

> EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it.

> If house building and light industry on Exmo_17 were allowed, it would take away part of the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns. > > Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner. > > A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath. > I understand the need for increased housing but these developments are ill thought through and in the wrong place.

> Any further housing in Devon should be built on brownfield sites with preplanned and well developed new infrastructure to cope with the demands of the additional population.

Chapter 5, Development in the Towns and Villages" POLICY SD01 and SD10
(development proposals off Meeting Lane, Lympstone.

- I do not believe this policy is sound. The infrastructure does not exist to support these developments and they risk damaging important wildlife habitat (particularly for bats) and negatively impacting flood risk due to run off from increased hardstanding.

GH/ED/72a and GH/ED/73 should be located in a different site. This site sits within the coastal protection area and is also adjacent to the pebblebed heath. The little cation of these sites would cause fragmentation to and the isolation of habitats. Wildlife corridors are an important element for wildlife and their destruction is contrary to paragraph 13.23 of the local plan. Wildlife corridors around these sites offer important routes for wildlife to travel between the Exe estuary at Lympstone up to the pebblebed heath and the common. They are irreplaceable habitats containing veteran trees and mature, species rich hedgerows across the site contrary to paragraph 13.9.

Both sites are upstream of the world renowned RAMSAR Exe estuary mudflats which would result in the loss of filtration in an area which regularly floods. Damaging run-off would then flow from these sites down into the mudflats and this would be destructive to this world renowned RAMSAR habitat. This is in conflict with policy AR01B.

The allocation of both these sites in the local plan is contrary to strategy OLO3 which states development will not be allowed in Coastal Preservation areas.

The Exe RAMSAR area around the village of Lypstone is visited by tourists and ornithologists from all over the world and it is vitally important that they are protected longterm.

Congestion of the already overused A376 would be increased by the additional traffic.

Lypstone is a small village and although it has a train station the majority of journeys to work, school and weekly shop are done by road. The increase in traffic congestion is in conflict with paragraph 11.2.

This development is unsustainable, and residents would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6.

Lypstone has only one direction out by road, via the A376. The access lanes already flood regularly and can make the village inaccessible. These sites in these locations will exacerbate these flooding and access issues.

The decision to include 72a is controversial since it is far from the village of Woodbury despite being in Woodbury parish. In practice residents would need to cross the A376 and navigate several miles of lanes to reach Woodbury services, so residents would inevitably put additional pressure on already full services and infrastructure such as school, doctor, parking, flooding etc. This is against policy OL05.

Site LYMP_07

LYMP_07 is upstream of Lypstone on the main rainwater catchment area of Wotton Brook. The subsoil here is of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Lypstone Village. This is in conflict with POLICY ARO1B.

LYMP_07 has been assigned in the local plan in contravention of strategy OLO3 which states development will not be allowed in Coastal Preservation areas.

The Exe area around the village of Lympstone is a world renowned RAMSAR site on the Exe estuary which is visited by tourists and ornithologists from all over the world.

To develop LYMP_07 would isolate and fragment habitats, destroying vital wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. These areas include veteran trees and species rich hedgerows and runs contrary to PARAGRAPH 13.9.

LYMP_07 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development which would require residents to travel. People would need to travel far further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too steep and too far from a town centre for people to allow most people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

The use of Exmouth facilities and services would lead to coalescence of Lympstone and Exmouth, contrary to POLICY OL05 of the local Plan. The Village of Lympstone and town of Exmouth have fought hard over decades to protect both settlements from coalescence.

Chapter ‘ Our outstanding landscape’

The following sites LYMP_07, GH/ED/72a and GH/ED/73 have been assigned in the local plan contrary to strategy OLO3 which states development will not be allowed in Coastal Preservation areas.

The Exe estuary is an important ecological site with rare and protected species.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Access to Exmo-20 is much closer to Budleigh Salterton . Thus all local services there would be the preferred choice. This undermines the settlement hierarchy contrary to policy OL05 of the local plan. An alternative site to Exmo-20 should be found which doesn't impact Pebblebed Heaths This site is contrary to HELAA,the site selection methodology and policy PB01. So not in accordance with Mitigation Hierarchy to select avoidance over mitigation.

Exmo 20 would impact St John in the Wilderness church and the rural nature of it's services

Exmo -20 would affect the tranquility, wildness and dark skies again contrary to OL01.

Wildlife corridors would be destroyed contrary to the Local Plan

The heavy clay subsoil with ineffective soak aways would exacerbate flood risk through Exmouth.

Increased car traffic which inevitable in view of distance to amenities, steep inclines meaning no walking or cycling would be likely would cause congestion and pollution- contrary to Policy TR01.

Sewage treatment would impact an already over stressed system

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To prevent over use of B3179, access elsewhere Greatly reduce the size of the scheme. If more people need to move to the area, move to a plan providing transport, schools, shops and hospitality, doctors and all necessary services.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: As a member of the society impacted by this plan I wish to have a say in the outcome of the planning process.

Full name: Catherine Mary Turner. (aka Kate Somerby)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High St, Doctors, School, beach etc) would be the preferred choice for residents of Exmo_20. This undermines the settlement hierarchy and would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the Local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Catherine Mary Turner. (aka Kate Somerby)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: An alternative site to Exmo_20 for housing allocation should be selected, one which was deemed available, achievable and suitable in the HELAA. Exmo_20 would cause harm to the adjacent Pebblebed Heaths (SS1/SAC/SPA/NNR) due to Exmo-20 being a supporting foraging habitat. Allocating Exmo_20 is contrary to the HELAA, the Site Selection Methodology and POLICY PB01 of the local plan and not in accordance with the Mitigation Hierarchy to select avoidance over mitigation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert to Exmo_20b as previously proposed.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: As a resident of Budleigh Salterton, and Chair of Budleigh Music Festival I have an interest in any future developments that will affect the reputation and accessibility of this volunteer led initiative, as well as an interest in protecting the local environment for all members of our community.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath.

I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

We regularly use the cycle path and also walk our dogs. It truly is a beautiful part of Exmouth and we really need to save it before it's too late.

If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

When critical infrastructure such as sewerage disposal, as managed by SWW, is in utter chaos with no coherent timely plan for necessary improvement, how can any large increase in inputs that such development would cause to the present system be seriously contemplated?

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proposed development at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA). the development of Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with mitigation strategy.

Exmo_20 would blight the "tranquility,wildness and dark skies" of the countryside, which is contrary to POLICY OL01.

Developing Exmo_20 would fragment and isolate habitats, destroy wildlife corridors contrary to PARAGRAPH 13.23 of the Local Plan. Also, contrary to PARAGRAPH 13.9 it would damage irreplaceable habitats, aged trees and hedgerows abundant with many species across the site, contrary to PARAGRAPH 13.9.

The Habitat regulations assessment(30.01,25) confirms that there is "currently not sufficient certainty to rule out adverse effects in integrity in relation air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and PB004.

Contrary to POLICY HE02 Exmo_20 would have significant adverse effects on St.John in the Wilderness GRADE11* listed church and churchyard, altering dramatically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02.

Exmo_20 is sited upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Withycombe. This conflicts with POLICY AR01B.

Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is an untenable development. It is an extremely isolated development and residents would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. it is too far (and too steep) from any town centre for residents to use either walking or cycling as transport of choice. This is contrary to POLICY TR01.

The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh Salterton the most conveniently accessible town. The services and infrastructure of Budleigh, High Street, Doctor's, School etc would be the obvious choice for residents of Exmo_20. the Doctors and school are just about coping as is without the addition of residents of an additional 700 houses. This as an outcome would lead to an amalgamation of Budleigh and Exmouth, contrary to POLICY OL05 of the local plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan. Reduce the size of EXmo_20. Do not access the site via B3179. Do not access site via Southern Wood. Revert to Exmo_20b as previously proposed.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Development of Exmo_20 on heavy clay subsoil with poor soakaway would result in an increase flood risk, where there is already one, in the downstream flood risk along Withycombe Brooke through Exmouth, already this is under additional stress due to climate changes. In addition, this is in conflict with Policy AR01B. Exmo_20 development would cause fragmentation and isolation of habitats while destroying the wildlife corridor, in contradiction to Paragraph 13.23 of the local plan. It will cause irreplaceable habitats to animals and veteran trees across the site, contrary to Paragraph 13.9 of the plans.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Building so far from the City, motorways and central train lines only causes more commuting and higher levels of stress to other roads and local villages. The local secondary school is already very full and as such children in the local area will need to relocate when having children and making informed decisions on their children's futures. What is Exmouth creating for the younger generation to stay? When is the future planning to ensure that the money of the families living in the new housing will enhance the local area? Doctors, Dentists, Colleges/uni courses need to be readily available, the future of the town and local area require families to stay and want to grow, while supporting small businesses and people - this will not happen when locals cannot park or access the required amenities to not just survive, but thrive. > Do not access the site via Southern Wood, this is detrimental to the locals who reside in this area. There is plenty safe space to access the site from Salterton Road or the B3179.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: So that local home owners who can see and understand the land can help to enhance the planning. On paper it might look sensible but locals can explain how the land reacts throughout seasons and time. Change is good, when considered in it's full entity, but the appropriate persons in addition to the specialists.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: EXMO_20

The Pebblebed Heaths, which are of international nature conservation importance, lie close by and to the north of the site.

By virtue of the proposed development being within 400 metres of the East Devon Pebblebed Heaths, it is likely to lead to the deterioration of habitats and loss or disturbance of wildlife within the East Devon Pebblebed Heaths Site of Special Scientific Interest, East Devon Pebblebed Heaths Special Area of Conservation and East Devon Heaths Special Protection Area arising from the residential occupancy of the building and increased recreational use. These effects cannot be avoided or mitigated other than by avoiding residential development. As such the proposed development is contrary to Strategy 47 (Nature Conservation and Geology) of the Local Plan 2013-2031 and the Conservation of Habitats and Species Regulations 2010.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy

or paragraph. Please be as precise as possible.: Reduce size of EXMO_20 or remove it from the Local Plan. Do not access this reduced site from the B3179.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
EXMO_20

The Pebblebed Heaths, which are of international nature conservation importance, lie close by and to the north of the site.

I had assumed that sites within 400m of the Pebblebed Heaths SAC, i.e the northern section of EXMO_20, would be ruled out as being unsuitable in the HELAA, i.e in the East Devon Local Plan 2020-2040 – Site Selection Methodology (May 2022).

Therefore, by virtue of the proposed development being within 400 metres of the East Devon Pebblebed Heaths, it is likely to lead to the deterioration of habitats and loss or disturbance of wildlife within the East Devon Pebblebed Heaths Site of Special Scientific Interest, East Devon Pebblebed Heaths Special Area of Conservation and East Devon Heaths Special Protection Area arising from the residential occupancy of the building and increased recreational use. These effects cannot be avoided or mitigated other than by avoiding residential development. As such the proposed development is contrary to Strategy 47 (Nature Conservation and Geology) of the Local Plan 2013-2031 and the Conservation of Habitats and Species Regulations 2010.

Please see planning application 18/2445/FUL | Conversion of existing barn with extension, plus associated works for holiday use only, Ellergarth, Dalditch Lane, Budleigh Salterton, EX9 7AH, and associated Appeal documents. The Application was refused through the policy of not allowing new dwellings within a 400m protected zone of the Pebblebed Heaths. The Inspector appointed by the Secretary of State noted that this restriction was specifically on account of the impacts of domestic cats through bird predation. Consistency of Policy is required.

The proposal will lead to unmitigated harm to the protected sites. The National Planning Policy Framework, at paragraph 175 indicates that if significant harm to

biodiversity resulting from a development cannot be avoided or adequately mitigated, then planning permission should be refused.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. 5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure that local views are considered.

Full name: Nicola Ward

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Policy 23 - Infrastructure Delivery: This policy outlines the requirement for necessary infrastructure, including wastewater management systems, to be in place to support new developments. It ensures that housing growth is aligned with the capacity of existing or planned infrastructure to prevent overloading of systems. Policy OL09: Control of pollution Permission will not be granted for development which would result in pollution that cannot be adequately mitigated. This will include: A. Pollution of the environment by gas or particulates, including: smell, fumes, dust, grit, smoke and soot; B. Pollution of surface or underground waters, for example by untreated sewage, including discharges to:

1. Rivers, other watercourses, water bodies and wetlands;
2. Water gathering grounds including water catchment areas, aquifers and groundwater protection areas;
3. Harbours, estuaries or the sea;

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove SDO1 development within Exmouth, Maer Lane STW catchment from the Local Plan. Even if to be addressed by SWW, Ofwat processes meant that such improvements cannot be completed within 8 years. To allow development of these locations prior to infrastructure expansion is to knowingly enable, create, add to sewage pollution of Exmouth river, sea and streams.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmouth is a town with insufficient sewerage infrastructure, demonstrably broken sewage network and demonstrably under capacity of the sewage treatment facility so without economically unviable investment for a site, the allocations would be contrary to POLICY SP07 & SP08 (and associated paragraphs) of the local plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Remove Site Exmo_20 from the Local Plan. The policy does not take into account the already acknowledge failure of the sewage network infrastructure and overwhelmed treatment capacity of the Maer Lane sewage treatment works. The policy does not even refer to the many issues that all acknowledge. EDDC have issued notice of a "civil emergency" and a "vote of no confidence in SWW" because of the nationally publicised sewage infrastructure failures across Exmouth and Budleigh from 2019 to 2025. To not even acknowledge this issue, despite EDDCs clear knowledge of the problems is highly irresponsible.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: ?

Exmo_20 would mean that hundreds of households would be using the already struggling water and sewerage infrastructure. SWW cannot cope with the management of current levels of sewerage in Exmouth and Budleigh Salterton and this extra demand could be catastrophic for the area in terms of the unregulated discharge of untreated sewerage into our rivers, seas and onto land. I cannot find anywhere in this over complicated process to state these infrastructure concerns. SWW are failing badly with the current population size, they will not cope with this size of development.

? Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. It is unsustainable development. This is contrary to POLICY TR01.

? The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

? Exmo_20 would undoubtedly destroy the “tranquillity, wildness and dark skies” of the countryside, which is contrary to POLICY OL01. ? Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the

Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9 ? The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04.

? Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

? Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We have serious concerns that the infrastructure we have in this part of rural Devon eg with regard to roads and and sewerage system capacity are already under pressure and causing real problems in the area. I would want to see the removal of Exmo_20 from the Local Plan, or at the least significantly reduce the size of Exmo_20.

Full name: Helen

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: “Policy 23 - Infrastructure Delivery: This policy outlines the requirement for necessary infrastructure, including wastewater management systems, to be in place to support new developments. It ensures that housing growth is aligned with the capacity of existing or planned infrastructure to prevent overloading of systems. This includes the availability of medical facilities, school places and road links, which are currently at full capacity. Policy OL09: Control of pollution Permission will not be granted for development which would result in pollution that cannot be adequately mitigated. This will include: A. Pollution of the environment by gas or particulates, including: smell, fumes, dust, grit, smoke and soot; B. Pollution of surface or underground waters, for example by untreated sewage. including discharges to:

1. Rivers, other watercourses, water bodies and wetlands;
2. Water gathering grounds including water catchment areas, aquifers and groundwater protection areas;
3. Harbours, estuaries or the sea;”

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove or considerably reduce SD01 development until adequate sewage treatment and storm capacity expansion is in place.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmouth currently has an insufficient sewerage infrastructure, a demonstrably broken sewage network and under capacity of the sewage treatment facility . Without economically unviable investment for a site, the allocations would be contrary to POLICY SP07 & SP08 (and associated paragraphs) of the local plan. Exmo_20 would cause harm to the adjacent Pebblebed Heaths (SSSI/SAC/SPA/NNR) due to Exmo_20 being a supporting foraging habitat. Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy. Exmo_20 would have a detrimental effect on the adjacent designated wildlife sites and destroy the “tranquility, wildness and dark skies” of the countryside, which is contrary to POLICY OL01 Due to its location , Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. The isolated location is an unsustainable development as people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. The B3179 is already very busy and the winding nature of the road with several turn offs already make it dangerous , particularly at night when bright LED headlamps can blind on-coming traffic. As a sole point of access the B3179 cannot support the extra volume of traffic that a development of 700 houses would inevitably create.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove site EXMO 20 from the local plan . There are far too many houses allocated on this site for the local infrastructure in place. The site is too near the protected Pebble Bed Heaths and will have a major impact on wildlife and biodiversity . The B3179 will not cope with any more traffic .

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The projected allocation of 2311 new homes in Exmouth compared to a much lower allocation of 471 for Sidmouth and 839 homes for Honiton , which are similar sized towns seems out of proportion. I question the need for 4777

new homes in East Devon by 2042, which is an arbitrary target given by central Government without any justification. This figure totally outstrips the need for affordable housing for local young people on the start of the housing ladder. Past developments in East Devon, such as Cranbrook have proved that the majority of new housing is bought up by people from outside the area and is too expensive for people who are born and grew up in East Devon. Without accompanying investment in infrastructures such as roads, sewerage, schooling, medical provision, retail and opportunities for leisure within the areas being built on, an employment opportunities, extra housing just places an extra strain on all the existing resources. The National Policy Planning Framework outlines that : 20. Strategic policies should set out an overall strategy for the pattern, scale and design quality of places and make sufficient provision for: (b) infrastructure for transport, telecommunications, security, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat);

(c) community facilities (such as health, education and cultural infrastructure); and

(d) conservation and enhancement of the natural, built and historic environment, including landscapes and green infrastructure, and planning measures to address climate change mitigation and adaptation. This planning proposal for Exmouth has clearly not considered these issues before allocating areas for development and also plan on using Grade 1 agricultural land instead of brownfield sites.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: This consultation document is unnecessarily difficult to answer and requires a computer which dis-enfranchises many in the community. It does not comply with the 2018 accessibility regulations for the public sector. The complex wording and demands for "precise" modifications and legal compliance assessments are completely unrealistic for the average resident, who will not have a background in planning law. The consultation form is designed to dissuade participation rather than engage the community, which is undemocratic.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The main access point of Exmo20 is on the busy B road linking Budleigh Salterton and Woodbury Common and would increase traffic here way out of the level designed for such a road. The site is also nearer Budleigh Salterton than Exmouth and as such residents are more likely to use overstretched facilities in Budleigh such as the doctors surgery and schools. The site is also huge and projects in an unrealistic way out of Exmouth. I fail to see why this expansion is required when there are also proposals for a second new own in East Devon and the expansion of Cranbrook has not yet been completed. The plans will ruin the appeal of this area of East Devon to visitors, and will just increase the level of traffic to Exeter, the main employment hub in the area.

The site would increase the need for car travel generally in conflict with paragraph 11.2 as it would not be possible to walk to local facilities either in Exmouth or Budleigh Salterton.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo20 from the developing local plan, or reduce its size away from the Budleigh to Woodbury Common road, or remove access from the B3179 altogether. Or, revert to site Exmo 20b as previously proposed.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath.

I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: It is contrary to Policy OL05 of the Local Plan because the facilities in Budleigh Salterton are nearer than those in Exmouth and thus the ones the residents of Exmo20 would be more likely to use. It would thus coalesce Budleigh and Exmouth. Therefore an alternative site should be selected. The chosen site should avoid harming the adjacent Pebblebed Heaths which are at risk under the present proposals. (See Policy PB01). Local wildlife would also be at risk. Exmo 20 would endanger local heritage sites, in particular St John in the Wilderness church and churchyard. The church and churchyard are treasured and meaningful for local residents. Unsuitable change would be contrary to POLICY HE02. Wildlife and the tranquil atmosphere in the area would be threatened (contrary to POLICY OLO1) as would also local veteran trees and hedgerows. Similarly air quality is in all probability at risk. Exmo20 would also potentially increase flood risk along Withycombe Brook which would conflict with Policy AR01B. Inevitably there would be increased traffic movement as residents accessed essential services. It is very hard to imagine more than a very small minority choosing to walk or cycle. This conflicts with POLICY TR01.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Ideally remove Exmo20 from the Local Plan. Failing that, addressing the size and access points would offer some improvement but not nearly enough to justify going ahead.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: GH/ED/72a and GH/ED/73 are situated within the coastal protection area and part of the Pebblebed Heath. These would fragment and isolate habitats and destroy wildlife corridors, contrary to paragraph 13.23. of the local plan. The wildlife corridors in these sites in particular take wildlife from the Exe estuary at Lymptone up to the Pebblebed Heath and Common. Development would be detrimental to irreplaceable habitats, veteran trees and species rich in hedgerows across the site contrary to paragraph 13.9. Both sites are upstream of the world renowned RAMSAR Exe estuary mudflats and the loss of infiltration in an area which regularly floods will then flow from these sites down into those mudflats destroying habitat. This is in conflict with policy AR01B.

Both sites have been assigned in the local plan contrary to strategy OLO3 which states development will not be allowed in Coastal Preservation areas. The Exe area around the village of Lymptone has stunning views of the world renowned RAMSAR site on the Exe estuary. This area is visited by tourists and ornithologists from all over the world but EDDC have ignored the speeches by zoologists and environmental specialist and allowed these sites to be put forward even though they are in the CPA.

Both these sites would increase the need for car travel and increase congestion on the A376. Lymptone as a small village has been targeted for housing using the excuse that it has a railway station. In truth, the majority of journeys to work, school and weekly shop is done by car. The increase in traffic congestion is in conflict with paragraph 11.2. It is unsustainable development. People would need to travel much further than 800m to existing key services and facilities, contrary to Paragraph 11.6.

Lympstone, being on the River Exe, only has one direction out and exclusively onto the A376. The access lanes already flood regularly making the village inaccessible. These sites in particular will exacerbate the flooding and access issues.

Site 72a is in Woodbury parish and the detriment it will bring to Lympstone village by putting pressure on already full services and infrastructure such as school, doctor, parking, flooding etc is against policy OL05 and even worse, Lympstone Parish Council and our EDDC councillors were banned from speaking at the strategic meeting for these sites.

LYMP_07 is upstream of Lympstone on the main rainwater catchment area of Wotton Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Lympstone Village. This is in conflict with Policy ARO1B.

LYMP_07 has been assigned in the local plan contrary to strategy OLO3 which states development will not be allowed in Coastal Preservation areas. The Exe area around the village of Lympstone has stunning views of the world renowned RAMSAR site on the Exe estuary. This area is visited by tourists and ornithologists from all over the world but EDDC have ignored the speeches by zoologists and environmental specialist and allowed these sites to be put forward even though they are in the CPA.

Developing LYMP_07 would fragment and isolate habitats and destroy wildlife corridors, contrary to Paragraph 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9.

LYMP_07 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. People would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

The services and infrastructure of Exmouth (Supermarkets, High Street, Doctor's, school, beach etc) would be the obvious choice for residents of LYMP_07. This would

lead to coalescence of Lympstone and Exmouth , contrary to POLICY OL05 of the local Plan. The Village of Lympstone and town of Exmouth have fought hard over decades to protect both settlements from coalescence. This was communicated loudly to the EDDC strategic planning committee who chose to ignore this very important strategic plan of the two settlements.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: As above

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: As above. This consultation exercise is designed to be opaque and inaccessible, preventing citizens from making their views known. It is disgraceful.

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA). Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy. Exmo_20 would destroy the “tranquillity, wildness and dark skies” of the countryside, which is contrary to POLICY OL01.

Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9

The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04.

Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02.

Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It

would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: ? Remove Exmo_20 from the Local Plan,

? Reduce the size of Exmo_20,

? Do not access the site via the B3179,

? Do not access the site via Southern Wood,

? Revert to Exmo _20b as previously proposed,

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Sonny Alexander Wightman

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

The main access point of Exmo_20 is significantly closer to BudleighSalterton than Exmouth, making Budleigh it's most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the preferred choice for residents of Exmo_20. This undermines the settlement hierarchy and would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the Local Plan. An alternative site to Exmo_20 for housing allocation should be selected, one which was deemed available, achievable & suitable in the HELAA. Exmo_20 would cause harm to the adjacent Pebblebed Heaths (SSSI/SAC/SPA/NNR) due to Exmo_20 being a supporting foraging habitat. Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy. Exmo_20 would cause harm to the heritage assets, most significantly St John in the Wilderness Grade II* listed church and churchyard, drastically altering the attractive rural setting for worship & burials which currently exists. This is contrary to POLICY HE02. Exmo_20 would have a detrimental effect on the adjacent designated wildlife sites and destroy the "tranquility, wildness and dark skies" of the countryside, which is contrary to POLICY OL01. Exmo_20 development would be in conflict with the Strategic Nature Area 368, fragmenting and isolating habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would cause harm to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9. Exmo_20 is in conflict with POLICY OL09 and POLICY PB04 as the Habitats Regulations Assessment (30.01.25) states that there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA) such that the Plan fails the integrity test. Development of Exmo_20 on heavy clay subsoil with ineffective soakaways, would exacerbate the already identified downstream flood risk along Withycombe Brook through Exmouth, which is already beyond its design capacity. This is in conflict with POLICY AR01B. Exmo_20 would increase the need for car travel and increase traffic congestion, in

conflict with PARAGRAPH 11.2. The isolated location is unsustainable development as people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath.

I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

I also want to add, that the local sewerage system already cannot cope with the existing demand in this area & us locals have had to put up with a lot of disruption. Building over 400 new houses on the surrounding fields is only going to worsen the amount of run off & further increase demand on the system. We are fed up of these issues & don't deserve the inevitable future problems this build will bring us.

This council was elected to represent the best interests of the local community. This proposal goes against what the vast majority wants & would be damaging to the town & its treasured green spaces! We want a town that we can be proud of again & not become another over crowded, built up dirty embarrassment!

We have already had our fair share of new build developments, Maer Valley, Littleham hill, Pankhurst & Dinan Way. This council needs to stop now, enough is enough!

Full name: Jenna Wolstenholme

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to building on the farmland named Exmo_17. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns.

Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath.

I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17.

Full name: Emmie Wood

Other party name (if relevant): budleigh riding school

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Green Field sites are not for building on, they are for Nature, which should have a 'seat', in It's own right, at the table of any planning meeting, as already happens in some other countries. There are many empty properties and 'brown field' sites, which can be used and many urban sites, which companies keep unused, for their own ends.

The issue of second home owners, who buy up the properties which would be homes relatively affordable for the youngsters, has started being addressed, with higher taxes, but more must be done.

There are architects around now, who have designed pre fab. homes which are eco-friendly and affordable for the single person and those starting out on the property ladder. It would be wonderful if EDDC were at the forefront of promoting these.

The main access point of Exm_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh it's most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctors, School, beach etc) would be the preferred choice for residents of Exmo_20. This undermines the settlement hierarchy and would lead to coalescence of Budleigh & Exmouth, contrary to POLICY OL05 of the Local Plan.

An alternative site to Exmo_20 for housing allocation should be selected, one which was deemed available and suitable in the HELAA. Exmo_20 would cause harm to the adjacent Pebblebed Heaths (SSSI/SAC/SPA/NNR) due to Exmo_20 being a supporting

foraging habitat. Allocating Exmo_20 is contrary to the HELAA, the Site Selection Methodology & POLICY PB01 of the local plan and not in accordance with the Mitigation Hierarchy to select avoidance over mitigation.

Exmo_20 would cause harm to the heritage assets at this Saxon/Norman/Medieval settlement, most significantly St John in the Wilderness Grade II* listed church, eroding the attractive rural setting for worship & burials which currently exists. This is contrary to POLICY HE02.

Exmo_20 would have a detrimental effect on this open countryside site and the adjacent internationally designated wildlife sites, eliminating the “tranquility, wildness and dark skies”, which is contrary to POLICY OL01.

Exmo_20 development would be in conflict with the Strategic Nature Area 368, fragmenting and isolating habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would cause harm to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9.

Exmo_20 is in conflict with POLICY OL09 and POLICY PB04 as the Habitats Regulations Assessment (30.01.25) states that there is “currently not sufficient certainty to rule out adverse effects in integrity to...air quality (East Devon Pebblebed Heaths SAC/SPA) such that the Plan fails the integrity test. The main site access proposed is opposite the SAC/SPA.

Development of Exmo_20 on heavy clay subsoil with ineffective soakaways, would exacerbate the already identified downstream flood risk along Withycombe Brook through Exmouth, which is already beyond its design capacity. This is in conflict with POLICY AR01B.

Exmo_20 would increase the need for car travel, contrary to Figure 7 – the energy hierarchy, and increase traffic congestion, in conflict with PARAGRAPH 11.2. The isolated location provides unsuitable development as residents would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo _20 development should be located at another site because : It would cause harm to Pebblebed Heaths (SAC / SPA). It is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy. It is contrary to POLICIES of the Local Plan PB01, 0L01,0L03, TR01, 0LO5 and also to paragraphs 13.23 and 13.9. It conflicts with POLICIES 0L09, PB04 and AR01B. It is also contrary to POLICIES HE02, TR01 and 0L05.

Exmo_ 20 would seriously overload the services and infrastructure of Budleigh Salterton and rapidly cause the coalescence of Budleigh and Exmouth which is directly contrary to POLICY 0L05 of the Local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan completely or reduce the size of Exmo20 by 75%.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I

have been a resident of Exmouth for 54 years. I am writing to object to the development of the site known as Exmouth_20. This is an amalgamation of the larger and smaller site either side of St Johns Road, and clearly there are objections on applying to the size and location of the larger site bordering the 83179. My objections are the traffic onto this road and then through Woodbury or down St Johns Road, for access to the closest schools. Then there is the proximity to the SSI sites, the lack of pavement and the danger of the road. I used to live in Lympstone and note that the councillors there, and in Budleigh seem to have much firmer voices than the Exmouth ones. I believe they have held up the Dinan way link for far too long. I would like to concentrate my comments on the effects of developing the smaller western side of Exmouth20. My objections are on the following grounds: Water Springs in Great Wood. A culvert travels down the far side of the private lane accessing Bystock Stables that could become a road to the site or public footpath. We have noted an increasing amount of run off water during the last few years that flows down St Johns Road and also down the private lane. We would expect the development drainage and sewerage to be a challenge as it would flow into the site you have chosen to develop. The topography of the ground is of gullies and culverts and then the Dinan way is higher in height We believe that the land will be flooded as a result. Mains Water infrastructure Please do not accept any reports from South West Water to say that their mains water infrastructure is robust enough to take on the buildings. We have seen frequent repairs and attempts to repair where the above springs coincide with their pipes. We have also seen a repairs cause a burst main 30 metres above the repair and a stream run down the road in less than a week.

Wild life The woods that are bordering the western side of the site have been untouched for many years. It is particularly important to stress that the wet nature of the woods, including ponds and the dense scrub that will be affected, with animal pathways lost. It

is worth mentioning the bats, because we have the following experience of these. When developing some outbuildings to make Owls Cottage, 5 bat boxes were installed and the only bat resident of the buildings was removed by an expert. (This bat shunned the bat box he bought to place him in and flew off to the woods). Needless to say you will not be able to replace the tree habitats with enough bat boxes if our house had to install five. As evidence of the population, we now have over 30 bats living in the Owls Cottage's wooden cladding: they still shun the boxes. Trees On the western side of Exmout_20 , there is possibly the largest East Devon oak tree. I have not verified this but hope some survey will be commissioned to do so. Listed Buildings and sites of interest

1. St John's in the Wilderness and burial ground. Anyone who has visited this outstanding location will know its' name is apt because it is surrounded by country side. Building around this site will be a tragedy for an accessible and tranquil location that worshippers and mourners can access by bus and a short walk.
2. There is a location in the western side of the 20b site where underground bunkers were installed in world war two for covert operations.
3. I co -own of the listed property, known as St John's Lodge, listed buildings site ref: 1164796, under the name Higher Lodge. N.B. It is the second property in the county with rustic pole cladding, the other building being the Bear House at Killerton and should be considered with similar gravitas. St John's Lodge was developed, by the Bystock Court estate, to be a gardeners cottage and have a rural flavour added for the Courts owners when brought his visitors to the cricket pitch in the next field. This anecdote is not widely known but is why it has the rustic pole cladding. In summary, site Exmouth_20 (particularly the Western side of St Johns Road,) is unlikely to provide the low cost homes that our town desperately needs. The land topography and mitigation costs will be high. Trees and bat surveys should take place, water run-off from natural springs and the historic locations have to be preserved and enhanced, as they are in other East Devon locations. Finally, I am skeptical about the provision of infrastructure. I have seen the estates, on the outskirts of Exmouth. All the traffic has to funnel, to town or to Exeter and this will continue, even with the new link, which is now 30 years too late. We have noted that although large numbers of houses are supposed to be supported with schools, shops and surgeries, which seemed to be your main reason for

choosing this large site. The developers have often split up the sites and do not seem to be adding in anything for commercial units. This will be meaning even more traffic going through Woodbury and on to Exeter. The roads are single lane, the productivity and commercial aspects of the town are not considered. You have allowed the construction of many elderly care flats in our town but have not helped improve health care services with your planning policies. Please consider the whole impact of this development on

the surgeries and schools we have. Please consider low cost housing options. As a builder, I will be very surprised if any developer will see this site with lovely sea views as low cost.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am a resident of Exmouth for 66 years. I am writing to object to the development of the site known as Exmouth_20. Exmouth_20 is an amalgamation of the larger and smaller site either side of St Johns Road, and clearly there are objections on applying to the size and location of the larger site bordering the B3179. My objections to the larger site are as spoken in your meeting, the traffic onto this road and then funneling through Woodbury or squeezing down St Johns Road, for access to the closest schools. (Unsound in relation to policy TR01) Then there is the proximity to the SSI sites, (unsound SAC/SPA/SSSI) and the dangerous nature of the road. All these objections were raised at your last meeting but I note that the Lympstone councillors, who maneuvered for this site, were not there to hear these raised. (unsound based on (HELLA stage 2 regulation consultations). I was glad to see that although developers of the site think that cycling is going to take place, councillors realized this was a ridiculous argument but sadly this false claim had no impact on the choices the Strategic Planning committee made in preferring this site to others. This was unsound based on TR01. I would like to concentrate my comments on the effects of developing the smaller western side of Exmouth_20 My objections are on the following grounds: Water Springs in Great Wood we know above our property. A culvert travels down the far side of the private lane accessing Bystock Stables that could become a road to the site or public footpath. We have noted an increasing amount of run off water during the last few years that flows down St Johns Road and also down the private lane. We would expect the development drainage and sewerage to be a challenge as it would flow into the site you have chosen to develop. Unsound on the basis of AR01(B)

The topography of the ground is of gullies and culverts and then the Dinan way is higher in height We believe that the land will be flooded as a result. AR01(B) Mains Water infrastructure Please do not accept any reports from South West Water to say that their

mains water infrastructure is robust enough to take on the buildings. We have seen frequent repairs and attempts to repair where the above springs coincide with their pipes. We have also seen a repairs cause a burst main 30 metres above the repair and a stream run down the road less than a week later. I do not trust South West Water to report correctly as they have failed to do this with other local developments. Wild life The woods that are bordering the western side of the site have been untouched for many years. It is particularly important to stress that the wet nature of the woods, including ponds and the dense scrub that will be affected and wild animal pathways lost. It is worth mentioning the bats, because we have the following experience of these. When developing some outbuildings to make Owls Cottage, 5 bat boxes were installed and the only bat resident of the buildings was removed by an expert. (This bat shunned the bat box he bought to place him in and flew off to the woods). Needless to say you will not be able to replace the tree habitats with enough bat boxes if our house had to install five. As evidence of the population, we now have over 30 bats living in the Owls Cottage's wooden cladding: they still shun the boxes. Although this is personal evidence,, I would like you to consider how you could mitigate for the loss of the habitat, which clearly will not be cheap Trees Exmoputh_20 west of St Johns road, there is possibly the largest East Devon oak tree. I have not verified this but hope some survey will be commissioned to do so. Listed Buildings and sites of interest

1. St John's in the Wilderness and burial ground. Anyone who has visited this outstanding location will know its' name is apt because it is surrounded by country side. Building around this site will be a tragedy for an accessible and tranquil location that worshippers and mourners can access by bus and a short walk.
2. There is a location in the western side of the 20b site where underground bunkers were installed in world war two for covert operations. This is not well known
3. There is a historic gateway and door in the road that would have given access across the fields to Bystock court to attend the church services.

4. I co -own of the listed property, known as St John's Lodge, listed buildings site ref: 1164796, under the name Higher Lodge. It is the second property in the county with rustic pole cladding, the other building being the Bear House at Killerton and should be considered with similar gravitas. St John's Lodge was developed, by the Bystock Court estate, to be a gardener's cottage and have a rural flavour added for the Courts owners when brought his visitors to the cricket pitch in the next field. This anecdote is not widely known but is why it has the rustic pole cladding. I do not think the building will be impacted at present, but I am including it because I know the National Trust , were able to shift the new link road from A la Ronde, but we, the local residents have no voice in

such issues. Where is the democracy if only the large organizations are heard.? In summary site Exmouth_20 is unlikely to provide the low cost homes that our town desperately needs. The land topography and mitigation costs will be high. Trees and bat surveys should take place and it should be looked at seriously because of the water run-off from natural springs and the historic locations have to be preserved and enhanced, as they are in other East Devon locations, on the western side. Finally, I am skeptical about the provision of infrastructure. I have seen all the estates, on the outskirts of Exmouth, built during my lifetime. All the traffic has to funnel, to town or to Exeter and this will continue, even with the new link, which is now 30 years too late. We have noted that although large numbers of houses are supposed to be supported with schools, shops and surgeries(OL05), which seemed to be your main reason for choosing this site, the developers have often split up the sites and do not seem to be adding in anything for commercial units. I note that this has occurred on the Gulliford Farm site where a supermarket was supposed to go, there now seems to be a planning application for 38 more houses. I do not believe that any more large developments should take place without the addition of a dual carriage way instead of the current roads in and out of the Exmouth funnel.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo20 is closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient accessible town. The services and infrastructure of Budleigh (High Street, Doctors, school, etc) would be the preferred choice for residents of Exmo 20. This undermines the settlement hierarchy and would lead to the coalescence of Budleigh and Exmouth, contrary to POLICY O L05

An alternative site to Exmo-20 for housing allocation should be selected, one of which was deemed available. It is achievable and suitable in the HELAA Exmo-20 would cause harm to the adjacent Pebblebed Heaths (SSSI/sAC/SPA/NNR) due to Exmo-20 being a supporting foraging habitat. Allocating Exmo-20 is contrary to HELAA, the Site Selection Methodology & POLICY PB01 of the local plan and not in accordance with the Mitigation Hierarchy to select avoidance over mitigation.

Exmo-20 would cause harm to heritage assets at Saxton /Norman/Medieval settlement, eroding the attractive rural setting for worship and burials which currently exists. This is contrary to POLICY HE02.

Exmo-20 would have a detrimental effect on this open countryside site and the adjacent internationally designated wildlife sites., eliminating the 'tranquility, wildness and dark skies' which is contrary to POLICY L91. I am particularly in favour of keeping dark skies.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo-20 from Local Plan

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: What is proposed is a huge development and the infrastructure is just not there to support it - the sewage outflow in this area is dreadful, they have been adding chlorine to the water for weeks as obviously the treatment plants can't cope; schools and GP surgeries are under intense pressure already - where is the funding for extra services in these and others essential to support such a big community. And, the impact of traffic on the road will be dreadful, it is already full of potholes, it will become very congested. Is there enough jobs for everyone to do and will people be using cars a lot to get to places of work adding to the carbon pollution or will there be additional public bus services - if there aren't this is unsustainable. Overall I consider this plan totally unsustainable. It is all about the infrastructure and I don't see this considered. Also there is the risk to heritage assets in St John and is in conflict with the Strategic Nature Area 368, and Policies OL09 and PB04. Overall this is a very damaging plan.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: REmove Exmo_20 from the Local Plan or seriously reduce its size by a considerable amount. Find other ways of accessing the site

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: See above

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

- The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heath (SAC/SPA).

Developing Exmo_20 is contrary to Policy PB01 of the local plan and not in accordance with the mitigation strategy

- Exmo_20 would destroy the tranquillity, wildness and dark skies of the countryside, which is contrary to Policy OL01

- Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to paragraph 13.23 of the local plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to paragraph 13.9

-The habitats regulations assessment (30.01.25) confirms that there is currently not sufficient certainty to rule out adverse effects in integrity in relations to air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with policy OL09 and PB04

- Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to policy HE02

- Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Withycombe. This is in conflict with policy AR01B

- Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with paragraph 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities,

contrary to paragraph 11.6. It is too far and too steep from any town centre for people to use walking or cycling as their choice of transport, contrary to policy TR01

- The main access point for Exmo_20 is significantly closer to Budleigh than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh would be the obvious choice for residents of Exmo_20 and this would lead to coalescence of Budleigh and Exmouth, contrary to policy OL05 of the local plan

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Expo_20 from the local plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Josephine Talbot

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

EXMO_20 is much closer to Budleigh Salterton than Exmouth. The access from this development would be more convenient for the residents to go to Budleigh Salterton. It would lead to coalescence of BS and Exmouth, contrary to POLICY 0L05 of the Local Plan. This is not a good idea as both towns are very different in type of population and atmosphere. The road from the proposed settlement is fast, difficult and awkward to get on and off from the location of the proposed settlement. You can see this easily from other turnoffs on that road. 2. EXMO_20 is also contrary to Policy PB01 and would cause harm to pebble beds etc. It would also have a harmful effect on adjacent designated sites contrary to Policy 0L01. It is also in conflict with Policy 0L09 and PB04 as the Habitats Regulations Assessment (30/01/25) re; air quality etc. EM_20 would also be in conflict with Strategic Nature area 368. and contrary to Para 13.23 of local plan. Cause harm to irreplaceable habitats - contrary to Para 13.9. Floodrisks - and conflicts Policy AR01B. Car travel and increased traffic congestion. Isolated location would mean people would need to travel by car as the walk or bike ride is too dangerous and difficult. It is contrary to Policy TR01 and in conflict with Para 11.2. I live in BS and am very aware of the parking and congestion BS town has.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan. You have enough development around this area as it stands and Cranebrook is still only half built. So why do you need this?

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To be fully informed of discussions regarding this and to make sure they are fair and just.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of EXMO_20 is in conflict with policies SP01, TR01, TR03, and paragraphs 11.2, 11.6, 3.34 and 2.6 of the Local Plan. ALLOCATION OF Exmo_20 is in conflict with policy SP01. Although Exmouth is a tier 1 town, Exmo_20 is 4 miles by car from Exmouth town centre and detached from it; it cannot be considered to be a development in Exmouth. Exmouth is totally unsuitable for further significant growth. It is on a peninsula, wedged between the river Exe and the coast. The town centre is at the south end of the peninsula making 360degree development impossible and with the large amount of existing development already sprawled a long distance from the town centre, any new development is closer to neighbouring towns & villages and therefore not development at the principal centre of Exmouth. Any development here will be a long distance from the town such that it is an unsustainable location. (POLICY SP01 proposes to promote the most significant levels of development at the principal centre of Exmouth).

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Stephen Watts

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: There is no clear evidence of widening of the A376. Exmouth is a peninsula with one narrow road in and out and a further 2000 properties will mean another 2000 cars. There is a problem already with traffic and continued temporary traffic lights causing severe delays and slowing down business. Houses are needed but dramatically increasing housing in Exmouth without improving the road in and out of Exmouth is just increasing impact on residence and business.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: An additional lane or an alternative road to the A376.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: See above

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: See above

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: There is no detail on infrastructure. Yes people will cycle as I do. But in winter and poor weather the cycle path is deserted and the roads are clogged.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Francis Raymond Whiteley

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: “Policy 23 - Infrastructure Delivery: This policy outlines the requirement for necessary infrastructure, including wastewater management systems, to be in place to support new developments. It ensures that housing growth is aligned with the capacity of existing or planned infrastructure to prevent overloading of systems. Policy OL09: Control of pollution Permission will not be granted for development which would result in pollution that cannot be adequately mitigated. This will include: A. Pollution of the environment by gas or particulates, including: smell, fumes, dust, grit, smoke and soot; B. Pollution of surface or underground waters, for example by untreated sewage, including discharges to:

1. Rivers, other watercourses, water bodies and wetlands;
2. Water gathering grounds including water catchment areas, aquifers and groundwater protection areas;
3. Harbours, estuaries or the sea;”

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove SDO1 development within Exmouth, Maer Lane STW catchment from the Local Plan. Even if to be addressed by SWW, Ofwat processes meant that such improvements cannot be completed within 8

years. To allow development of these locations prior to infrastructure expansion is to knowingly enable, create, add to sewage pollution of Exmouth river, sea and streams.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Currently the Waste Water Treatment Works at Maer Lane has capacity only to process dry weather situations, approximately 125 litres/second. The maximum throughput is around 240l/s. But the difference is required to clear the storage tanks (aka Balance Tanks) before the next rainfall. This clearly fails between 70 and 100 times a year as the Combined Sewer Overflows (CSOs) are activated. This breaks the current Environment Agency Permits. South West Water cannot therefore cope with the current load let alone a greater one. The number of activations will go up considerably as the differential between maximum throughput and dry flow rates reduces: It will not be linear. This Policy deliberately breaks the law and forces SWW to break the law as well.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: No development can be allowed until after the planned upgrades to the Waste Water Treatment Works is completed and is shown to be legally compliant,

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: The hearing needs to be shown explicitly why the sewage system is above maximum capacity.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

PROPOSED ALLOCATION OF SITE EXMO_20

Devon Wildlife Trust considers the inclusion of this site for development is unacceptable and we object in the strongest possible terms.

We consider that the proposed allocation is unsuitable for development both due to the location of the area within the wider ecological landscape and the habitat composition of the site itself. We note that the site was originally scoped out of being allocated in the Site Selection Report (August 2024) for a number of reasons, most significantly ‘there are significant local levels of biodiversity interest at the site that could be adversely affected by development. The site promoter for a southern part of the site shows highway access to the south of the site coming through a length of Unconfirmed County Wildlife Site, which would clearly cause damage.’

PROXIMITY TO DESIGNATED SITES

The proposed allocation lies directly adjacent to the southern extent of a number of sites which have been designated at the highest level. Exmo_20 lies within 10 metres of Pebblebed Heaths National Nature Reserve (NNR), East Devon Pebblebed Heaths Special Area of Conservation (SAC), East Devon Heaths Special Protection Area (SPA) and East Devon Pebblebed Heaths Site of Special Scientific Interest (SSSI). Devon Wildlife Trust Bystock Nature Reserve also lies within these designations. These sites include a strong element of public access.

The proposed allocation lies within East Devon Pebblebed Heaths SSSI Impact Risk Zone (IRZ). Development of land situated within IRZs has potential to have a harmful effect on terrestrial SSSIs and the SACs that they underpin. Natural England consider residential development of 50 units or more likely to have an impact on the East Devon Pebblebed Heaths SSSI. It is understood the proposed allocation is for up to 1,000 dwellings.

Natural England SSSI condition assessments have undertaken to determine the condition of East Devon Pebblebed Heaths SSSI, with several parcels which are considered ‘unfavourable recovering’ and ‘unfavourable declining’. Habitats are therefore clearly in a vulnerable condition, and this is likely to be significantly exacerbated by the development of Exmo_20.

The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area (SNA). This area has been identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land at scale for development.

The proximity of the European sites (SPA and SAC) to the proposed allocation raises considerations under the requirements of the Habitats Directive 1992 for these sites to be maintained or, where necessary, restored at a favourable conservation status (Article 3 (1)). Natural England has a clear presumption against any net increase in residential development within 400m of a heathland SAC. There is a substantial evidence base which demonstrates that urban development in the area around lowland heathland has an adverse effect on the quality of heathland interest features which underly the designation of the European sites and SSSIs. Key references can be found at:

https://webarchive.nationalarchives.gov.uk/ukgwa/20140605111944/http://www.naturalengland.org.uk/regions/south_west/ourwork/heathlands/default.aspx

The current East Devon Local Plan states ‘To help preserve the integrity of the East Devon Pebblebed Heaths, specifically on account of the impacts of domestic cats

through bird predation, new dwellings will not be allowed on or within 400 meters of the Pebblebed Heaths.’

It is beyond the scope of this letter to detail the range and diversity of sensitive habitats and species which are supported by the NNR/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development. These include, but are not limited to:

- Disruption to the hydrology of heathland wetland through both drainage interception and enriched urban water discharges;
- Increased air pollution;
- Increased likelihood of arson/accidental fire;
- Damage to habitat and disturbance to wildlife caused by increased use of heathland for off road cycle and motorcycling;
- Increased recreational use, especially by dog walkers, leading to disturbance of ground nesting birds and habitat damage;
- Habitat change from heath to grassland through enrichment by dog faeces;
- Predation by domestic cats on reptiles and ground nesting birds;
- Presence of higher numbers of people and greater recreational use leading to more difficulties in managing the heaths effectively for their designated interests;
- Increased fly tipping of garden and other waste.

It is important to note that many of these urban effects can operate synergistically to exacerbate the adverse impacts on designated interest features.

Due to the proximity of the proposed allocation to the SAC, it is incumbent on the local planning authority to undertake an Appropriate Assessment (AA) prior to adopting the Local Plan. It is unlikely that given the scale and proximity of the proposed Exmo_20 allocation to the SAC, that an AA could conclude that there would be no adverse effects on the integrity of the SAC, regardless of the over-arching strategic approach of the South-East Devon European Sites Mitigation Strategy (SEDESMS). Therefore, the authority would need to progress through the derogation process and seek permission

from the Secretary of State demonstrating no suitable alternatives and proposing suitable compensatory measures.

HABITATS/SPECIES WITHIN THE EXMO_20 ALLOCATION BOUNDARY

The proposed allocation includes a number of areas of high ecological value. Several blocks of woodland are present, a number of which have been highlighted as Unconfirmed Wildlife Sites.

These are areas which have been identified as potentially high value habitats, but for which access has not yet been obtained to allow detailed survey. These areas are identified by comprehensive assessment of aerial photography and are therefore likely to support habitat of high value for wildlife.

A number of areas within Exmo_20 are listed in the Priority Habitat Inventory, which includes designated areas of ancient and deciduous woodland and other assigned habitats of importance.

The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries. For example, nightjar travel away from heaths to feed and therefore development of habitat directly adjacent to heathland has the potential to negatively impact this species associated with primary designation habitats of the European sites.

It is deeply concerning to hear that enabling works appear to have commenced on site, with tree felling to create access underway. We urge the LPA to ensure that such works are halted, with compensation measures undertaken to address any biodiversity loss which has occurred.

We hope that the information presented above explains why the area encompassed within proposed allocation Exmo_20 is wholly unsuitable for development. We do not

believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: PROXIMITY TO DESIGNATED SITES

Devon Wildlife Trust would urge East Devon District Council to remove this allocation from the plan to avoid such impacts altogether.

HABITATS/SPECIES WITHIN THE EXMO_20 ALLOCATION BOUNDARY

We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 could and should be located on an alternative site where it could cause less harm or no harm to the Pebblebed Heaths (SAC/SPA). Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy. Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9. Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is an unsuitable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far, and too steep, from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01. The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh it's most convenient and accessible town. The services and infrastructure of Budleigh - High Street, Heath Centre, School , beach etc - would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the Local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Organisation (where relevant): National Trust

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: As set out in the National Trust's response to previous consultations, the National Trust owns important heritage assets and environmentally sensitive coastal land in and adjacent to Exmouth. National Trust is the owner of land at Lower Halsdon Farm (since 1996 when Lower Halsdon Farm and the surrounding land was generously bequeathed to the National Trust by farmer Stanley Long). The land owned by the National Trust includes land south from properties on Courtlands Lane and west from Exeter Road (directly south of the proposed allocations) down to Mean High Water on the Exe foreshore. This area is important in landscape terms on the estuary fringe and forms a significant part of the designated 'Coastal Preservation Area' on the eastern side of the Estuary between Lympstone and Exmouth. The National Trust therefore has an interest in protecting the character of the estuary fringe. The National Trust notes that proposed site allocations Lymp_07 (Land at Courtlands Cross) and Exmo_23 (Land to the South of Courtlands Lane), which lie between National Trust ownership at A la Ronde and at Lower Halsdon Farm, and were indicated at Reg 18 consultation on the policies maps as 'second choice' sites, are now proposed allocations in the Reg 19 Local Plan Consultation. The National Trust's objection in relation to housing development at the proposed allocation site Lymp_07 (and part thereof) has been made on several occasions as formal representations to historic planning applications at this site, and then at Reg 18 stage of the Local Plan when this site was a 'second choice' allocation. The National Trust wishes to confirm that it maintains its objection to this allocation, which is proposed to accommodate around 100 new homes and 0.4 hectares of employment land. Our response was previously set out in full as part of the Reg 18 consultation. The National Trust agrees with previous assessments made by East Devon District Council and the Planning Inspectorate when considering previous planning applications/appeals, that the site is unsuitable for housing due to the resulting significant landscape and visual harm to the estuary fringe. Housing development at Lymp_07 (Land at Courtlands Cross) and Exmo_23 (Land to the South of Courtlands Lane) would be at odds with the contribution that the National Trust land and

surrounding area makes to the unspoilt open qualities of the landscape in this location, which should be highly valued, and therefore the National Trust maintains its objection and requests that these are omitted from the final version of the Local Plan submitted for examination. Our previous response is attached again for the attention of East Devon District Council. As part of the National Trust objection to proposed allocation site Lymp_07, we confirmed that we would object to any removal/reduction of the Green Wedge and/or Coastal Preservation Area designation from this site or from site Exmo_23, or the surrounding area, from its current extent. And we maintain this objection also. This is set out in further detail under Policy OL05: Green Wedges and Strategic Policy OL03: Coastal Preservation Areas, below.

Full name: Helene Jessop

Organisation (where relevant): RSPB

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: In the RSPB's view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John's (Exmo_20) (within 400m of Withycombe Raleigh Common, part of the designated SPA/SAC and RSPB nature reserve), Land at Marley Drive (Exmo_04) (within 50m of the designated heathlands, Land south of Littleham (Exmo_17), Land west of Hulham Road (Exmo_47), and Land at Coles Field Hulham Road (Lymp_14) and Courtland allocations) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathlands (arising from potential loss of foraging habitat for nightjar, various urban effects on the designated heathland habitats and species, and addition nitrogen deposition from the increase in traffic emissions arising from new development. If these allocations progress, individual site assessment will be needed to determine first if any (those on the perimeter of existing built development) have existing value as functionally linked habitat for foraging nightjar that are a designated feature of the East Devon Heaths SPA and, if so, how adverse impacts on the SPA nightjar population through loss of identified foraging habitat will be avoided, and to determine if urban effects on the SAC and SPA sites can be satisfactorily mitigated, as highlighted in the HRA (p86, Footprint Ecology, 30/1/25). For example, the allocation land at St John's (Exmo_20) is adjacent (apart from only a dividing road) to the designated heathlands used by breeding nightjar. Nightjar have also been recorded breeding close to the designated heathlands but outside the SPA close to Exmouth, and nightjar will often forage off heathland. The RSPB is very concerned that the St John's allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated

heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase in recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to Land at St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 meters of the Pebblebed Heaths", there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident domestic cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands. The new national heathland breeding bird survey is taking place in 2025 and, when the results from that are published, they should be used to inform assessments prior to decision on any development. There is as yet no strategic to address the problem of traffic emissions and resultant increase in nitrogen deposition affecting heathland vegetation. In respect of Courtlands (eg Lymp_07) the RSPB is also concerned about impact on a priority bird that is not a designated feature of any protected site. Breeding curlew have been recorded on farmland in the area in recent years; this s41 farmland species of principal importance (red listed as a bird of conservation concern and specially protected under the Wildlife and Countryside Act 1981) currently has very few breeding territories in east Devon, and the Council should ensure no net loss to the population - where in situ retention and suitable management of habitat is not possible, compensatory habitat should be provided (such as mechanism has been successfully adopted elsewhere in Devon where this species occurs, including Teignbridge).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: In the RSPB's view, the Council should not progress any proposed allocation for new housing or development close to the designated heathlands until a strategy and effective measures to reduce traffic emissions and nitrogen deposition on the designated sites is in place. Additionally, ecological assessment should be informed by the results from the 2025 national heathland breeding bird survey currently in progress, and site survey to determine if those sites have value as functionally linked land used by foraging nightjar. All proposed sites around the designated heathlands should be subject to Appropriate Assessment re impacts on the designated heathland habitats and species and not progress if AA concludes that urban effects such as cat predation cannot be avoided or

satisfactorily mitigated and that mitigation measures (eg, SANG provision) for recreational impacts are unlikely to be effective for those proposed developments in very close proximity to the designated sites. The RSPB recommends this policy also references that development proposals at Courtlands Cross (and others with potentially suitable habitat for Cirl Buntings) should include ecological assessment for cirl bunting presence (as per Policy PB03 Protection of irreplaceable habitats and important features (re habitats supporting protected and notable species)).

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: The RSPB is very concerned at development allocations close to the designated heathlands for reasons of:

- lack of any strategy to address traffic emissions which will further add to the currently critical load of nitrogen deposition affecting the heathland vegetation
- the increasing risk of urban effects negatively affecting the heathland the closer new housing is to the heathland, and the less likely that SANG, public open space will be effective as mitigation given increased proximity of new housing to accessible heathland.

Full name: Alice Gater-Wildgust

Organisation (where relevant): Budleigh Salterton Town Council

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The largest development within the Local Plan is located the furthest from the designated Tier 1 Town it is allocated to, and adjacent to Budleigh Salterton, a Tier 3 town situated within a designated National Landscape. This policy is not legally compliant as it fails to satisfy a number of the remaining key tests, including those related to sustainability, environmental impact, and the adequacy of infrastructure provision. Furthermore, this site was previously rejected by East Devon District Council's Housing and Economic Land Availability Assessment (HELAA) as unsuitable, indicating that it does not meet the necessary criteria for development in terms of environmental considerations and suitability for housing.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To mitigate the impact of the development on the National Landscape, it is necessary to reduce the proportion of the site at Exmo_20 that borders this protected area. The main access road to the site should be relocated away from the National Landscape and instead connect with more appropriate infrastructure, such as the newly planned Dinan Way road. Moreover, no site of this scale can fully comply with East Devon District Council's (EDDC) own policy requirements outlined in Chapter 6 'Mitigating Climate Change'. This is especially critical given the site's proximity to the National Landscape boundary and its location adjacent to the Pebblebed Heaths, making the heaths particularly vulnerable to environmental degradation.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: No consideration has been given to the main town affected by Exmo_20, Budleigh Salterton. This development fails to adequately address local priorities and needs, and must go beyond the scope outlined in the Local Plan. Furthermore this development directly contradicts Policy OL05 of the Local Plan which sets out to prevent development that would 'damage the individual character and identity of settlements'. Budleigh Salterton Town Council (BSTC) note that there are, quite rightly, concerns listed regarding the protection of the St. John in the Wilderness Church and its surrounding environment. Equal consideration must be given to the broader National Landscape, including the Pebblebed Heaths Special Site of Scientific Interest (SSSI), which requires comprehensive safeguarding. It is essential that East Devon District Council (EDDC) refrains from promoting land for development that has already been rejected by its own Housing and Economic Land Availability Assessment (HELAA), as this raises significant concerns regarding the suitability of the site for development. The impact of the proximity of such a large development on a discrete tier 3 town with limited infrastructure to accommodate the proportional increase in population and activity has not been taken into consideration. The inclusion of Exmo_20 in SD03 is in conflict with Policy PB01 of the Local Plan (Protection of internationally and nationally important wildlife site) and is not in accordance with the mitigation strategy and therefore renders SD03 unsound.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: This site was explicitly ruled out of the development programme by East Devon District Council's (EDDC) own criteria under the Housing and Economic Land Availability Assessment (HELAA), which classified the site as 'available but unacceptable.' Given that experts in this field have already determined the site to be unsuitable for development based on established planning and environmental criteria, we believe that no modifications can render this aspect of the plan sound. The decision made by those with the relevant expertise should be respected, as it reflected a thorough assessment of the site's suitability for development

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Budleigh Salterton Town Council has not been directly consulted on this matter, despite being the most proximate town to the proposed main access point for the Exmo_20 development. Moreover, at the time we became aware that this site was to be included in the Local Plan, we were advised that the appropriate time to provide feedback to East Devon District Council (EDDC) would be during the formal consultation period for the plan. This lack of early consultation with the Town Council (representing the local community and residents) most affected by the development, undermines the effectiveness and transparency of the planning process

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: BSTC would like to be present at any future hearing regarding this matter

Full name: Rob Martin

Organisation (where relevant): Clyst Honiton Parish Council

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This policy says that Clyst Honiton could have a farm shop, not possible given the proposal to build over the farm land in the parish. This could be a real problem and would effectively prevent a community shop being set up to avoid isolation in a village surrounded by commercial and housing development.

Full name: Anne-Marie Bates, Clerk & RFO

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Dear Planning Policy Team RE: Response to Regulation 19 Consultation on the New Local Plan Woodbury Parish Council response to the Regulation 19 Consultation is set out below along with an appendix referencing the relevant correspondence. Woodbury Parish Council would like to express our significant concerns in response to the Regulation 19 consultation on the new Local Plan. It is our firm belief that this consultation has not been conducted in a sound or satisfactory manner. Firstly, we find the consultation to have been inadequate in terms of meaningful engagement. The lack of substantial and proactive communication with Parish Councils is particularly disappointing. It is essential that East Devon District Council promotes meaningful discussions with Parish Councils, ensuring their voices and perspectives are heard and valued throughout the consultation process. We have encountered persistent issues with the timeliness and quality of the consultation process. The notice period provided for responses was unreasonably short and the time allocated to allow for formal meetings with our residents was insufficient. Many of our queries and concerns remain unanswered, leaving us feeling side-lined in this important decision-making process. On Friday, 23rd August 2024, at 5:08 PM, an email containing a letter from Cllr T. Olive was sent regarding the site selection decision-making process for the emerging Local Plan. The letter informed us that sites within our Parish would be discussed on Tuesday, 3rd September 2024. Due to the Bank Holiday weekend, the email was only read by the Clerk on Tuesday, 27th August 2024. This resulted in insufficient time (fewer than the required three clear days) to call a Parish Council meeting to address the matter appropriately. The consultation system used “Commonplace” had overly wordy content and a lack of user-friendliness. The tile system requires excessive navigation in and out of the tiles and large amounts of information has to be read to be able to proceed and then only specific questions are

given. This process is difficult to navigate and comprehend and no doubt puts off many users from responding. Adding to this each user had to register which again was not clear. This can be evidenced by the lack of responses received. Despite the Regulation 19 Consultation need for clarity, its presentation has made it challenging to address key aspects of the Local Plan such as general legal compliance, soundness, and the duty to co-operate. Moreover, the consultation has not provided adequate opportunities for stakeholders to express where development should be placed. This lack of consultation on location preferences has led to significant cumulative negative impacts on key infrastructure, services, and the environment. The significant development taking place in the Exmouth area, particularly to the north of Woodbury Parish, has highlighted a concerning lack of attention to infrastructure. Currently, this region in the district relies solely on the A376 and A3052 for its transportation needs, with Woodbury frequently being utilised as a diversionary route or shortcut. The challenges with sewage treatment in this area are well-documented, as the existing infrastructure frequently suffers from leaks and spills; substantial development is likely to place even greater strain on this already overburdened system. We are also disheartened that our landscape proposal, which was submitted as part of the process, has not received any acknowledgment or comment. This omission underscores the need for a more inclusive and attentive approach to consultation. Effective and genuine engagement with Parish Councils, timely communication, and sufficient opportunities for public input are essential for ensuring that the Local Plan reflects the needs and concerns of all communities in East Devon. We trust that our concerns will be taken seriously and look forward to receiving your response.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Land at St John's (Exmo_20) - we support that a masterplan is required for this site. However, the policy states that development which 'would result in unacceptable impacts will not be permitted within 400m of the Pebblebed Heaths'. There may be scope for confusion on the nature of impacts and what constitutes an unacceptable level of impact. This policy also refers to the delivery of SANGS. It would be clearer if the last sentence of the third paragraph of this policy stated: "The development will need to be supported by a new, developer provided, SANGs. This will be required to be delivered as part of the overall proposal scheme either on the allocation site or on nearby land. LNRS should be used to identify the best site and form of SANGS" The above applies to Exmo_17 also. There is no mention of the main river on site which is a key constraint. In our Reg 18 response, we mentioned the importance of providing buffer zones to watercourses across sites in Exmouth. We see the value of emphasising these as a key constraint in the policies.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_47: The relative rural isolation and tranquillity of grade I The Point in View chapel (associated with Grade I A La Ronde cottage further west), adjacent grade I Manse and surrounding grade II Registered Park and Garden, contribute to the significance of these assets as an ornamental farm and religious complex within a wider pastoral setting. Site Exmo_47 forms part of a green buffer between this group of assets and the residential development to the east, which helps to maintain these qualities. Development would therefore result in harm to the significance that these assets derive from their settings. Bearing in mind the limited contribution of the site to meeting East Devon's housing need, we question whether the proposed site allocation is justified and consistent with national policy. Furthermore, the proposed capacity of 15 dwellings appears too much to be supported by the site, when considering the need to restrict development to the southerly parts of the site (as specified by the policy) and provide access and gardens etc.

Exmo_20: Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (paragraph 206(b)). Development may also result in some harm to the setting of the nearby grade II listed buildings Withycombe Barton (a mid-late 19th Century house) and Higher Lodge (an early 19th Century Cottage or nee). The church and its grounds enjoy a scenic and tranquil setting and extensive views across the surrounding pastoral landscape. The churchyard is enclosed by rising land in a broad arc from north to south, with land to the east forming a highly sensitive part of the setting. We are therefore in general agreement with the policy statement that 'development will need to be

concentrated in the southern parts of the site’. However, restrictions on development in the setting of the church need to be more clearly defined. It appears that at modest densities it may be possible to accommodate the stated residential site capacity within less sensitive field parcels, entirely to the south of the church, between the water courses and areas of plantation woodland. If adding further employment development to the mix would result in harm, then we question whether it can be justified on this site bearing in mind the significant oversupply of employment land proposed by the plan as a whole. Finally, we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. It is unclear whether this is the sole reason for including a large swathe of land to the north and east of the church within the site? Alternative access to the south of the site should be explored. Consequently, in its current form we consider Exmo_20 fails the NPPF tests of soundness as it is unjustified and inconsistent with national policy, including paragraph NPPF 16(d) and policies in Chapter 16.

Exmo_17: Exmo_17 covers a large area located to the east of Littleham, with a cycle path (former railway) bisecting the landscape from east to west. Land to the south includes several fields and wooded water courses, which form a rural setting to the east of grade II* listed Parish Church of St Margaret and St Andrew within its churchyard – a heritage asset of the highest significance according to the NPPF. The southernmost field parcel adjacent to the church forms a particularly sensitive part of the setting. Any built development here has potential to result in considerable harm. This is acknowledged by the site selection report, which identifies a ‘major’ impact from development to the south, lessening to the north. Development may also result in some harm to the grade II lychgate and grade II Castle Cottages located further east. It appears that at modest densities it may be possible to accommodate both the stated residential site capacity and proposed employment uses (if justified) without developing the southern parcel of land adjacent to the church. Furthermore, while we welcome the requirement for a masterplan, the policy would benefit from clear provisions to protect views of and from the church. Consequently, in its current form we consider Exmo_20 fails the NPPF tests of soundness as it is unjustified and inconsistent with national policy including paragraph 16(d) and policies in Chapter 16. We note that the whole site falls within the East Devon National Landscape, and adjacent to the Coastal Preservation Area, the boundary of which is proposed to be redrawn to exclude this development site. These issues will require careful consideration.

Exmo_08 and Exmo_16: This proposed site allocation is on visually prominent sloping land and would urbanise, and result in significant harm to, the setting of grade II Green

Farmhouse in a way that would be difficult to mitigate owing to the topography. We therefore question whether this site is justified and consistent with national policy.

Exmo_50: We consider the reference to ‘skilful design’ unhelpful and suggest that this is replaced with more appropriate policy wording that considers character and responds to heritage policies in the NPPF.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Exmo_47: Hulham Road currently provides a strong eastern boundary to the remaining pastoral landscape around the group of heritage assets at A La Ronde. We recommend that this is maintained by removing Exmo_47 from the Plan. If the site is nevertheless to be considered for allocation, then the site capacity should be reconsidered on the basis of a more detailed understanding of potential impacts on the settings of heritage assets, and how this could be minimised and mitigated. This should accompany and inform a concept plan showing how any proposed development and mitigation would be located within the site. An associated policy would then need to incorporate these provisions, such as controls on development siting, height, materials and landscaping.

Exmo_20: Exmo_20 needs to be informed by a more detailed understanding of potential impacts on the settings of heritage assets, and how this could be minimised and mitigated. This should accompany and inform a concept masterplan showing how any proposed development and mitigation would be located within the site. Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified. Other options for site access should be explored. For example, could access be gained via a new road passing through Exmo_18 (Land east of Liverton Business Park) to the south? Overall, there needs to be greater clarity and assurance of the areas of the historic setting to be protected.

Exmo_17: Notwithstanding impacts on the National Landscape which will also require careful consideration, we request that the boundary of the site allocation is amended to remove the southern field parcel adjacent to the church along with all land south of

Littleham Brook. This would also allow the Coastal Preservation Area to be retained over this land, and would negate the need to bridge the brook, which may be costly. We suggest that the policy text is also adjusted as follows: “This allocation will need to come forward on the basis of an agreed masterplan for the whole site that clearly demonstrates how comprehensive development will be undertaken and implemented. The site is located in the East Devon National Landscape and particular sensitivity will need to be taken in respect of design and development approaches to minimise potential for adverse landscape impacts. Southerly parts of the site are particularly sensitive and considerable care will be needed in protecting to conserve and enhance the setting and ambience of St Margaret and St Andrews Church at Littleham, including any important views of or from the church and its churchyard.” Exmo_08 and Exmo_16: We recommend that the proposed allocation is removed from the plan. Should the site nevertheless be taken forward as a potential site allocation, a more detailed assessment would be needed of the potential impact of the scheme on the setting of Green Farmhouse. This should inform and accompany a concept plan to demonstrate whether the proposed site capacity can be achieved with a layout and landscaping to minimise and mitigate impacts.

Exmo_50: “This site forms an urban redevelopment opportunity that will accommodate a new police station as well as at least 20 new homes, with a design that responds sympathetically to the character and appearance of the conservation area, and conserves and enhances the settings of listed buildings around the site, Provided that it does not compromise the aims of this policy,, conserves and though with skilful design, noting the significance heritage interests around the site, a greater number of new homes will be actively encouraged.”

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Outside of the West End, Exmouth carries the largest proportion of new housing and employment land, with allocations totalling around 1,500 new dwellings and 6.7 ha of employment (Strategic Policy SD01). Proposed allocations predominantly focus development on the northern and eastern fringes of the town, remote from the rail station and direct bus links to Exeter. The focus for external commuting and retail trips will continue to be Exeter and employment in the West End. Consequently, it will be vital to deliver sustainable transport measures that improve linkages to existing transport facilities and offer new public transport opportunities, to reduce reliance on the private motor car and avoid unnecessary short distance journeys impacting on the SRN.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Strategic Policy SD01: Exmouth and its development allocations (p76) Exmo_04a and Lymp_14 These sites contain and are surrounded by priority deciduous woodland habitats. The strategic policy does require that particular attention is paid to the onsite and surrounding biodiversity. However, Natural England recommends that the strategic policy could be improved by encouraging opportunities to establish connectivity between existing biodiversity assets. Exmo_17 The Site Selection Report states that “Development of the site could have significant adverse impacts if poorly undertaken. Any development would need to be of high quality and would need to be very carefully planned and sensitively implemented. “ Natural England agrees with this and reiterates that Section 245 Section 245 (Protected Landscapes) of the Levelling-up and Regeneration Act 2023 (LURA) now requires that authorities must now ‘seek to further the purpose’ (conserving and enhancing natural beauty) of protected landscapes. Exmo_20 The St John’s site (Exmo_20) was rejected as GH/ED/76 (same boundaries) at the Regulation 18 stage of the Local Plan, and it was not included in the May / June 2024 EDDC additional sites consultation. Therefore, even though this is a Regulation 19 consultation, this is the first time that Natural England has had opportunity to comment on this site. It is noted that the accompanying HRA suggests that the strategic policy contains sufficient mitigation to avoid an adverse effect from urban effects and residential impacts on the East Devon Heaths SAC/ SPA. The HRA also makes further recommendations for project level mitigation. Natural England agrees with the mitigation suggestions in the HRA. However, Natural England recommends that these measures should, as far as possible, be integrated into the strategic policy so that there is greater certainty that the mitigation will be delivered. We would also like to make the following points. The principle for keeping residential development outside of a 400m exclusion zone is established within

the Local Plan. Natural England welcomes the stipulation within the strategic policy SD01 that “built development will need to be concentrated in the southern parts of the site” with a 400m exclusion for residential and any development that has adverse impact. While this gives some degree of protection to the SAC / SPA the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road. This would perform multiple functions. It would conserve foraging areas for nightjars that inhabit the heaths, provide opportunity for BNG habitats and also maintain visual amenity adjacent to the East Devon National Landscape. Authorities must now ‘seek to further the purpose’ of protected landscapes as per LURA Act 2023. This is a clear opportunity to create permeable sites for nature networks and is in line with a wider green infrastructure approach. As such any access road from the northeast should be sensitively implemented. We would also recommend that any employment parking outside of the 400m zone should be restricted to users of the facilities (employees / customers) so that it does not become parking access for the SAC/SPA. The policy is not currently clear on whether the required SANG will be delivered on or offsite. If delivered onsite it is recommended that it should be as tightly integrated as possible to residential development in terms of location and access. Any onsite SANG should be buffered, fenced and have restricted on-wards access towards the SAC / SPA. The current EDDC SANG ratio provision policy of 8ha per 1000 residents is unlikely to translate to a site with sufficient space for a good-sized circular walk. Natural England would suggest adopting a higher ratio of 16ha per 1000 on this site, which would be in keeping with the HRA mitigation recommendation for ‘extensive’ SANGS provision. This, in tandem with high quality recreational features will help focus recreational pressure away from the East Devon Heaths SAC / SPA. If the above recommendations were applied to the site, with development in the south-west and a green buffer in the north-east, there may be opportunity to pull the settlement boundary away from the SAC / SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC / SPA.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: ?

The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA).

Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy.

? Exmo_20 would destroy the “tranquillity, wildness and dark skies” of the countryside, which is contrary to POLICY OL01.

? Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9

? The Habitats Regulations assessment (30.01.25) confirms that there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA). Exmo_20 is in conflict with POLICY OL09 and POLICY PB04.

? Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HE02.

? Exmo_20 is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and through Withycombe. This is in conflict with POLICY AR01B.

? Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

? The main access point to Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: ? Remove Exmo_20 from the Local Plan, ? Do not access the site via Southern Wood,

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposed Growth at Axminster

3. It is noted that at least 1,409 dwellings and 4.8 ha of employment land is proposed at Axminster across a number of allocations (Policies SP03 and SD02). Axminster is located to the west of the border between Somerset and East Devon. The Primary Market Town of Chard is located within Somerset approximately 11 km east of Axminster. The former South Somerset District Council previously commented on the potential impact of additional traffic generation to employment areas at Chard because of planned growth at Axminster.

4. Submitted evidence base document East Devon Local Plan 2020 – 2042 Forecast Impact on the Strategic Road Network Honiton and Axminster, January 2025 has assessed the impact of proposed allocations on the junctions with the strategic road network (SRN) at Honiton and Axminster and has confirmed that there is capacity on the SRN for the proposed growth, this is welcomed. The allocation of employment land providing job opportunities along with housing should help to increase the self-containment of Axminster. No objections are raised.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: Nutrient Neutrality – River Axe Special Area of Conservation

5. Somerset Council has been working with the Lead Authority, East Devon DC to address the issues relating to nutrient neutrality in the River Axe Special Area of Conservation. The East Devon Local Plan Key Supporting Document KSD – 02 Duty to

Co-operate Regulation 19 Consultation identifies that this matter is ongoing. Somerset Council confirm that they will continue to work with East Devon Council to address this issue and will contribute to any subsequent Statement of Common Ground. The inclusion of Strategic Policy PB04: Habitats Regulation Assessment, particularly the section on nutrient neutrality in the River Axe SAC catchment is welcomed.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

PHSW supports Strategic Policy SD02: Axminster and its development allocations, which includes land under their control.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

While PHSW supports the allocation of land east of Lyme Road (Axmi_22) for the delivery of 100 dwellings, to ensure the policy's soundness during examination, policy requirement to safeguard land for the relief road should be removed. We say this because:

- The Policy's requirement for a 'possible future relief road' lacks justification due to insufficient evidence of its necessity, feasibility or viability. A review of the current Regulation 19 consultation evidence base documents indicates that the relief road is unlikely to be delivered in the plan period.

- By definition, the term 'possible,' refers to something uncertain or improbable. Since the inclusion for the relief road from the 2013-2031 adopted Local Plan (adopted in

2016), nine years have passed without its delivery. Substantial evidence reveals that the road it is not viable and therefore undeliverable.

- The previous Regulation 18 Consultation Plan (August 2022) highlighted significant viability issues with the relief road. These concerns were also noted in EDDC's Strategic Planning Committee meetings.

- For the plan to be made sound, reconsidering and removing the safeguarding of the possible future relief road is essential, allowing for the timely delivery of the Axmi_22 allocation within the next 5 years.

Furthermore, it is important to consider the changes to the Key Diagram and Proposals Map relevant to Axminster. The Key Diagram designates Axminster as a Tier 2 settlement, marking it as a main centre planned to accommodate approximately 1,100 homes and 4ha of employment land. The online Draft LP Proposals Map identifies the Site as falling within the settlement boundary for Axminster. It also indicates a significantly reduced quantum of development on the eastern side of Axminster, with Site allocated for housing. The land to the north is allocated for both housing and employment.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The reduction in the quantum of development compromises the ability to deliver the relief road originally envisioned for Axminster. The existing evidence base does not include any reassessment of the necessity of a relief road. The evidence base, therefore, lacks any evidence to demonstrate that, given the reduction in scale and quantum of development planned in the emerging Plan, the relief road is still essential to mitigate the impacts of the development.

Emerging Policy SD02 allocates the site for:

“Land east of Lyme Road (Axmi_22)

This site is allocated for 100 dwellings. The site layout should make provision for a suitable access road to facilitate the development of site GH/ED/80 to the north and also be built to a standard suitable for use as part of a possible future relief road to link to the A358, Chard Road, south of the Weycroft Bridge.”

The current wording of emerging Policy SD01 is considered to be unjustified, and the inclusion of a requirement for the site to “be built to a standard suitable for use as part of a possible future relief road” is not suitable for the proposed scale of development currently identified for 100 homes.

There is a further reference of the ‘possible future relief road’ as part of allocation wording for land north of the site at Prestaller Farm, Beavor Lane (GH/ED/80a) which also forms apart of Strategic Policy SD02: Axminster. Specifically, that element of draft Policy SD02 states:

“Development must incorporate a site road that is of a standard and is appropriately located so that it, and through potential future extension of the road, can form a possible future relief road to link to the A358, Chard Road, south of the Weycroft Bridge.”

In both instances, there is no further justification to support the inclusion of a possible future relief road.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure the further work required is undertaken to ensure the Local Plan is positively prepared, effective, justified and consistent with National Policy.

Re: Land east of Musbury Road (Axmi_02, Axmi_08 and Axmi_09) – for 438 dwellings and 1.6 hectares of employment land

Our client fully supports the allocation of the site for residential development but does not support the allocation for employment uses. There are also concerns about the justification for and feasibility of delivering a community hall.

SPATIAL STRATEGY AND DELIVERABILITY

Our client fully supports the identification of Axminster as a Main Centre able to support significant development. Axminster is a highly sustainable settlement with very good transport connections and a varied range of shops, services and facilities.

Strategic scale allocations at Axminster will better balance the historic skew of development towards the West End of the District as well as making up for the non-delivery of the former strategic allocation to the east of the town.

The proposed development site will both benefit from, and be able to further support, the extensive range of services and facilities in the town.

RESIDENTIAL

The three sites taken together as a single allocation is a logical extension to the town and the quantum of residential development identified in the policy is fully supported.

Allocating all three parcels as a single site will enable a comprehensive approach to forward planning future housing requirements delivering high quality homes to the south of Axminster.

The three parcels can function as a single entity, or can be delivered in phases, and are available, suitable and deliverable. Preliminary feasibility and design work confirms that this quantum can be accommodated on the site.

LAND QUALITY

Most of the site has remained as agricultural land and apart from minor and small-scale exceptions, is unlikely to have elevated levels of contamination.

FLOOD RISK AND DRAINAGE

The majority of the site is in Flood Zone 1 and any new development would be restricted to Flood Zone 1 at 'very low risk' of flooding from surface water. New development can be designed to safely convey any upstream flows through the site. In geological terms, soakaway drainage may be viable, to be confirmed by further assessment but if not the existing waterways on site would provide a natural outfall option.

ACCESS AND CONNECTION TO SERVICES AND FACILITIES

Vehicular access to the wider site can be provided from a number of locations. The site is accessible by foot and cycle to a range of shops, services and facilities in Axminster. There are a range of transport options to access Exeter, Taunton, Yeovil and Dorchester including train and local/strategic bus connections.

LANDSCAPE

Built development within the valleys and along the River Axe tributaries is an established pattern in Axminster and development on this site could follow this pattern.

Development on the higher slopes in the east will need to be carefully designed and planned. Measures will be required to soften the built edge and integrate development within the wider landscape and National Landscape setting. Field boundaries, hedgerows and hedgerow trees can be incorporated into the scheme to achieve this and help create stronger habitat links.

There is also an opportunity to improve the Public Right of Way network to create circular trails and connect to existing routes.

ECOLOGY

A full Phase 1 Habitat Assessment of the site has been undertaken. It is considered that there are not likely to be any insurmountable ecological challenges to a residential development of the scale and at the location proposed. Grassland habitats in particular are of local interest only.

There is potential for significant biodiversity enhancement in retained habitats to achieve required net gain and dovetail with the landscape mitigation.

HERITAGE

A Historic Desk Based Assessment (DBA) has been carried out confirming the likely presence of buried archaeological remains within the site. A programme of archaeological works will be carried out to understand the extent, nature and significance of the below ground archaeology within the allocation boundary. Once the results are available, appropriate mitigation can be designed into the scheme as required

The DBA also considered the potential for the development of the study site to affect the significance of the scheduled Roman fort and associated settlement, and Higher Wyke Farmhouse. The DBA concludes that the impact on the Roman fort would be addressed through the below ground archaeology assessment and mitigation. In terms of Higher Wyke Farmhouse the DBA concludes that any impact on its significance could be adequately addressed through detailed design measures.

UTILITIES

The site can achieve connections to existing utility networks, all of which have sufficient capacity to accommodate comprehensive development.

NUTRIENT NEUTRALITY

The Council is progressing a mitigation strategy for the River Axe catchment to address the impacts of the proposed allocations. Any future applications will make appropriate contributions to this to ensure the future development is nutrient neutral. The effect of surface water on the River Axe SAC can be mitigated through drainage design, using SuDS and other established techniques.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

COMMUNITY HALL

While the provision of appropriate community infrastructure is supported, the need for such facilities and the challenges of delivery and operation need to be understood.

Axminster benefits from a number of existing community facilities including Phippen Community Centre, Axminster Leisure Centre, Axminster Community Shed, Axminster Bradshaw Heritage Meeting Room and the main Town Council office located close to the centre of the town, so the need for an additional hall or meeting place is questioned. There is also no evidence provided regarding overall Community provision in East Devon, or specifically in Axminster, neither has there been any evidence regarding interest from local groups or the Town Council in taking on such a facility. Mandating the delivery of such facilities in such circumstances risks leaving part of the site undeveloped or worse a structure unused that is not suitable for other uses.

If this element is retained in the policy, there needs to be referenced to evidenced need and an identified operator and / or flexibility about how the community element can be provided.

Viability is also an issue in Axminster as acknowledged by the Tree Dragons Viability Assessment so the requirement for additional facilities needs to be properly evidenced and the viability implications understood.

HIGHWAYS MEASURES

The references in the policy to the provision of active travel links to the town centre and maximising opportunities for localised improvements/contributions to enhance sustainable travel modes is supported.

There is a concern however with the reference to the provision of off-carriageway bus stops on Musbury Road insofar as practicality of delivery. While land from the site could be used to deliver such provision for the southbound direction, there is no land available on the other side of the road to provide an off-carriageway bus stop for the northbound direction. We note the policy only requires this to be explored, but it should not reference something which is known to not be deliverable.

Additionally current highway guidance “Buses in Urban Developments” published in 2018 by the CIHT on providing infrastructure for buses encourages the provision of on-carriageway bus stops to prioritise bus movements and make it easier for buses to pull out into traffic flow. As such specifically requiring the provision of off-carriageway bus stops is not consistent with current best practice and one suggestion might be to drop the off-carriageway requirements and just refer to bus stops. It would then be for the highway authority to determine the appropriate arrangement through the planning application process.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Suggested revised policy text:

This land is proposed for 438 dwellings. This allocation will need to come forward on the basis of an agreed masterplan for the whole site that clearly demonstrates how comprehensive development will be undertaken and implemented.

The allocation will need to consider active travel links to the town centre and railway station, and the masterplan should address the landscape and heritage sensitivities of the site.

Highways access shall be taken from the A358 Musbury Road. The masterplan shall take full account of archaeological survey work within the allocation boundary to determine the extent of any remains associated with the adjacent Scheduled Ancient Monument.

Connectivity onto Wyke Road and public rights of way will be required to ensure good pedestrian/cycle access. The development should maximise opportunities for localised improvements/contributions to enhance sustainable travel modes. In particular, it should explore opportunities to provide bus stops on Musbury Road to improve sustainable travel options.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: We ask to be kept informed of next stages of consultation and also that we have an opportunity to participate in any public examination of this document.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD02

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: TCE support the allocation of 225 dwellings and associated land-use at GH/ED/80a – see fuller representation for further explanation.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: AXMINSTER/SITE-SPECIFIC POLICY SD02 (GH/ED/80A)

5.1 Within this policy, land at Prestaller Farm, GH/ED/80a is allocated for 225 dwellings and a community hub which should provide opportunities for workspace, café/shop and meeting space. Access is required to be via Axmi_22 (land east of Lyme Road) to the south and there is a reciprocal provision within the Axmi_22 allocation as well. TCE supports the principle of the GH/ED/80a allocation, and the amount and use of development identified within the policy.

5.2 The policy also requires the incorporation of a site access road to a standard and location to enable potential future extension for a relief road link to Chard Road to the north. TCE acknowledges the desire for this, subject to viability considerations.

5.3 The policy also acknowledges the remainder of the land under TCE control that lies to the north of the Mill Brook but outside the allocation, noting that where necessary to meet the demands and needs of the development, part of it can be used for off-site open space provision and habitat/BNG mitigation purposes. This is welcomed and supported by TCE. A Vision Document provided in Appendix 3 provides more detail as to how the adjacent land owned by TCE could be developed for the benefit of Axminster

achieving both sustainable development and increasing biodiversity as well as more opportunities for public open space.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: For SD02 the site assessments remain superficial and although they have been improved since the earlier version they require further detail work for consistency and accuracy.

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am concerned as to how "joined-up" the thinking is. As with other aspects of the Plan, the impacts on the river SSSI and SAC do not relate to a single place and can only be fully considered when combined with all other potential up and down stream developments. At present I can see no inclusivity for river impacts.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD02

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: A meeting of Axminster residents identified that many were unaware of the plan details or the proposed site locations. The on-line only method for information and comment was considered ineffective and unsuitable. A significant minority of Axminster residents believe that SD02 has not been adequately consulted.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Four of the sites listed were considered by residents as not practical or suitable (GH/ED/SOa, Axmi_02, _08 and _09). Previous applications for development on two of these sites have previously been refused and the site geography/topography has not changed. A meeting of local residents considered that site selection was not evidence-based with only superficial site assessments. These four sites are open fields on steeply sloping land that drains directly in to the River Axe through other areas of high risk of flooding. The sites all currently waterlog from October to March and the loss of water retention and run-off changes was considered a major risk. Local surface water flooding already occurs around these sites and mitigation of this is required before any further development and mitigation can be considered.

The sites selected within Axminster do not relate to the propose Axminster Relief Road (see 11.10) and sites associated with that have been rejected without apparent justification. The existing road network and drainage systems in Axminster are already above capacity and make any new development within the town or on the valley sides impractical without significant water retention and road changes. Human infrastructure

in terms of healthcare, professional services and education (there is currently no 6th form or tertiary education available) are not considered in the policy.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

The four sites already found to be unsuitable should be removed and the site selection exercise needs to be re-visited to identify sites that could be practically developed. A properly evidence based selection needs to be undertaken with regard to the route of any future relief road, potential flooding impacts and development of the current railway service and infrastructure. This is required in order to provide practical sites and associated infrastructure, A sustainable

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: All drainage in Axminster goes into the River Axe and fills the existing broad floodplain above the tidal limit at Colyton Bridge. Any increase in river level at Axminster has implications for increased flooding around the current flood plani which includes communities at Musbury, Colyford and Colyton as well as the railway line which is already compromised by seasonal landslips between Crewkerne and Honiton. The primary catchment area for the River Axe is in West Dorset and Somerset and there is no apparent consideration of potential river level increases from development in these areas. It is not possible to accurately gauge or mitigate water levels in Axminster without detailed knowledge of upstream and downstream events. In addition to the road constraints within Axminster, both main road routes through the town (A35 and A358) are single carriageway with the exception of the Raymonds Hill-Kilminster section of the A35. Axminster residents rely on services and facilities in Exeter, Chard, Taunton and Bridport and any expansion of the town should consider the necessary improvements needed for the existing road and rail links.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I do not think that there is sufficient joined-up thinking in the current strategy for Axminster. I am concerned that site selection is not evidence-

based and appears to bear little relation to the potential Axminster relief road. I do not think that the strategy as presented is either deliverable or sustainable

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD02

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reference is made to the possible relief road which “should” be made. This is not reassuring at all. The policy should insist that the relief road WILL be provided because failure to do so will cause no end of problems for the town.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Too many houses are being proposed for too small an area. Axminster does not have the infrastructure to support so many new dwellings. Before developing these sites, provision must be made for new schools, health care facilities, shops, better roads and a more reliable transport infrastructure. With these things in place, additional dwellings would be easier to subsume into the existing Axminster community.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Too many houses are being proposed for too small an area. Axminster does not have the infrastructure to support so many new dwellings. Before developing these sites, provision must be made for new schools, health care facilities, shops, better roads and a more reliable transport infrastructure. With these things in place, additional dwellings would be easier to subsume into the existing Axminster community.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: As already mentioned. The existing infrastructure cannot support this many new dwellings.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Martin Ferdinando

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD02

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: In 2022 when researching the purchase of my property in Sector Lane, I confirmed with East Devon Council that the land in question had been removed from the local plan due to inadequate access when the funding of a relief road was removed and that agricultural pollutants in the soil were too high. I was assured that no homes could be built on this land, indeed no applications for building would be considered for at least 20 years. On that basis, I purchased my property. The land has continued to be used for the grazing of sheep and cattle and is regularly sprayed with farm manure to help fertilize the healthy growing of pasture for grazing. So, how has the level of nitrates and phosphates now reduced making it safe for residential development? The access road has not been built and the plan uses a completely meaningless and woolly statement 'Sector Lane should be reconfigured'. How? The road outside my property, 'Wilwyn' is not wide enough for two vehicles to pass. Vehicles have to pull on to my driveway to pass. This includes HGVs, agricultural vehicles, vans and cars. My driveway is not designed for such weight/usage. How will I be compensated? The plan infers that Sector Lane be closed to through traffic, but how will the daily milk tanker access the nearby farm? The 'other end' access point is too steep/narrow and bendy for such a vehicle? There is no footway outside my house. The suggestion that Sector Lane is a suitable pedestrian or cycle route for not only the 225 dwellings on this plan, but the 100 on the land East of Lyme Road is laughable. It will be dangerous, even if the road is no longer a through road, the users of the existing residents of Sector Lane and its various cul de sacs mean the road is almost constantly in use by vehicular transport. Weycroft Bridge is a Grade 2 listed bridge, already subject to 4 way traffic lights and regularly floods. Additional traffic will endanger the bridge. The additional housing will create faster rain water run off, increasing the risk of flash flooding. Nearby Stoney Lane is regularly blocked with excessive vehicles, particularly when infrastructure failures have occurred on the Chard Road, creating gridlock. What arrangements are in place to mitigate this? There is nothing in the plan that explains this. The report keeps using

words like 'potential' and 'should', 'maximise' and 'sustainable', none of which this plan displays. The plan refers to the railway but on numerous occasions when I have used the railway, the allocated trains have been packed or formed of just two carriages. What is in place to ensure the rail provision is improved? 'Should' doesn't mean it will. There is no youth provision in the town. No open Police station. Inadequate dental practices and health centres. Lack of local shopping facilities will mean more traffic on to already congested roads. No multi faith provision for the increased diversity of existing residents, even before these hundreds of new properties are built. The stench of sewage from the local sewage farm and the clear evidence of pollutants entering the water course proves the existing facilities cannot cope with existing use. These additional properties will be an environmental catastrophe.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Removal of the area GH/ED/80a from the plan. Axminster has already expanded far faster than most other areas of Devon. Whilst it is understood Axminster is surrounded by National Landscape and protected areas, high density housing squashed into Axminster will undoubtedly affect the surrounding countryside from increased traffic, light pollution, noise, antisocial behaviour and damage to farm land.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I was previously assured that this part of the plan had been removed following the removal of funding for a suitable bypass and the agricultural pollutants in the land. This was in 2022. Nothing has changed since then to make it 'sound' so therefore it should be removed from the current plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Since the area in question should no longer be in the plan, the only modification would be to remove it and consider alternative locations.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: I do not believe there has been adequate consultation with those likely to be most affected.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD02

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I believe it is non compliant because it does not allow Axminster the opportunity to grow in a way that respects its history, environment, and community needs. It does not demonstrate or quantify that new developments are well-planned, environmentally responsible, and supported by the right infrastructure that creates a future that benefits both current and future generations. This is not a collaborative approach with a joined up plan — where residents, planners, and developers work together that would help achieve the best possible outcome for our town.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Transform this plan into a cohesive, data-driven strategy with clear baseline metrics and a well-defined infrastructure timeline that ensures: Axminster has a unique opportunity to grow in a way that honors its history, safeguards its environment, and meets the evolving needs of its community. To achieve this, new developments must be carefully planned, environmentally responsible, and supported by robust infrastructure from the outset. A well-structured approach—where housing, transport, public services, and utilities are developed in tandem—will create a sustainable future that benefits both current and future generations. By fostering collaboration between residents, planners, and developers, we can ensure that growth is not only well-managed but also enhances the town’s character and quality of life. A strategic, phased approach—guided by clear timelines and measurable outcomes—will deliver the best possible future for Axminster.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: see 2 above

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Proposed Allocation of sites – specifically Axmi_02, 08, 09

1.Flooding. My comments relate to this section of the proposal (Axmi_02) -and the adjoining Axmi_08 and Axmi_09. The public footpath known as Fairy Lane forms part of the heritage Fosseway. As a path leading from the fields to Musbury Road - during periods of heavy rainfall this path becomes a torrent of water. A drain cover is installed at the junction of Fairy Lane and Musbury Rd - however this is often covered in debris and therefore insufficient to handle the quantities of water. There is no other drainage in the area for surface water collection. What is not apparent from a 2D map is the gradient of the land and how much higher the fields are than the houses. Therefore - the water flows directly over the road and floods the houses opposite our property which are at a lower level than the road – as well as flowing down the road. In periods of cold weather, this then freezes becoming a significant hazard.

With the current drainage systems unable to deal with current rainfall events - if the fields were to become a housing development - reducing natural drainage into the ground - flooding events would significantly increase causing devastation to households - both financial and practical. This could also impact the nutrient neutrality

in the area. Excess water drainage due to concreting over the fields would increase nutrient pollution, causing potentially disastrous effects on water quality, the environment & biodiversity.

2. SWW Inadequate infrastructure. South West Water (SWW) have attended multiple times over the last few years - sometimes for planned works but often for emergency reasons. However the issues with poor drainage / sewerage facilities servicing our property and our neighbours continues. They have dug up the road outside our property multiple times, each time apparently repairing or reviewing the dated infrastructure - but issues continue. I am awaiting info from SWW – but these are just some of the visits – Oct 3rd & 15th 2018, July 2021, Significant issues Oct 2021, 6th Dec 2022, 31st July 2024, (closing road suddenly). Another leak issue occurred in Lear Lane on 20th Sept 2024– with SWW returning again on 11th Oct as still leaking – yet another reminder of failure of infrastructure / old pipes. Myself & neighbours report numerous occasions when there has been high rainfall and consequently flooding. Indeed in October 2021 due to massive flooding, they have had to pay for drain clearance / installation in their driveways and have sandbags at the ready.

With the current SWW network totally inadequate for the current housing on this section of Musbury Road - it would be a catastrophe to add any further development to this system.

3. Road Safety. At this section of Musbury Road, the road is narrow, on the brow of a hill (as our house name suggests) with no footpaths either side. The speed limit of 30mph is not adhered to and as one of the main road and bus routes into Axminster – it is already a hazard for safety - not only for any cars trying to exit their driveways / houses - but also no pedestrian access down the road. Often, people have to take their lives in their hands to attempt to ‘bunny hop’ from one drive to another in an attempt to navigate this section of road. The road at this section is barely wide enough for 2 cars, and when

buses or lorries use this, there is absolutely no margin for manoeuvre – especially if a motorist was to come across a pedestrian having to walk along the road.

As will be noted, most properties have had to instal multiple mirrors to aid access in and out - so I cannot see how safe access would be provided not only for any housing development - but also for contractors during building. To emphasise the safety issues, I have detailed some serious accidents just on this section of Musbury Road – 19/8/13, 10/8/17, 20/10/17, 15/6/18, 26/8/22, 3/11/22, 15/3/24. Limited visibility at this section of road would negate any access around the Fairy Lane site and there is no possibility of widening the road due to the housing on either side.

A potential access could be Woodbury Park / Wyke Road - however these are also extremely narrow roads with current housing developments limiting widening of these roads - so safe and accessible routes in and out of the proposed sites is not viable.

5/8/2016 –Axminster Neighbourhood plan – The summary stated “there is consistency across the County, District and Parish that a relief road is necessary as the only way of reducing the problems in the town centre”. Obviously – this was not undertaken when the last developments were planned and built – so if this was necessary then – how would the town cope with additional proposed housing?

4.Access to Facilities. Access to facilities in the town (ever dwindling) and through the town via A358 is already extremely congested due to the nature of the narrow roads and old buildings - so again if there was a huge increase in numbers of people accessing the town and trying to park, drive from one side to another - the current infrastructure is totally unsuitable. Another consideration would be the lack of pedestrian access from this area of Musbury Road into the town centre. Should additional homes be built on these fields, how would climate friendly pedestrian / bicycle access from these developments into the town centre be managed ?

5. Archeological interest. Archeological remains were recently found within the proposed site, with a nearby Scheduled Ancient Monument - what investigations would be conducted regarding these archeological sites to safeguard these areas of archeological / historical significance?

6. I have recently taken part in the Devon Bat Survey - which found a number of bat species around my property with the Western Barbastelle found (as a 99% probability) a rare and threatened species. I would enquire as to what environmental / species investigations will be conducted to ensure that wildlife and particularly endangered species are not further harmed.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

1. Flooding risk would need to be addressed as well as nutrient neutrality due to the proximity of the River Axe. Provision to take water away from Musbury Road as per the current gradient would need to be provided.

2. South West Water infrastructure is required to be completely installed - new drainage and water facilities to protect land and current housing - never mind the additional 1409 proposed .

3. Road safety is currently an issue - so provision of access for construction as well as house holders on the proposed site would need to be separate from current Musbury Road. There needs to be additional relief road for large lorries which would affect road safety around Axminster. This was seen as necessary in 2016 but has still not been built! Public right of way and bicycle paths should be installed to allow for safe sustainable travel from the proposed site to the Axminster town centre. There needs to be thought about how people would access the opposite side of the town centre as the current High Street would not suffice.

4. Access to facilities in town centre is already congested - so new relief road to access these would be necessary - as well as planning for new schools, medical facilities to cater for 1409 new households.

5. The proposed areas Axmi_02, Axmi_08, Axmi_09 should be removed from the Plan as the potential for further flooding due to land gradient and South West Water inadequate infrastructure, road safety and access to site and Town Centre concerns are too severe.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: I don't believe that this policy complies with a duty to cooperate as no consideration has been given to alleviate the current flooding, road access and safety concerns.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Because I feel that the considerations of the Land owners currently outweighs the significant concerns of the local community as we have put forward valid concerns which have not been taken into account when preparing the Local Plan.

Full name: Ian Harrington.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD02

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: No development in Axminster should encroach on the wellbeing of the River Axe and it's fragile eco-system. Or any development that will further increase the already serious flooding risk to the properties and road at Weycroft. The council, in their ignorance have passed this development despite many objections and several other preferred site in Axminster being overlooked, sites that don't encroach on the River Axe's eco-system or flood risk to properties. The development in question is Ref No:(GH/ED/83) land West of Chard Road.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Build the proposed development on one of the other preferred sites in Axminster as listed in the plan. One that is nowhere near the River Axe

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: As previously stated, the development is far too close to the River Axe which will lead to pollution and more flooding at Weycroft. Also destroying the many large hedge rows will kill untold numbers of wildlife including many species of birds, lizards, adders, bats in the WW2 pill box, otters in the River Axe at Weycroft and breeding cormorants. The area at Weycroft with it's grade one and two buildings with the backdrop of fields and the River Axe views will be blighted for ever.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: As stated previously, permission for this development should never have been given by the ill informed planning committee and why another preferred site wasn't considered beggars belief.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: As previously stated, I am (as are many) upset and baffled as to why one of the other preferred sites listed in the plan that didn't encroach on the River Axe or Weycroft with it's flooding and the destruction of wildlife, wasn't considered. Some investigations by an independent body should be in order before building commences.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To make sure that the River Axe and Axminster's wildlife has a voice.

Full name: Nigel Humphrey

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD02

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: There is a government requirement to consider the impact of new developments the environment and transport. Proposing 1400 new homes in Axminster without improving single lane Weycroft bridge (which is the ONLY access road to the town from the north) will lead to significant traffic and environmental impacts and congestion. This has not been appropriately considered meaning the plan is not legally compliant.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Either 1) make a firm commitment in the plan to put in place strategic mitigation measures/policies by committing to improvements to single lane Weycroft bridge (which is the ONLY access road to the town from the North) to enable these significant housing developments or 2) reduce the housing allocation for Axminster to a level which is more sustainable in terms of traffic impacts. This is likely to only be around 500.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Same reason as above, this section of the development plan is not sound as environmental/traffic impacts have not been adequately considered, identified nor strategically mitigated.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Either 1) make a firm commitment in the plan to put in place strategic mitigation measures/policies by committing to improvements to single lane Weycroft bridge (which is the ONLY access road to the town from the North) to enable these significant housing developments or 2) reduce the housing allocation for Axminster to a level which is more sustainable in terms of traffic impacts. This is likely to only be around 500.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: During the plan preparation the EDC spatial planning team has clearly not co-operated with the EDC highways team or the Department for transport . This has led to a situation where major transport/environmental impacts due to significant proposed Axminster housing developments clearly not been properly assessed or strategically mitigated through appropriate planning policies. Hence the plan is not meeting the duty to co-operate.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: My name is *** Personal details have been removed ***; I am a resident of Axminster. My email Address is *** Personal details have been removed *** The online consultation did not allow me to input my details any other way.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD02

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: DEVELOPMENT IN THE TOWNS AND VILLAGES The Policies fail to address Objective 2 of The Vision, that is, tackling the climate emergency, Objective 6, high quality development, and Objective 9, encouraging walking & cycling. For Objective 2, it fails to recognise that Exeter is the major draw for employment and that most journeys will be made between there and the new housing areas. Placing all new development close to Exeter is essential to achieving Objective 2. Objective 6 will not be met by isolated developments on the peripheries of existing settlements. Only large-scale development can provide for high quality developments. The Cornish example of Nansledan shows what can be achieved towards Objectives 2, 6 and 9 through a comprehensive and carefully considered housing provision. East Devon District Council has the opportunity to demonstrate its abilities and commitments to truly delivering a world-beating vision through a major planned expansion through an enlarged proposed second new community, Policy SW01, rather than piecemeal relatively small-scale developments at the edges of existing communities. For Objective 9, permitting 'edge development sites' for new housing at existing communities fails to address the Objective. It is unrealistic to expect people to walk or cycle given the distances and the natural terrain. To give but one example, development on the edges of Ottery St Mary are too far for people to walk to the central shopping area (and other facilities) and the steep valleys further severely mitigate against foot and cycle travel for a number of the locations. Moreover, off-street vehicle parking in the central area is already used to capacity and your proposals fail to address the consequences or provide for any positive resolution. Policies should be radically redrafted to address such matters. In particular, it should advance the proposed second new community, WS01, as the solution and increase its size such that development on the edges of existing settlements are unnecessary.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Evidence base. Although the Local Plan document contains paraphrasing or reproduction of all of the constraints, guidelines and regulations regarding planning applications there appear to be few examples of any of these being considered in the selection of development sites. At best individual site assessments appear to be superficial (and may lack due diligence) and none made any reference to specific constraints or recommendations. There are numerous obvious constraints including lack of access, drainage onto high flood risk areas, biodiversity loss from currently open land, ancient hedgerows and known archaeological remains. (many of which have been repeatedly stated in earlier consultations but not addressed). There is currently no detailed evidence to justify how the sites were selected or preferences ranked, This is particularly concerning as one site was previously considered unsuitable for development in 2023 due to soil contamination, access and drainage issues¹, constraints that have not changed in the last 2 years. A planning application for 16 houses at another selected site² was previously rejected due to access issues. There are numerous constraints that apply to the proposed sites and no justifications provided as to rejection of other “brownfield” sites proposed earlier in the consultation. Although the term “mitigation” has been used there is no detail of what this might entail or potential costs and land usage involved. We believe that there is little point “offering” sites that cannot be developed in practice, As proposed changes to planning processes will involve less public scrutiny we believe it is important that accurate evidence based selections are considered at any early stage. Sustainability. The Local Plan makes brief mention of the previously proposed N/S Relief Road. Without this facility all traffic through or round Axminster must use the single narrow route bordered by listed buildings or the single track road at Stoney Lane. The developments as proposed would expect to result in a further 1430 cars³ on already congested single track roads. Existing

drainage in the town is already at capacity with frequent surface water flooding events. All drainage goes into the River Axe which has resulted in multiple floods at Weycroft, in the town, at Trafalgar Way and in downstream settlements. Any increase in river level will exacerbate these events and potentially threaten other infrastructure on the border of the existing flood plain such as the railway line. Current medical and dental services are at capacity and the recent reduction in provision at Axminster hospital are real current constraints that need to be considered before the proposed 2,50004 population increase. Climate change. The site assessments and town plan do not consider the likely impacts of climate change on the existing town, or the proposed development. The single most likely effect of a warmer world is increased rainfall. Most of sites considered are now continually waterlogged from November-March and losing that stored water facility will significantly impact on river levels. As 1 inch of rain on 1 hectare will produce 250 cubic metres of water and 2-3 inches of rainfall in 24 hours is now not uncommon, the plan needs to consider the level of additional mitigation that will be required for the existing town before adding further run-off from the new developments. Joined up thinking. We believe that there is little direct evidence of joined up thinking in the plan. The catchment area for the Axe valley is largely in Dorset and Somerset and the plan provides no details of any proposed developments in those counties that could affect river levels. Existing wildlife, hedgerow, biodiversity and historic constraints are listed in the plan but not applied in any detail to any sites. Some notable examples are Myotis species bats which include Devon Wildlife priority species that are known at Axmi-02. Some of the other wildlife issues that have not been considered include ancient hedgerows and other Devon priority animal plant and fungi species (sites Axmi-02, 08, 09 and others), It seems unlikely that replacing open countryside with built environments will achieve the 10% BNG5 required under current policies. The sites at Axmi-02 and Axmi-08 contain some 50 acres of the original settlement associated with the Roman Fort at Woodbury⁶ and the passing reference in the plan gives no assurances as to how preservation and access to this will be maintained. A significant lack of joined up thinking relates to travel in the area immediately outside Axminster. There appears to be no considerations made of additional traffic loads on the the A35 and A358 which are single carriageway between Axminster both Honiton and Chard and which are already severely constrained at Chideock, Honiton and Chard. Potential developments in Dorset and Somerset will add to the current traffic levels on these routes and in surrounding towns, but do not appear to have been considered. Although the presence of a railway station in Axminster is featured in the plan, the current station car park is already at capacity with “overflow” parking occurring on nearby residential roads. The station car park contains the main entrance to the Mole Avon store and yard and also serves as a bus station. There is no free land to enlarge the station car park and any additional parking in the area would compromise business access and necessitate finding another site in the town for the bus parking. The one train an hour service on a single track is particularly vulnerable to

frequent landslips between Crewkerne and Honiton and these constraints have not been included. As detailed above the railway line borders the existing flood plain and would be at risk if the river level increased. Conclusion The conclusion of the meeting was that the developments in Axminster would not be either sustainable or deliverable as currently proposed. The meeting agreed that there was a need for development proposals to be fully evidence based with appropriate infrastructure development included at the outset. We believe that the absence of these and the other issues leaves the current draft of the Local Plan as “not fit for purpose”.

Land west of Chard Road (GH/ED/83) - there is no mention of the flood risk elements in this section. Flood risk and the requirement for flood risk assessments are mentioned in other policies, so it is not clear why not in this one, especially given the proximity to the River Axe. Land east of Musbury Road (Axmi_02, Axmi_08 and Axmi_09)- we support the requirement for a masterplan on this site, especially to suitably manage the flood risks.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD02

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Axmi_01a: While we welcome the reference to the two non-designated WWII pill boxes, the policy fails to acknowledge the close proximity of Newenham Abbey Scheduled Monument, and other archaeologically rich areas associated with a Roman Fort and Roman Road nearby to the east. When taken with other constraints such as flood risk, which isolates the site from the urban edge of Axminster, we query whether this site allocation is justified?

Axmi_02, 08, 09: Adjacent to Woodbury Lane and surrounded by the proposed allocation on two sides is the Scheduled Monument known as ‘Roman fort and later Romano-British settlement at Woodbury Farm’. This is a heritage asset of the highest significance according to the NPPF. Nearby to the west is the line of a Roman Road known as the Fosse Way (as well as WWII records on the HER). The site assessment report notes that associated archaeology may extend beyond the site, particularly to the west. There is therefore potential for significant impacts on archaeology, of a magnitude as yet unknown, which the site selection report acknowledges ‘may constrain or prohibit any development on parts of the site’. In addition to this, the potential harm to the setting of the asset is considerable. Built development across the site would remove or fundamentally alter the physical and visual relationship between the Scheduled Monument, the route of the nearby Roman Road and the landscape over which the fort would have had surveillance, falling to the River Axe before rising to the hills beyond. This site allocation is therefore unsound as it is not justified (based on proportionate evidence relating to archaeology and setting impacts), it is inconsistent with national policy, and it is not effective as there are questions around deliverability.

Axmi_23: Given the sensitive town centre location including multiple designated heritage assets, an adjustment to the wording of this policy is requested to better align with legislation and national policy.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Axmi_01a: As there is an oversupply of employment land this site should be prioritised for removal from the Plan. If the site is nevertheless progressed as a potential site allocation, the policy would need to be strengthened to ensure that there is adequate consideration of the historic environment and to secure appropriate design.

Axmi_02, 08, 09: We recommend that this site allocation is removed from the Plan. Otherwise, as this is an area of high archaeological sensitivity, a desk-based assessment and potentially a site evaluation would be needed to justify a site allocation. Please refer to the Plan-making section of our guidance on Planning and Archaeology, in particular from p24. A more detailed understanding is also needed of potential impacts on the settings of heritage assets, and whether this could be minimised and mitigated.

Axmi_23: “Very careful design will be needed to reflect conserve and enhance the character and appearance of the Conservation Area location and the setting of surrounding heritage assets.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: 47. Strategic Policy SD02 seeks to allocate sites in Axminster for more than 1,000 new dwellings and 4.8 ha of employment land. Selected allocations for land west of Musbury Road (Axmi_01a) and land east of Musbury Road (Axmi_09) appear to bound the A35 corridor either side of the Abbey Gate junction. The concentration of development alongside the Abbey Gate junction and the high-speed single carriageway nature of the A35 at this location could give rise to road safety issues as a consequence of additional turning movements. 48. It is recommended that the policy wording for proposed allocations Axmi_01a and Axmi_09 should reference the proximity of the SRN and the need for development to avoid any adverse impacts in terms of road safety and National Highways asset. Pedestrian access onto the A35 from neighbouring development sites should also be prevented given the lack of available facilities and the high-speed nature of the road.

Planned development in Axminster will increase turning movements on the high-speed A35. Whilst some allocations are again carried forward from the adopted Local Plan, it is appropriate to consider their cumulative impact. The Abbey Gate and Symonds Lane junctions have both experienced recent collisions involving turning vehicles, albeit neither are currently identified as Accident Cluster Sites by National Highways. Whilst the planned level of growth is unlikely to require strategic transport improvements, it will be important for future planning applications to consider the safety implications of planned growth, and individual allocations may yet require localised works to the SRN to offset any adverse impacts. This should also be a consideration as part of any future assessment of the Axminster Relief Road, which remains a safeguarded ambition of the plan, and could alter traffic demand at the A35 junctions.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

On behalf of Combe Estates

INTRODUCTION Combe Estate are long standing generational owner of large areas of agricultural and forestry land within East Devon. Their land interests are primarily in Honiton and Gittisham. As part of its interests, the Estate undertakes residential and commercial development and are the owners of Combe Garden Centre. The Estate therefore has a wide range of land and business interests within the district. The Estate has provided representations to the Council as part of previous consultations on the draft local plan and via the related call for sites process. Given the nature of their long-standing presence in the district, The Estate is an important local stakeholder with allocation interests within the proposals in the East Devon Local Plan for future development in the district. Against this background, Bell Cornwell LLP has reviewed the policies and information set out in the East Devon Local Plan (2020 -2042) Regulation 19 Consultation Draft and makes the following representations. CHAPTER 5. DEVELOPMENT IN THE TOWNS AND VILLAGES Strategic Policy SD03: Honiton and its Development Allocations Combe Estate supports the development allocations for Honiton listed in Strategic Policy SD03 and identified on the Policies Map, particularly Land west of Hayne Lane (site reference Gitti_03, Gitti_04 and Gitti_05) for which they have existing land interests. They are also part owners of Land adjacent to St Michael's Church (site reference Honi_07). The Estate are committed to seeing both of their sites and respective allocations delivered. Site Specific – Gitt_03, Gitti_04 and Gitt_05 The inclusion of Gitti_03, Gitti_04 and Gitti_05 for mixed use development is clearly supported as its represents a logical approach to development and growth to the west of Honiton, noting:

- the position of Honiton within the settlement hierarchy for East Devon;

- the sustainable transport options and overall level of services and facilities in the town;
- the proximity of the site to the A30 COMBE ESTATE REPRESENTATIONS ON THE EAST DEVON LOCAL PLAN (2020 – 2042) REGULATION 19 CONSULTATION DRAFT (MARCH 2025) BY BELL CORNWELL LLP 2
- The location of the site relative to existing jobs and food retail provision within the town of Honiton;
- The constraints that exist elsewhere in the settlement (for example this site can be delivered entirely outside of the AONB). Strategic Policy SD03 is considered to be sound, though we would recommend some modest tweaks/changes to wording. The specific policy allocating Gitti_03, Gitti_04 and Gitt_05 states; “Land west of Hayne Lane (Gitti_03, Gitti_04 and Gitti_05) Land to the west of Hayne Lane, on the western side of Honiton, is allocated for a mixed-use development to provide: A. 310 homes; and B. 14.6 hectares of land to accommodate employment and community uses. This allocation will need to come forward on the basis of an agreed masterplan for the whole site that clearly demonstrates how comprehensive development will be undertaken and implemented. Southern parts of the site are in the East Devon National Landscape and this area will require very careful design to take account of its landscape setting. On the western edges the site is close to the historic village of Gittisham and particular sensitivity will need to be attached to preventing adverse heritage impacts. These southerly and westerly parts will be best suited for open space uses. Commercial and employment uses will need to be concentrated to the north of the railway line bisecting the site with residential uses to the south. Community facilities, to include a shop or shops and a hall, will need to be provided within or next to 84 residential parts of the development. There will be the need for attractive and safe pedestrian and cycle linkages between the southern and northern parts of the site (ideally utilising an existing passage under the railway that lies in a roughly mid-way point in the allocation). It is expected that vehicular access to the residential development will be via the existing estate to the north (i.e. via Meadow Acre Road). Vehicular access to the employment development will need to come via Hayne Lane. The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes, including bus services.” In terms of the objectives of the policy we would draw attention to the masterplan submitted in support of the current representation. We would ask that it is noted that: COMBE ESTATE REPRESENTATIONS ON THE EAST DEVON LOCAL PLAN (2020 – 2042) REGULATION 19 CONSULTATION DRAFT (MARCH 2025) BY BELL CORNWELL LLP 3
- The Estate are committed to seeing the site delivered for a minimum of 310 homes.

- The Estate are committed to delivering the area of land to the north of the allocation which comprises part of the 14.6 hectares of employment and community uses (note part of this is land owned by EDDC) – however, additional flexibility should be built into the definition of uses permitted in this part of the policy to include wider commercial uses and leisure uses.
- The need for masterplanning of the sites is noted, and this can be controlled in-part, through an outline planning application.
- The development can be accommodated without being located within the East Devon National Landscape and account can be taken of landscape setting.
- Similarly, the evolving masterplan takes account of the topography and proximity of the historic village of Gittisham on the western edge the site which has taken account of topographical features and heritage assets.
- Both of the areas above can be utilised for BNG delivery and open space to ensure appropriate setting is retained for heritage assets and landscape designations.
- The Estate are happy to provide community facilities, to include a shop or shops and a hall as part of any wider masterplanned development.
- The importance of attractive and safe pedestrian and cycle linkages between the southern and northern parts of the site are also noted and deliverable.
- In terms of vehicular access to the residential development – this should not be solely from Meadow Acre Road – which is located within an adjacent development. Access will be available from Hayne Lane (as per transport / access notes submitted at the Reg.18 stage) and shown on the masterplan, with a secondary route potentially available from Higher Ash Close. As such, the allocation of the site for residential development is sound and supported by appropriate officer assessment in the submitted evidence base. Site Specific – Honi_07 The Estate are in control of land identified as Honi_07 – this was previously put forward as an allocation for 30 dwellings in previous versions of the plan. The client's land can be accessed directly from Waterleat Avenue to the north. During the preparation of the Regulation 19. Version of the Local Plan, Members have decided to allocate Honi_12 (land east of Cuckoo Down Lane) as additional development land. This site is landlocked and access would need to come through our client's land for delivery. Our client has no objection to the principle of this approach, but, given Honi_07 is road fronting this part of the allocation will need to come forward first to facilitate access to the wider development. COMBE ESTATE REPRESENTATIONS ON THE EAST DEVON LOCAL PLAN (2020 – 2042) REGULATION 19 CONSULTATION DRAFT (MARCH 2025) BY BELL CORNWELL LLP 4 As drafted, the allocation states: Land adjacent to St Michaels Church and south east of Cuckoo Down Lane (Honi_07 and Honi_12) This land is allocated for 101 homes and will form a

residential extension on the southern side of Honiton. The site is in the Blackdown Hills National Landscape area and close to heritage assets, it will require very careful design to take account of its landscape setting and the setting of surrounding heritage assets. Therefore a high quality comprehensive development scheme is required for the whole site. Development within allocation Honi_12 is expected to be dependent on development within allocation Honi_07 coming forward, as access needs to be from Weatherill Road. The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes.” As drafted, the policy notes the different land ownerships and clearly Honi_07 will need to come forward first to secure access to Honi_12. Our client is also aware that Honiton Town Council may object to Hon_12 (the additional land beyond our client’s ownership) as an allocation through this process. This has been reported prior to the consultation on this stage of the Local Plan. Should this be the case, and any further objections raised to the wider allocation, our client would also be prepared to deliver their site as a single allocation for circa 30 dwellings, which previous proofing layouts provided with our reg 18. Submission (and submitted again now for completeness) show can be accommodated on the site. However, we wish to stress that the site can also come forward as part of a first phase of larger development for circa 101 houses if this is felt appropriate. The key issues to stress here, is that The Estate’s land is deliverable. Technical work undertaken to date demonstrates the site is deliverable and it be delivered as a first phase of comprehensive development with the ability to connect to adjacent land parcels. Summary Position / Conclusion Combe Estate are of the view that both of their allocated sites represent sustainable development, and these are deliverable and suitable site for residential led mixed use development that will help meet the overall housing needs in Honiton and East Devon. COMBE ESTATE REPRESENTATIONS ON THE EAST DEVON LOCAL PLAN (2020 – 2042) REGULATION 19 CONSULTATION DRAFT (MARCH 2025) BY BELL CORNWELL LLP 5 It will provide much needed housing and new employment space for growth in the main centre of Honiton. The site will also assist in meeting affordable housing requirements in the town and the wider East Devon area where there is significant under supply. Both sites are immediately available for development and The Estate are committed to seeing the sites delivered for their allocated uses. The Estate generally support the Council’s approach to the spatial strategy and residential land allocations and consider that these are sound, justified and positively planned. However, the drafting of some of the policy could be clarified through the provision of further detail whilst some policies will benefit from the inclusion of more flexibility. Combe Estate’s key comments on the allocations they are promoting through the Regulation 19 Publication Draft can be summarised as:

- Honiton is suitably identified as a ‘main centre’ in the settlement hierarchy and is rightly a location for significant growth.

- Combe Estate are supportive of the direction of strategic employment policy and will deliver the allocation that has been proposed on their land – however, the definition of ‘employment’ should not be too narrow, and there should be the ability to include a variety of alternative uses (including a wider range of commercial and tourism based uses) to recognise the modernisation of the East Devon job market and to ensure that East Devon is not prevented from embracing new and emerging businesses to the area.
- Affordable housing percentages for allocated sites need to be closely appraised and set as low as is reasonably possible to ensure development is viable – this is particularly relevant in Honiton where current AH levels on open market schemes are sought at 25% and with this percentage figure increasing with the next Local Plan.
- Where masterplans are proposed for strategic allocations, further guidance/clarification is needed on these matters – could this not be addressed through a planning application (outline) rather than a masterplan/design code approach?
- BNG requirements should be amended to form a consistent position with national policy on its’ delivery e.g. 10% should be sought rather than 20%.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

2.45 It should be noted that land off Northcote Hill is capable of meeting the requirements of policy SP07 through the delivery of a number of public benefits, including extensive areas of public open space; highway improvements to support the vehicular trips likely to arise from

the proposed development; community park; neighbourhood hub; and enhancement of walking and cycling routes.

2.53 Land off Northcote Hill, Honiton (south of the railway line) should be allocated to deliver 285- 300 homes, which would ensure the development can make a meaningful contribution towards EDDC's housing land supply in the short to medium term, allowing for any unforeseen delays in housing delivery within the new settlement. By increasing the proposed allocation on Land off Northcote Hill, Honiton (south of the railway line), this will ensure that the allocation makes the most effective use of land, in accordance with national policy and guidance.

2.55 It is welcomed that land south of Northcote Hill (north and south of the railway line) is identified as two draft allocations within the draft LP. Taylor Wimpey supports the

allocations and can confirm that both sites are suitable and available for immediate development. Both sites can contribute to the Council's immediate housing land supply.

2.87 Land off Northcote Hill lies on the edge of the Blackdown Hills National Landscape Area and therefore any future proposed development should consider the Blackdown Hills AONB Design Guide for Houses and accord with the principles of the National Design Code and Building for a Healthy Life, and any other local design guidance.

2.88 As illustrated on the supporting Vision Document, land off Northcote Hill can deliver an attractive, well-designed and landscape-led scheme that responds to the site's context and location. The developable areas are carefully located along the site's existing contours, with a large eastern green buffer to frame the development from the wider countryside. The concept masterplan demonstrates how the site can accommodate 285-300 homes on land south of the railway line, which will be integrated with the existing settlement of Honiton.

2.90 In accordance with this policy, Land off Northcote Hill will prioritise sustainable modes of transport and ensure that walking and cycling is prioritised within the development's design. The scheme will deliver an attractive, landscape-led development with extensive areas of public open space, including a community park for the enjoyment of existing and future residents.

2.92 Land off Northcote Hill (north and south of the railway line) is not located within a Local Cycling and Walking Infrastructure route. As set out within the accompanying Transport Note, however, the proposed masterplan will incorporate high quality walking and cycling routes throughout the development and provide off-site pedestrian improvements, including provision of footways to ensure future residents are able to safely access the existing facilities and services within Honiton.

2.104 Land off Northcote Hill will not affect internationally and nationally important wildlife sites. The site lies outside of any Natural England 'SSSI Impact Risk Zones' relating to residential development.

2.117 Land off Northcote Hill is located outside of a nature recovery network. The proposed development will deliver a comprehensive landscape-led scheme, which will deliver a mosaic of habitats and deliver areas of ecological enhancement, contributing to the site's biodiversity net gain.

2.121 Land off Northcote Hill proposes to deliver areas of new public open space, which will be for the enjoyment of the existing and future residents of Honiton. This could include a new community park, which will offer a variety of walking routes, informal recreation and biodiversity enhancements. The various areas of informal open

space (including trim trail equipment) will contribute to the health and well-being of future residents. The proposals are landscape-led and informed by the site's context.

2.123 As demonstrated through the accompanying Heritage Note, by virtue of there being no heritage assets within proximity of the site, land off Northcote Hill is unlikely to lead to harm to the significance of any designated heritage assets in the local area. The proposed development, as shown on the accompanying concept masterplan will ensure, through the design process, that opportunities are taken to enhance the historic environment where possible.

3.17 In the case of land at Northcote Hill south of the railway line (Phase II), it is considered that the allocation does not currently optimise site density through the effective use of land. According to the draft Local Plan, allocation GH/ED/39b is able to accommodate 100 homes. However, through further investigation, the technical information submitted alongside this submission clearly demonstrates that the site can accommodate 285-300 homes.

3.21 This policy is supported and a future planning application relating to land off Northcote Hill will be supported by a suitable Travel Plan and Transport Assessment in accordance with this Draft LP policy.

3.35 Land off Northcote Hill is located outside of EDDC's defined Green Wedges. The development of these allocations would therefore accord with this draft LP policy.

3.39 Land off Northcote Hill is not located within a regionally or locally important wildlife sites, which is noted to include Local Nature Reserves (LNR); County Wildlife Sites (CWS); Unconfirmed Wildlife Sites (UWS); Special Verges designated for biodiversity. The proposed development will not negatively impact Regionally or Locally important wildlife sites and therefore will fully accord with the requirements of this Draft LP policy.

3.52 Any future application relating to Land off Northcote Hill will be accompanied by detailed tree assessments and protection plans in accordance with Draft Policy PB08.

3.63 Land off Northcote Hill offers the opportunity to deliver extensive areas of public open space, which could include a community park, that would be a significant public benefit to the existing and future residents of Honiton. The proposed development would ensure safe pedestrian and cycle accessibility in accordance with this Draft LP policy.

3.65 Land off Northcote Hill is not constrained by heritage assets and offers the opportunity to deliver a sustainable landscape-led development that will deliver significant benefits to East Devon, making a meaningful contribution to the District's housing land supply.

3.67 Land off Northcote Hill is not constrained by heritage assets and offers the opportunity to deliver a sustainable landscape-led development that will deliver significant benefits to East Devon, making a meaningful contribution to the District's housing land supply.

3.69 As set out within supporting technical notes, Land off Northcote Hill is not constrained by archaeological assets. Any future application would be supported by a suitable geophysical survey to ensure compliance with this Draft LP policy.

3.71 Land off Northcote Hill is not constrained by historic landscapes, parks or gardens and offers the opportunity to deliver a sustainable landscape-led development that will deliver significant benefits to East Devon, making a meaningful contribution to the District's housing land supply.

4.6 These representations are supported by a full suite of Technical Reports, which have informed a concept masterplan for land north and south of Northcote Hill.

4.7 The technical reports demonstrate that the site can accommodate a greater quantum of development than set out within the Draft LP. The technical reports are summarised below.

Landscape and Design

4.8 A Landscape Visual Assessment (LVA) was prepared by Stantec in February 2025 which provides Landscape and Visual advice for the proposed residential development at Land off Northcote Hill, Honiton. The LVA provides a series of landscape development principles with the aim of avoiding or reducing any adverse effects on the landscape as a result of the development.

4.9 The assessment states that there is potential for sensitive development at the site that responds to the surrounding landscape areas based on a number of opportunities, constraints and development principles.

Highways/Access

4.10 A Transport Vision Technical note has been prepared by Transport Planning Associates (TPA) and sets out the key transport related opportunities for the proposed development. The report provides an assessment of the following:

- Existing Conditions and Accessibility;

- Existing Local Travel Behaviour;
- Transport Policy and Guidance;
- Transport Vision Overview;
- Access Strategy;
- Masterplan Development and Virtual Mobility;
- Walking and Cycling Vision;
- Public Transport Vision;
- Travel Planning and Other Sustainable Transport Measures;
- Preliminary Junction Capacity Assessment; and
- Summary and Conclusion.

4.11 A technical analysis, assessing the potential impact of the development on the local highway network demonstrates that Phase 2 (GH/ED/39b) can accommodate 300 homes rather than the 100 dwelling currently allocated in the Draft Plan.

4.12 The report highlights that the site is well located in the context of the local and transport highway network and is also well connected with facilities and amenities within Honiton and the surrounding towns and cities. The site is also within walking and cycling distance of a wide range of facilities and amenities in Honiton. The site is situated within close proximity to existing public transport facilities including Honiton Railway Station and a number of bus services. The report demonstrates the possibility to encourage travel via active transport, providing the opportunity to reduce levels of car use by future residents.

4.13 In terms of access, the report concludes that the site can deliver a safe and suitable access for both vehicles and active travel.

Flooding and Drainage

4.14 A Flood Risk and Drainage Technical Note has been prepared by Pheonix Design, which provides an assessment of any flood risk or drainage issues that may be present on the site. The assessment concludes that the site is identified to be of low risk to flooding from all sources, and that the NPPF/PPG Sequential Test and Exemption Test are not required. The assessment goes on to state that Sustainable Drainage Systems will be used to manage any surface water from the proposed development and will ensure that the site is safe from flooding for its lifetime.

Ecology

4.15 An Ecological Deliverability Report has been prepared by EAD Ecology which provides an assessment of the suitability of the site for development. The report confirms that there are no overriding ecological constraints to the development of the site. It is also considered that, where constraints are identified, that measures could be provided to ensure that enhancements deliver a minimum of 10% biodiversity net gain, as per the mandatory requirement, or 20% biodiversity net gain, as set out in emerging Policy PB05. The report also confirms that the development could be carried out in accordance with the national and local (adopted and emerging) biodiversity planning policies.

4.16 The report also sets out the scope for any further ecological work that will be submitted alongside a planning application. Several habitat surveys (set out within the TN), as well as an Ecological Impact Assessment would be required in order to ensure

that all proposed habitats and species are protected or enhanced as part of the scheme.

4.17 An Ecological Constraints and Opportunities Plan has also been prepared by EAD Ecology and provides an overview of the site's ecological constraints and opportunities. The plan outlines the key ecological constraints for the site which include the hedgerows, scattered broadleaved trees and buildings, watercourse and pond, and lowland mixed deciduous woodland. The constraints include priority habitats which have the potential to support protected species as well as watercourse creating a buffer from development. However, these constraints are overcome via the key ecological opportunities.

4.18 The key ecological opportunities include the creation and enhancement of habitats within Green Infrastructure which will provide a net gain in Priority Habitats such as species rich

hedgerows, traditional orchards and wildflower meadows. Habitats with low ecological value, such as modified grasslands, offer opportunities for habitat improvement. Provisions for Biodiversity Net Gain will also be implemented.

4.19 A Habitat Management and Monitoring Plan could also form a condition to a future planning permission which would ensure the long-term management of all retained and proposed habitats.

4.20 If species are identified on site, the provision of new reptile hibernation sites and boxes for birds, dormice, bats and invertebrates could also be provided within the Public Open Space as well as within the structure of the new buildings.

Tree/Arboriculture

4.21 A Tree Survey Report has been prepared by RPS, in February 2025, in respect of the proposed development. A total of 86 individual trees were surveyed during the assessment. Additionally, the survey recorded 55 tree groups, 1 woodland area, 30 hedges, and 2 scrub areas. Most of the trees on the site were located either in the old nursery to the south, within the woodland along the northern boundary, or as hedgerow trees. The rest of the survey area consisted mainly of open fields. It is noted that there are no TPO's, Ancient Woodlands or Veteran trees on the Site.

4.22 The report also provides considerations for the design and site layout, stating that the current and future potential of tree growth should be considered. It also highlights the need to avoid any works to Root Protection Areas.

Heritage

4.23 A technical paper has been produced by TCMS Heritage which represents a high-level summary of Archaeology and Built Heritage evidence base at this preliminary stage. The report sets out the Key Opportunities and Constraints, Proposed Strategy and Conclusions.

4.24 In terms of Archaeology, the key opportunities and constraints include the Dumpdon Camp Scheduled Monument which is located c. 2.5 km to the north of the site and is considered a dominant feature in the wider landscape. The site is said to have a negligible potential for archaeological deposits dating to Prehistoric and early Medieval Periods, a medium potential for deposits from Roman and Medieval Periods, which would be of low significance if present, and a high potential for deposits from the post-Medieval Period.

4.25 In terms of Built Heritage, there are no designated heritage assets within the Site.

4.26 The site is said to have a negligible contribution to the overall setting of Dumpdon Hill Fort Scheduled Monument (1018851) due to its very small scale within the otherwise extensive landscape setting of the monument. The report recommends that a non-intrusive geophysical survey is carried out as well as appropriate mitigation measures for the retention of existing historic hedgerows and patterns of field drainage within the site. The application should be designed to include mitigation measures to minimise any direct/indirect impacts on significant heritage assets.

4.27 To conclude, the report states that the heritage constraints do not represent an overarching constraint to the development and that there is no heritage reason for the site not to be allocated within the emerging Local Plan.

Evolving Masterplan / Vision Document

4.28 A Vision Document has been prepared by Stantec to accompany these representations which sets out the proposed vision for the Site. The vision for the site is to provide a vibrant and sustainable new development to the east of the town of Honiton which is well integrated within the existing settlement and landscape setting. The document relays how the development will provide a logical extension to the Honiton while retaining and enhancing a network of green open spaces for the enjoyment of the wider community. The site will accommodate new homes in order to meet local housing demand, including that of affordable housing, with the opportunity to provide a new neighbourhood hub. The site will also have excellent local connections to the existing settlement, encouraging active travel offering ample opportunity for sustainable and local living.

4.29 The proposal supports a form of development that accords with the ecological hierarchy and by focusing on avoidance, mitigation and enhancement measures and can deliver biodiversity net gain.

Summary / Planning Benefits

4.30 The proposed development will deliver the following benefits:

- The provision of up to 115 dwellings on land north of the railway line and 285-300 dwellings on land south of the railway line, making efficient use of land and delivering a significant contribution to the Council's housing needs in the short to medium term;
 - The opportunity for the creation of significant areas of informal and formal public open space, including allotments, community park, play space and walking routes;
 - Delivery of a neighbourhood hub;
 - Delivery of ecological enhancements and on-site biodiversity net gain;
-
- The provision of attenuation basins to the south of the site offering a sustainable urban drainage system (SuDS) which also offer a habitat for aquatic wildlife; and
 - off-site improvements to highways, improving traffic flow and enhancing pedestrian and cycle connectivity for new and existing residents.

5.1 These representations and accompanying Technical Notes demonstrate that the current draft allocation at Land South of Northcote Hill – south of the railway line (GH/ED/39a), which restricts the development of the site to 100 homes, does not

constitute effective use of land or optimises the use of land to accommodate an appropriate amount and mix of development (in accordance with NPPF 2023; Paragraph 135e).

5.2 The Draft LP policy for land south of the railway line (GH/ED/39b) should be increased to 285-300 homes for the following reasons:

1. It would make efficient use of the site in accordance with national policy;
2. It would enable the site to support additional uses in the form of a community park and additional facilities such as a neighbourhood hub, as well as making a more meaningful contribution towards EDDC's housing land supply and meeting the housing needs of East Devon in a sustainable location;
3. The site is being promoted by a national housebuilder that is committed to delivering homes in the short-medium term – increasing the quantum of development on this allocation would ensure the draft LP delivers sufficient homes throughout the first part of the Plan period to meet its needs, noting the concerns raised regarding the delivery assumptions of the new settlement east of Exeter.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

5.3 To ensure the draft LP makes the most efficient use of land the draft allocation should be revised as follows: Land south of Northcote Hill – south of the railway (GH/ED/39b)

This site is allocated for 300 homes and will form a medium-scale residential extension on the eastern side of Honiton. Parts of the site are on more elevated ground and development will need to be sensitively planned to avoid adverse impacts on the nearby Blackdown Hills National Landscape area. Vehicular and pedestrian access improvements would be required, incorporating Northcote Hill into development. The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes.

Full name: Bethan Haigh

Organisation (where relevant): Boyer Planning

Other party name (if relevant): Taylor Wimpey UK Ltd. C/O Boyer

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

2.54 We welcome the designation of Honiton as a Tier 2 settlement and a sustainable location for future growth and development.

2.55 It is welcomed that land south of Northcote Hill (north and south of the railway line) is identified as two draft allocations within the draft LP. Taylor Wimpey supports the allocations and can confirm that both sites are suitable and available for immediate development. Both sites can contribute to the Council's immediate housing land supply.

2.56 We discuss each of these allocation in turn below.

2.57 Land south of Northcote Hill (north of the railway line) (site reference - GH/ED/39a) – An outline planning permission was resolved to be approved on the allocation site by East Devon Planning Committee for the development of up to 115 homes, public open space, sustainable drainage systems, landscaping, vehicular access via Tunnel Lane and associated highways improvements and infrastructure. The proposed development was for up to 115 homes.

2.58 Land south of Northcote Hill (south of the railway line) (100 homes) (site reference – GH/ED/39b) – We support the allocation of the site for residential

development; and consider that the site has capacity for up to 285-300 homes. Taylor Wimpey have recently undertaken a full suite of technical work (summarised in section 4 of these representations) that confirms the site can comfortably accommodate a significantly higher quantum of development (285- 300 homes) which could deliver an extensive community park and other public benefits including a neighbourhood hub. The enclosed Vision Document demonstrates how a landscape-led development, with homes provided alongside extensive areas of public open space, including a new community park, can deliver 285-300 homes.

2.59 Taylor Wimpey welcomes the site's identification as an allocation within the draft LP and considers that the allocation has the potential to make a more significant contribution towards the district's housing land supply as shown on the masterplan submitted with these representations, alongside the delivery of additional public benefits for existing and future residents.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

2.60 Taylor Wimpey request that the proposed allocation at Land south of Northcote Hill (south of the railway line) is uplifted to 285-300 homes to ensure the allocation makes the most efficient use of the site in accordance with National Policy and Guidance.

2.61 The draft LP policy should be amended accordingly, and draft revised policy wording has been provided at Section 5 of these representations.

Full name: Bethan Haigh

Organisation (where relevant): Boyer Planning

Other party name (if relevant): Taylor Wimpey UK Ltd. C/O Boyer

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: NPPF Transitional Arrangements

1.9 It is acknowledged that EDDC state that the Plan should be examined under the 2023 version of the NPPF, in line with the NPPF Transitional Arrangements set out at Paragraph 234a). This requires Regulation 19 Consultation to be reached before March 12th 2025, with a draft housing requirement that is at least 80% of the authority's Local Housing Need (LHN) figure.

Unpublished Evidence Base

1.10 It is evident, however, that this Regulation 19 Consultation does not include the full suite of evidence base, with the following documents noted as 'still to follow':

- CCF-001 - Water Cycle Study
- CCF-002 Strategic Flood Risk Assessment Surface Water Zone
- CCF-005 - Coastal Change Topic Paper
- HCO-004- Playing Pitch Strategy

- HCO-005 - Open Space Strategy
- HCO-006 - Sports Facilities Study
- HRD-004 - East Devon Heritage Strategy (2024-2042)

Two Phased Regulation 19 Consultation

1.11 Introductory text within this Draft LP also confirms that EDDC will be undertaking a second phase of Regulation 19 Consultation in Spring 2025, which will include additional detail regarding the new community (Strategic Policy WS01) and ‘other inter-related local plan matters’. The Draft LP proceeds to state, ‘once this evidence work is completed, and policy gaps in the plan can be filled in, and further policy refinement undertaken, the second phase of consultation will take place’.

1.12 It is evident that the new community is an integral part of the Draft LP strategy, and the delivery assumptions are fundamental to ensure EDDC achieve a housing requirement that is within 80% of their LHN figure. We raise significant concerns regarding EDDC’s approach in releasing piecemeal evidence that underpins this new community. It is evident that the approach to undertaking the Regulation 19 Local Plan in two parts is to allow EDDC to benefit from the NPPF Transitional Arrangements set out at Paragraph 234a). It is our view

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1.1 These representations have been prepared by Boyer on behalf of Taylor Wimpey UK Ltd, in response to the East Devon District Council (EDDC) Local Plan (Regulation 19) Consultation Document (hereafter referred to as the “Draft LP”), in promotion of land off Northcote Hill, to the east of Honiton (the site).

1.2 Representations have been previously submitted as part of EDDC’s Regulation 18 Consultation undertaken in 2022, and the second Regulation 18 Consultation in 2024.

1.3 The site is dissected by the East Devon Railway Line into two parts, identified as Phase I (north of the railway line) and Phase II (south of the railway line). It is welcomed that both parts have been identified as allocations within the Draft LP:

- The land north of the railway line, which is proposed by the Council as a residential Local Plan allocation of approximately 100 homes; and referred to as ‘land north of Northcote Hill, north of the railway line’ (GH/ED/39a); and
- The land south of the railway, which is proposed by the Council as a residential Local Plan allocation of approximately 100 homes; and referred to as ‘land south of Northcote Hill, south of the railway line’ (GH/ED/39b).

1.6 Together, the site can create a sustainable new neighbourhood to the east of Honiton, providing approximately 400 homes. This includes 115 homes on land north of the railway line; and 285-300 homes on land south of it. By doing so, the proposed allocation would significantly contribute towards the Council’s housing land supply, in accordance with the Council’s spatial strategy.

Phase II Supporting Documentation

1.7 These representations should be read alongside the following technical reports, which support an increased quantum of development proposed for Phase II:

- Vision Document (prepared by Stantec) (which includes a concept masterplan for land north and south of the railway line);
- Tree Survey Report (prepared by RPS);
- Drainage Technical Note (prepared by Phoenix Design);
- Ecology Deliverability Report (prepared by EAD Ecology);

- Heritage Technical Note (prepared by TCMS);
- Landscape Visual Assessment (prepared by Stantec); and
- Transport Appraisal (prepared by TPA);

Test of Soundness

1.8 These representations respond to the relevant draft Local Plan policies, with particular consideration given to the NPPF's tests of soundness:

- Positively Prepared;
- Justified;
- Effective; and
- Consistent with National Policy

that this does not represent effective plan-making or the Government's objective to significantly boost the supply of homes.

1.13 The Draft LP in its current consultation form therefore fails to meet Section 19a) of the Town and Country Planning (Local Planning) (England) Regulations 2012 as a copy of each of the submission documents has not been made available for consultation. It cannot therefore be considered that this Draft LP meets the definition of a comprehensive Regulation 19 Consultation.

1.14 Notwithstanding this, should this Draft LP be examined under the provisions of the previous NPPF (2023), these representations reference the soundness of this Draft LP against the requirements set out within the NPPF (2023).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

1.4 We support the principle of both allocations; however, we strongly consider that the number of homes proposed for the land south of the railway line (Phase II) must be increased to 285- 300 homes. This increase is essential for ensuring that the allocation (and future scheme) makes effective use of the land and optimises its potential to accommodate an appropriate amount and mix of development as well as making a meaningful contribution towards meeting housing needs in East Devon (in accordance with NPPF 2023; Paragraph 135e).

1.5 Increasing the number of homes on land south of the railway line will enable the proposed development to offer more public benefits, such as a neighbourhood hub and significant public open space, potentially including a community park.

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Strategic Policy SD03: Honiton and its development allocations proposes to allocate the above site – Land at Kings Road, Honiton (Honi_18) – for residential development of 136 new homes

SITE PROMOTION HISTORY

The site was first promoted in response to the Further Draft Local Plan Consultation in June 2024 and subsequently considered by Strategic Planning Committee (SPC) on 29 October 2024 which resolved to allocate the site for about 136 homes, subject to confirmation from National Highways that the principle of an access can be achieved.

Prior to the final SPC meeting on 11 December 2024 to agree all proposed allocations ahead of the Regulation 19 consultation, confirmation was provided that an acceptable site access could be achieved following further discussions with DCC Highways. National Highways and the Police. The site was subsequently recommended for allocation.

Our client, Obsidian Strategic Asset Management (Obsidian), fully supports the allocation.

SPATIAL STRATEGY

Honiton is appropriately classified as a Main Centre and has an extensive range of services and facilities such that it has strategic significance as a location for higher levels of future housing development of the scale proposed in the emerging Local Plan.

ACCESS

The appended Highways Technical Note summarises the key highway discussions that have taken place regarding the site access. This demonstrates that a safe and acceptable site access that meets relevant standards can be secured with connection to the existing footways along Kings Road to provide pedestrian access into the town. The note also confirms that the identified Kings Road crossing can be provided.

The site is sustainably located in relation to the town with Honiton train station, providing links to Exeter, Axminster, Salisbury and London, located just 800m west of the site, with Honiton hospital and surgery immediately to the south of the train station. There is also an existing bus stop adjacent to the site at Kings Road and as referenced in the policy bus stops on Waterleat Avenue providing regular local services. Services and facilities along the High Street are within 0.6 miles of the site and schools, recreational facilities and the leisure centre are all within 1 mile of the site.

ENVIRONMENTAL DESIGNATION

Although the land lies adjacent to a National Landscape, the site itself is not subject to any statutory environmental designation.

The site is located to the east of Honiton, outside but adjacent to the current settlement boundary. The land also lies adjacent to the East Devon and Blackdown Hills National Landscapes.

While indicative at this stage the Concept Design has been prepared to provide a sensitive development that allows for a new edge of settlement built form that is appropriate to its setting with significant areas of open space and landscaping around the periphery of the development to assist with the assimilation to the National

Landscape, whilst also providing sustainable urban drainage and biodiversity net gain benefits.

An illustrative concept plan demonstrating how the site could be developed is appended.

TREE COVER

There is very limited tree cover on the site, and it would be expected that the existing trees could be retained in situ as part of any development proposal. Within the site are two field boundary hedgerows and the concept plan demonstrates that these hedgerows could be retained and enhanced, forming a central part of a scheme by lining the proposed main street.

CONTAMINATION

The site has been in agricultural use and there are no known contaminants on the site at this stage of investigation.

INFRASTRUCTURE

Following a preliminary review of the site and its opportunities and constraints, it is expected that the site can comfortably accommodate the identified allocation numbers. As set out above a new highway access will be required off the A35 which is envisaged to be a right turn lane junction.

The site is suitable for development of market homes and affordable homes in line with emerging policy contained within the East Devon Draft Local Plan.

DELIVERABILITY

The site under the control of a willing landowner, as evidenced by the active site promotion undertaken to date, such that it can come forward for development early in the local plan period. Initial site assessment and feasibility work has not identified any constraints that would preclude development of the site.

While only preliminary design work has been carried out to date, this demonstrates that the site can readily accommodate the identified development quantum with a sensitive scheme appropriate to its edge of settlement setting. Significant areas of open space and landscaping can be accommodated around the periphery of the development area to assist with mitigating views from the adjacent National Landscape, whilst also providing sustainable urban drainage and biodiversity net gain benefits.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Site Allocation Taylor Wimpey strongly supports the allocation of Land at Ottery Moor Lane (Honi-10) for residential development. Policies There are a number of policies that impose technical and other standards that while entirely laudable but have not been properly evidenced or justified and as such are, in themselves, unsound. Cumulative these policies could hinder housing delivery by placing undue burdens on developers and landowners and affecting scheme viability.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: Whilst my client is supportive of SD03, HONI__06 as an allocation, it is respectfully requested that the following comments on the detail of this allocation policy are reflected in the plan as it progresses towards adoption. The main change that is requested is to include an allowance for the provision of a care home for the elderly in the allocation policy as an alternative to the 30 homes that are specified at present. Care homes provide a specialist type of residential accommodation and fall within Class C2 (residential institutions) as opposed to Class C3 (dwellinghouses). Pre-application discussions have been positive in confirming that the principle of a care home on this site is acceptable and the adopted local plan sets out support for Class C2 uses on sites allocated for residential development. The pre-app submission also indicates that a 68-bed care home can be comfortably accommodated on this site, representing the efficient use of previously developed land in a highly sustainable location. It is also noted that the provision of a 68-bed care home on this site could contribute the equivalent of 38 dwellings on this site applying the 1.8 ratio for communal accommodation specified in the Housing Delivery Test calculation whilst also contributing to the creation of sustainable and balanced communities in response to local need, a key aspiration of the emerging plan. As such, it is respectfully requested that the wording of the policy is amended to reflect this and to include an option for a care home. The suggested wording below would provide additional flexibility to allow for the delivery of a care home on this site in order to assist with the creation of sustainable and balanced communities. The suggested alternative wording for SD03, HONI__06 is as follows: 'Former Millwater School at Honiton Bottom Road (Honi_06) This land is allocated for a care home for the elderly (Use Class C2) or 30 homes and will form a smallscale development in the southern part of Honiton'

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To discuss in detail requested changes set out in letter

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: As we have set out above, we still consider the proposed housing provision at Honiton is too low and the opportunity to bring sites forward that maximise the opportunity to deliver housing earlier in the Plan period should be further considered. As the Regulation 18 and 19 site selection processes has identified there is significant capacity at Honiton for a range of smaller sites to come forward that can benefit from existing infrastructure and accessibility.

Land at Heathfield Manor (previously Honi 15)

Our clients' site at Heathfield Manor represents such an opportunity which regrettably was not given proper consideration during the site selection process, largely over confusion regarding the extent of the site being considered and errors in the paperwork. We firmly believe that in those circumstances the site was not given proper consideration.

The facts of the case are that part of the site was identified as a draft allocation (reference Honi_01) in the Regulation 18 Plan. This was on the basis that HELAA identified that the site did not present any inherent issue from a highway, flood risk, biodiversity, heritage and accessibility perspective. The site's location within the National Landscape was acknowledged and identified as a sensitivity, although the draft allocation confirms that this did not preclude a sensitively designed scheme. The

Panel considered the site to be achievable for housing with an identified yield of around 79 dwellings. The site was also considered available and deliverable within the first 5 years of the Local Plan period.

The Honi_01 site was therefore fully tested, assessed and consulted upon as part of its identification as proposed allocation at the Regulation Stage and recognised as beneficial to the strategy for Honiton. This should have been an important starting point for the site when the Regulation 19 sites selection process commenced. However as outlined below, this actually accounted for nothing with ultimately the site being removed for no reason and with no justification. Regardless ultimately of the consideration of the wider site (Honi_15), which as we set out below was also significantly flawed, Honi_01 should have been considered on its own merits and in the context of it having been previously identified as a proposed allocation and the support the evidence base provided for it at that stage.

We made further representations regarding the site as part of the further Regulation 18 consultation held between May and June 2024 which set out the benefits of a wider scheme extending across 3 field parcels instead of the previously proposed one. This wider site had been considered under the 2022 call for sites exercise and the HELAA Panel (under reference Honi_15) subsequently concluded the site could be achievable for housing with a potential yield of 133 dwellings, with no inherent issues identified from a highways, flood risk, biodiversity, heritage and accessibility perspective.

In our representations in June 2024, we set out how the extended site will support greater opportunity for a landscaped driven development that can integrate and assimilate with the existing landscaped character to form a high-quality development. This would be achieved through a more logical extension to the southwestern part of Honiton, effectively filling in the gap between Hayne Lane and the A375 and rounding off the urban area. At the same time providing a better assimilation of development with the National Landscape through a wide network of green space and green corridors, public open space, extensive landscape features and blue infrastructure. It would provide a more effective approach toward managing landscape harm and provide the opportunity for significant enhancement. This is a clear benefit of the wider scheme.

To support the wider site's inclusion further a Framework Masterplan was prepared and submitted to the Council which identified clear opportunities for landscape and habitat enhancement that would provide substantial benefit in enhancing the transition from

the National Landscape and the urban form of Honiton and significantly improve the current relationship and landscape setting. I attach a copy of the site location plan at Appendix 1 and the Framework Masterplan at Appendix 2.

It seems quite clear that sensitive development of the wider site would provide and fund important mitigation and enhancement, whilst delivering the wider benefits of growth for the local community. It would deliver more housing in a sustainable location to support the role of Honiton and is a site that is relatively unconstrained nor overburdened by infrastructure requirements. The site can therefore come forward quickly to support delivery in the earlier stages of the Plan period and provide much needed resilience to the Plan's strategy.

Despite these clear benefits which were supported by the officers who originally recommended allocation of Honi_15 within the Regulation 19 Plan, the site selection report recommending this was withdrawn a few days prior to the Strategic Planning Committee's (SPC) consideration and replaced with a report that only identified the partial site of Honi_01 although it was still referred to as Honi_15 and included a number of inconsistencies. I have attached extracts from both the report that was withdrawn, and the subsequent amended report relied upon by Members at the SPC for reference at Appendices 3 and 4 respectively. On raising this with the policy team (importantly officers did not directly inform of us of this change) we were advised that the report had been amended because the wider site had not been subject to previous consultation and instead "the inclusion of these additional parcels requires further consideration and will be reported on separately to a future meeting as appropriate."

However, this further consideration never took place, instead the SPC debate including public comment was simply confused as to what was being considered, Honi_01 or Honi_15 and suggestions that we had acted unreasonably in seeking to extend the site through the consultation, when it was clearly an error by the Council. The upshot was that not only was Honi_15 not given any proper consideration nor a further discussion arranged to do so as had been advised, but Honi_01 was withdrawn from the Plan, despite its earlier allocation. The only reason put forward was the site's location within the National Landscape despite this clearly being the same situation as before and other sites subsequently being included in the Plan also falling within the National Landscape.

The boundary of the National Landscape does not follow the settlement boundary and there is already significant parts of Honiton that falls within the boundary of the National Landscape designation. It is clearly not a principle reason for excluding sites within this context and as set out above development does provide opportunities to improve the relationship between existing urban areas and National Landscape coverage. Not only are other sites at Honiton allocated within the extent of the National Landscape boundaries, but sites across the District have also been allocated, including Exmouth and Sidmouth, but also including lower order settlements such as Newton Poppleford and Sidbury etc. Clearly if this is not a principle reason to exclude sites in those lower tier places then it would be unreasonable to rule sites out at Honiton given the town's greater role for accommodating growth.

The removal of the Heathfield Manor site from the Plan is a significant lost opportunity and there were and are no good reasons for it not to have been allocated, particularly given it provides a more logical southern extension of Honiton than other more constrained sites that have been included in the Plan to the east and west which are far less well related to the existing urban area to the site at Heathfield Manor.

We consider the above matters have significantly prejudiced the consideration of the site both partially (Honi_01) and the wider area (Honi_15). At the very least given the support through the process for Honi_01 this should be added back into the Plan. However given the inevitable challenges the District will face in delivering its housing requirements and the clear benefits of the wider scheme there are clear grounds for allocating Honi_15.

In that context we make the following comments on the sites allocated in Policy SD03:

Land west of Hayne Lane (Gitti_03,04 and 05)

Our clients are concerned that the allocation of this site was based primarily on quantum and capacity rather than a consideration of relevant matters in respect of deliverability. It also a site that is distant from the core facilities of the town and accessibility during the site selection process was described as challenging. Part of the site also falls within the National Landscape, demonstrating that this does not appear to be the principle for ruling out sites as suggested in the context of Heathfield Manor.

The wording of the allocation makes it clear that there will be access issues to be addressed as well as landscape and heritage sensitivity alongside the need for the site to come forward in a masterplan dealing with the site comprehensively and the provision of significant infrastructure.

All this points to a site that will take some time to come forward. Whilst not suggesting the site should not be allocated, it is unlikely to make a significant contribution to housing delivery in the early parts of the Plan period. On that basis it is clearly a more sustainable strategy to deliver a range of sites which provide good access and connectivity options to existing services and facilities whilst offering opportunities for enhancement of existing infrastructure to support the growth of the town. This will also be more beneficial in ensuring the Plan is resilient in meeting housing needs at an early stage of the Plan period.

Land adjacent to St Michaels Church and south east of Cuckoo Down Lane (Honi_07 and Honi_12)

As with Heathfield Manor, this site lies within the National Landscape but is closer to heritage assets and is also a less logical extension to the urban area in respect of form. The site's allocation is inconsistent with the decision to not allocate Heathfield Manor. Honi_12 was not recommended to be allocated by officers.

Land south of Northcote Hill (GH/ED/39a and b)

These allocations represent a significant extension eastward of the town with both access and accessibility challenges with access to the site constrained by narrow roads under railway bridges. Significant improvements will be required. Again given these sensitivities the site is unlikely to make a significant contribution to housing delivery in the early parts of the Plan period.

Based on the inclusion of the above sites, there are no good reasons for the Plan not to allocate the Heathfield Manor site. It is a site that is relatively unconstrained nor overburdened by infrastructure requirements. The site can come forward quickly to support delivery in the earlier stages of the Plan period and provide much needed resilience to the Plan's strategy. Without having a range of sites within Honiton the Plan

will over rely on more constrained sites which are more difficult to bring forward, particularly given the significant uncertainties around deliverability.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

We believe further growth at Honiton should be provided for through the allocation of further sites. This will underpin the Plan's strategy to ensure sufficient housing growth in the town throughout the Plan period, including at an early stage. The site at Heathfield Manor is unconstrained and has previously been identified as a preferred choice site based on its suitability. There are no impediments to its delivery and as such it can make an important contribution to the Plan.

Policy SD03 should therefore be modified to include land at Heathfield Manor (Honi_15) as an allocation.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To elaborate on these and previous representations made on the Plan

Full name: Stuart Houlet

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

(PCL Planning on behalf of Waddeton Park Limited (Honiton)): As we have set out [elsewhere], we still consider the proposed housing provision at Honiton is too low and the opportunity to bring sites forward that maximise the opportunity to deliver housing earlier in the Plan period should be further considered. As the Regulation 18 and 19 site selection processes has identified there is significant capacity at Honiton for a range of smaller sites to come forward that can benefit from existing infrastructure and accessibility.

Land at Heathfield Manor (previously Honi 15): Our clients' site at Heathfield Manor represents such an opportunity which regrettably was not given proper consideration during the site selection process, largely over confusion regarding the extent of the site being considered and errors in the paperwork. We firmly believe that in those circumstances the site was not given proper consideration.

The facts of the case are that part of the site was identified as a draft allocation (reference Honi_01) in the Regulation 18 Plan. This was on the basis that HELAA identified that the site did not present any inherent issue from a highway, flood risk, biodiversity, heritage and accessibility perspective. The site's location within the National Landscape was acknowledged and identified as a sensitivity, although the draft allocation confirms that this did not preclude a sensitively designed scheme. The Panel considered the site to be achievable for housing with an identified yield of around

79 dwellings. The site was also considered available and deliverable within the first 5 years of the Local Plan period.

The Honi_01 site was therefore fully tested, assessed and consulted upon as part of its identification as proposed allocation at the Regulation Stage and recognised as beneficial to the strategy for Honiton. This should have been an important starting point for the site when the Regulation 19 sites selection process commenced. However as outlined below, this actually accounted for nothing with ultimately the site being removed for no reason and with no justification. Regardless ultimately of the consideration of the wider site (Honi_15), which as we set out below was also significantly flawed, Honi_01 should have been considered on its own merits and in the context of it having been previously identified as a proposed allocation and the support the evidence base provided for it at that stage.

We made further representations regarding the site as part of the further Regulation 18 consultation held between May and June 2024 which set out the benefits of a wider scheme extending across 3 field parcels instead of the previously proposed one. This wider site had been considered under the 2022 call for sites exercise and the HELAA Panel (under reference Honi_15) subsequently concluded the site could be achievable for housing with a potential yield of 133 dwellings, with no inherent issues identified from a highways, flood risk, biodiversity, heritage and accessibility perspective.

In our representations in June 2024, we set out how the extended site will support greater opportunity for a landscaped driven development that can integrate and assimilate with the existing landscaped character to form a high-quality development. This would be achieved through a more logical extension to the southwestern part of Honiton, effectively filling in the gap between Hayne Lane and the A375 and rounding off the urban area. At the same time providing a better assimilation of development with the National Landscape through a wide network of green space and green corridors, public open space, extensive landscape features and blue infrastructure. It would provide a more effective approach toward managing landscape harm and provide the opportunity for significant enhancement. This is a clear benefit of the wider scheme.

To support the wider site's inclusion further a Framework Masterplan was prepared and submitted to the Council which identified clear opportunities for landscape and habitat enhancement that would provide substantial benefit in enhancing the transition from the National Landscape and the urban from of Honiton and significantly improve the

current relationship and landscape setting. I attach a copy of the site location plan at Appendix 1 and the Framework Masterplan at Appendix 2.

It seems quite clear that sensitive development of the wider site would provide and fund important mitigation and enhancement, whilst delivering the wider benefits of growth for the local community. It would deliver more housing in a sustainable location to support the role of Honiton and is a site that is relatively unconstrained nor overburdened by infrastructure requirements. The site can therefore come forward quickly to support delivery in the earlier stages of the Plan period and provide much needed resilience to the Plan's strategy.

Despite these clear benefits which were supported by the officers who originally recommended allocation of Honi_15 within the Regulation 19 Plan, the site selection report recommending this was withdrawn a few days prior to the Strategic Planning Committee's (SPC) consideration and replaced with a report that only identified the partial site of Honi_01 although it was still referred to as Honi_15 and included a number of inconsistencies. I have attached extracts from both the report that was withdrawn, and the subsequent amended report relied upon by Members at the SPC for reference at Appendices 3 and 4 respectively. On raising this with the policy team (importantly officers did not directly inform of us of this change) we were advised that the report had been amended because the wider site had not been subject to previous consultation and instead "the inclusion of these additional parcels requires further consideration and will be reported on separately to a future meeting as appropriate." However, this further consideration never took place, instead the SPC debate including public comment was simply confused as to what was being considered, Honi_01 or Honi_15 and suggestions that we had acted unreasonably in seeking to extend the site through the consultation, when it was clearly an error by the Council. The upshot was that not only was Honi_15 not given any proper consideration nor a further discussion arranged to do so as had been advised, but Honi_01 was withdrawn from the Plan, despite its earlier allocation. The only reason put forward was the site's location within the National Landscape despite this clearly being the same situation as before and other sites subsequently being included in the Plan also falling within the National Landscape.

The boundary of the National Landscape does not follow the settlement boundary and there is already significant parts of Honiton that falls within the boundary of the National Landscape designation. It is clearly not a principle reason for excluding sites within this context and as set out above development does provide opportunities to

improve the relationship between existing urban areas and National Landscape coverage. Not only are other sites at Honiton allocated within the extent of the National Landscape boundaries, but sites across the District have also been allocated, including Exmouth and Sidmouth, but also including lower order settlements such as Newton Poppleford and Sidbury etc. Clearly if this is not a principle reason to exclude sites in those lower tier places then it would be unreasonable to rule sites out at Honiton given the town's greater role for accommodating growth.

The removal of the Heathfield Manor site from the Plan is a significant lost opportunity and there were and are no good reasons for it not to have been allocated, particularly given it provides a more logical southern extension of Honiton than other more constrained sites that have been included in the Plan to the east and west which are far less well related to the existing urban area to the site at Heathfield Manor.

We consider the above matters have significantly prejudiced the consideration of the site both partially (Honi_01) and the wider area (Honi_15). At the very least given the support through the process for Honi_01 this should be added back into the Plan. However given the inevitable challenges the District will face in delivering its housing requirements and the clear benefits of the wider scheme there are clear grounds for allocating Honi_15.

In that context we make the following comments on the sites allocated in Policy SD03:

Land west of Hayne Lane (Gitti_03,04 and 05) Our clients are concerned that the allocation of this site was based primarily on quantum and capacity rather than a consideration of relevant matters in respect of deliverability. It also a site that is distant from the core facilities of the town and accessibility during the site selection process was described as challenging. Part of the site also falls within the National Landscape, demonstrating that this does not appear to be a principle for ruling out sites as suggested in the context of Heathfield Manor.

The wording of the allocation makes it clear that there will be access issues to be addressed as well as landscape and heritage sensitivity alongside the need for the site to come forward in a masterplan dealing with the site comprehensively and the provision of significant infrastructure.

All this points to a site that will take some time to come forward. Whilst not suggesting the site should not be allocated, it is unlikely to make a significant contribution to housing delivery in the early parts of the Plan period. On that basis it is clearly a more sustainable strategy to deliver a range of sites which provide good access and connectivity options to existing services and facilities whilst offering opportunities for enhancement of existing infrastructure to support the growth of the town. This will also be more beneficial in ensuring the Plan is resilient in meeting housing needs at an early stage of the Plan period.

Land adjacent to St Michaels Church and south east of Cuckoo Down Lane (Honi_07 and Honi_12) As with Heathfield Manor, this site lies within the National Landscape but is closer to heritage assets and is also a less logical extension to the urban area in respect of form. The site's allocation is inconsistent with the decision to not allocate Heathfield Manor. Honi_12 was not recommended to be allocated by officers.

Land south of Northcote Hill (GH/ED/39a and b) These allocations represent a significant extension eastward of the town with both access and accessibility challenges with access to the site constrained by narrow roads under railway bridges. Significant improvements will be required. Again given these sensitivities the site is unlikely to make a significant contribution to housing delivery in the early parts of the Plan period.

Based on the inclusion of the above sites, there are no good reasons for the Plan not to allocate the Heathfield Manor site. Chapter 5 – Development in the Towns and Villages

Policy SD03: Honiton and its development allocations

As we have set out above, we still consider the proposed housing provision at Honiton is too low and the opportunity to bring sites forward that maximise the opportunity to deliver housing earlier in the Plan period should be further considered. As the Regulation 18 and 19 site selection processes has identified there is significant capacity at Honiton for a range of smaller sites to come forward that can benefit from existing infrastructure and accessibility.

Land at Heathfield Manor (previously Honi 15)

Our clients' site at Heathfield Manor represents such an opportunity which regrettably was not given proper consideration during the site selection process, largely over confusion regarding the extent of the site being considered and errors in the paperwork. We firmly believe that in those circumstances the site was not given proper consideration.

The facts of the case are that part of the site was identified as a draft allocation (reference Honi_01) in the Regulation 18 Plan. This was on the basis that HELAA identified that the site did not present any inherent issue from a highway, flood risk, biodiversity, heritage and accessibility perspective. The site's location within the National Landscape was acknowledged and identified as a sensitivity, although the draft allocation confirms that this did not preclude a sensitively designed scheme. The Panel considered the site to be achievable for housing with an identified yield of around 79 dwellings. The site was also considered available and deliverable within the first 5 years of the Local Plan period.

The Honi_01 site was therefore fully tested, assessed and consulted upon as part of its identification as proposed allocation at the Regulation Stage and recognised as beneficial to the strategy for Honiton. This should have been an important starting point for the site when the Regulation 19 sites selection process commenced. However as outlined below, this actually accounted for nothing with ultimately the site being removed for no reason and with no justification. Regardless ultimately of the consideration of the wider site (Honi_15), which as we set out below was also significantly flawed, Honi_01 should have been considered on its own merits and in the context of it having been previously identified as a proposed allocation and the support the evidence base provided for it at that stage.

We made further representations regarding the site as part of the further Regulation 18 consultation held between May and June 2024 which set out the benefits of a wider scheme extending across 3 field parcels instead of the previously proposed one. This wider site had been considered under the 2022 call for sites exercise and the HELAA Panel (under reference Honi_15) subsequently concluded the site could be achievable for housing with a potential yield of 133 dwellings, with no inherent issues identified from a highways, flood risk, biodiversity, heritage and accessibility perspective.

In our representations in June 2024, we set out how the extended site will support greater opportunity for a landscaped driven development that can integrate and assimilate with the existing landscaped character to form a high-quality development. This would be achieved through a more logical extension to the southwestern part of Honiton, effectively filling in the gap between Hayne Lane and the A375 and rounding off the urban area. At the same time providing a better assimilation of development with the National Landscape through a wide network of green space and green corridors, public open space, extensive landscape features and blue infrastructure. It would

provide a more effective approach toward managing landscape harm and provide the opportunity for significant enhancement. This is a clear benefit of the wider scheme.

To support the wider site's inclusion further a Framework Masterplan was prepared and submitted to the Council which identified clear opportunities for landscape and habitat enhancement that would provide substantial benefit in enhancing the transition from the National Landscape and the urban form of Honiton and significantly improve the current relationship and landscape setting. I attach a copy of the site location plan at Appendix 1 and the Framework Masterplan at Appendix 2.

It seems quite clear that sensitive development of the wider site would provide and fund important mitigation and enhancement, whilst delivering the wider benefits of growth for the local community. It would deliver more housing in a sustainable location to support the role of Honiton and is a site that is relatively unconstrained nor overburdened by infrastructure requirements. The site can therefore come forward quickly to support delivery in the earlier stages of the Plan period and provide much needed resilience to the Plan's strategy.

Despite these clear benefits which were supported by the officers who originally recommended allocation of Honi_15 within the Regulation 19 Plan, the site selection report recommending this was withdrawn a few days prior to the Strategic Planning Committee's (SPC) consideration and replaced with a report that only identified the partial site of Honi_01 although it was still referred to as Honi_15 and included a number of inconsistencies. I have attached extracts from both the report that was withdrawn, and the subsequent amended report relied upon by Members at the SPC for reference at Appendices 3 and 4 respectively. On raising this with the policy team (importantly officers did not directly inform of us of this change) we were advised that the report had been amended because the wider site had not been subject to previous consultation and instead "the inclusion of these additional parcels requires further consideration and will be reported on separately to a future meeting as appropriate."

However, this further consideration never took place, instead the SPC debate including public comment was simply confused as to what was being considered, Honi_01 or Honi_15 and suggestions that we had acted unreasonably in seeking to extend the site through the consultation, when it was clearly an error by the Council. The upshot was that not only was Honi_15 not given any proper consideration nor a further discussion arranged to do so as had been advised, but Honi_01 was withdrawn from the Plan,

despite its earlier allocation. The only reason put forward was the site's location within the National Landscape despite this clearly being the same situation as before and other sites subsequently being included in the Plan also falling within the National Landscape.

The boundary of the National Landscape does not follow the settlement boundary and there is already significant parts of Honiton that falls within the boundary of the National Landscape designation. It is clearly not a principle reason for excluding sites within this context and as set out above development does provide opportunities to improve the relationship between existing urban areas and National Landscape coverage. Not only are other sites at Honiton allocated within the extent of the National Landscape boundaries, but sites across the District have also been allocated, including Exmouth and Sidmouth, but also including lower order settlements such as Newton Poppleford and Sidbury etc. Clearly if this is not a principle reason to exclude sites in those lower tier places then it would be unreasonable to rule sites out at Honiton given the town's greater role for accommodating growth.

The removal of the Heathfield Manor site from the Plan is a significant lost opportunity and there were and are no good reasons for it not to have been allocated, particularly given it provides a more logical southern extension of Honiton than other more constrained sites that have been included in the Plan to the east and west which are far less well related to the existing urban area to the site at Heathfield Manor.

We consider the above matters have significantly prejudiced the consideration of the site both partially (Honi_01) and the wider area (Honi_15). At the very least given the support through the process for Honi_01 this should be added back into the Plan. However given the inevitable challenges the District will face in delivering its housing requirements and the clear benefits of the wider scheme there are clear grounds for allocating Honi_15.

In that context we make the following comments on the sites allocated in Policy SD03:

Land west of Hayne Lane (Gitti_03,04 and 05)

Our clients are concerned that the allocation of this site was based primarily on quantum and capacity rather than a consideration of relevant matters in respect of deliverability. It also a site that is distant from the core facilities of the town and accessibility during the site selection process was described as challenging. Part of the site also falls within the National Landscape, demonstrating that this does not appear to be the principle for ruling out sites as suggested in the context of Heathfield Manor.

The wording of the allocation makes it clear that there will be access issues to be addressed as well as landscape and heritage sensitivity alongside the need for the site to come forward in a masterplan dealing with the site comprehensively and the provision of significant infrastructure.

All this points to a site that will take some time to come forward. Whilst not suggesting the site should not be allocated, it is unlikely to make a significant contribution to housing delivery in the early parts of the Plan period. On that basis it is clearly a more sustainable strategy to deliver a range of sites which provide good access and connectivity options to existing services and facilities whilst offering opportunities for enhancement of existing infrastructure to support the growth of the town. This will also be more beneficial in ensuring the Plan is resilient in meeting housing needs at an early stage of the Plan period.

Land adjacent to St Michaels Church and south east of Cuckoo Down Lane (Honi_07 and Honi_12)

As with Heathfield Manor, this site lies within the National Landscape but is closer to heritage assets and is also a less logical extension to the urban area in respect of form. The site's allocation is inconsistent with the decision to not allocate Heathfield Manor. Honi_12 was not recommended to be allocated by officers.

Land south of Northcote Hill (GH/ED/39a and b)

These allocations represent a significant extension eastward of the town with both access and accessibility challenges with access to the site constrained by narrow roads under railway bridges. Significant improvements will be required. Again given these

sensitivities the site is unlikely to make a significant contribution to housing delivery in the early parts of the Plan period.

Based on the inclusion of the above sites, there are no good reasons for the Plan not to allocate the Heathfield Manor site. It is a site that is relatively unconstrained nor overburdened by infrastructure requirements. The site can come forward quickly to support delivery in the earlier stages of the Plan period and provide much needed resilience to the Plan's strategy. Without having a range of sites within Honiton the Plan will over rely on more constrained sites which are more difficult to bring forward, particularly given the significant uncertainties around deliverability.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Modification required

We believe further growth at Honiton should be provided for through the allocation of further sites. This will underpin the Plan's strategy to ensure sufficient housing growth in the town throughout the Plan period, including at an early stage. The site at Heathfield Manor is unconstrained and has previously been identified as a preferred choice site based on its suitability. There are no impediments to its delivery and as such it can make an important contribution to the Plan.

Policy SD03 should therefore be modified to include land at Heathfield Manor (Honi_15) as an allocation.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To elaborate on the concerns raised within in these and earlier representations on the Plan

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Strategic policy SD03 details the allocation made for Honiton and these allocations provide for a total of 839 dwellings at the town (including completions). There is no reference to sports pitches being provided as part of any of the allocations. The current Playing Pitch Strategy for Honiton (February 2017) set out plan to deliver additional playing pitches for the town. This included the provision of five rugby pitches at the former showground site plus football or cricket pitch provision at St Rita's. It is acknowledged that the Playing Pitch Strategy for the District is being reviewed at present and that is to be issued Spring/ Summer this year, however, it is notable that none of the additional pitch provision identified in the 2017 pitch strategy for Honiton has been delivered. In this context, and given the earlier comments about bolstering the allocated land for housing delivery, we consider that the land at the former showground site provides a good opportunity to deliver a mixed use residential and sports development on the edge of Honiton. This would assist in addressing both the need for more sports pitches and housing. If the former showground site was included in this then the total supply could be increased to approximately 988, as well as securing the delivery of 4 junior rugby sports pitches. This would be a positive addition to the development strategy for the town. The site is located in an accessible location approximately 900 metres from the town centre. This is a reasonable walking and cycling distance. Also, the site has an existing access on Langford Road which can be improved as necessary alongside other highway improvements, such as pedestrian crossing, extended footway and cycle route facilities, to provide improved connections. The former showground site is available, suitable and achievable (as the findings of the HELAA [November 2022] found with regard to the part submitted for assessment - Honi_9) and could be developed with limited adverse impacts, it appears that there is reasonable alternative to the current strategy that would help further to ensure that the necessary minimum

levels of housing are achieved and exceeded, and that some playing pitch provision for the town of Honiton is delivered.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I would like to add the following comments to my previous objection on this matter.

The amount of employment land proposed (14.6ha) in the plan is in excess of that realistically needed to meet the requirement to support the suggested growth in dwelling numbers.

In relation to employment land it is inevitable that the continuing development of high quality employment opportunities at Cranbrook, the second new settlement, Skypark, Exeter Science Park, the Enterprise Zone and other employment developments in proximity to the M5 will detract from the attractiveness of other employment sites in East Devon along the A30 corridor and in particular the 14.6ha of employment land at Honiton.

Allocation Reference Gitti_03 and Gitti_04

I OBJECT to these allocations. The reasons are summarised as follows:

- This has been an allocated employment site for more than 15 years and remains undeveloped. There are clearly viability issues which so far have proved to be unsurmountable. If the site cannot come forward within the plan period for development, then it should not be allocated.

- The employment allocation extends west of Hayne Lane for 800 metres and will, if developed, result in a highly visible and unacceptable ribbon development.
- The development will jut prominently into open countryside leading to a perceived threat of coalescence between Honiton and Gittisham village.
- The development will be detrimental to the setting of two designated National Landscapes (NL) formerly The Blackdown Hills AONB and the East Devon AONB. The developments would be particularly visible from high ground to the north of the allocation.
- Although the Otter valley west of Honiton including the allocation site is not in itself within an NL, it is of great landscape value and contributes to Honiton's attractive setting.
- This employment allocation of 14.6ha is significantly more than what is necessary to serve the needs of Honiton and the surrounding area. There is no statistical evidence of a need for 14.6ha.
- Any viability concerns must not be an over-riding justification for bad planning.
- The “local need” for employment and commercial land can be found with existing vacant land and regeneration opportunities at Heathpark.

- The development would result in the unnecessary loss of high quality, productive agricultural land.
- The local highways infrastructure is inadequate to serve 14.6ha of employment land and due to the residential development at Hayne Farm will add additional danger to both pedestrian and residential traffic on Devonshire Road.
- The services (gas, water, electricity, foul and surface water sewers, sewage treatment etc) are inadequate to serve this proposed development and will require considerable investment.
- The biodiversity qualities of the existing landscape will be seriously compromised.
- Localised flooding occurs regularly and disrupts traffic on the A30. A 14.6ha employment development will increase the regularity and intensification of flooding on the A30 and on the local highways network.

HONITON GROWTH – RESIDENTIAL

I OBJECT to the proposed allocation Gitti_05.

The reasons for this objection are summarised as follows:

- The allocation clearly does not meet sustainability criteria.
- The detrimental impact development will have on the setting of Gittisham Village and its conservation area.
- Development will have a detrimental visual impact on the designated National Landscape, formerly the East Devon AONB and on the setting of the National Landscape.
- Vehicular access to this allocation is only available via Devonshire Road and it is not appropriate to increase further residentially generated traffic and pedestrian movements through the Heathpark industrial estate. The combination of additional employment and residential growth to the west of Honiton being accessed via Devonshire Road will be detrimental to public safety.
- Additional traffic accessing Hayne Lane or the existing Hayne Farm development will also be detrimental to vehicular and pedestrian safety.
- Further development will increase pressure on already overstretched health, social and education services. The local primary school is at capacity and is predicted to remain so.
- Highways, sewers, sewage treatment and surface water infrastructure are already at capacity.

- Development of Gitti_5 would fail to meet your sustainability criteria. The town centre services together with the railway station, the hospital and doctors' surgery are located for both vehicle and pedestrian travel at distances between 3300m at best and 3900m at worst. Your sustainability criteria recommend no greater distance than 1600m. The distance to the Community College is even greater and the nearest primary school between 2800m and 3400m. The further west you move into the site the greater the distance becomes. The nearest supermarket (Lidl) will be between 1600 m and 2200m. The inevitable consequence of this will be multiple car movements contrary to your sustainability objectives and policies. This is not a sustainable site for residential development and is contrary to your sustainability objectives.
- Access to Public transport is poor.
- The development would result in the unnecessary loss of high quality, productive agricultural land, which has already been ravaged by the development of the Hayne Lane estate.
- The services (gas, water, electricity, foul and surface water sewers, sewage treatment etc) are inadequate to serve this proposed development and will require considerable investment.
- The biodiversity qualities of the existing landscape will be seriously compromised.

- Localised flooding occurs regularly and disrupts traffic on the A30. Any further significant residential development will increase the regularity and intensification of flooding on the A30 and on the local highways network.
- There is a lack of provision of any accessible community facilities to serve this isolated community, a need which cannot be overcome, either in the short, medium or even long term.
- This development amounts to the rape of our countryside for purely monetary gain and has nothing to do with satisfying the housing needs of the community of Honiton.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Strategic policy SD03 details the allocation made for Honiton and these allocations provide for a total of 839 dwellings at the town (including completions). There is no reference to sports pitches being provided as part of any of the allocations.

The current Playing Pitch Strategy for Honiton (February 2017) set out plan to deliver additional playing pitches for the town. This included the provision of five rugby pitches at the former showground site plus football or cricket pitch provision at St Rita's. It is acknowledged that the Playing Pitch Strategy for the District is being reviewed at present and that is to be issued Spring/ Summer this year, however, it is notable that none of the additional pitch provision identified in the 2017 pitch strategy for Honiton has been delivered.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

In this context, and given the earlier comments about bolstering the allocated land for housing delivery, we consider that the land at the former showground site provides a good opportunity to deliver a mixed use residential and sports development on the edge of Honiton. This would assist in addressing both the need for more sports pitches and housing. If the former showground site was included in this then the total supply could be increased to approximately 988, as well as securing the delivery of 4 junior rugby sports pitches. This would be a positive addition to the development strategy for the town.

The site is located in an accessible location approximately 900 metres from the town centre. This is a reasonable walking and cycling distance. Also, the site has an existing access on Langford Road which can be improved as necessary alongside other highway improvements, such as pedestrian crossing, extended footway and cycle route facilities, to provide improved connections.

The former showground site is available, suitable and achievable (as the findings of the HELAA [November 2022] found with regard to the part submitted for assessment - Honi_9) and could be developed with limited adverse impacts, it appears that there is reasonable alternative to the current

strategy that would help further to ensure that the necessary minimum levels of housing are achieved and exceeded, and that some playing pitch provision for the town of Honiton is delivered.

In summary, we support the emerging Spatial Strategy in terms of the direction of growth to the Main Centres, however, we suggest that the Council could pursue a better alternative strategy with regard to the housing target and meeting the full housing need based on the revised NPPF, and bolstering the identified supply of land for housing to ensure that the minimum target is achieved and exceeded.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am very concerned to see that there are housing sites being allocated to Honiton which were not in the original consultation, particularly the site near Church Hill which I believe was originally rejected as a site for housing. This area is used frequently by local residents for walking as there is a public footpath which runs through the fields and it would be awful if these fields were lost.

The fact that it is stated in the Local Plan that one of the key points is to protect the natural environment is clearly a ludicrous statement when so much of the beautiful countryside is being lost to development, housing development is, I believe one of the worst things to affect the environment, your certainly not saving it. I would also have thought that many tourists come to Devon particularly to visit the countryside and not endless housing estates, the houses on which are crammed in for maximum profit by the developers and do not provide adequate space for gardens and parking for new residents.

The best thing that you could for East Devon would be to not build anymore housing at all, there seems to be quite a lot of derelict/empty properties about which could be restored.

All of this housing impacts on the local infrastructure, you can hardly get to see a doctor or national health dentist as it is, will you be expanding local schools, opening the hospital beds that were shut some years ago at Honiton Hospital or do we all still have to rely on the RD & E at Exeter. I know there has been talk that a new sewage works will be needed to cope with the extra waste, what about all the extra water needed to supply all these houses. How many more cars and people do you want to pack into East Devon, I will be surprised if there is a single blade of grass left soon. From one very displeased local pensioner who has lived her nearly all of my life.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Honi_18 was a very late addition, should never have been allowed to go forward as it wasn't consulted on at reg 18 stage. Honiton Town Council or general public were not informed of this plan. There is a conflict of interest with agent Carter Jonas and Highways England and SLR and Highways England Carter Jonas are land agents for Highways England. SLR are road design planners for Highways England. My family have farmed Lambpark field for over 35 years. Access will be very dangerous if we have to cross a 3 lane road with tractor and the trailer is 24 foot long. Gateway is in the northeast corner of field. Please see map. Footpaths Hale Farm 12.13.14.15. Footpath 12 runs in next field to Honi_18. Footpath 15 runs from Hale farm up High to Springfield Road at the moment people have restricted views of open countryside. When we had lockdown covid 19 we counted 45 walkers in a four and a half hour period. RSPB bird survey a few years ago found many species of high conservation concern. Hale Farm has right of way through Hale Close farm to Pine Park Road on existing driveway. We wish to maintain this right. No new road crossing driveway. Hedgerows tree and bushes were cleared. Tree and bushes were thinned out of my brook about five years ago, without my permission. Town lakes field has a leat running through part of field. This is part of Honiton's old water supply. It used to run in an iron gutter down the high street known as the Honiton crystal. I do not see how houses on Honi_18 as the land is full of springs also has a high water table. I know properties still have right for this water. Put settlement boundaries to behind houses in Kings Road. Honi_14 Honi_39B Honi_14 previously had a planning application 93/P1265 rejected. Out objection is for Honi_14 and Honi_39B to be taken together. Rail bridge is very low and narrow, every time a vehicle hits a bridge it causes enormous disruption to train services. Trains are not allowed to pass over the affected structure until properly examined by a competent person, a process that may take many hours. Nothrcote hill road is only a small country road, not suitable to take anymore traffic. Many people use footpath 13, which goes through Honi_39B. This land has great landscape value. Please put settlement boundaries back to railway line as they were before?

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Although I do not oppose new residential developments in Honiton, and recognise their need, I have severe concerns regarding the proposed development on King's Road. I own a property further down the road, this does not back on to the site, however my concern is the impact this will have on traffic on the road. As a main trunk road it can be difficult, particularly in the summer to pull on to the road from our driveway. Currently, traffic can queue at the Waterleat Avenue junction to access the A35, the new development is proposed to access the main road, dead opposite, this will not be good for road users, both local and those passing through, and will likely lead to an accident, with Drivers attempting to 'go for it'. With the number of houses proposed in this development this will lead to a considerably increased risk. Some may suggest reducing the speed limit to 20mph, but this will make it even harder for residents to pull off their driveways. I could support the development if a bypass was considered, but I believe without any road layout changes, there is a considerable safety risk for a development of this size directly onto the A35. Many thanks.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: A35 bypass in East of town.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure residents concerns are heard.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We have lived in the village since 1986 and I have had connections with the village all my life. We have bought up 4 children in the village and it's so nice to have the wildlife and less traffic especially with the narrow roads. It's devastating to think that there will be more fields dug up that will impact on the wildlife to accommodate all the buildings you are suggesting to be built. Also the impact on roads with the extra traffic and large lorries that would have to come through, with all the pot holes. Also the amount of near misses from people pulling straight out from the garden centre that is there already will be more hazardous with more units there. STRATEGIC POLICY SD03 : Honiton and it's development allocations. Land West of Hayne Lane (Gitti_03, Gitti_04 and Gitti_05) HONITON GROWTH - EMPLOYMENT The amount of employment land proposed (14.6ha) in the plan is in excess of that realistically needed to meet the requirement to support the suggested growth in dwelling numbers. In relation to employment land it is inevitable that the continuing development of high quality employment opportunities at Cranbrooke, the second new settlement, Skypark, Exeter Science Park, the Enterprise Zone and other employment developments in proximity to the M5 will detract from the attractiveness of other employment sites in East Devon along the A30 corridor and in particular the 14.6ha of employment land at Honiton. Allocation Reference Gitti_03 and Gitti_04 I OBJECT to these allocations. The reasons are summarised as follows:

- This has been an allocated employment site for in excess of 15 years and remains undeveloped. There are clearly viability issues which so far have proved to be unsurmountable. If the site cannot come forward within the plan period for development then it should not be allocated.
- The employment allocation extends west of Hayne Lane for 800 metres and will, if developed, result in a highly visible and unacceptable ribbon development
- The development will jut prominently into open countryside leading to a perceived threat of coalescence between Honiton and Gittisham village
- The development will be detrimental to the setting of two designated National Landscapes (NL) formerly The Blackdown Hills AONB and the East Devon AONB. The

developments would be particularly visible from high ground to the north of the allocation

- Although the Otter valley west of Honiton including the allocation site is not in itself within an NL, it is of great landscape value and contributes to Honiton's attractive setting
- This employment allocation of 14.6ha is significantly in excess of what is necessary to serve the needs of Honiton and the surrounding area. There is no statistical evidence of a need for 14.6ha
- Any viability concerns must not be an over-riding justification for bad planning
- The "local need" for employment and commercial land can be found with existing vacant land and regeneration opportunities at Heathpark
- The development would result in the unnecessary loss of high quality, productive agricultural land
- The local highways infrastructure is inadequate to serve 14.6ha of employment land and due to the residential development at Hayne Farm will add additional danger to both pedestrian and residential traffic on Devonshire Road
- The services (gas, water, electricity, foul and surface water sewers, sewage treatment etc) are inadequate to serve this proposed development and will require considerable investment
- The biodiversity qualities of the existing landscape will be seriously compromised
- Localised flooding occurs regularly and disrupts traffic on the A30. A 14.6ha employment development will increase the regularity and intensification of flooding on the A30 and on the local highways network. HONITON GROWTH - RESIDENTIAL I
OBJECT to the proposed allocation Gitti_05. The reasons for this objection are summarised as follows:
 - The allocation clearly does not meet sustainability criteria;
 - The detrimental impact development will have on the setting of Gittisham Village and its conservation area;
 - Development will have a detrimental visual impact on the designated National Landscape, formerly the East Devon AONB and on the setting of the NL;
 - Vehicular access to this allocation is only available via Devonshire Road and it is not appropriate to increase further residentially generated traffic and pedestrian movements through the Heathpark industrial estate. The combination of additional employment and residential growth to the west of Honiton being accessed via Devonshire Road will be detrimental to public safety.

- Additional traffic accessing Hayne Lane or the existing Hayne Farm development will be detrimental to vehicular and pedestrian safety;
- Further development will increase pressure on already overstretched health, social and education services. The local primary school is at capacity and is predicted to continue so;
- Highways, sewers, sewage treatment and surface water infrastructure already at capacity;
- Development of Gitti_5 would fail to meet your sustainability criteria. The town centre services together with the railway station, the hospital and doctors surgery are located for both vehicle and pedestrian travel at distances between 3300m at best and 3900m at worst. Your sustainability criteria advises a distance of no greater than 1600m. The distance to the Community College is even greater and the nearest primary school between 2800m and 3400m. The further west you move into the site the greater the distance becomes. The nearest supermarket (Lidl) will be between 1600 m and 2200m. The inevitable consequence of this will be multiple car movements contrary to your sustainability objectives and policies. This is not a sustainable site for residential development and is contrary to your sustainability objectives.
- Access to Public transport is poor;
- The development would result in the unnecessary loss of high quality, productive agricultural land
- The services (gas, water, electricity, foul and surface water sewers, sewage treatment etc) are inadequate to serve this proposed development and will require considerable investment
- The biodiversity qualities of the existing landscape will be seriously compromised
- Localised flooding occurs regularly and disrupts traffic on the A30. Any further significant residential development will increase the regularity and intensification of flooding on the A30 and on the local highways network.
- Lack of provision of any accessible community facilities to serve this isolated community.

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: As a resident of Gittisham for 40 years I am well acquainted with the geography and planning history of the area.

I wish to object to the proposals for further development East of Hayne Lane, both North and South of the railway line.

The development that has already taken place is of a ribbon nature: access from residential and industrial developments is linear and leads onto poor and narrow roads.

Any further buildings will only result in more traffic pollution and unsatisfactory access for resident or businesses.

Gittisham Parish council have already submitted formal objections: I append their objections below and concur with all of the points made.

OBJECTION - LOCAL PLAN CONSULTATION DRAFT

STRATEGIC POLICY SD03 : Honiton and it's development allocations. - The biodiversity qualities of the existing landscape will be seriously compromised
- Localised flooding occurs regularly and disrupts traffic on the A30. A 14.6ha employment development will increase the regularity and intensification of flooding on the A30 and on the local highways network.

HONITON GROWTH - RESIDENTIAL I OBJECT to the proposed allocation Gitti_05. The reasons for this objection are summarised as follows:

- The allocation clearly does not meet sustainability criteria;
- The detrimental impact development will have on the setting of Gittisham Village and its conservation area;
- Development will have a detrimental visual impact on the designated National Landscape, formerly the East Devon AONB and on the setting of the NL;
- Vehicular access to this allocation is only available via Devonshire Road and it is not appropriate to increase further residentially generated traffic and pedestrian movements through the Heathpark industrial estate. The combination of additional employment and residential growth to the west of Honiton being accessed via Devonshire Road will be detrimental to public safety.
- Additional traffic accessing Hayne Lane or the existing Hayne Farm development will be detrimental to vehicular and pedestrian safety. Outside of the development there

are no pavements or public footpaths except for one on the other side of the village. There are minimal opportunities for exercise or leisure on foot or bicycle in any part of the parish;

- Further development will increase pressure on already overstretched health, social and education services. The local primary school is at capacity and is predicted to continue so;
- Highways, sewers, sewage treatment and surface water infrastructure already at capacity;
- Development of Gitti_5 would fail to meet your sustainability criteria. The town centre services together with the railway station, the hospital and doctors surgery are located for both vehicle and pedestrian travel at distances between 3300m at best and 3900m at worst. Your sustainability criteria advise a distance of no greater than 1600m. The distance to the Community College is even greater and the nearest primary school between 2800m and 3400m. The further west you move into the site the greater the distance becomes. The nearest supermarket (Lidl) will be between 1600 m and 2200m. The inevitable consequence of this will be multiple car movements contrary to your sustainability objectives and policies. This is not a sustainable site for residential development and is contrary to your sustainability objectives.
- Access to Public transport is poor;
- The development would result in the unnecessary loss of high quality, productive agricultural land
- The services (gas, water, electricity, foul and surface water sewers, sewage treatment etc) are inadequate to serve this proposed development and will require considerable investment
- The biodiversity qualities of the existing landscape will be seriously compromised
- Localised flooding occurs regularly and disrupts traffic on the A30. Any further significant residential development will increase the regularity and intensification of flooding on the A30 and on the local highways network.
- Lack of provision of any accessible community facilities to serve this isolated community. There is a village hall in the centre of Gittisham village but residents of Hayne Farm usually drive to it as it is too dangerous to walk or cycle along the narrow, busy lane.

I am a resident of Gittisham Parish and have lived in the centre of the village for 26 years. I am married with 2 children, who were born here. I have always been actively

involved in the village, with the church, the village hall, the playground and the Parish Council. I work from home and I am a civil engineer, previously working in flood defence at the Environment Agency for 20 years. My leisure time is spent walking and running in this area, where I very much appreciate the beauty and peace of my surroundings.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: 1) Local roads, paths, and parks are wholly inadequate. The intersection between Meadow Acre Road and Hayne Lane is already an accident waiting to happen, with vehicles travelling south on Hayne Lane routinely turning left to continue on the road at dangerous speed. Vehicles also routinely enter and exit Meadow Acre Road at too high a speed, positioned centrally in the road (no markings) as if no possibility of encountering oncoming traffic. There are too many vehicles parked on Meadow Acre Road impeding traffic. The road under the train bridge is single pass only, and presumably too low for a double decker bus to pass. The right of way is frequently ignored, and clearly unable to cope with additional traffic of the scale proposed. The proposed path under the railway line is currently sectioned off and in disrepair. There is a distinct lack of functional playgrounds and local rights of way (walking paths) and no safe route to walk/cycle into Gittisham or enjoy the countryside. Devonshire Road, through Heathpark Industrial Estate is in great disrepair (potholes/fissures), and already unable to cope with peak time traffic e.g. 5pm Mondays, Tuesdays, Wednesdays, and Thursdays. The A30 cannot be accessed from Hayne Lane and so the proposed development will increase the congestion exponentially. 2) Already struggling (and potentially impacted) local services. Honiton Surgery is routinely uncontactable and online based. As an adult you can only get an appointment in a timely manner in extreme situations. How will the surgery service additional residents in their catchment. The suggestion is farcical. Similarly, one can't join NHS Dentists anymore. The waiting list is a matter of decades not years. I also fail to see how Littleton Nursery / Primary School can provide sufficient additional capacity, similarly private nurseries like Sunny Days are struggling to facilitate enough places with the Government's expanded free childcare hours. Honiton Community College has closed its sixth form. There really is not the infrastructure and services present locally to justify this scale of development. Ultimately we do need new homes, but they need to be adequately serviced and an improvement to communities, not a detriment. A proposed shop is insuffice.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Local infrastructure/road safety and services need to be dramatically improved. A two way road and path would be needed added under the railway, a safe walking path provided to Gittisham, and functional parks/playgrounds installed. Local GP and dentist services would need to be vastly improved, and Schools supported.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: 1)

Local roads, paths, and parks are wholly inadequate. The intersection between Meadow Acre Road and Hayne Lane is already an accident waiting to happen, with vehicles travelling south on Hayne Lane routinely turning left to continue on the road at dangerous speed. Vehicles also routinely enter and exit Meadow Acre Road at too high a speed, positioned centrally in the road (no markings) as if no possibility of encountering oncoming traffic. There are too many vehicles parked on Meadow Acre Road impeding traffic. The road under the train bridge is single pass only, and presumably too low for a double decker bus to pass. The right of way is frequently ignored, and clearly unable to cope with additional traffic of the scale proposed. The proposed path under the railway line is currently sectioned off and in disrepair. There is a distinct lack of functional playgrounds and local rights of way (walking paths) and no safe route to walk/cycle into Gittisham or enjoy the countryside. Devonshire Road, through Heathpark Industrial Estate is in great disrepair (potholes/fissures), and already unable to cope with peak time traffic e.g. 5pm Mondays, Tuesdays, Wednesdays, and Thursdays. The A30 cannot be accessed from Hayne Lane and so the proposed development will increase the congestion exponentially. 2)Already struggling (and potentially impacted) local services. Honiton Surgery is routinely uncontactable and online based. As an adult you can only get an appointment in a timely manner in extreme situations. How will the surgery service additional residents in their catchment. The suggestion is farcical. Similarly, one can't join NHS Dentists anymore. The waiting list is a matter of decades not years. I also fail to see how Littleton Nursery / Primary School can provide sufficient additional capacity, similarly private nurseries like Sunny Days are struggling to facilitate enough places with the Government's expanded free childcare hours. Honiton Community

College has closed its sixth form. There really is not the infrastructure and services present locally to justify this scale of development. Ultimately we do need new homes, but they need to be adequately serviced and an improvement to communities, not a detriment. A proposed shop is insuffice.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Local

infrastructure/road safety and services need to be dramatically improved. A two way road and path would be needed added under the railway, a safe walking path provided to Gittisham, and functional parks/playgrounds installed. Local GP and dentist services would need to be vastly improved, and Schools supported.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: 1) Local roads, paths, and parks are wholly inadequate.

The intersection between Meadow Acre Road and Hayne Lane is already an accident waiting to happen, with vehicles travelling south on Hayne Lane routinely turning left to continue on the road at dangerous speed. Vehicles also routinely enter and exit Meadow Acre Road at too high a speed, positioned centrally in the road (no markings) as if no possibility of encountering oncoming traffic. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

GH/ED/39 was identified within the HELAA Appendix E(v)1 list and should have failed site sifting. Then suddenly on the 1st November two New sites GH/ED/39a and GH/ED/39b were created. These two new sites were put into Reg 18, with site GH/ED/39a being promoted as a 'preferred' site, and GH/ED/39b being classed as 'rejected'. I still do not understand how a site identified as 'NOT suitable or achievable' in HELAA suddenly becomes a 'preferred' site. What is even more baffling is the fact that the description for site GH/ED/39a in Reg 18 has the following first sentence: 'Whilst this site did not pass the Stage 2 HELAA Panel assessment, it was deemed appropriate to appraise, given known developer interest in the site and potential that is felt to exist to overcome possible constraints, notably in respect of highway considerations.'. The description identifies that it did not pass Stage 2 HELAA, so according to the 'Site Selection Methodology' in effect at the time (dated May2022), it should not have been put forward for consultation. Then to even add more confusion, the description indicates that another reason for putting it forward for consultation was due to the fact that there was 'known developer interest in the site'. WHAT SITE DOES NOT HAVE DEVELOPER INTEREST IN IT.

The reason(s) given for putting this forward are dubious to say the least. If EDDC are not going to follow their own methodologies and report findings, then why bother with them, and what confidence do we have that other processes and procedures have not been ignored??

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Remove site GH/ED/39 (and therefore GH/ED39a and GH/ED/39b) from the draft local plan.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to strongly oppose the proposed allocation of land at Kings Road (Honi_18) for 136 homes, as outlined in the emerging East Devon Local Plan. As a resident of Kings Road, I believe this allocation fails to meet several aspects of the test of soundness as required by Regulation 19 and the National Planning Policy Framework (NPPF). My primary concerns relate to whether the plan is Positively Prepared, Justified, Effective, and Consistent with National Policy.

1. Not Positively Prepared and Not Consistent with National Policy: Allocating 136 homes in this edge-of-town location, with significant and acknowledged pedestrian safety issues, limited existing facilities, and a demonstrable impact on the surrounding national landscape, does not represent a positively prepared strategy for sustainable development. It appears to prioritise housing numbers without adequately considering the environmental and social consequences, which is inconsistent with the principles of sustainable development promoted in the NPPF, particularly concerning the creation of healthy and safe communities (Paragraph 94).

2. Not Justified: I contend that this allocation is not justified due to a lack of robust evidence and a failure to adequately consider reasonable alternatives:

- **Honiton's Existing Allocation Levels:** It is my understanding that Honiton already has a significant number of housing allocations within this Local Plan. There is a serious question as to whether the town is being asked to accommodate a level of growth that exceeds its capacity in terms of existing facilities, infrastructure, and transportation networks. Pushing the level of housing allocation beyond the town's ability to absorb it sustainably further undermines the justification for this specific site.
- **Lack of Robust Evidence:** The Council has not provided sufficient evidence to demonstrate that the existing infrastructure, including pedestrian crossings on Kings Road, local roads, schools, healthcare facilities, and utilities, can cope with the additional demand from 136 homes. Where is the detailed transport assessment that comprehensively addresses the cumulative impact of this and other proposed developments on traffic congestion and pedestrian safety? The landscape impact

assessment also appears insufficient in light of the site's proximity to a valued national landscape. There is a lack of clear evidence demonstrating the specific need for this scale of development in this precise location, especially considering the existing challenges.

- **Failure to Consider Reasonable Alternatives:** Has the Council transparently considered other sites within Honiton or the surrounding area for this level of housing? What were these alternatives, and what were the specific reasons for their rejection in favour of Kings Road? Without this information, it is impossible to conclude that this allocation represents the most appropriate strategy.
- **Impact on Local Character:** There is a concern that the scale and design of 136 homes on this site may not be in keeping with the existing local character of Honiton and the surrounding area, further undermining the justification for this allocation in this sensitive location.
- **Lack of Community Engagement:** Was the community adequately consulted specifically on the allocation of this site for this scale of development? Were the concerns of local residents, particularly those living on Kings Road, properly taken into account in the decision-making process?

3. Not Effective: The proposed allocation raises significant concerns about whether it is effective and deliverable:

- **Deliverability Concerns due to Infrastructure Deficiencies:** The existing dangerous pedestrian crossing on Kings Road and the potential for increased traffic congestion raise serious questions about the deliverability of this site without significant and potentially costly infrastructure upgrades. There is no clear commitment or funding plan outlined for these necessary improvements.
- **Strain on Existing Facilities:** The lack of a supermarket on this side of town and the already stretched capacity of other facilities and infrastructure within Honiton (schools, healthcare, etc.) suggest that this development is not deliverable in a way that supports a thriving and sustainable community.

4. Not Consistent with National Policy (Further Points): This allocation appears inconsistent with several key aspects of the NPPF:

- **Protecting and Enhancing the Environment (Paragraph 174):** The development's location on the edge of a beautiful national landscape and the direct impact on residents' views clearly conflict with the policy to protect and enhance valued landscapes. The potential impact on local biodiversity also needs further investigation.
- **Promoting Sustainable Transport (Paragraph 111):** Locating a significant number of homes in an area with a known dangerous pedestrian crossing and limited public

transport options (requiring crossing a busy road) does not prioritise sustainable transport modes.

- **Loss of Green Space:** The allocation likely involves the loss of green space that may be valued by the local community for recreation and amenity. The NPPF encourages the protection of such spaces.
- **Precedent Setting:** Approving this development could set an undesirable precedent for further unsustainable development on the edges of Honiton, further encroaching on the surrounding countryside. **Suggestions and Conclusion:** I reiterate my understanding of the need for housing within East Devon. However, the proposed allocation at Kings Road (Honi_18) presents significant and unacceptable challenges related to safety, infrastructure, landscape impact, and the overall sustainability of the development, especially when considered in the context of Honiton's already substantial housing allocation. If the Council insists on pursuing development in this area, the following are essential:
 - A detailed and independently reviewed traffic and crossing technical study must be completed and its recommendations fully funded and implemented before any development commences. This must deliver demonstrable and significant improvements to pedestrian safety on Kings Road.
 - Substantial investment in local infrastructure, including a supermarket on this side of town, expansion of existing schools and healthcare facilities, and improvements to utilities, must be secured and guaranteed.
 - A significant buffer zone must be established and rigorously protected between the development and the adjacent national landscape to mitigate visual and ecological impacts.
 - A thorough assessment of alternative sites that are more sustainable and less impactful on existing communities and the environment must be undertaken and made publicly available.
 - The Council must provide clear justification for the overall level of housing allocation within Honiton and demonstrate that the town's infrastructure and facilities can realistically accommodate this growth. I strongly urge the East Devon District Council to reconsider this unsustainable and unsound allocation and to prioritise alternative sites that better align with the principles of sound planning and the long-term well-being of the residents of Honiton and the protection of our valuable natural environment. Thank you for your thorough consideration of these significant concerns.

Full name: Honiton Group Petition

Other party name (if relevant): On behalf of 80 residents who have signed the petition

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We are writing on behalf of over 80 local residents who have signed a petition opposing the proposed development in Honiton (Kings Road) under the Local Plan Strategy SDO3. As concerned residents, we wish to formally object to this proposal due to significant concerns regarding road safety, access issues, environmental impact, and the overall well-being of the existing community.

Road Safety & Access issues: The proposed development raises serious concerns about increased traffic congestion and road safety risks. Kings Road is already under strain with existing traffic, and is often at a stand still with heavy commercial traffic, this is only exasperated during the summer months. The road has already given way previously and is often closed due to accidents. The additional burden of construction vehicles and increased residential traffic will exacerbate these issues. The incredibly busy road with limited access points make this area unsuitable for further expansion without significant infrastructure improvements.

impact on Residents' Well-being: This development will have detrimental effects on the mental health and quality of life of existing residents. The peaceful and scenic nature of this part of Honiton is a defining characteristic of our town, and its destruction will cause distress to many who rely on this environment for their well-being.

Environmental & Wildlife Concerns: The site in question is home to local wildlife that would be displaced by this development. The loss of green space will negatively impact biodiversity and the natural beauty that contributes to Honiton's unique character. The

area serves as a haven for local flora and wildlife and any development will irreversibly damage these ecosystems.

Heritage and Visual Impact: The site's current landscape forms an iconic part of Honiton's identity as a historic market town. Any large-scale development risks undermining the town's rural charm, replacing it with an unsightly and inappropriate expansion that fails to respect the existing character of the area.

The EDCC Process. We are deeply concerned at the flawed process that this consultation has taken in relation to Honi-18. we first heard of the proposals 2 weeks ago in that time we have visited local homes and could have had many more signatures to this petition but there was such limited time to do this. Of the 80 people only 6 have known about the plans which reveals the extraordinary lack of openness and transparency that has marked the process. If this is not illegal then it is certainly cowardly and underhand and does no credit to EDCC- it will have served to alienate the local community. Every single person who has signed this petition was aghast at the plans and the way that they simply do not fit the area.

[Petition wording below]

Local petition to oppose the plan HONi-18 in the 2020-2042 consultation (under local plan strategy SD03)

We the undersigned oppose the Honi-18 plan for the following reasons:

1 This is an area of great natural beauty and should not be lost to new housing. Once lost it can never be recovered. Even though it is not officially delegated as AONB it is clear to everyone that these fields are an integral part of the beauty of this area East of the A35.

2. There is abundant wildlife in these fields. Buzzards, peregrine falcons, woodpeckers, deer, heron, foxes, rabbits, badgers, magpie, crested newts, and many hedgerow birds including chaffinch bullfinches goldcrest. These need protecting in this stunning area.

3. The local infrastructure can not support more housing in this area of the town, As the roads are already overly busy and the plans for access to the proposed site are inadequate and dangerous given how steep , narrow and windy the road is above the junction to Waterleat Lane . This plan has simply not taken into account the disruption that the planned road layout will have on local people. The amount of traffic is already of great concern for local people and we see the plan for a junction above the Copper Castle as dangerous and disruptive. Anyone with personal knowledge of the road will know this is a very bad and substandard plan.

We protest most strongly that EDCC has not considered this aspect properly and is riding roughshod over the needs of local people.

4.This plan would greatly alter the feel and beauty of the north east end of the Honiton and thereby diminish this lovely old market town. It is this very reason that previous attempts to building housing in this area have been unsuccessful. We must not sell the soul of Honiton for short term and inadequate housing solutions.

5. The well-being and mental health of the residents need protecting as the area and the views are very important to their lives does the EDCC really want to exacerbate the mental health crisis in our society.

6 We want to register our deep unease and protest at the secretive process by which this consultation has been run. As stakeholders in the town we believe we should have been actively informed about the proposed plan which only appears to have become a live option in June 2024, and which many of the undersigned only came to know about it in March 2025 .

You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

For these reasons, we strongly urge the planning committee to reject to reconsider this area for proposal under the draft local plan and reconsider the long-term impact of such developments on the town and its residents. We request that the council gives due consideration to our concerns and prioritizes sustainable, community-led planning over unsympathetic urban expansion. There are several other locations highlighted in the draft plan such as the land to Cuckoo Down lane that is not directly impacting residents and has significantly reduced traffic. We appreciate your time and consideration of this objection and would welcome the opportunity to discuss this matter further.

It is our view that another site, one that is brownfield (or simply more appropriate) needs to be found. In this way the needs for more housing can be met but which does not undermine the town and the lives of those who live in the North-East of the town so harshly.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Full name: Helen Mary Roulson

OBJECTION - LOCAL PLAN CONSULTATION DRAFT

STRATEGIC POLICY SD03 : Honiton and it's development allocations. Land West of Hayne Lane (Gitti_03, Gitti_04 and Gitti_05) HONITON GROWTH - EMPLOYMENT The amount of employment land proposed (14.6ha) in the plan is in excess of that realistically needed to meet the requirement to support the suggested growth in dwelling numbers. In relation to employment land it is inevitable that the continuing development of high quality employment opportunities at Cranbrooke, the second new settlement, Skypark, Exeter Science Park, the Enterprise Zone and other employment developments in proximity to the M5 will detract from the attractiveness of other employment sites in East Devon along the A30 corridor and in particular the 14.6ha of employment land at Honiton. Allocation Reference Gitti_03 and Gitti_04 I OBJECT to these allocations. The reasons are summarised as follows:

- This has been an allocated employment site for in excess of 15 years and remains undeveloped. There are clearly viability issues which so far have proved to be unsurmountable. If the site cannot come forward within the plan period for development then it should not be allocated.

- The employment allocation extends west of Hayne Lane for 800 metres and will, if developed, result in a highly visible and unacceptable ribbon development
- The development will jut prominently into open countryside leading to a perceived threat of coalescence between Honiton and Gittisham village
- The development will be detrimental to the setting of two designated National Landscapes (NL) formerly The Blackdown Hills AONB and the East Devon AONB. The developments would be particularly visible from high ground to the north of the allocation
- Although the Otter valley west of Honiton including the allocation site is not in itself within an NL, it is of great landscape value and contributes to Honiton's attractive setting
- This employment allocation of 14.6ha is significantly in excess of what is necessary to serve the needs of Honiton and the surrounding area. There is no statistical evidence of a need for 14.6ha
- Any viability concerns must not be an over-riding justification for bad planning
- The "local need" for employment and commercial land can be found with existing vacant land and regeneration opportunities at Heathpark
- The development would result in the unnecessary loss of high quality, productive agricultural land
- The local highways infrastructure is inadequate to serve 14.6ha of employment land and due to the residential development at Hayne Farm will add additional danger to both pedestrian and residential traffic on Devonshire Road
- The services (gas, water, electricity, foul and surface water sewers, sewage treatment etc) are inadequate to serve this proposed development and will require considerable investment
- The biodiversity qualities of the existing landscape will be seriously compromised
- Localised flooding occurs regularly and disrupts traffic on the A30. A 14.6ha employment development will increase the regularity and intensification of flooding on the A30 and on the local highways network.

HONITON GROWTH - RESIDENTIAL I OBJECT to the proposed allocation Gitti_05. The reasons for this objection are summarised as follows:

- The allocation clearly does not meet sustainability criteria;

- The detrimental impact development will have on the setting of Gittisham Village and its conservation area;
- Development will have a detrimental visual impact on the designated National Landscape, formerly the East Devon AONB and on the setting of the NL;
- Vehicular access to this allocation is only available via Devonshire Road and it is not appropriate to increase further residentially generated traffic and pedestrian movements through the Heathpark industrial estate. The combination of additional employment and residential growth to the west of Honiton being accessed via Devonshire Road will be detrimental to public safety.
- Additional traffic accessing Hayne Lane or the existing Hayne Farm development will be detrimental to vehicular and pedestrian safety;
- Further development will increase pressure on already overstretched health, social and education services. The local primary school is at capacity and is predicted to continue so;
- Highways, sewers, sewage treatment and surface water infrastructure already at capacity;
- Development of Gitti_5 would fail to meet your sustainability criteria. The town centre services together with the railway station, the hospital and doctors surgery are located for both vehicle and pedestrian travel at distances between 3300m at best and 3900m at worst. Your sustainability criteria advises a distance of no greater than 1600m. The distance to the Community College is even greater and the nearest primary school between 2800m and 3400m. The further west you move into the site the greater the distance becomes. The nearest supermarket (Lidl) will be between 1600 m and 2200m. The inevitable consequence of this will be multiple car movements contrary to your sustainability objectives and policies. This is not a sustainable site for residential development and is contrary to your sustainability objectives.
- Access to Public transport is poor;
- The development would result in the unnecessary loss of high quality, productive agricultural land
- The services (gas, water, electricity, foul and surface water sewers, sewage treatment etc) are inadequate to serve this proposed development and will require considerable investment
- The biodiversity qualities of the existing landscape will be seriously compromised

- Localised flooding occurs regularly and disrupts traffic on the A30. Any further significant residential development will increase the regularity and intensification of flooding on the A30 and on the local highways network.
- Lack of provision of any accessible community facilities to serve this isolated community.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Delete Land west of Hayne Lane Policies Gitti_03, Gitti_04, Gitti_05

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure full understanding of the issues raised in the objections

Full name: Matthew Waldron

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: Given the limited details that relate specifically to this area, I don't think there are any legal compliance issues.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Regarding the section on “land west of Hayne Lane (Gitti_03, Gitti_04, and Gitti_05),” where I also live, the draft states: “This allocation will need to come forward on the basis of an agreed masterplan for the whole site that clearly demonstrates how comprehensive development will be undertaken and implemented.”

This statement is particularly important as this area will accommodate the largest share of Honiton’s development—over 300 of the proposed 800+ homes—alongside an expansion of the trading estate.

I want to clarify that I do not oppose building more houses; I recognise that this needs to happen all over the country. However, beyond ensuring a good standard of new homes, I expect the supporting infrastructure, accessibility, and impact on nearby communities to be handled with fairness and due diligence.

I hope more details will be provided because, as it stands, the draft only states: “It is expected that vehicular access to the residential development will be via the existing estate to the north (i.e., via Meadow Acre Road).”

This is a serious concern. The development in this area has not been planned with long-term viability in mind. Only last year, the community was consulted, and I have already raised concerns about the existing issues.

Currently, access to the area is inadequate due to:

1. Narrow roads—Hayne Lane has short sections for two-way traffic and is constrained by the railway bridge, and Meadow Acre Road is not wide enough for two-way traffic, especially with parked cars on both sides.
2. Limited entry points—Access is only via Beech Walk, which is a single lane, or through the trading estate, which is already prone to congestion and is set to expand.

While this situation is still manageable, it must not be made worse.

Meadow Acre Road has hundreds of properties facing onto it. I understand that previously, local residents opposed access via Old Elm Road due to traffic concerns. However, Old Elm Road is a standard bi-directional road with pavements, a bus stop, and only one house facing it directly. In contrast, Meadow Acre Road is too narrow for bi-direction traffic, and is lined with homes—yet it is now proposed as the primary access route for new development.

If Old Elm Road was deemed unsuitable, then Meadow Acre Road, which is even less appropriate, should not be considered a viable access route. At the very least, its residents should have the same right to object.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

1. Open Old Elm Road for permanent access. This would improve connectivity to Honiton, reduce reliance on the unsuitable Beech Walk and Hayne Lane routes, and ease congestion in the trading estate.

2. Create a new access route via the road past Combe Garden Centre toward Gittisham Forge. While this road is currently narrow, it differs from Meadow Acre Road in that no houses face onto it, meaning traffic flow would be more manageable. It could be improved by widening it or restricting parking to designated laybys. At the very least, it would provide an alternative access route instead of forcing all traffic through Meadow Acre Road.

While the existing single-lane section under the railway bridge toward Gittisham village would not be suitable for increased traffic, a new road could turn off before this point to connect with the proposed development.

This approach would create a fairer, more sustainable infrastructure plan for both new and existing residents, providing two main access routes and making the best out of a difficult situation, which I strongly believe is a fair compromise.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: As resident stakeholder to this proposal, I would absolutely expect to see a case which can provide detail and assurance to show how concerns will be addressed

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Full name: Sean Webber

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I do not believe that the areas HON_07, HON_12, or HON_13 are suitable for development. They are within the National Landscape and are very close to historic buildings - they would surround St Michael church. The fields are also an important green space for people living nearby and developing the land would result in the town spreading further into the adjacent countryside, reducing the access to greenspace for existing residents. The addition of some many extra houses would also result in increased traffic and noise.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I believe these areas should be removed from the plan, or the scale of the development should be significantly reduced. The area HON_07 seems the most suitable of the three areas but I believe development of HON_13, and particularly HON_12 would have a significantly negative effect on the local area and its residents.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Scott Wolfe

Proposal:

5. Development in the Towns and Villages

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proposed entrance/exit onto an already over trafficked A35 that can take 5 mins or more to pull onto, even worse in summer, a road with a high rate of accidents resulting to deaths or serious injury in this area.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Building on sites already under development to the west and north of the town are more suitable and enviromentaly viable.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The town is alredy suffering from over population regarding amenities, it is impossible to get a NHS dentist, an appointment at the surgery is just as bad and the local scool classrooms overcrowded

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Martin Thurgood

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: DEVELOPMENT IN THE TOWNS AND VILLAGES The Policies fail to address Objective 2 of The Vision, that is, tackling the climate emergency, Objective 6, high quality development, and Objective 9, encouraging walking & cycling. For Objective 2, it fails to recognise that Exeter is the major draw for employment and that most journeys will be made between there and the new housing areas. Placing all new development close to Exeter is essential to achieving Objective 2. Objective 6 will not be met by isolated developments on the peripheries of existing settlements. Only large-scale development can provide for high quality developments. The Cornish example of Nansledan shows what can be achieved towards Objectives 2, 6 and 9 through a comprehensive and carefully considered housing provision. East Devon District Council has the opportunity to demonstrate its abilities and commitments to truly delivering a world-beating vision through a major planned expansion through an enlarged proposed second new community, Policy SW01, rather than piecemeal relatively small-scale developments at the edges of existing communities. For Objective 9, permitting 'edge development sites' for new housing at existing communities fails to address the Objective. It is unrealistic to expect people to walk or cycle given the distances and the natural terrain. To give but one example, development on the edges of Ottery St Mary are too far for people to walk to the central shopping area (and other facilities) and the steep valleys further severely mitigate against foot and cycle travel for a number of the locations. Moreover, off-street vehicle parking in the central area is already used to capacity and your proposals fail to address the consequences or provide for any positive resolution. Policies should be radically redrafted to address such matters. In particular, it should advance the proposed second new community, WS01, as the solution and increase its size such that development on the edges of existing settlements are unnecessary.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: See response to Q2(b)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

OBJECTION - LOCAL PLAN CONSULTATION DRAFT

This is a representation made on behalf of GITTISHAM PARISH COUNCIL

STRATEGIC POLICY SD03 : Honiton and it's development allocations. Land West of Hayne Lane (Gitti_03, Gitti_04 and Gitti_05) HONITON GROWTH - EMPLOYMENT The amount of employment land proposed (14.6ha) in the plan is in excess of that realistically needed to meet the requirement to support the suggested growth in dwelling numbers. In relation to employment land it is inevitable that the continuing development of high quality employment opportunities at Cranbrooke, the second new settlement, Skypark, Exeter Science Park, the Enterprise Zone and other employment developments in proximity to the M5 will detract from the attractiveness of other employment sites in East Devon along the A30 corridor and in particular the 14.6ha of employment land at Honiton. Allocation Reference Gitti_03 and Gitti_04 The Gittisham Parish Council OBJECT to these allocations. The reasons are summarised as follows:

- This has been an allocated employment site for in excess of 15 years and remains undeveloped. There are clearly viability issues which so far have proved to be unsurmountable. If the site cannot come forward within the plan period for development then it should not be allocated.
- The employment allocation extends west of Hayne Lane for 800 metres and will, if developed, result in a highly visible and unacceptable ribbon development
- The development will jut prominently into open countryside leading to a perceived threat of coalescence between Honiton and Gittisham village
- The development will be detrimental to the setting of two designated National Landscapes (NL) formerly The Blackdown Hills AONB and the East Devon AONB. The developments would be particularly visible from high ground to the north of the allocation
- Although the Otter valley west of Honiton including the allocation site is not in itself within an NL, it is of great landscape value and contributes to Honiton's attractive setting
- This employment allocation of 14.6ha is significantly in excess of what is necessary to serve the needs of Honiton and the surrounding area. There is no statistical evidence of a need for 14.6ha
- Any viability concerns must not be an over-riding justification for bad planning
- The "local need" for employment and commercial land can be found with existing vacant land and regeneration opportunities at Heathpark
- The development would result in the unnecessary loss of high quality, productive agricultural land
- The local highways infrastructure is inadequate to serve 14.6ha of employment land and due to the residential development at Hayne Farm will add additional danger to both pedestrian and residential traffic on Devonshire Road
- The services (gas, water, electricity, foul and surface water sewers, sewage treatment etc) are inadequate to serve this proposed development and will require considerable investment
- The biodiversity qualities of the existing landscape will be seriously compromised
- Localised flooding occurs regularly and disrupts traffic on the A30. A 14.6ha employment development will increase the regularity and intensification of flooding on the A30 and on the local highways network.

HONITON GROWTH - RESIDENTIAL The Gittisham Parish Council OBJECT to the proposed allocation Gitti_05. The reasons for this objection are summarised as follows:

- The allocation clearly does not meet sustainability criteria;
- The detrimental impact development will have on the setting of Gittisham Village and its conservation area;
- Development will have a detrimental visual impact on the designated National Landscape, formerly the East Devon AONB and on the setting of the NL;
- Vehicular access to this allocation is only available via Devonshire Road and it is not appropriate to increase further residentially generated traffic and pedestrian movements through the Heathpark industrial estate. The combination of additional employment and residential growth to the west of Honiton being accessed via Devonshire Road will be detrimental to public safety.
- Additional traffic accessing Hayne Lane or the existing Hayne Farm development will be detrimental to vehicular and pedestrian safety;
- Further development will increase pressure on already overstretched health, social and education services. The local primary school is at capacity and is predicted to continue so;
- Highways, sewers, sewage treatment and surface water infrastructure already at capacity;
- Development of Gitti_5 would fail to meet your sustainability criteria. The town centre services together with the railway station, the hospital and doctors surgery are located for both vehicle and pedestrian travel at distances between 3300m at best and 3900m at worst. Your sustainability criteria advises a distance of no greater than 1600m. The distance to the Community College is even greater and the nearest primary school between 2800m and 3400m. The further west you move into the site the greater the distance becomes. The nearest supermarket (Lidl) will be between 1600 m and 2200m. The inevitable consequence of this will be multiple car movements contrary to your sustainability objectives and policies. This is not a sustainable site for residential development and is contrary to your sustainability objectives.
- Access to Public transport is poor;
- The development would result in the unnecessary loss of high quality, productive agricultural land
- The services (gas, water, electricity, foul and surface water sewers, sewage treatment etc) are inadequate to serve this proposed development and will require considerable investment

- The biodiversity qualities of the existing landscape will be seriously compromised
- Localised flooding occurs regularly and disrupts traffic on the A30. Any further significant residential development will increase the regularity and intensification of flooding on the A30 and on the local highways network.
- Lack of provision of any accessible community facilities to serve this isolated community.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Delete policy in relation to: Land west of Hayne Lane (Gitti_03, Gitti_04 and Gitti_05)

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure that all the relevant planning issues are taken into consideration

Full name: Heloise Marlow

Organisation (where relevant): Honiton Town Council

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Honi_12 was rejected for development by EDDC in the public consultation process which ran from November 2022 to January 2023. Rejection of Honi_12 for development was reiterated by EDDC in July 2023 and June 2024. The agenda for EDDC's Strategic Planning Committee meeting on the 20th September 2024 confirmed that Honi_12 was not recommended for development. However, the agenda for the Strategic Planning Committee meeting on the 29 October 2024 recommended Honi_12 for housing allocation and the Committee resolved to include Honi_12 in the site allocation.

Honi_18 was referenced in the minutes of the Strategic Planning Committee meeting held on 11 December 2024 as being one of the “changes that had been made to some local plan chapters to ensure greater consistency of approach throughout the document and to address matters on potential development allocation sites that had been agreed by Committee as previous meetings.” A search of the previous agendas and minutes for the Strategic Planning Committee has found no reference to Honi_18 at all.

It is clear that for both sites, Honi_12 and Honi_18 EDDC failed to properly consult on the allocation of these sites and their inclusion in Strategic Policy SD03: Honiton and its development allocations is not legally compliant

In addition Honiton Town Council objects to the inclusion of Honi_07. Honiton Town Council objected to the inclusion of Honi_07 in January 2023 due to the adverse impact

on landscape, heritage and its siting in a Natural Landscape (formerly Area of Outstanding Natural Beauty). EDDC initially identified the site as a second choice site accepting that development would have a high impact on landscape and heritage.

Should sites Honi_07 and Honi_18 be allocated for development, Honiton Town Council would ask that the original boundaries be reinstated.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Honi_07, Honi_12 and Honi_18 should be removed as development sites from the Local Plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Honi_12 was rejected for development by EDDC in the public consultation process which ran from November 2022 to January 2023. Rejection of Honi_12 for development was reiterated by EDDC in July 2023 and June 2024. The agenda for EDDC's Strategic Planning Committee meeting on the 20th September 2024 confirmed that Honi_12 was not recommended for development. However, the agenda for the Strategic Planning Committee meeting on the 29 October 2024 recommended Honi_12 for housing allocation and the Committee resolved to include Honi_12 in the site allocation.

Honi_18 was referenced in the minutes of the Strategic Planning Committee meeting held on 11 December 2024 as being one of the "changes that had been made to some local plan chapters to ensure greater consistency of approach throughout the document and to address matters on potential development allocation sites that had been agreed by Committee as previous meetings." A search of the previous agendas and minutes for the Strategic Planning Committee has found no reference to Honi_18 at all.

It is clear that for both sites, Honi_12 and Honi_18 EDDC failed to properly consult on the allocation of these sites and their inclusion in Strategic Policy SD03: Honiton and its development allocations is not legally sound.

In addition Honiton Town Council objects to the inclusion of Honi_07. Honiton Town Council objected to the inclusion of Honi_07 in January 2023 due to the adverse impact on landscape, heritage and its siting in a Natural Landscape (formerly Area of Outstanding Natural Beauty). EDDC initially identified the site as a second choice site accepting that development would have a high impact on landscape and heritage.

Should sites Honi_07 and Honi_18 be allocated for development, Honiton Town Council would ask that the original boundaries be reinstated.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Honi_07, Honi_12 and Honi_18 should be removed as development sites from the Local Plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Honi_12 was rejected for development by EDDC in the public consultation process which ran from November 2022 to January 2023. Rejection of Honi_12 for development was reiterated by EDDC in July 2023 and June 2024. The agenda for EDDC's Strategic Planning Committee meeting on the 20th September 2024 confirmed that Honi_12 was not recommended for development. However, the agenda for the Strategic Planning Committee meeting on the 29 October 2024 recommended Honi_12 for housing allocation and the Committee resolved to include Honi_12 in the site allocation.

Honi_18 was referenced in the minutes of the Strategic Planning Committee meeting held on 11 December 2024 as being one of the "changes that had been made to some local plan chapters to ensure greater consistency of approach throughout the document and to address matters on potential development allocation sites that had been agreed by Committee as previous meetings." A search of the previous agendas and minutes for the Strategic Planning Committee has found no reference to Honi_18 at all.

It is clear that for both sites, Honi_12 and Honi_18 EDDC failed to properly consult on the allocation of these sites and their inclusion in Strategic Policy SD03: Honiton and its development allocations fails to comply with the duty to co-operate.

In addition Honiton Town Council objects to the inclusion of Honi_07. Honiton Town Council objected to the inclusion of Honi_07 in January 2023 due to the adverse impact on landscape, heritage and its siting in a Natural Landscape (formerly Area of Outstanding Natural Beauty). EDDC initially identified the site as a second choice site accepting that development would have a high impact on landscape and heritage.

Should sites Honi_07 and Honi_18 be allocated for development, Honiton Town Council would ask that the original boundaries be reinstated.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Honiton Town Council wishes to ensure that its objections are put to the Planning Inspector by a representative of the Council.

Organisation (where relevant): Historic England

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Honi_07 and Honi_12: Sites Honi_07, Honi_12 and adjacent site allocation Honi_13 surround the grade II* Church of St Michael and All Angels and lych gate, and its associated grounds, on three sides. Its prominent position on higher ground at the edge of the settlement contributes to its significance. Close to the church is the associated grade II listed Former Sextons House. The church is now closed and seeking a new use; it is on the Heritage at Risk Register. Depending on its location and scale there is potential for development of land around the church to result in harm to the significance that the church derives from its setting. Please see our separate comments on Honi_13 below, which we recommend should be removed from the Plan. We are also concerned about the potential for built development in Honi_07 to result in considerable harm to the immediate setting of the Lych Gate and Sexton's House, and potentially the church itself. It appears that at modest densities, the land within Honi_12 would be adequate to accommodate the stated residential capacity. We therefore request that clear wording is included in the policy to restrict future use of Honi_07 to open space, and potentially the site access, provided this can be located and designed to limit harmful impacts. Further clarity around key requirements for the remainder of the site (Honi_12) is also needed, consistent with NPPF paragraph 16(d). In particular, limits on building heights to conserve views of the church tower, and retention and strengthening of field boundaries as landscaping buffers. Bearing in mind the closed and 'at risk' status of the church, consideration should be given to ways in which development of the site could assist in securing the future of the church, e.g. as a community asset and through use of developer contributions.

Honi_13: Honi_13 is immediately adjacent to the grade II* Church of St Michael and All Angels with clear intervisibility between the site and the graveyard. Historic England has

formerly raised significant concerns about an application for five dwellings on this site. These are set out in our response to application 16/0145/FUL, which was subsequently withdrawn. It now appears that a single storey dwelling has been approved and is being constructed on the site in place of a former outbuilding.

Honi_18: The grade II listed Copper Castle former toll house and associated grade II listed gates form a legible entry point to Honiton. Development should seek to conserve and enhance the significance of these assets consistent with policies in the NPPF. This could be achieved by excluding development from the field parcel between Axminster Road and the drive to Hale Close Farm and ensuring that the proposed junction is carefully located and designed.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Honi_07 and

Honi_12: Amend the policy text as follows: “The site is in the Blackdown Hills National Landscape area and close to heritage assets, it will require very careful design to take account of its landscape setting and the setting of surrounding heritage assets. This should include limits on building heights, retention of field boundaries and creation of landscaping buffers. Land within the northern field parcel should be retained as an open green space with no built development, other than potentially a vehicle access, provided that the impacts of this can be appropriately mitigated.” The policy should require/promote (as appropriate) a linkage between development of the site and securing the future of the church, e.g. through developer contributions.

Honi_13: We recommend that Honi_13 is removed from the Plan.

Honi_18: Additional text for Honi_18 “Development should conserve the settings of the listed Copper Castle and gates, by keeping the eastern side of Axminster Road clear of built development, and through sensitive siting and design of the proposed access.”

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Strategic Policy SD03 seeks to allocate sites in Honiton for around 800 new homes and 17.9 ha of employment land. The majority of employment land (14.6 ha) is to be allocated at the western end of the town to enable extension of the existing Heath Park Industrial Estate near to the A30 Turks Head grade separated junction. It is noted that the site allocation is carried forward from the adopted Local Plan. Whilst the planned level of growth is considered unlikely to require strategic transport improvements, there is the potential for queuing interaction with the local highway network. It is therefore recommended that the policy wording for proposed allocations Gitti_03, Gitti_04 and Gitti_05 (Land west of Hayne Lane) should reference the need for development to avoid any adverse impacts in terms of SRN safety. Pedestrian access onto the A30 should also be suitably prevented and adequate pedestrian routes should be provided in vicinity of the site to discourage access onto the A30. 50. Residential development at the eastern end of Honiton has the potential to impact on the A35/ High Street mini-roundabout. We therefore support policy wording in respect of maximising opportunities to enhance sustainable travel modes.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: 18.

Further transport evidence submitted in support of the Publication Draft includes a traffic modelling exercise considering the SRN impacts of planned growth in the towns of Honiton and Axminster (TRI-22). The A30 at Honiton provides two grade separated interchanges, with the Turks Head junction located at the western end of the town and a second interchange with the A35 located at the eastern edge. The A35 provides onward access to Honiton town centre via an at-grade roundabout junction with the High Street. The A35 continues to the immediate south of Axminster and offers three all movement junctions to access the town, known as Yarty Bridge, Abbey Gate and Symonds Lane. National Highways has reviewed the submitted assessment work and is writing separately to East Devon Council and Devon County Council regarding the assessment work undertaken. Key comments include the following, and are reflected in subsequent comments on Policy wording for the Regulation 19 plan, or will be reflected in a future Statement of Common Ground with East Devon Council: Planned development in Honiton will impact the A30 Turks Head junction, A30/ A35 interchange, and A35/ High Street roundabout. Whilst some allocations are carried forward from the adopted Local Plan, they have not yet come forward for development and it is appropriate to consider their cumulative impact. Estimated traffic flow increases at the Turks Head junction peak at 80-90 vehicles per hour for movements to/ from the west. Increases at the A30/ A35 interchange are around half this figure. Whilst the increases are considered unlikely to trigger a requirement for a change in slip road layout – as demonstrated by the Devon County Council work – National Highways will undertake its own review of the continued safety of the slip road layouts given projected increases in demand. No operational assessment has been undertaken for the nearby Exeter Road mini-roundabout. Operation of this roundabout has the potential to generate queuing back towards the A30. It will be imperative that future applications for development in Honiton consider the operation of this junction, to ensure that queuing does not impact on the safety and efficiency of the SRN. Development at the eastern end of Honiton will place further pressure on the A35/ High Street junction. The junction is constrained and

will be sensitive to peak hour traffic increases. It will therefore be important to ensure that new development at the eastern end of the town is integrated into existing active travel and public transport networks to avoid car-dependent development.

Organisation (where relevant): Fisher German LLP

Other party name (if relevant): National Grid Electricity Transmission (NGET)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We have identified that one or more proposed development sites are crossed or in close proximity to NGET assets. Details of the sites affecting NGET assets are provided below:

Land south of Northcote Hill – north of the railway (GH/ED/39a) 4YA ROUTE TWR (002 - 112): 400Kv Overhead Transmission Line route: AXMINSTER – EXETER & CHICKERELL - EXETER

A plan showing details of the site locations and details of NGET assets is attached to this letter. Please note that this plan is illustrative only. NGET also provides information in relation to its assets at the website below: <https://www.nationalgrid.com/electricity-transmission/network-and-infrastructure/network-route-maps>

NGET advocates the high standards of design and sustainable development forms promoted through national planning policy and understands that contemporary planning and urban design agenda require a creative approach to new development around high voltage overhead lines and other NGET assets.

Without appropriate acknowledgement of the NGET assets present within the site, these policies should not be considered effective as they cannot be delivered as

proposed; unencumbered by the constraints posed by the presence of NGET infrastructure.

New Infrastructure

Currently there are no known new infrastructure interactions within the area, however demand for electricity is expected to rise as the way NGET power our homes, businesses and transport changes. As the nation moves towards net zero, the fossil fuels that once powered the economy will be replaced with sources of low-carbon electricity, such as offshore wind farms.

The UK Government has committed to reach net zero emissions by 2050. This means achieving a balance between the greenhouse gases put into the atmosphere and those taken out. Decarbonising the energy system is vital to this aim.

NGET's infrastructure projects in England and Wales will support the country's energy transition and make sure the grid is ready to connect to more and more sources of low carbon electricity generated in Britain.

The way NGET generate electricity in the UK is changing rapidly, and NGET are transitioning to cheaper, cleaner and more secure forms of renewable energy such as new offshore windfarms. NGET need to make changes to the network of overhead lines, pylons, cables and other infrastructure that transports electricity around the country, so that everyone has access to clean electricity from these new renewable sources.

These changes include a need to increase the capability of the electricity transmission system between the North and the Midlands, and between the Midlands and the South. It is also needed to facilitate the connection of proposed new offshore wind, and subsea connections between England and Scotland, and between the UK and other countries across the North Sea.

Accordingly, we request that the Council is cognisant of the above.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We propose modifications to the above site allocations and/or policies to include wording to the following effect. We propose that these modifications are applied to each of the aforementioned site allocations affected by NGET assets:

SD03: Land south of Northcote Hill – north of the railway (GH/ED/39a)

"The potential impact of the existing overhead transmission line route on design and layout should be taken into account at the pre-application stage through early engagement with National Grid."

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: We are fully supportive of this allocation and consider this site as fully suitable for development.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

We are fully supportive of this allocation and consider this site as fully suitable for development. The site sits on the very edge of Ottery St Mary. The site is directly adjacent to the B3174 Road which directly connects to the A30 at Daisy Mount Interchange to the east (which is less than 2 miles from the site). This site is on the most accessible side of Ottery St Mary with excellent connectivity. The site is within easy walking distance of the Town Centre. The site allocation of 90 dwellings can easily be accommodated (including affordable provision). DCC intends to preserve part of the site for a potential primary school which would be sized to initially deliver a 210 place primary school (but with the site being capable of expanding to a 420 place primary school). DCC is also committed to preserving an area of land, which would be suitable for a teaching block of at least 8 classrooms and also provide some additional ancillary land, if identified as necessary, for a future expansion of Kings School. The site is also fully capable of providing Public Open Space, a community access areas, BNG, and an environmental area. The site was subject to an outline planning application in 2020 (East Devon Planning Reference 20/1504/MOUT). This application was refused in large part, as it was an exception site and not included in the Local Plan. This will be resolved if the site is included in the Local Plan, following examination. The 2020 Outline

Planning Application was recommended for approval by East Devon Planners and the application process had positively resolved the vast majority of issues to bring this site forward. The core issues being the following: Site Access – In the 2020 application it was proposed that a roundabout was constructed on the B3174 on the south west quadrant of the site. This roundabout would support both development on Thorne's Farm and the land to the south of the B3174 which has now been identified in the emerging East Devon Local Plan. This was widely accepted as a good access solution. It was proposed that the development created a spine road through the site which connected to Cadhay Lane on the north east corner of the site. The new spine road provided opportunities to reduce traffic or even make part of Cadhay Lane outside Kings Schools access only. The Outline Planning Application provided positive solutions to provide footways to connect into the existing footpath network to Barrack Road and beyond. The site was to include a network of footways and cycleways to provide good permeability for pedestrians and cyclists. Drainage – The planning application proposed that the site was drained into the watercourse on the northern boundary of the site through a mixture of gravity and pump drainage. These subs solutions were accepted by the Local Authority Flood Team. Topography and Visual Impact – The site gently inclines from east to west and with the western boundary of the site being the higher. The site also slopes towards the B3174. A full Landscape Visual Impact Assessment was undertaken as part of the application by NPS Group and this identified the Visual Impact as low based on a number of viewing points, which were agreed with East Devon Planners. This Visual Impact Assessment was not presented at the Planning Committee. Landscaping and Design – The 2020 Planning Application anticipated that the vast majority of trees and hedges could be preserved and there were good opportunities for additional tree planting within the site, both to improve attractiveness and further mitigate visual impact. The previous application was intended to provide a welcoming 'street scene layout' and pick up design element from the local area. Site Viability - In 2020 a joint viability assessment was commissioned by DCC and EDDC. This assessment concluded that - "the application site is sustainable and suitable for the provision of affordable housing being well located to the Town Centre and accessible to services, transport links, facilities and employment opportunities". Site Layout – The 2020 planning application layout clearly demonstrated that 150 residential units, a primary school site, an area of land preserved for secondary education and an environmental area could all be accommodated successfully on the site. The current proposal for the development of 90 residential units, education areas and other facilities can therefore be comfortably accommodated. Overall – There can be high confidence that this site is deliverable based on the significant body of work that was submitted and accepted as part of the 2020 Outline Planning Application.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: We are fully supportive of this allocation and consider this site as fully suitable for development.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: We would like to participate in the hearing to address any objections that may be raised in relation to this allocation.

On behalf of our client, Mr M.J. Nancekivell and Mr R.P. Nancekivell ('the Landowner'), we set out representations to the East Devon Local Plan Regulation 19 Consultation (the 'Draft Plan') in relation to land at Barrack Farm, Ottery St Mary ('the Site') The Site (Plan 1) is identified as a draft allocation (Otry_01b) for housing and employment development (70 homes and 1.25ha of employment land) in the Draft Plan. The purpose of these representations is to: 1 Outline the need for additional housing numbers in the Draft Plan. 2 Support the allocation of the Site for housing/employment and demonstrate the site is suitable, available and deliverable. 3 Demonstrate that the Site has capacity to deliver circa 90 homes (rather than 70) and 1.25ha of employment land, optimising its potential. 4 Comment on other policies in the plan insofar as they relate to the promotion of housing/employment development at the Site. The Landowner has other land interests in Ottery St Mary and we have submitted separate representations in relation to land at Gerway Farm (draft allocation ref. Otry_21). Strategic Overview and Housing Need We have provided a full assessment of the Draft Plan's strategic policies and the approach to meeting District-wide housing need in our representations to Otry_21. We do not repeat those details here but note the following headlines, because they support the principle that the capacity of allocated sites should be maximised where possible: 1 EDDC is proposing to reduce its rate of housing delivery below that achieved over recent years; 2 The approach to the NPPF's 'transitional arrangements' is flawed and EDDC cannot simply plan for 80% of its up-to-date housing need. The Draft Plan must be revisited to plan for its full need i.e. 1,188 dwellings per annum, over the plan period; 3 The approach to a phased housing trajectory does not comply with national policy. Planned delivery must meet or exceed the annual housing need figure; EDDC cannot plan to underdeliver for the first

11 years of its Plan and then make up for this in the latter years – this has significant implications for social and economic growth and will have resultant impacts on, for example, affordable housing and the wider housing crisis; 4 The Draft Plan does not deliver a 5YHLS with requisite buffer (20%) and will therefore immediately fail NPPF para. 78(c); and 5 There is an overreliance on the large/complex sites, particularly the new settlement. This includes a flawed approach to its assumed delivery rates (too soon in plan period, with implications for 5YHLS, and overestimated total delivery across the plan period). In conclusion, the Draft Plan is therefore not planning for sufficient housing across the full plan period and must be amended to plan for its full up-to-date housing need. There is a particular need to identify land to deliver additional housing numbers in the early-mid plan period and feed into 5YHLS. Housing numbers to one side, the Landowner supports the spatial approach to housing delivery across the settlements in East Devon, including the recognition that Ottery St Mary as a Main Centre should support significant development over the Plan period. It is therefore well placed to deliver some of the additional housing need for East Devon. Policy SD04: Ottery St Mary and its development allocations Land at Barrack Farm – Otry_01b Our client supports the allocation of Barrack Farm (Policy SD04, Otry_01b) for housing and employment use; the Council clearly recognises that the Site is suitable and available. In accordance with NPPF para. 130(a), however, policies should ensure that developments make optimal use of the potential of each site to meet as much of the identified housing need as possible. This also aligns with draft policy DS02 (efficient use of land). These representations explain that, through technical assessment and initial design concept work, the Site has capacity to deliver circa 90 homes and 1.25ha of employment land. Policy SD04 (Otry_01b) should be redrafted to reflect this. Housing Numbers The accompanying Vision Document (VD) (Annex 1) sets out a summary of the preliminary technical work undertaken to assess the constraints/opportunities of the Site, followed by initial design concepts to inform an indicative framework plan with developable areas. Based on relatively low densities of circa 35 dwellings per hectare (suited to this context) this clearly demonstrates the Site has capacity to accommodate a further 20 homes (in addition to the 70 homes referenced in the current draft allocation), plus the 1.25ha of employment land. This will assist in supporting East Devon to meet its increased housing need. The Site Selection Report (SSR) for Ottery St Mary states that the site is suitable for residential development at 30dpha, but no justification is given for the density stated, and the Methodology states that final allocation density will be determined in line with Stage 3: Site assessment: “The yield shown at the start of the site assessment is calculated using the maximum in the HELAA methodology. The site assessment may indicate that this should be reduced, for example to take account of landscape, ecological, or historic environment features; to achieve a higher yield in particularly accessible locations; or to reflect Local Plan consultation responses. Where this is the case, the yield will be adjusted to ensure that the Local Plan reflects a realistic site potential, and commentary will highlight parts of

the site where density should be lower or built development avoided.” (para. 1.25). For allocation ref. Otry_01b this must be adjusted to reflect the detailed technical work undertaken and optimise the potential of the Site. This would ensure draft Policy SD04 accords with the NPPF and draft policy DS02 (efficient use of land). Summary of Technical Assessment

Landscape and Visual Impact The accompanying VD includes a landscape and visual appraisal (pg. 10) which explains that the site: 1 Is of ‘Medium Value’ as ‘an ordinary landscape which is appreciated by the community but has little or no wider recognition of its value’.

2 While agricultural, it experiences urbanising influences including lit roads, built form and playing fields; and, 3 Has the capacity to successfully accommodate new development, with residential in the lower, eastern parts of the site opposite the existing urban edge, and employment land where the agricultural sheds are currently located.

Archaeology and Heritage The draft allocation requires further archaeological assessment prior to development. The Landowner has undertaken an archaeological assessment of the full extent of their interest at land parcel ref. Otry_01 (i.e. the draft allocation plus the fields immediately to the west), which identifies a short-lived early 19th century infantry barracks on the Devon Historic Environment Record towards the eastern end. The exact siting is unknown, but this is not a constraint that would prevent the development of the site subject to the draft allocation (ref. Otry_01b), and as shown in the framework plan in the accompanying VD. There are a number of listed buildings within 1km of the site and the Ottery St Mary Conservation Area covers the historic Town centre and lies 630m to the east of the site at its closest point. As a result of local topography and modern development activity, no potential impacts on the setting of designated or non-designated heritage assets have been identified.

Highways and Access We support the approach to coordinating the access between the two allocations Otry_01b and Otry_09. However, the responsibility for delivery of an

access to facilitate both allocations is only included within the wording of the Barrack Farm allocation (Otry_01b). This assumes responsibility of Otry_01b only, which is not justified, nor is this necessarily feasible. Draft Policy SD04 Otry_01b requires the site to ‘provide a harmonized access and interaction with Land at Thorne Farm (Otry_09)’. It should simply be required to provide an access which does not fetter the potential for access to Otry_09, illustrating how both site entrances would work in harmony once both sites are delivered. These representations are accompanied by a Highways and Transport Technical Note (Annex 2) (HTTN), which explains that the Site: 1 Is suitable for development for around 90 dwellings and 1.25ha of employment land because a range of facilities and services are readily accessible by walking, cycling and public transport, meeting the requirements of draft Strategic Policy TR01 (walking, wheeling, cycling and public transport). 2 Vehicular access can be achieved from the unnamed road to the east of the allocation. 3 A safe pedestrian route can be provided through the Site to accommodate connections to the proposed commercial units. Detailed requirements for a travel plan/transport statements/transport assessments (draft Strategic Policy TR03) and regarding car/cycle parking and charging points can be addressed at the detailed design stage (draft Strategic Policy TR04: Parking standards - Residential).

The Transport Technical Note explains that analysis has been undertaken (using DataShine Commute) to establish the likely trip distribution for about 90 houses and 1.25ha of employment land. It confirms vehicles will disperse within the road network in Ottery St Mary and this is not likely to result in an unacceptable impact. It is concluded that satisfactory access can be achieved and the Site is deliverable from a transport and movement perspective. We are aware that the site is within the Aerodrome Safeguarding outline area. However, residential development will not exceed three storeys, nor will it have high structures, and it will therefore not interfere with radio signals or create bird strike hazards.

Flooding The Technical Note on Flooding, Water Efficiency and Green & Blue Infrastructure at Annex 3 explains that: 1 The site is within fluvial Flood Zone 1 and is at very low risk of flooding, and therefore no flood mitigation is required; 2 A flood risk assessment will be prepared to support a planning application due to a site area of

over 1ha, as per national requirements; 3 Surface water flooding can be accommodated through a comprehensive drainage network, including use of sustainable drainage systems; and, 4 Water efficiency can be addressed at the detailed design stage and can be achieved through the installation of reduced water fittings and water butts as needed. There are no flood risk or drainage matters that would preclude development of the Site for about 90 houses/1.25ha of employment land and any proposal would accord with the requirements of draft Strategic Policy AR01 regarding Flooding.

Ecology The accompanying Ecology Appraisal (EA) (Annex 4) confirms that the site is not affected by; 1 Any habitat designations; and, 2 Has limited ecological value. The Site does provide suitable habitat for a range of species including protected species such as badgers and dormouse. Habitats of higher value are trees, hedges and the riparian corridor associated with the River Otter, which would be unaffected by the draft allocation. Ottery St Mary is an inherently sustainable location for housing growth and the site is highly deliverable. It is anticipated to come forward in the early-mid Plan period. The Landowner strongly supports the allocation of land at Barrack Farm under draft Policy SD04 (Otry_01b) and is committed to working collaboratively with EDDC to ensure a robust policy context that supports the delivery of housing and employment on the Site. As is typical of a site subject to a draft allocation at Regulation 19 stage, there are some elements of the proposed land use quantum which require refinement; these are set out in the above representations and accompanying technical reports with the objective of ensuring the site's potential is optimised and contributes suitably to East Devon's housing need.

We trust this assists in refining draft Policy SD04 (Otry_01b) and would welcome minor updates on this basis, in accordance with the NPPF and other policies of the Draft Plan. Please do not hesitate to contact me or my colleague Sophie White should you require any clarification

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

In light of the above, we propose that the wording of policy SD04 with respect to Barrack Farm be amended to: “Barrack Farm (Otry_01b) This land at Barrack Farm, is allocated for around 90 new homes and up to 1.25 hectare of employment land provision, to be provided in accordance with Strategic Policy SP04. Archaeological assessment will be required prior to development commencing and will need to inform development proposals. The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes. Development at this site should not fetter the potential for access to Otry_09, illustrating how both site entrances would work in harmony once both sites are delivered.” We also propose that the wording of policy SD04 regarding Land at Thorne Farm (Otry_09) is amended to reflect the need for joined up thinking in respect of access: Land at Thorne Farm (Otry_09) This land, which lies west of the town and adjacent to the sports centre and school, will provide around 90 new homes as well as space for an educational facility. Further flood risk assessment is required and an undeveloped buffer should be maintained to protect the County Wildlife Site and Ancient Woodland to the north west of the site. Development at this site should not fetter the potential for access to Otry_01b, illustrating how both site entrances would work in harmony once both sites are delivered”.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

1.1 These representations are submitted on behalf of Mr M.J. Nancekivell and Mr R.P. Nancekivell ('the Landowner') in response to the East Devon District Council's (EDDC) Local Plan Draft 2020-2042 Regulation 19 Consultation Document (the 'Draft Plan'). They relate to the Landowner's interest in Ottery Saint Mary (OSM) at Gerway Farm (the Site, Plan 1), to the southwest of OSM, capable of delivering 150 homes.

1.2 The site comprises: 1 Land to the east, which is allocated for housing development (70 homes) in the Draft Plan (Policy SDo4 Otry_21) and referred to as the "eastern parcel". 2 Land to the west, which is unallocated but represents a viable and logical opportunity to delivery more houses (about 150 units across both land parcels), referred to as the "western parcel". 3 Additional land under the same ownership which is available for Biodiversity Net Gain and green/blue infrastructure to support the delivery of the housing allocation, referred to as the "additional land".

Plan 1: The Site

Source: The Richards Partnership. Reproduced from the Ordnance Survey Map with permission of Her Majesty's Stationery Office (c) Crown Copyright Licence no 100046803.

Pg 1

1.3 The purpose of these representations is to: 1 Explain that the Council's assessment of housing need is flawed such that more sites need to be allocated. 2

Support land to the south of Ottery St Mary as a suitable and sustainable location for growth, as acknowledged by the draft allocation. 3 Promote land to the west of the site as an extension to the draft allocation. 4 Demonstrate the suitability and deliverability of the wider site for comprehensive development to deliver around 150 homes. 5 Comment on other policies in the plan insofar as they relate to the promotion of housing development on our Landowner's site.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

In light of the above, we propose that the wording of policy SD04 with respect to Barrack Farm be amended to: "Barrack Farm (Otry_01b) This land at Barrack Farm, is allocated for around 90 new homes and up to 1.25 hectare of employment land provision, to be provided in accordance with Strategic Policy SP04. Archaeological assessment will be required prior to development commencing and will need to inform development proposals. The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes. Development at this site should not fetter the potential for access to Otry_09, illustrating how both site entrances would work in harmony once both sites are delivered." We also propose that the wording of policy SD04 regarding Land at Thorne Farm (Otry_09) is amended to reflect the need for joined up thinking in respect of access: Land at Thorne Farm (Otry_09) This land, which lies west of the town and adjacent to the sports centre and school, will provide around 90 new homes as well as space for an educational facility. Further flood risk assessment is required and an undeveloped buffer should be maintained to protect the County Wildlife Site and Ancient Woodland to the north west of the site. Development at this site should not fetter the potential for access to Otry_01b, illustrating how both site entrances would work in harmony once both sites are delivered".

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

3.1 The Ottery St Mary Site Selection Report (February 2025) (SSR) identifies 15 sites for potential residential and commercial development in Ottery St Mary. The selection of sites for allocation within the SSR is completed in accordance with the published Site Selection Methodology. The SSR, and Draft Plan policy SD04, allocate: 1 Barrack Farm (Otry_01b): 70 dwellings, 1.25ha employment land; 2 Thorne Farm (Otry_09): 90 dwellings, educational facility; 3 Salston Barton (Otry_10): 20 dwellings; 4 Bylands (Otry_15): 8 dwellings; 5 Strawberry Lane (GH/ED/27): 60 dwellings; and, 6 Gerway Farm (Otry_21): 70 dwellings.

3.2 The Landowner is fully in support of the approach to allocate development in and around Ottery St Mary, a sustainable location. In response to the housing need assessment provided in Section 2.0 of this Statement and the settlement hierarchy established in policy SP01 of the draft Plan, Ottery St Mary can accommodate further growth in line with its Main Centre Status, assisting with delivery of the additional housing needed by EDDC. Strategic Policy PB06: Local Nature Recovery Strategy and Nature Recovery Network

5.23 Strategic Policy PB06 of the Draft Plan addresses the Local Nature Recovery Strategy and Nature Recovery Network.

5.24 The accompanying EA notes that the limitation of provision of off-site biodiversity provision only within the overall NRN could limit opportunities to deliver otherwise important ecology and biodiversity gains in alternative locations.

Pg 21

5.25 The proposed allocation provides opportunities to protect and enhance habitats in the area, particularly the riparian corridor of the River Otter, and therefore complements Strategic Policy PB06.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Land at Gerway Farm – Draft Allocation Otry_21

3.3 Part of the land under the Landowner’s control is allocated (Otry_21, see Plan 1 above) “for 70 homes” under draft Policy SD04. Our Landowner supports this policy subject to: 1 Capacity for all allocations should be consistently referred to as ‘around’ or ‘about’ (aligned with some of the other draft allocations) rather than fixing this at a set number, to build in the necessary flexibility and reflective of the fact that detailed design has not yet been undertaken; and 2 The allocation should be expanded to include the land immediately to the west (see Plan 1 for expanded allocation area) to deliver a total of ‘around 150 units’. This is covered under Section 4.0 to follow.

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Land at Gerway Farm – The Expanded Allocation

3.4 The Ottery St Mary SSR considered the Landowner's interests under two separate site references – see GH/ED/29a and GH/ED/29b at Plan 2 below. Pg 10

Plan 2: GH/ED/29 Site

Source: Ottery St Mary Site Selection Report

3.5 The Council's assessment of GH/ED/29a (then draft allocated) and GH/ED/29b is the same for "infrastructure", "landscape", "historic environment", "ecology", "accessibility" and "contribution to spatial strategy". On this basis, and given that GH/ED/29a was found to be suitable for allocation, it would be consistent and logical to also allocate the expanded area proposed at Plan 1.

3.6 The Council has concluded in the SSR that GH/ED/29b should not be allocated because: 1 It forms an unacceptable extension into open countryside: Given the excessively large extent of GH/ED/29b assessed in the SSR, this appears to be a

reasonable conclusion. 2 It has inadequate access arrangements: Given the single point of access, and assuming the development of 200 units, this appears to be a reasonable conclusion. 3 It is an unacceptable large scale: If this point is linked to the extent of the red line and the ability to access 200 units off a single access, this would appear to be a reasonable assumption. However, there is no evidence that the scale of development would be unacceptable against other indicators, including ‘infrastructure’ and ‘accessibility’.

Pg 11

Critically, if a smaller area had been assessed – such as the land subject to this representation – a different conclusion would arise. 4 The Council also identifies further reasons for not allocating GH/ED/29b but these fall away for the smaller area subject to these representations. For example, parts of the site are constrained but these are not insurmountable issues for the site extent now proposed for allocation. The SSR constraints can be addressed as: a The site is irregularly shaped and comprises grade 2 and 3 agricultural land: Whilst this is applicable to wider GH/ED/29b (i.e. the land to the south is largely Grade 2), the proposed expanded allocation area shown at Plan 1 is largely grade 3 agricultural land with some small areas of grade 2 agricultural land in the southern area of the land parcel. It is also important to confirm that the allocation extent in the Draft Plan (GH/ED/29a) contains a similar proportion of Grade 2 vs Grade 3 land, demonstrating this was accepted by EDDC. b Part of the site is within floodzones 2 and 3: None of our Landowner’s site is in flood Zone 3. A small part is within flood zone 2 (associated with low lying land) and we explain in Section 4.0 that any risks can be mitigated through reprofiling and a suitable drainage system. c

Potential access to Claremont Field would need to cross a band of floodplain: This does not apply to the promotion site because development can be accessed without requiring a new vehicular access to Claremont Fields; access can be taken from Sidmouth Road. The existing Public Right of Way will be retained and as per above any flood risk can be managed. d A small area of surface water flood risk crosses the site: A small area of surface water flood risk is within GH/ED/29a. Remaining surface water flood risk broadly follows the fluvial Flood Zones 2 and 3 that runs north-east to north-west across the northernmost part of the site, which can be managed as per above. e The HSE major hazard pipeline runs through the southern edge of the site and the consultation zone extends to cover approximately 4.2ha of the site (approx. 0.35ha of which is also floodplain). We have received confirmation from HSE that there are no implications for the expanded allocation site (Appendix 5). f Electricity wires cross the site and would need to be undergrounded: Electricity lines cross our Landowner’s ownership and can be re-routed or undergrounded at the application

stage. This ‘constraint’ would not preclude residential development. g It is very sensitive in heritage terms: We assume this is a reference to historic field enclosure pattern to the south of our Landowner’s ownership. As per draft allocation Otry_21, further evaluation will be needed but we explain below that geophysical surveys currently suggest no archaeological interests that would require preservation in situ. h It is visible in long range views: We understand that the Council might be concerned about the impact of development across the whole of GH/ED/29b. However, Otry_21 was found to be acceptable in landscape terms and the principles would apply to the expanded allocation area. We comment further on landscape and visual impacts at Section 4.0 below.

Pg 12

3.7 In assessing GH/ED/29b, the Council misdirected itself by not looking at this area at a finer grain. The constraints – and apparent weaknesses - are not equally applicable across the whole site. Notably, the constraints do not affect the expanded allocation area to the same degree and the site promoted in these representations is more akin to the assessment of Otry_21 and can therefore be allocated. Pg 13

4.0 Suitability of the Promotion Site for Allocation

4.1 The Landowner is proposing that Otry_21 is extended as shown on the framework plan below to form ‘Amended Allocation Otry_21’, delivering a total of about 150 houses. This is hereafter referred to as ‘the site’.

Plan 3 Framework Plan for Extended Allocation

Source: The Richards Partnership

4.2 The site is suitable for housing. The Vision Document (Appendix 1) explains that a well- conceived scheme can be delivered which responds positively to the site’s context, achieves ecological enhancement and creates an appropriate landscape setting. Overall, housing can be delivered on the current draft allocation (eastern parcel) and the western parcel. It would be possible to provide extensive landscaping. Beyond this, further to the west, a significant area of land could be utilised to achieve a well-connected network of publicly accessible green and blue infrastructure.

Landscape and Visual Impact

4.3 The Vision Document explains that: 1 Only limited parts of the site will be visible in views from the footpath network to the south. From most views, the site will be seen on the context of existing built development. 2 View from Sidmouth Road to the south would be occasional glimpses. The site is well screened by high hedgerow and roadside banks. 3 Views from publicly accessible locations in the wider landscape are well contained, screened by hedgerows/woodland block or viewed against the backdrop of existing development.

Pg 14

4.4 Extensive landscaping could be accommodated on site. Existing trees and hedges can be retained, managing the impact of development in the local context.

4.5 The site is located approximately 1.5km from the East Devon National Landscape. From its boundary, the town is seen in distant views. The changes at the site, viewed from the edge of the Natural Landscape would 'read' in the context of existing development. As a result, we would expect the special qualities that contribute to the landscape and scenic beauty of this part of the Natural Landscape to be conserved and that its setting would not be materially altered by this development.

Transport and Access

4.6 Connect Consultants has prepared a Highways and Transport Technical Note (Appendix 2). It explains that the site: 1 Is suitable for development because a range of facilities and services are readily accessible by walking, cycling, and public transport, meeting the requirements of draft Local Plan Strategic Policy TR01 (walking, wheeling, cycling, and public transport). 2 There is capacity in the highway network to accommodate about 150 houses with no unacceptable impact on the local road network. 3 Vehicular access can be achieved from Sidmouth Road. An initial design of a simple T- junction is achievable and suitable for about 150 homes. 4 A safe segregated pedestrian route can be created from the site along the western side of Sidmouth Road to connect to the existing pedestrian footway at Gerway Close, from where there is a continuous pedestrian route into Ottery St Mary. 5 Pedestrian routes within the site can accommodate the existing Public Rights of Way and link through to Claremont Field.

4.7 Detailed requirements for a travel plan/transport statements/transport assessments (draft Strategic Policy TR03) and regarding car/cycle parking and charging points can be addressed at the detailed design stage (draft Strategic Policy TR04: Parking standards - Residential).

4.8 The site is within the Aerodrome Safeguarding outline area, but residential development will not exceed three storeys, nor will it have high structures, and it will therefore not likely interfere with radio signals or create bird strike hazards.

4.9 In assessing Otry_21 and GH/ED/29b, the Council notes in the SSR that: “Sidmouth Road at this point is a reasonably wide C-class road, potentially capable of accommodating additional development and associated movements in itself. However, the road narrows significantly towards Sidmouth to the south and access into and through Ottery is constrained by narrow roads and a single route through the town centre. Further investigation may be required to determine if more significant highways improvements (bypass/distributor road) might be necessary. Development of the site has the potential to impact on Junction 29 of the M5, which suffers from congestion at peak periods.”

Pg 15

4.10 The Transport Technical Note explains that analysis has been undertaken (using DataShine Commute) to establish the likely trip distribution for about 150 houses. It confirms that traffic effects during the weekday AM and PM peak hours are likely to be in the region of: 1 An additional 64 vehicles in the AM peak and 59 in the PM peak are likely to travel on Sidmouth Road north of the Site, which will disperse within the road network in Ottery St Mary. This equates to an average of approximately one additional vehicle per minute, which is not likely to result in an unacceptable impact. 2 Only 10-13 additional vehicles are shown to travel on Sidmouth Road south of the Site during the AM and PM peak hours. Again, this is not likely to result in an unacceptable impact.

4.11 The Transport Technical Note concludes that satisfactory access can be achieved. The promotion site is deliverable from a transport and movement perspective. Heritage and Archaeology

4.12 There are no heritage issues above or below ground that would preclude the site being allocated. Of note; 1 A desk-based heritage assessment and geophysical survey of site GH/ED/29 (including the promotion site) were undertaken by the Council in 2023. They provide evidence of archaeological potential and suggest that the promotion site may have been part of the open field system associated with the town in the later medieval period. The field pattern survives in part to the south of the promotion site, but otherwise has been eroded through the removal of hedgerows to create larger fields for modern farming. 2 The geophysical survey recorded sub-surface remains of the former field boundaries within the promotion site. There is potential to restore some of

the lost boundaries as part of the proposed green infrastructure, presenting a heritage benefit. 3 There are no indications that any of archaeological features would be of the higher level of significance that would warrant preservation in situ.

4.13 In summary, as per the existing Otry_21, no heritage constraints have been identified that would prevent development on the promotion site. Ecology

4.14 The SSR explains that Otry_21 and GH/ED/29 would result in a predicted “minor adverse effect...(not significant)” on Ecology. The same conclusion applies to the expanded allocation i.e. the site.

4.15 The Ecology Appraisal (EA) (Appendix 3) confirms that the site is not affected by; i any habitat designations; and ii has limited ecological value.

4.16 It does provide suitable habitat for a range of species including protected species such as badgers and dormouse. Habitats of higher ecological value are trees, hedges, and the riparian corridor associated with the River Otter.

Pg 16

4.17 The initial Framework Plan shows that mitigation can be designed into the development, including the retention of trees and hedgerows, additional planting and the management of a significant area of green space to the west of the site for biodiversity gain. The need for further mitigation can be addressed at the planning application stage.

4.18 A protected belt of trees is identified along the western boundary of the wider site to be used for green space, and further protected trees in the northwestern point of the wider site, and many mature and veteran trees are noted within the SSR.

4.19 The site is located within the East Devon Pebblebed Heaths SAC HRA mitigation zone. There is an adopted strategic mitigation solution, The South-East Devon European Sites Mitigation Strategy, involving financial contributions, with which the Otry_21 and the promotion land can also comply (EA para 3.6).

4.20 There are no issues that would preclude housing development on the site. At least 10% Biodiversity Net Gain (BNG) in accordance with statutory requirements can be achieved given scale and control of the site. Emerging policies can be satisfied; 1

Strategic Policy PB01, protecting internationally and nationally important wildlife sites. 2 Policy PB03 of the Draft Plan, irreplaceable habitat and habitat features,

such as hedgerows, will be maintained. 3 Strategic Policy PB04, which sets out mitigation measures with respect to the Pebblebed Heaths Habitats Site would be adhered to in line with the South-East Devon European Sites Mitigation Strategy. 4

Policy PB07, which outlines design expectations for ecological enhancement and biodiversity in addition to BNG. 5 Policy PB08, which relates to the

accommodation of trees, hedges and woodland in built development. 6 Policy PB09, which outlines the approach to monitoring new planting schemes. Flooding and drainage

4.21 The Technical Note on Flooding, Water Efficiency, Green & Blue Infrastructure (Appendix 4) explains that: 1 A small area of land to the north of the site is within flood zone 2 and 3. The Vision Document shows that about 150 houses can be

developed on the site without any incursion into the flood zone. 2 There are pockets of land around the site boundary that are at risk from surface water flooding, but this is reflective of low-lying land and can be addressed through reprofiling and the introduction of suitable drainage systems. 3 Additional mitigation if needed, can be addressed by ensuring appropriate finished floor levels which can be fixed at the planning application stage. 4 Sustainable Drainage Systems will be utilised to control surface water runoff and ensure ecological benefits. The Vision Document shows scope for provision to the west of the site.

Pg 17

5 Water efficiency can be addressed at the detailed design stage and can be achieved through the installation of reduced water fittings and water butts as needed.

4.22 There are no flood risk or drainage matters that would preclude development of the site for about 150 houses and any proposal would accord with the requirements of draft Strategic Policy AR01 regarding Flooding.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Summary and suggested policy wording

4.23 The site is a deliverable and sustainable opportunity to help meet East Devon's housing in the early-mid Plan period.

4.24 The evidence above identifies; 1 The site is necessary to provide the additional housing numbers required for East Devon and could deliver about 150 new homes in total; 2 There will be no detrimental impact on the highways infrastructure; 3 The National Landscape is unaffected; 4 The site is well connected the town centre for pedestrians and cyclists; and, 5 Other technical policy issues relating to heritage, ecology and flood risk can be addressed at the planning application stage.

4.25 We propose that the boundary of allocation Otry_21 is as per the plan at Appendix 6 and that the wording of Strategic Policy SD04: Gerway Farm is amended as below (bold as additions and strikethrough as deletions): This Land at Gerway Farm, off Sidmouth Road, is proposed for about 150 houses and associated infrastructure 70 houses. Archaeological assessment is required prior to development. Flood risk assessment and measures to ensure that safe cycle and pedestrian access to nearby facilities can be achieved will be required."

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: 6 Land west of Cadhay Lane (GH/ED/26)

6.1 Site Summary and allocation benefits

6.1.1 As outlined in Section 2 this site is a suitable, appropriate, and sustainable location for residential development.

6.1.2 The local plan evidence is predicated on the entire site being allocated for development. However, the evidence fails to recognise that a smaller area of the site is being promoted that being the eastern part of the site where it adjoins Cadhay Lane and the playing field such that the site boundary mirrors the proposed allocation to the north. It should also be noted that the draft allocation site to the north is further from local services and arguably less sustainably location than site GH/ED/26.

6.1.3 All potential technical matters can be addressed through typical scheme design. Furthermore, Ottery St Mary is a wholly suitable and sustainable location for further housing growth. Its sustainability is evidenced by its designation as an Area Centre in the adopted and emerging Local Plan.

6.1.4 It is noted the site is within a revised proposed draft 'Green Wedge', as proposed elsewhere in the current Regulation 19 consultation. Further analysis of this is provided in section 4 of this document, however, in summary, the revised Green Wedge is unsound and is neither logical nor supported by sufficient evidence.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: [Details please refer to the attachment page.16-20]

6.1.5 KCS would support a partial allocation of the site for residential development, namely the two fields in the eastern part of the site (as identified in previous representations and summarised here). This would deliver a number of significant benefits, including:

- Development would provide a strong defensible boundary to the edge of Ottery St Mary,
- It would include high quality landscaping and public realm works in-keeping with the edge of settlement location,
- The landscaping and planting offer additional benefits in terms of biodiversity net gain.
- Ecological features can be provided within the site and/or on adjoining land.
- The site is within the least constrained area around the town in landscape terms as shown in the submitted comparison document.
- Vehicular access can be provided, without severe effects on the local highway network. The provision of highway improvements through a north / south link road through the allocation site would be a benefit for the local area.
- Further residential allocation in Ottery St Mary will aid the vitalisation of the town centre and be in line with the settlement hierarchy,
- The opportunity exists to connect into good bus, bicycle, and pedestrian links to key local services, facilities and employment sites, and
- This site can help meet housing requirement in the first five years of the plan period,
- It would deliver notable affordable housing in an area of need.

6.1.6 The site is an entirely sustainable, logical, and deliverable site which can meet local housing needs in the short to medium term.

6.1.7 As discussed in section 5 of this document, Ottery St Mary has the capacity to deliver a similar amount of growth as Axminster due to its sustainability as a Main/ Area Centre. Delivery of further allocations would bolster housing supply and create more certainty around the delivery of the ‘headroom’ supply.

6.1.8 Further, the site is also comparatively equal or better, sustainable, deliverable, and suitable in comparison with other sites put forward for allocation in Ottery St Mary.

6.1.9 In line with the NPPF, the site is deliverable as set out in the below table

Criteria
Site Specific Achievable

The site is under option to KCS Development Ltd and the timetable for delivery of homes on site is within 1-5 years, subject to planning. Suitable

There are no technical issues with the site that cannot be mitigated against.

Furthermore, the site is located in a sustainable area with access to a number of amenities and public transport links. Available

There are no ransom strips or legal issues and/ or covenants affecting development at the site.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: 5 Land at Strawberry Lane (site GH/ED/27)

5.1.1 This site has been promoted to the emerging Local Plan for East Devon since the initial Issues and Options Consultation in early 2021. Since then, a number of further consultations have taken place and the Council's evidence base has been progressed.

5.1.2 Policy SD04 outlines housing allocations in Ottery St Mary and Land south of Strawberry Lane is included under reference GH/ED/27. Below is the text from the allocation policy for the site: This land lies south of Strawberry Lane and is proposed for 60 houses. This allocation will need to be supported by further flood risk assessment work, details of special measures to be taken to protect ancient trees and measures to ensure that safe cycle and pedestrian access to nearby facilities and Ottery St Mary town centre can be achieved. Part of the site is at risk of flooding and a Level 2 SFRA has been undertaken, the results of which should be incorporated into the development. A sequential test has been undertaken as part of the local plan. The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes.

5.1.3 As stated previously, KCS supports the sound allocation of this land. The emerging plan is entirely sound in allocating the site.

5.1.4 All technical matters have been investigated and found that appropriate mitigation to any possible adverse effects can be addressed through the planning process. There is a current planning application (24/1716/MOUT) for outline consent for up to 65 dwellings, and almost all technical matters related to the development have been

resolved and/or are close to resolution. There are significant benefits associated with the proposals including affordable dwelling provision.

5.1.5 The planning application also considers the criteria set out in the allocation policy. Therefore, the application has been supported by Flood Risk Assessment work and measures to mitigate against this such as only locating built development in Flood Zone 1. Further, connectivity for pedestrians and cyclists has been a consideration in the design of the scheme with the existing PROW being retained but slightly diverted and an extra connection to the north of the site added. Further, it should be noted that no trees are to be removed for development.

5.1.6 Significant off-site highways improvement works are not required to bring this site forward. Highways modelling undertaken as part of the planning application demonstrated that the number of vehicle movements forecast to be generated by development at the site is low and can be accommodated.

5.1.7 There are sustainable access options for pedestrians/ wheelers both along Strawberry Lane and through existing developments, which link the site to the town centre and other nearby services.

5.1.8 The site can therefore make a meaningful contribution of the council's five year housing land supply position both immediately and within the local plan five year supply. Therefore delivery of this site is critical to the overall deliver of housing in East Devon and is fundamental to the soundness of the plan.

5.1.9 Further, in line with the NPPE, the site is deliverable as set out in the below table

Full name: Valerie ANSFIELD

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The average citizen is not in a position to verify this

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: It is notable is that at the meetings attended and contributed to by residents and Town representatives, sites GH/ED/27 & Otry-1 O were not selected for development (for many reasons including what follows) but they have somehow been included at a later stage thus prompting questions about due process. Continued as attached

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Sites GH/ED/27 and Otry-10 should be excluded from development sites allocated by virtue of the process adopted AND their lacking in viability. Suitable sites for the right type of housing in the right location should be sought instead.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: There's no indication that aspirations to provide such as suitable transport networks, education facilities, sports and recreation facilities can be

secured : simply requiring money of potential developers is only part of the implementation required. A comprehensive plan to achieve is required in all of this

There's no evidence in this that East Devon can require compliance from providers of Education, Transport Services etc that would meet the aspirations stated nor is doing so at present

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Full name: Christopher Bargmann

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

There are multiple issues with this allocation. The site is on agricultural land outside the designated built up area boundary which is contrary to both the EDDC Local Plan and the Ottery st Mary/West Hill Neighbourhood Plan.

There is a significant conflict of interests over this parcel of land. It is owned by Devon County Council who stand to gain financially (potentially significantly) from a future sale of this agricultural land if it is approved for housing developemnt. Commercial interests of the County Council cannot , and should not, be a driver for the allocation of unsuitable land when there are less controversial altenatives available in Ottery st Mary.

Access is a major problem with both Exeter Road and Cadhay Lane unsuitable for additional traffic. Potential access points will increase road safety risks. Proximity to the Kings School and Sports Centre are a significant concern wrt increased traffic volumes.

The property is a known flood risk - in particular the northern field where the brook suffered a major flood incident in 2008. Significant runoff from these fields onto Exter Road is also a regular occurence and will get worse if housing is allowed. Properties that are, or could be, impacted by runoff water/flooding are;

- The Ottery Sports Centre and AstroTurf sports pitch,
- The properties on Exeter Road, west of the Cadhay Lane junction,

- The Kings School,
- The Ottery st Mary Hospital,
- Thorne Farm and Thorne Farm Way,
- Portions of the Kings Reach housing development,
- Island Farm, and,
- The Finnimore Industrial Estate.

The long term visual impact of development on this site will be significant. The site is well above the existing build line and will be visible from numerous locations and viewpoints in the Ottery region. It will be detrimental to the appearance of the landscape. In addition the proposed scale of the housing development (±90 properties) is totally out of keeping with the rural setting of the site. It represents creeping urban sprawl into the rural environment surrounding Ottery st Mary which cannot be justified and the local infrastructure and services cannot support.

Approximately half of the Thorne Farm site falls within the Minerals Consultation Area defined around the outcrop of the Budleigh Salterton Pebblebeds (BSP) in the vicinity of Straitgate Farm. The BSP themselves are covered by a separate Minerals Safeguarding Area. The BSP are a principal source of sand and gravel in Devon, in particular because of the high quality crushable gravel content. Whilst the BSP are not geologically mapped as underlying the Thorne Farm site, they are mapped on the field to the west. Bedrock outcrop is rare and the presence of the BSP on the western side of the Thorne Farm site cannot be excluded. It is crucial to preserve mineral resources close to markets in order to meet sustainability and climate change requirements and this is enshrined in the Devon Minerals Plan. With expansion ongoing east of Exeter it would be short-sighted to sterilise a potentially viable sand and gravel resource by allowing the proposed development to go ahead. Development on the Thorne Farm site should be rejected as being contrary to the terms of the Devon Minerals Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The allocation of this land for housing is wholly unsuitable, it should be withdrawn as an allocation site. The

commercial interests of the County Council should not take precedent over the need for sensible development in Ottery st Mary

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Detailed above. the site is unsuitable for housing developemnt.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: The voices of local people should be heard on issues that affect their communities

Full name: JeromeBossuet

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I find the housing targets too high and unrealistic for the capacities of Ottery St Mary's infrastructures. It does not reflect the local Ottery development plan with some areas that were defined as unsuitable by the local council and the population.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: With only one bridge and bottleneck at Wiggaton, road to Alington and roads to the East, traffic situation is already problematic. Some infrastructure eg the pedestrian bridge over the Otter broken for over a year and half means very dangerous for school children. GP, dentists, primary school oversubscribed, some high street shops closing, don't see the point of putting more houses. Disjointed strategy, and the well-being of population is not taken into account. Air pollution rising.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Please consider realistic lower housing targets (see also housing stock) otherwise the town will lose its identity. Ottery target higher than Sidmouth, Seaton, Budleigh by far, why??

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Elizabeth Brown

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The average citizen is not in a position to verify this.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: It is notable that at the meetings attended and contributed to by residents and town representatives, sites GH/ED/27 and Otry_10 were not selected for development (for many reasons including what follows) but they have somehow been included at a later stage this prompting questions about due process. Continued as attached...

NOT SOUND. This is huge concern that sites GH/ED/27 & Otry_10 are outside of the built-up boundary and remote, from the town facilities and therefore not a sustainable location. No adequate details have been released on the special measures that need to be taken to protect ancient trees and hedgerows and no details on the measures needed to ensure safe cycle and pedestrian access to nearby facilities and Ottery St Mary town center can be achieved. In addition, so far it appears that the flood risk evaluation has been done from a desk and relies heavily on investigations carried out 10 years ago in 2015. Furthermore, there was no remedial work carried out in the vicinity after flooding affected properties in the Salston Barton area in 2008. The flood water came from the direction of the proposed development. Kings School (Ottery St Mary) and Ottery Primary School are at capacity. Coleridge Medical Centre is struggling to meet the needs of existing patients.

The EDDC has failed to respond to any questions and road safety concerns posed by local residents.

The above points are some of the major concerns but closer scrutiny of the East Devon Local Plan 2020-2042 reveal hugely concerning lapses in both due diligence and due process. Namely:

- In the current local plan this land was inserted AFTER the consultation period, and was removed when a local councillor spotted it and described it as UNDEMOCRATIC.
- In the appraisal of the development parcels around the district this parcel was NOT appraised in the same way as all the other locations especially with respect to views from the protected landscape (AONB), narrow road width, lack of pavement access, dominates existing settlement from high ground, joins up a hamlet to a town, exacerbates flood risk - these criteria INDIVIDUALLY were enough to rule out land parcels in all other locations - and inconsistencies in the utilisation of the neighbourhood plan with respect to the green wedge and the preservation of hamlets.
- During consultation EDDC were informed in person and in writing that Salston is a hamlet, and it appears in their report of the consultation process.
- The Senior Planning Officer denied knowledge that Salston is a hamlet to the Strategic Planning Committee whilst they were in committee (meaning that the public could not offer a correction for the record) - this should have been an integral part of the officers' preparation for the committee meeting and surely one of the first steps of evaluating any planning proposal.
- A member of the public raised an official complaint about the unacceptable way that the committee had been misled - the EDDC response was to accept the error and explain it as the officers cannot be expected to know everything. This is their job, they SHOULD be expected to know basic details such as this, the EDDC response was

unacceptable . If something is written in u report by the planning officers then one could reasonably expect that they might subsequently refer to it in preparation for committee.

Hypothetical. untested and unconsultcd plans for a potential pavement access were given to the Strategic Planning Committee in support of the rational

- No-one has answer d the residents of Sulston with regard to whether the development will make road -conditions more dangerous for existing residents.
- -one can provide assurances that any measures to ensure that flood risk for the re idents of al ton will not be exacerbated in perpetuity by extensive development on th lope above our houses, even if we don't take account of climate change projections, since several Salston properties have a history of flooding. Future management of flood risk management measures associated with the proposed development site (flood retention) cannot be legally enforced in perpetuity
- It is hard to feel listened to if the issues that we raise during statutory consultation both in person and in writing, are consistently ignored, as the EDDC have demonstrated repeatedly as the draft strategic planning process has progressed. This implies that consultation is treated as a necessary part of the wider process rather than an opportunity for the public to input, and this is UNDEMOCRATIC.

For residents of Ottery St Mary and Salston the above list of unexpected divergence from due process, starting with the current Local Plan, implies that EDDC strategic planning officers had decided a priori in their stated aim to 'join Salston up to Ottery St Mary' by linking Salston to the very extensive new development of Kings Reach. It is also manifestly unfair to expect Salston residents to endure further noise and disruption, even at weekends, of construction after many years more than originally planned of living nearby to construction related disruption at Kings Reach, and lesser so at Salston Manor.

Planning Inspectorate need to uphold our objections - these local plans are flawed on a number of extremely concerning levels and need to be returned for amendment.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Sites GH/ED/27 and Otry_10 should be excluded from development sites allocated by virtue of the process adopted and their lacking in viability. Suitable sites for the right type of housing in the right location should be sought instead.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: There's no indication that aspirations to provide such as suitable transport networks, education facilities, sports and recreation facilities can be secured: simply requiring money of potential developers is only part of the implementation required. A comprehensive plan to achieve is required in all of this.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Ottery St Mary has had an extremely high amount of development in the past 10 years, proportionately higher than neighbouring towns & villages. We have received no increase in services, in fact, we have received a significant decrease in services. In your FAQ's on why we need a local plan you state "In many cases communities have raised concerns about the impacts of development on the capacity of schools, doctors and other infrastructure, however these are common issues experienced by most communities not just in East Devon but across the country. The answer to this is for EDDC to work with infrastructure providers to deliver the infrastructure that is needed and where possible secure funding to support this". I have seen no evidence of this to date, so why should we believe this will happen in the future? The infrastructure needs to be put in place ahead of/alongside development, not trailing after when it is discovered there is no funding for these extra services.

In the past 10-15 years Ottery St Mary has lost its childrens centre (& the groups/advice they offered to new parents/families), it has lost its community hospital and Minor Injuries Unit, the bus service serving the town has been reduced, there is increasing pressure on the GP service and it can be extremely difficult to even make contact with the GP surgery, let alone make an appointment, there has been no increase in educational provision, the roads are in really bad condition - lots of pot holes and despite numerous complaints the extremely damaged speed bumps outside the Kings School haven't had a proper fix in over 10 years, one of the public footpaths eroded into the river and no solution has arisen to reopen this footpath, the footbridge over the river has been damaged/shut making it dangerous for both residents and Kings School children commuting to/from town and school, other services in the town are currently at risk/being reduced due to lack of funding. I have seen no evidence in the past 10 years of EDDC working with infrastructure providers to deliver required funding/improve

infrastructure and yet we are expected to believe that you will in the future. It feels like EDDC are determined to fill East Devon with houses with no thought to the future/no fight back to central government about required numbers/no thought for existing residents and the services/amenities a town does (or doesn't) have.

Section 106 money has so many limitations placed on it, it can't be used to help the organisations which most need help.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I believe the housing policy needs to be revisited prior to any decisions being made. There should be a legal requirement placed on all new homes builders to ensure that houses are environmentally sustainable - they should all have their own means of generating power either by solar panels or heat pumps, they should take up less land to fit more homes into the space we have (e.g. build taller rather than wider).

EDDC needs to look beyond immediate needs to the future - if you allow Land at Thorne Farm to be built upon (land which is currently allocated for educational or community purposes) then you immediately block the possibly future expansion of the Kings School & the leisure centre. Whilst The Kings School may not need to expand at present, if you continue to allow our community (& neighbouring villages) to continue to expand at the current rate, then the Kings School (& Ottery Primary School) will soon need to expand. If you allow building on this site then there will be no room for the school to expand and you will then need to find a much bigger site for either a new school or to move the current school to. It is a very short sighted vision. Added to this, residents of Ottery have been asking for many years for a swimming pool, an obvious location for this is next to the Kings School and Leisure centre. Again, build on this site and you remove that possibility completely in a very short sighted move.

During Covid, and then when the war in Ukraine started it made us all consider how, as a country, we need to be more self sufficient. Build on our farm land and take this away, you remove the ability for us ever farm that land again.

Ottery is not a big town like Honiton, Exmouth and Sidmouth. It has very small roads and on the occasions that one of the main routes in/out of Ottery are closed (which happens surprisingly regularly due to accidents, repairs, works) then there is utter chaos on the country lanes surrounding the town, with lorries, buses and tractors often meeting each other on narrow country lanes and getting completely stuck.

The roads in the centre of Ottery are not designed for the amount of traffic that they currently have, let alone more.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site reference Otry_21 I would like to object to the development on this site. I think the site entrances on the Sidmouth road will make Sidmouth road very busy. Especially between 7-9am and 2-6 from school runs and people driving/returning from work. I know there is already lots of families living in ottery but as the schools are at capacity they are having to go to Sidmouth which again doesn't help with the busyness of the road. And during the summer months where tractors frequently go up and down the road with big trailers they already need to pull into the gerway close site just to let cars past as the road isn't wide enough. This is also the case for lorry's that we get. As there would most likely be a link through Claremont field estate that also links to the Sidmouth road it would make Claremont busy and that road also narrows in certain places. As iv already mentioned the schools are at capacity and would need expanding to cope with the extra houses and potential families looking for schools. The drs surgery is also at capacity and struggling with the amount of people in ottery as it is. Having only Sainsbury's as the only supermarket with a small car parking area that already struggles to cope with the amount of people it wouldn't cope with more people in ottery. Ottery population as nearly doubled in the past 20 years and already struggling with the amount of cars driving in and around ottery. The amount of wildlife that we hear from foxes, rabbits, owls, birds etc that live in the fields and nest in the hedgerows will have their habitat taken away and would have to move on to different location. We regularly get the same birds yearly that nest in the hedges that back on to the gerway estate and taking that away will impact on their population. I know there is a need for more housing but that doesn't mean it's ok to just build anywhere and everywhere.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: If there are many more houses built in Ottery St Mary the infrastructure will be at breaking point. We haven't the facilities and the roads in the centre of town are already getting blocked. The Doctor's Surgery is overwhelmed and it is almost impossible to get an appointment to see a doctor. The schools are overcrowded and will find it difficult to accommodate extra pupils. The lack of parking around The King's School is getting out of hand. More and more pupils are parking their cars round Thorne Farm Way. As the year goes on more pass their driving test & the roads become crowded with cars. When the school day has finished the roads round Thorne Farm become clogged with cars picking up their children. We avoid trying to leave the estate at these times.

The infrastructure of Ottery must be improved before too many more houses are built.

The adequacy of local infrastructure has to be addressed as a consideration within any development proposals. The Primary School is near capacity and the medical centre is already struggling to cope with its existing patient load. Parking in the town centre is already very tight at busy times, as is traffic flow through the town. Will the Local Plan deal specifically with these issues, envisaging as it currently does a significant increase both population and traffic? Sewerage is another factor that will require careful assessment.

2 a) Regarding development on site Otry21, Policy OL10 says that development will not be permitted on Grades 1, 2 or 3a agricultural land except in exceptional circumstances. It seems doubtful that circumstances could be sufficiently exceptional to justify the proposed development at Gerway Farm as a priority over other options, particularly as a large number of grade 3 sites were offered around Ottery in the call for sites. By way of recent background, over the past seven years the Grade 2 field in question has been regularly fertilised and has grown at least one full crop of maize after ploughing; in the years when the farmer has chosen instead to sow or leave it to grass, it has produced several successive hay crops in each growing season. It is clearly a potentially highly productive piece of agricultural land. It has also been used, occasionally and on a temporary basis, to graze sheep. I note that one of the grounds for rejection of Appeal Ref: APP/U1105/W/24/3336475 (Land East of Sidmouth Road, Ottery St Mary EX11 1PW) by the Planning Inspector was because it contravened the then Local Plan policy in precisely this way.

b) There are already two traffic issues on the Sidmouth Road between the proposed site at Otry21 and Ottery town centre. One is where the road narrows just

north of the entrance to Gerway Close where any large vehicles - tractors, buses, lorries etc - cause oncoming traffic to stop or reverse. The other is Tip Hill where: a) traffic has to wait/queue for oncoming vehicles to clear the parked cars at the side of the road and b) perhaps more importantly, the road past Luxtons is barely wide enough for two cars and has a pavement on the east side which narrows down to little more than 2½ feet width in places. Pedestrians are obliged to step into the road in order to pass one another. Vehicles pass so close to the footway as to create a hazard, and my wife is certainly not alone in having been hit by the wing mirror of a passing car. It is into this already constricted environment that the proposal to develop site Otry 21 would insert a further 100 or more additional vehicles and pedestrians. This is on top of the inevitable extra use arising from proposed new developments in other parts of Ottery, whose residents are bound to choose to drive this way to reach, for example, Sidmouth or the local recycling centre at Bowd. Anyone who uses this stretch of highway regularly knows that further development along the Sidmouth Road is simply not sensible.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Otry_21: The proposed development of 70 homes on such a small site is inappropriate, not least given its rural setting and its location far from town centre facilities. Otry_10:

The site is not suitable. There are flood risks (surface and river). Access roads are unable to take any further traffic movements and there is no satisfactory pedestrian route. Otry_01b: Part of this site is currently an active farm, a centre of employment. It is not clear how the site can accommodate the new employment allocation for Ottery St Mary and additional housing. Further, the proposed housing density of the development is excessive. Otry_09: Flash flood risks at the northern site boundary which are likely to increase due to the planning approved quarry development must be addressed as must the down-stream impact on the existing Thorn farm estate, not least due to the inevitable loss of undeveloped grassland should approval be granted for Otry_09.

Otry_15: The proposed site is too far distant from town centre facilities to be viable.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proposals are poorly developed. Notwithstanding the objections raised to ‘edge development’ at large, specific issues arise as follows: Much of the Town’s infrastructure and services are already at capacity and no mention is made in your proposals for expanding provision. The GP surgery is overloaded, as is off-street parking provision, the central road system (Broad Street to Gold Street) cannot cope with current traffic volumes, there is not the capacity to provide for dedicated cycle lanes and pedestrian footways (where provided) are substandard. There is little or no opportunity for further employment growth: people will need to travel to Exeter contrary to policies intended to address the climate emergency. The distances and deep-valley topography means that most will drive from the proposed housing sites to town-centre facilities, contrary to policy objectives addressing the climate emergency. Recent housing developments have increased provision by some 25%: to add a further 318 dwellings is excessive.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: DEVELOPMENT IN THE TOWNS AND VILLAGES The Policies fail to address Objective 2 of The Vision, that is, tackling the climate emergency, Objective 6, high quality development, and Objective 9, encouraging walking & cycling. For Objective 2, it fails to recognise that Exeter is the major draw for employment and that most journeys will be made between there and the new housing areas. Placing all new development close to Exeter is essential to achieving Objective 2. Objective 6 will not be met by isolated developments on the peripheries of existing settlements. Only large-scale development can provide for high quality developments. The Cornish example of Nansledan shows what can be achieved towards Objectives 2, 6 and 9 through a comprehensive and carefully considered housing provision. East Devon District Council has the opportunity to demonstrate its abilities and commitments to truly delivering a world-beating vision through a major planned expansion through an enlarged proposed second new community, Policy SW01, rather than piecemeal relatively small-scale developments at the edges of existing communities. For Objective 9, permitting 'edge development sites' for new housing at existing communities fails to address the Objective. It is unrealistic to expect people to walk or cycle given the distances and the natural terrain. To give but one example, development on the edges of Ottery St Mary are too far for people to walk to the central shopping area (and other facilities) and the steep valleys further severely mitigate against foot and cycle travel for a number of the locations. Moreover, off-street vehicle parking in the central area is already used to capacity and your proposals fail to address the consequences or provide for any positive resolution. Policies should be radically redrafted to address such matters. In particular, it should advance the proposed second new community, WS01, as the solution and increase its size such that development on the edges of existing settlements are unnecessary.

SD04 OTTERY ST MARY The proposals are poorly developed. Notwithstanding the objections raised to ‘edge development’ at large, specific issues arise as follows: Much of the Town’s infrastructure and services are already at capacity and no mention is made in your proposals for expanding provision. The GP surgery is overloaded, as is off-street parking provision, the central road system (Broad Street to Gold Street) cannot cope with current traffic volumes, there is not the capacity to provide for dedicated cycle lanes and pedestrian footways (where provided) are substandard. There is little or no opportunity for further employment growth: people will need to travel to Exeter contrary to policies intended to address the climate emergency. The distances and deep-valley topography means that most will drive from the proposed housing sites to town-centre facilities, contrary to policy objectives addressing the climate emergency. Recent housing developments have increased provision by some 25%: to add a further 318 dwellings is excessive. Otry_21: The proposed development of 70 homes on such a small site is inappropriate, not least given its rural setting and its location far from town centre facilities. Otry_10: The site is not suitable. There are flood risks (surface and river). Access roads are unable to take any further traffic movements and there is no satisfactory pedestrian route. Otry_01b: Part of this site is currently an active farm, a centre of employment. It is not clear how the site can accommodate the new employment allocation for Ottery St Mary and additional housing. Further, the proposed housing density of the development is excessive. Otry_09: Flash flood risks at the northern site boundary which are likely to increase due to the planning approved quarry development must be addressed as must the down-stream impact on the existing Thorn farm estate, not least due to the inevitable loss of undeveloped grassland should approval be granted for Otry_09. Otry_15: The proposed site is too far distant from town centre facilities to be viable.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. 6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am keen to help make the area develop in a meaningful and sensible manor

Full name: Kerry Kennell

Organisation (where relevant): Ottery St Mary Town Council

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: GH/ED/27 – consideration must be given to the topography of this site. There is a 5 metre drop to existing houses. This site needs to be visited in person to fully understand the concerns. Is there any sight of the tests that have been completed regarding flooding? Level 2 SFRA has been undertaken for Otry_10 and a sequential test completed for Strawberry Lane and Salston Barton but the results have not been published.

What happens if a site is included but it is then found to be unsuitable? Does that cause the land supply to be questioned? It was felt that additional houses would be provided through the proposed new town but there is not enough information regarding what this would entail.

Otry_21 – there are access problems with this site and no nearby facilities without walking into town. Sustainable sites should be on the other side of town – not this side.

Ottery is a Tier 2 settlement – there is no train station and the existing ‘regular’ bus service is not regular enough for the existing residents.

Otry_09 – water pours onto the road from this site. The Council feel it is essential that there is focus on the development of enhanced sustainable travel modes. All facilities should be accessible within an accessible distance.

A member of the public asked “What is the Council aspiring to in relation to industrial units?” The Council hasn’t discussed this but this is something that can be included in the new Neighbourhood Plan. This will be discussed once the Neighbourhood Plan review is commenced. Otry_20 is not included in the sites for Ottery (Strategic Policy SD04 Pages 85-87) despite this being part of the Ottery St Mary parish and during the Strategic Planning Meetings only Ottery St Mary Town Council could speak in relation to this site. This site is in fact included in the Feniton section (Strategic Policy SD18 Page 98). The Council feel that this is misleading to those wishing to comment on the plan as it isn't transparent that that site is in Ottery Parish. The Council is also concerned that no numbers have been allocated how many houses could be built on this site. The proposal to put industrial units/employment to North nearer the existing houses and new houses further away to the south would mean that the new houses would be further away than the required meterage to walk to the local facilities making the site too remote. The Council are extremely concerned that this proposal involves removing an existing orchard.

Otry_15 – would increase traffic through town. There is currently no footpath on Slade Road and there should be an improvement to the footpath infrastructure before any development takes place.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Devon County Council objects to allocation Seat_13a until further archaeological work is undertaken. Before site Seat_13a at Seaton is allocated in Policy SD05, further archaeological work is required to understand the archaeological resource to determine the suitability of this site for future development as it lies in an area of known high archaeological potential to the north and adjacent to the site of a nationally important late Iron Age farmstead and Roman villa that are protected as a scheduled monument. The County Historic Environment Team is able to provide detailed advice on the extent and scope of the archaeological works required in order to determine the suitability of the site for allocation for development.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

There does not need to be and should not be an assumption that the access will come from Poplar Tree Drive. An access from Lime Way should be very achievable with a suitable carriageway width and footpaths both sides to access a development of 40 houses safely and with no material impact on any existing junctions. Accessing via Lime Way in many ways could indeed be preferable and require less engineering than from Poplar Tree Drive and so will have better environmental and amenity consequences. The intention will be to produce more information on this for the examination but this representation seeks to ensure that a Lime Way access should not be ruled out and indeed could specifically be included in the allocation policy at least as an option.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: It specifies an access which may not be suitable or at least could be less preferable than an alternative means of access.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Access options off Lime Way should also be explored at planning application stage so this can either be dealt with by omitting reference to Poplar Tree Drive or specifying Lime Way as an access option.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: We have an interest in this land and hence would like to ensure that the local plan policy makes it deliverable.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: N/A

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The LPA's decision to exclude Seat_11 from the emerging local plan is not considered to be correct.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The Site Selection report for Seaton highlights that Seat_11 'is not within or adjacent, or otherwise well-related, to Seaton.' However, this is not correct.

Firstly, Seat_11 is to the immediate north west of Seat_02 'Land at Barnards Hill Lane' which is allocated for 40 dwellings within the emerging Local Plan. Therefore, Seat_11 is adjacent to a proposed strategic housing allocation and well-related to Seaton under the emerging Local Plan.

Secondly, there are material circumstances that are different to when the LPA conducted its assessment of the site under the Site Selection report. The site now has a

extant planning permission for the construction of a dwelling. Planning permission was granted permission 22/2582/FUL (appeal ref. APP/U1105/W/23/3332347). The appeal inspector found the site to comprised previously-developed land within a sustainable location that is well related to the town's services and facilities. The Inspector also found that development on the site would not have a harmful impact on the landscape, ecology, trees, residential amenity or the surrounding highway network. Seat_11 is also not within the Green Wedge (unlike Seat_02) and would have no impact on the coalescence of nearby settlements.

Planning permission for the construction of a second dwelling on Seat_11 has also been submitted to the LPA at the time of writing this representation.

It is, therefore, considered that Seat_11 should be allocated within the emerging Local Plan for housing development.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

Firstly, Seat_11 is to the immediate north west of Seat_02 'Land at Barnards Hill Lane' which is allocated for 40 dwellings within the emerging Local Plan. Therefore, Seat_11 is adjacent to a proposed strategic housing allocation and well-related to Seaton under the emerging Local Plan.

Secondly, there are material circumstances that are different to when the LPA conducted its assessment of the site under the Site Selection report. The site now has a extant planning permission for the construction of a dwelling. Planning permission was granted permission 22/2582/FUL (appeal ref. APP/U1105/W/23/3332347). The appeal inspector found the site to comprised previously-developed land within a sustainable location that is well related to the town's services and facilities. The Inspector also found that development on the site would not have a harmful impact on the landscape, ecology, trees, residential amenity or the surrounding highway network. Seat_11 is also not within the Green Wedge (unlike Seat_02) and would have no impact on the coalescence of nearby settlements.

Planning permission for the construction of a second dwelling on Seat_11 has also been submitted to the LPA at the time of writing this representation.

It is, therefore, considered that Seat_11 should be allocated within the emerging Local Plan for housing development.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: N/A

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The Site Selection report for Seaton highlights that Seat_11 'is not within or adjacent, or otherwise well-related, to Seaton.' However, this is not correct.

Firstly, Seat_11 is to the immediate north west of Seat_02 'Land at Barnards Hill Lane' which is allocated for 40 dwellings within the emerging Local Plan. Therefore, Seat_11 is adjacent to a proposed strategic housing allocation and well-related to Seaton under the emerging Local Plan.

Secondly, there are material circumstances that are different to when the LPA conducted its assessment of the site under the Site Selection report. The site now has a extant planning permission for the construction of a dwelling. Planning permission was granted permission 22/2582/FUL (appeal ref. APP/U1105/W/23/3332347). The appeal inspector found the site to comprised previously-developed land within a sustainable location that is well related to the town's services and facilities. The Inspector also found that development on the site would not have a harmful impact on the landscape, ecology, trees, residential amenity or the surrounding highway network. Seat_11 is also not within the Green Wedge (unlike Seat_02) and would have no impact on the coalescence of nearby settlements.

Planning permission for the construction of a second dwelling on Seat_11 has also been submitted to the LPA at the time of writing this representation.

It is, therefore, considered that Seat_11 should be allocated within the emerging Local Plan for housing development.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To articulate the reasons why Seat_11 should be allocated within the emerging Local Plan and to provide evidence that could not be submitted at earlier stages of the plan's production (i.e. the grant of planning permission) subsequent to the consultation of the emerging local plan.

Full name: Alan Sydenham

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I believe that the emerging Plan needs to be amended to ensure continued protection of our natural environment and Green Wedge and know that the present infrastructure of Seaton can in no way support further housing as stated the adopted Plan. It stated that: “community facilities, school, health, social and cultural, are seen as borderline or inadequate with no capacity to serve additional residents”. I hear many people complaining that they cannot get a doctor's appointment and one of the local surgeries has stated in the past month that they could not cope with more patients. It is also impossible to find an NHS dentist in the area; we have waited 3 months without a dentist and now have to go PRIVATE at exorbitant prices.

The adopted Plan stated in 2013 that “priority will be given to the enhancement of the environment and the promotion of business opportunities within the Town Centre to improve the attraction of the town for residents, visitors and businesses.” There is no longer any mention of enhancing the environment or supporting the town centre in the new Plan. Why the change??

The emerging Plan no longer commits to policies for the conservation, enhancement and sensitive management of the landscape and simply states: “Seaton is set within a stunning natural environment with the coast to the south, Seaton Wetlands along the eastern boundary, and the East Devon AONB located beyond to the east.” Again, why the change?

The adopted Plan states: We will restrict any further significant housing developments beyond the existing Built-up Area boundary Ensure that the integrity of the wildlife and habitats sites adjoining and near the town are not compromised..... Extend the network of green links within the settlement and to surrounding countryside and settlements. There will be limited housing development in the short term beyond

that already proposed in the regeneration area. The New Plan seems to completely ignore all of this!

Seaton has increasingly experienced flooding east of Harepath Road and at Seaton Wetlands Nature Reserve. Any development on the Green Wedge would inevitably result in further flooding of the Reserve and would put its future as a significant tourist attraction at considerable risk.

I could go on and on but lack the time. Please reconsider all these complete turn arounds which will be disastrous for Seaton and for the future of those living in this beautiful area.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Introduction I have previously found the use of Commonplace clunky. Furthermore Commonplace tightly frames the consultation in terms of the council and central government asking the ‘first questions’. The programme also limits narrative of the lived experience of current residents. Place making procedures value these narratives. My comments in this document refer primarily to Seaton (level 2 settlement) and to planned housing sites, the local environment and economic development. I object to the inclusion of SEAT_02, 03, 05 and _13a in the EDDC Strategic Plan for the following reasons. National and local government’s approach to housing The national focus, particularly in recent months has been on numbers of houses to be built. This approach fails to ensure that the right types of houses are built in the right place. Government depends on commercial house builders who in turn, depend on building estates of similar properties on sites that yield economies of scale. Similar calculations limit the number of social housing units that are included in developments. Should economic conditions and supply lines change during the course of development work, social/affordable housing units are first to be reduced or abandoned. Throughout the country, there is housing stock that is abandoned and deteriorating; properties purchased and kept empty until ‘market conditions are more favourable’; second homes some of which are constantly in use by ‘together-apart’ families; second homes used as family holiday homes/ holiday lets and increasing numbers of properties used for short term lets and Air B&B. Current legislation and tax regimens lack power to mobilise these properties for those in genuine need of housing. Central government and councils, including EDDC, need to achieve a more equitable balance between local housing needs and the tourist market. Furthermore, the high proportion of holiday lets in an area with a constant throughput of visitors threatens the development of social capital and health among permanent residents. The numbers of similar 3-4 bedroom properties that developers create also fail to meet the needs of residents. For example, in Seaton there is significant need for social housing. Local working age residents are

primarily involved in hospitality, retail and some are carers. These are not high paying forms of employment. 3-4 bedroom new build houses are unlikely to be affordable for this demographic. Also in Seaton (and nationally) there is a need for different types of housing that meets the needs for multigenerational living; for disabled residents requiring easy access and internal adaptations; for small units for single occupancy. Simply building more numbers on 'same old, same old' estates will not work for community members! Innovative use of existing housing stock requires council officers and legal teams. Importantly it is only now that the national government acknowledges the lack of builders for new builds, repair and renovation. Not all councils have inspectors and officers to monitor and follow up, access, repair and renovate existing housing stock. There is a need for government and councils to both think and act in radically different ways about equitable housing. Infrastructure first Continuing to place the development cart before the infrastructure horse at every level only leads to a downward spiral in overall human and environmental wellbeing. I join with other contributors to this consultation to highlight the paucity of health services; primary and secondary education; transport and highways; surface water and sewage systems to support new development. With experience of internal residential flooding I highlight that tertiary technical education for essential building trades and technicians to ensure resilient housing design; ongoing monitoring and maintenance of common areas and sustainable urban drainage systems (SUDS) has received little attention. Therefore development of SEAT_02, 03, 05 and _13a threatens existing adjacent properties and environment. Legislative infrastructure also needs change. In the context of climate crisis; nature based solutions to address flooding; and top down imposition of housing targets, national legislation needs updating in relationship to land registry, riparian rights and responsibilities and use of water courses. Policy dissonance - where do priorities lie? Nature based tourism? Seaton along with other areas in East Devon promotes itself as a destination for nature based tourism. However, the draft Strategic Plan still proposes SEAT_02, 03, 05 and _13a for development. Other contributors to the consultations have commented on the impact of these sites on the local environment and ecology. The Seaton Tramway has recently invested in an additional stop for tourists to access the wetlands. However recent planning applications have not included any visualisation data from the top of the tram or from the new stop. How can we genuinely promote nature based tourism when the view to the west is of housing estates? Also visible from the B3172 and Harepath Road! Finally, flood risk In the same way that we lack technicians and legal instruments to deal with adolescent drainage technologies, I argue that recently published research (see below) demonstrates that planning guidance as it relates to SEAT_02, 03, 05 and _13a is behind the curve in relation to climate change and flood risk. In the course of my experience with field based SWW and DCC Flood and coastal risk and highways staff they do their best in a resource and planning guidance constrained workplace. This carries its own personal stress toll. However, development before infrastructure in economic terms simply externalises

costs onto the ‘little people’ be they flood victims or junior staff. Beware of blindfolded decision making about strategic planning for SEAT_02, 03, 05 and _13a when You do not have access to key upcoming reports ‘Water cycle report’ (EDDC) and “Assessment of flood risk from surface water and ordinary watercourses in Seaton’ (DCC) A recent Planning committee based decisions on Google Maps Street View that excluded visualisation of critical SUDS receiving watercourses in spate. Water attenuation across the sites is likely to be critically dependent on poorly maintained attenuation basins and permeable paving (and water butts?)

Source: <https://www.susdrain.org/delivering-suds/using-suds/suds-principles/management-train.html> despite the challenging context of

- increasing short duration high intensity rainfall;
- infiltration being excluded from the SUDS train because of the underlying local geology and finally,
- limited effective legal instruments and qualified technicians exist to ensure effective ongoing maintenance of common areas and SUDS. May you be wise in your decision making!

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am upset to see that land opposite Axeview Drive in Seaton is still on the list for development. A year ago myself and other local people spoke out about this proposal at a town council meeting. I would like to ask you if any of our objections have been taken into account?

1. Flooding. When it rains heavily the water comes down from the field and through the hedge in a waterfall and runs down the road like a river.. It pools up in our house entrances.

Both my self at 21 and my neighbours at 23 have had our entrances relocated to the middle of the house as a preventative measure.

If the field and the trees are not there to soak up the water then where can it go?? The answer is into our homes.

I have spoken to the farmer who currently rents the field and he explained that there is also a natural spring on the hedge line that also over flows during heavy rain.

Building construction will cause an extreme amount of mud, debris and extra water to be sent down our road and on to the busier Barnards Hill.

The increased run off from new builds will cause more potential flooding as the water won't have anywhere else to go but down our hill and to the houses along Barnards Hill.

2. The Sewerage system.

The sewerage system for our house is 40 plus years old. Adding an extra 30 plus houses to this is surely not acceptable or safe ?

In 2021 the construction of Rodgers Way caused an overflow of the sewage system that meant that number 17 Axeview Road was so badly damaged by sewage water and waste flowing into their home. It was too much for the system to process. The elderly occupants had to stay in a hotel for many months whilst the damage was repaired.

Mrs Margaret Leppard of Seaton Floodworking Group has actively opposed this proposal on these grounds. The flood threat is real and very frightening.

3. Mental health and wellbeing.

Even the idea of this development is causing extreme stress to residents. I myself am losing sleep and constantly worrying about it. We are a small cul de sac of 23 houses. The top of our road becoming a building site entrance is a horrifying thought. All that noise, dust, mud and constant construction traffic for months and months..

Then afterwards the increased traffic flow of 80 plus cars going up and down our road will turn this quiet street into a busy road.

What are the plans for this. Where is the proposed site entrance? Do you then plan to have full car access through our road or pedestrian only ?

3. The cul de sac ends with a Devon bank. This is surely protected under the Hedgerows protection act 1997. It is full of wildlife and encompasses a veteran ash tree.. I have contacted Devon County Council and the Environment Agency to advise them of this threat. The green wedge contains a number of trees, many oaks, one of which is protected. The government suggests a buffer zone of 15 times the circumference of the trees girth to protect the roots.

4. The Roman villa in Honeyditches field. The field above Axe View is also known as a Roman field. The current farmer had told me that he regularly finds Roman pottery in the field. I have contacted Alice MacLeod of Historic England to advice of this possible planning application.

I would ask the council to please look out for its residents and help them to sleep easy at night by rejecting this proposal.

Thank you for taking the time to read my letter and I look forward to receiving your feedback.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Strategic Policy SD05: Seaton and its development allocations (pages 87-89). Support of the exclusion of Sites Seat_01, Seat_08 and Seat_10 from the East Devon Local Plan Regulation 19 as future development sites.

Site: Seat_01

I would like to support the decision that site Seat_01 has not been allocated as a future development site for housing or employment purposes in the latest 'East Devon Local Plan 2020 to 2042 Regulation 19 Publication Draft (February 2025)'. The previous 'East Devon Local Plan (Regulation 18) – consultation feedback report – July 2023' (page 192), 'East Devon Local Plan Site Selection Report Seaton' (pages 8-13), and earlier 'Appendix 2: Site Selection – Interim findings at Tier One and Two Settlements' document (2022), as well as the decision of the Strategic Planning Committee at their meeting held on September 11, 2024, all came to the same conclusion in relation to site Seat_01 not being suitable as a future development site. As has already been identified for this site, Seat_01 is a Greenfield site with a rising character on the western boundary of the town. Its elevated character means that it can be seen from multiple viewpoints such as the South West Coastal Path, Axe Cliff Golf Club on the eastern boundary, the Area of Outstanding Natural Beauty (Strategic Policy OL02) to the east of it and from the top of Seaton Hole. Therefore, any development on this site would have an adverse impact on the topography and undeveloped skyline on the Western boundary of Seaton. Seat_01 also serves as an important fire break between the built up area and the adjacent woodland, which itself has no vehicular access point from Bunts Lane. Therefore extending the current built up area boundary to include Seat_01 would reduce this open

buffer as a protection. The site also provides a natural habitat for an abundance of different wildlife species and enables their movement to and from the neighbouring woodland in Bunts Lane. Seat_01 is also a well known corridor used by bats, being in the Beer Quarry & Caves Special Area Conservation zone. In summary, I continue to support the decision that site Seat_01 has not been allocated as a future development site for housing or employment, and for that reason, has not been included in the latest 'East Devon Local Plan 2020 to 2042 Regulation 19 Publication Draft (February 2025)'.
Site: Seat_08

I would like to support the decision that site Seat_08 has not been allocated as a future development site for housing or employment purposes in the latest 'East Devon Local Plan 2020 to 2042 Regulation 19 Publication Draft (February 2025)'. The previous 'East Devon Local Plan (Regulation 18) – consultation feedback report – July 2023' (pages 195-6), 'East Devon Local Plan Site Selection Report Seaton' (pages 32-37), and earlier 'Appendix 2: Site Selection – Interim findings at Tier One and Two Settlements' document (2022), as well as the decision of the Strategic Planning Committee at their meeting held on September 11, 2024, all came to the same conclusion in relation to site Seat_08 not being suitable as a future development site. As has already been identified for this site, Seat_08 is a Greenfield site with a rising character on the western boundary of the town. It is a highly exposed site on the skyline which can be seen from multiple viewpoints from the south and east, which includes an Area of Outstanding Natural Beauty (AONB; Strategy Policy OL02). Therefore, any development on this site would have an adverse impact on the topography and undeveloped, natural skyline on the Western boundary of Seaton. In addition, Seat_08 is in the Coastal Preservation Area (Strategy Policy OL03) and also shares a Landscape Character Type 2A in the East Devon Landscape Character Assessment. SEAT_08 also serves as an important fire break between the built up area and adjacent Couchill Coppice. The site also provides a natural habitat for an abundance of different wildlife species (some of which are protected species) and enables their movement to and from the neighbouring Couchill Coppice. Seat_08 is also a well known corridor used by bats, being in the Beer Quarry & Caves Special Area Conservation zone. In summary, I continue to support the decision that site Seat_08 has not been allocated as a future development site for housing or employment, and for that reason, has not been included in the latest 'East Devon Local Plan 2020 to 2042 Regulation 19 Publication Draft (February 2025)'.

Site: Seat_10

I would like to support the decision that site Seat_10 has not been allocated as a future development site for housing in the latest 'East Devon Local Plan 2020 to 2042 Regulation 19 Publication Draft (February 2025)'. The previous 'East Devon Local Plan (Regulation 18) – consultation feedback report – July 2023' (page 196), East Devon Local Plan Site Selection Report Seaton' (pages 43-45), and earlier 'Appendix 2: Site Selection – Interim findings at Tier One and Two Settlements' document (2022), as well as the decision of the Strategic Planning Committee at their meeting held on September 11, 2024, all came to the same conclusion in relation to site Seat_10 not being suitable as a future development site. As has already been identified for the site, Seat_10 is a Greenfield site on the western boundary of the town which is sensitively located on a steep slope. Its elevated character means that it can be seen from multiple viewpoints, which includes the South West Coastal Path, the top of Seaton Hole and elevated positions in Beer parish. Therefore, any attempt to build on it would have a negative impact on the natural landscape. The site is also a well known corridor used by bats (for foraging and commuting), being in the Beer Quarry & Caves Special Area Conservation zone, particularly as there is no overspill of light pollution into it because it is on the edge of the built up area. This, therefore, supports findings that site SEAT_10 is an important corridor used by various species of bats. In summary, I continue to support the decision that site Seat_10 has not been allocated as a future development site for housing, and for that reason, has not been included in the latest 'East Devon Local Plan 2020 to 2042 Regulation 19 Publication Draft (February 2025)'.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Strategic Policy SD05: Seaton and its development allocations (pages 87-89).

Comment: Re: Sites Seat_03 and Seat_05. I do not support the provision of housing for these sites given they conflict with a number of policies contained within the East Devon Local Plan. These include Policy OL05: Green Wedges (page 203) which states: “Within green wedges, as defined on the Policies Map, development will not be permitted if it would add to existing sporadic or isolated development, damage the individual character or identity of a settlement, or could lead to or encourage settlement coalescence, whether physical, visual, or intrinsic.” Strategic Policy OL01: Landscape Features (pages 196-197) states: “East Devon’s landscape, countryside and rural areas will be protected against harmful development. Development will only be permitted where the applicant is able to demonstrate through a proportionate Landscape Appraisal that it will protect and enhance valued landscape attributes and special features and qualities that contribute to the character of East Devon’s landscapes, in particular where it would not harm the distinctive landscape, amenity and environmental qualities within which it is located.” Strategic Policy OL02: National Landscapes (Areas of Outstanding Natural Beauty) (pages 199-200) states: “National Landscapes (Areas of Outstanding Natural Beauty) The highest level of protection will be given to the landscape and scenic beauty of the National Landscapes (NLs) in East Devon: A) Development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities, character and natural beauty of the NL (including the coastline, where relevant). B) Major development in a NL will only be permitted in exceptional circumstances and where it can be demonstrated to be in the public interest.” Strategic Policy PB04: Habitats Regulations Assessment (pages 220-223) states: “Protection of Beer Quarry Cave SAC bat pinch points between Seaton and Colyford, and between Colyford and Colyton. In order to protect the pinch points and secure their long-term suitability for the SAC bat species, the council will not support

any applications which reduce the quality or functionality of the bat foraging and commuting habitats within these pinch points, such as through hedgerow/tree loss and adverse impacts from lighting”. In addition, Transport Policy TR01 (pages 183-184; Paragraph 11.5) refers to “Exmouth, Honiton, Seaton, and Ottery St Mary having bespoke bus services, with several high-frequency routes linking East Devon settlements to Exeter”, as ‘Justification for Policy’. However, the Justification for Policy TR01 fails to recognise there are disparities in this ‘broad brush’ assumption. Towns such as Seaton have no bus services serving the town from Exeter after 7:05PM for six days of the week, (6:05PM on Sundays), whereas Exmouth, Honiton and Ottery St Mary do. Nor is there a bus service from Axminster to Seaton after 6:30PM for six days of the week, (Mondays to Saturdays), and no bus services on Sundays, to provide a link with Axminster’s railway station. There is also no bus service from Honiton to Seaton after 5:50PM for seven days of the week, to provide a link with Honiton and its railway station. Policy TR01 does not take into account there is no early morning bus service from Seaton (before 8am) on Saturdays and Sundays to any destinations, including Axminster, Sidmouth, Honiton and Exeter, all of which are major hubs for employment, medical facilities, leisure and recreational activities. Moreover, Sunday services are also limited from Seaton, with just one bus route (the 9A) operating to provide a connection with Sidmouth and Exeter. Unlike Exmouth, Axminster and Honiton, Seaton does not have a supplementary railway to provide further travelling opportunities on public transport. Therefore, Transport Policy TR01’s ‘broadbrush’ assumption that each town has a comparable level of “high-frequency routes linking East Devon settlements to Exeter” is incorrect and therefore must be disregarded in relation to suggesting it meets the needs of residents living in Seaton and the surrounding parishes. Policy OL10: Development on High Quality Agricultural Land (page 209) looks to, A) “Restrict development on the best and most versatile agricultural land (Grades 1, 2, and 3a) unless there is an overriding need and no suitable lower-grade land is available”. It is clear that the sites Seat_03 and Seat_05 are both high quality and versatile use agricultural land. Therefore, they should not be use for housing allocation. Strategy 23 for Seaton in the emerging East Devon Local Plan, 2020 to 2040, Preferred Options Reg. 18 Consultation Draft Plan (Current draft - autumn 2022), (page 81, Paragraph 6.45) also states: “The population and range of community facilities and services in Seaton make it an appropriate place to locate a relatively large amount of housing and employment development”. However, as already demonstrated through the aforementioned policies, Seaton offers a more restricted level of infrastructure compared to every other Tier 2 towns in East Devon. Therefore, taken alongside the additional constraints of Seaton’s topography and other valued landscape characteristics, this does not justify the number of new housing and employment sites being proposed.

Therefore, I do not support the recommendation in the East Devon Local Plan Regulation 19 Report that Seaton should be considered a Tier 2 town able to deliver 522 new dwellings up to 2040 (Strategy Policy SP03; pages 32-35). Especially when considered in comparison with Sidmouth and the Sid Valley with its greater infrastructure, including more primary and secondary schools provision, more shops, all weather recreational facilities, and with a more active community hospital, is required to deliver 471 new dwellings for the same period. This would suggest that Sidmouth and the Sid Valley is actually far better placed to support an increase in their respective housing allocation beyond 471 new dwellings rather than utilise sites Seat_03 and Seat_05 in Seaton.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Page 3, Paragraph 2. Quote: “This Local Plan, guiding development in East Devon through to 2042, aims to preserve and enhance these distinctive qualities. While government policy necessitates the allocation of land for housing and employment, our focus remains firmly on ensuring development is balanced, sustainable, and beneficial to our communities. This Plan is underpinned by principles that seek to protect our outstanding landscapes and wildlife while fostering vibrant, inclusive communities.”

Comment: Unfortunately, this latter point cannot be evidenced or supported in relation to protecting the large green wedge site between Seaton and Colyford. As well as being an outstanding landscape, the site supports biodiversity and provides an important foraging site for an abundance of nationally protected wildlife species, such as bats. The site also meets various farming practises in relation to encouraging localised food production, which is more sustainable and also delivers a reduced carbon footprint through reduced transportation requirements compared to sourcing a comparable alternative food source, either nationally or importing it.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear Councillor The updated National Planning Policy Framework, paragraph 187, says that ‘Planning policies and decisions should contribute to and enhance the natural and local environment.’ Adopted East Devon Local Plan Strategy 25 states that ‘Seaton has a role as an important Green Tourism destination on the Jurassic Coast’ and this has to include protection of the panoramic views of the Axe Valley Estuary. It also states that ‘Seaton’s outstanding natural environment is its most precious and defining asset and policies for the conservation, enhancement and sensitive management of the landscape, heritage and wildlife of the area will be prominent.’ Strategy 46 – Landscape Conservation and Enhancement - states that ‘development will need to be undertaken in a manner that is sympathetic to, and help conserve and enhance the quality and local distinctiveness of the natural and historic landscape character of East Devon’. There is a consultation in the new Local Plan, at the moment, which asks people their opinion about the East Devon National Landscape Management (formally known as the Area of Outstanding Natural Beauty). EDDC’s vision for 2050 is for ‘ A Wilder Greener Landscape where healthy ecosystems provide multiple benefits to society.’ The special qualities of the landscape are recognised, protected, enhanced and conserved, safeguarding the area’s rich heritage for generations to come. Emerging East Devon Local Plan - Strategic Policy OL01: Landscape Features - East Devon’s landscape, countryside and rural areas will be protected against harmful development. Development will only be permitted where the applicant is able to demonstrate through a proportionate Landscape Appraisal that it will protect and enhance valued landscape attributes and special features and qualities that contribute to the character of East Devon’s landscapes, and in particular where it would not harm the distinctive landscape, amenity and environmental qualities within which it is located. Strategic Policy OL02: National Landscapes (AONB) - The highest level of protection will be given to the landscape and scenic beauty of the National Landscapes (NL’s) in East Devon. Development in a NL, or outside but affecting its setting or appearance, will only be

permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities, character and natural beauty of the NL. Policy OL04: Areas of Strategic Visual Importance – Development proposals will only be permitted where they preserve the visual integrity, identity and scenic quality of the District, in particular by conserving and enhancing key views. Policy OL05: Green Wedges - Green Wedges are a long standing local landscape designation that recognises the importance of maintaining open green networks between settlements in close proximity, for wildlife, flood storage capacity, leisure and recreation and prevent settlement coalescence in order to maintain a sense of place and identity for local communities. Within green wedges..... development will not be permitted if it would add to existing sporadic or isolated development, damage the individual character or identity of a settlement or could lead to or encourage settlement coalescence, whether physical and or visual. (The Seaton Built-up Area Boundary has been moved northwards, effectively closing the Green Wedge between Seaton and Colyford, to allow for a development on good quality agricultural land) Strategic Policy PB01: International followed by nationally designated wildlife sites are of great importance and must be given upper most protection. Policy PB02: Protection of regionally and locally important wildlife sites. Policy PB03: Protection of irreplaceable habitats and important features. Development proposals which would result in the destruction or degradation of irreplaceable habitats will be refused.... Strategic Policy PB04: Habitats Regulations Assessment

-Nutrient neutrality in the River Axe. EDDC requires development proposals within the River Axe SAC catchment to demonstrate how nutrient neutrality will be achieved.

-Protection of Beer Quarry Caves SAC bat pinch points between Seaton and Colyford and between Colyford and Colyton. In order to protect the pinch points and secure their long-term suitability for the SAC bat species, the council will not support any applications which reduce the quality or functionality of the bat foraging and commuting habitats within these pinch points, such as through hedgerow/tree loss and adverse impacts from lighting. (A proposed development at Seaton contains a football pitch crossing one of these foraging and commuting habitats which would be adversely affected if there was any chance of flood lighting.) The Emerging Local Plan states that “This plan is underpinned by principles that seek to protect our outstanding landscapes and wildlife, while fostering vibrant, inclusive communities..... We will ensure that alongside new development there is greater care of the natural world with biodiversity improvements.....” The policies I have listed here seem to reinforce these aspirations. However EDDC’s vision for Seaton is significantly different in the emerging Local Plan compared to the adopted Local Plan that is in force at the moment. There is conflict here. There are at least three development sites on Seaton’s Green Wedges which have been put forward for housing!

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I believe that the emerging Local Plan needs to be amended to ensure that EDDC commits to the continued protection of our landscape, natural environment, wildlife and our Green Wedges. Once these have gone, they have gone for ever. The Local Plan must be deliverable, not just aspirational.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We are wanting you to remove the areas within Seaton you have earmarked for development. Namely 75 houses in Barnards Hill Lane, 130 dwellings off Harepath Road and 39 dwellings west of Axeview Road. In terms of housing need, a general matrix has been used to come up with Seaton's allocation despite a housing needs assessment not being undertaken and despite Seaton's unique natural environment which needs protecting. There are currently over 120 properties on the market from £49,000 upwards plus those currently under construction at Fosseyway Court and Seaton Quay with many other sites in the pipeline.

Our infrastructure is insufficient for any new developments. Town centre shops are very concerned which is borne out by the statement that Tesco would bring shoppers into the Town centre which has never happened.

There are so many other reasons that the Harepath Road area in particular should not be built on which has been written about endlessly and never taken note of.

Full name: Dr Rick Rylance

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I'm writing to you direct as I find the formal website unnecessarily restrictive, complicated and difficult to manage, as do several other potential respondents. You should consider this in any future iterations. Convenience of processing at your end is not a good reason to over-control responses. I am concerned about the impact of proposed housing developments on Seaton, where I live, and its immediate natural environment which I treasure and use extensively.

- I note no housing needs assessment has been undertaken in Seaton and that the current plan appears to be driven by formula rather than evidence of need or impact. I note there are currently a considerable number of properties for sale locally and that there are extensive building projects underway.
- I am concerned that no thorough survey had been done of the availability of brown field or repurposed sites which might be used for additional residential accommodation rather than green field developments.
- I am concerned about the impact on local services of sharp increases in local population including in the provision of health care, transport, and education.
- I am concerned about the impact on traffic flows has not been sufficiently assessed in the context of increasing congestion on narrow country lanes especially in the summer with heavy use of large tourist vehicles.
- I am concerned about the impact on what is already a rather run-down town centre of developing out-of-town retail units.
- Most importantly, I am concerned about the impact on the local natural environment which is the single most important aspect of living in rural Devon and which will be damaged by steadily increasing housing. No sensible person would believe that any development suggested here will be the last. Others will follow as they

always do when precedent is set. If these developments go ahead, developers' interests will prevail over those of residents, and their profits and convenience over quality of life and environment. Finally, it is worth saying that the current proposals conflict with, or potentially conflict with, existing policies on, for example, Green Wedges, Landscape, housing, communities, town centres, and flood planning, as well as statement on the importance of the natural environment and its benefits for the community and individual health and quality of life. This is strategically incoherent.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The emerging Local Plan states that it aims to preserve and enhance the distinctive qualities of East Devon's glorious thriving natural environment; that it is underpinned by principles that seek to protect our outstanding landscapes and wildlife...that it will ensure that there is greater care of the natural world with biodiversity improvements, etc; and that EDDC will work with partner bodies to secure new expanded and improved physical, social and community facilities and infrastructure delivered alongside development.

But for Seaton, the emerging Plan is proposing new development sites on the town's Green Wedges which not only ensure that the principles of the Plan in respect of the natural environment cannot be delivered in Seaton, they are also directly in conflict with the following policies:

- Policy OL05: Green wedges Within green wedges..... development will not be permitted if it would add to existing sporadic or isolated development, damage the individual character or identity of a settlement, or could lead to or encourage settlement coalescence, whether physical, visual, or intrinsic.
- Strategic Policy OL01: Landscape features East Devon's landscape, countryside and rural areas will be protected against harmful development. Development will only be permitted where the applicant is able to demonstrate through a proportionate

Landscape Appraisal that it will protect and enhance valued landscape attributes and special features and qualities that contribute to the character of East Devon's landscapes, in particular where it would not harm the distinctive landscape, amenity and environmental qualities within which it is located.

- Strategic Policy OL02: National Landscapes (Areas of Outstanding Natural Beauty) The highest level of protection will be given to the landscape and scenic beauty of the National Landscapes (NL's) in East Devon: Development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities, character and natural beauty of the NL (including the coastline, where relevant). Major development in a NL will only be permitted in exceptional circumstances and where it can be demonstrated to be in the public interest;
- Strategic Policy PB01: International followed by nationally designated wildlife sites are of greatest importance and must be given upper most protection.
- Policy PB02: Protection of regionally and locally important wildlife sites
- Policy PB03: Protection of irreplaceable habitats and important features Development proposals which would result in the destruction or degradation of irreplaceable habitats will be refused unless
- Strategic Policy PB04: Habitats Regulations Assessment
 - Nutrient neutrality in the River Axe SAC catchment. East Devon District Council requires development proposals within the River Axe SAC catchment to demonstrate how nutrient neutrality will be achieved.

- Protection of Beer Quarry Cave SAC bat pinch points between Seaton and Colyford, and between Colyford and Colyton. In order to protect the pinch points and secure their long-term suitability for the SAC bat species, the council will not support any applications which reduce the quality or functionality of the bat foraging and commuting habitats within these pinch points, such as through hedgerow\tree loss and adverse impacts from lighting.

Therefore for all the above reasons, I believe that proposed sites Seat_02, Seat_03, Seat_05 and Seat_09 should be removed from the emerging Plan

Further policies within the emerging Plan which are inaccurate are :

- Transport TR01 Exmouth, Honiton, Seaton, and Ottery St Mary have bespoke bus services, with several high-frequency routes linking East Devon settlements to Exeter. Seaton's bus services have declined considerably over the last few years making it difficult - and in some cases impossible - to travel to other towns for work.
- Policy OL10: Development on high quality agricultural land This policy restricts development on the best and most versatile agricultural land (Grades 1, 2, and 3a) unless there is an overriding need and no suitable lower-grade land is available.

EDDC's commitment to Seaton in the emerging Plan is much reduced compared to its commitment in the current adopted Plan which seeks to support the town's economy, building its reputation as a destination for green tourism:

1) HOUSING

- Strategy 25 - The adopted Plan (2013 – 2031) stated that any further significant housing developments beyond the build-up area boundary would be restricted by locating the majority of the required 150 within the existing town. But the emerging Plan not only states that “The population and range of community facilities and services in Seaton make it an appropriate place to locate a relatively large amount of housing and employment development” it now proposes significant housing in the Green Wedge.

In the time since the current Plan was adopted and now, Seaton has delivered more houses than allocated whilst its infrastructure and facilities have reduced.

Therefore the proposal to allocate further land for housing is unsustainable, and to do so in the town's Green Wedges is against EDDC's own vision and policies relating to protection of the natural environment.

I therefore do not support the inclusion of sites Seat_02, Seat_03, Seat_05 or Seat_09 in the emerging Plan for future development.

2) COMMUNITY FACILITIES

- The adopted Plan in 2013, stated: “community facilities, school, health, social and cultural, are seen as borderline or inadequate with no capacity to serve additional residents”.
- Despite those facilities having reduced further since 2013, in 2025 the emerging Plan now states that “Seaton has a wide range of community facilities, with a variety of shops, sports facilities, a library, GP, hospital, and regular bus service around the settlement and to areas elsewhere”.

The emerging Plan statement that Seaton has a wide range of community facilities is incorrect. The town cannot support an increase in population; doctors and dentists are at capacity; the hospital has lost facilities; bus services have been reduced; community facilities at Colyford Road have been demolished. The inclusion of Seat_02, Seat_03, Seat_05 and Seat_09 for future development is therefore unsustainable.

3) TOWN CENTRE

The adopted Plan stated in 2013 that “priority will be given to the enhancement of the environment and the promotion of business opportunities within the Town Centre to improve the attraction of the town for residents, visitors and businesses.”

This statement has been removed from the emerging Plan but needs to be restored to meet the emerging Plan's commitment to "preserve and enhance the distinctive qualities of East Devon's glorious thriving natural environment", and to "promote business opportunities within the Town Centre to improve the attraction of the for residents, visitors and businesses", all of which are essential to secure the town's future economy.

4) NATURAL ENVIRONMENT

- The adopted Plan states “Seaton's outstanding natural environment especially its Wetlands is its most precious and defining asset, and policies for the conservation, enhancement and sensitive management of the landscape, heritage and wildlife of the area will be prominent. The Axe Wetlands, Dorset and East Devon Coast World Heritage Site (Jurassic Coast) and surrounding exceptional coastline will be key environmental assets that will be integral to the future success of the town.”
- The emerging Plan no longer commits to policies for the conservation, enhancement and sensitive management of the landscape for Seaton and simply states: “Seaton is set within a stunning natural environment with the coast to the south (including the Jurassic Coast World Heritage Site), Seaton Wetlands along the eastern boundary, and the East Devon AONB located beyond to the east. Two scheduled monuments in close proximity indicate the high historic value in the area, along with a conservation area and several listed buildings in and around the town centre.”

Again, despite the statement that the emerging Plan will "preserve and enhance the distinctive qualities of East Devon's glorious thriving natural environment", in respect of Seaton EDDC's previous commitment to protect, conserve and enhance the town's unique natural environment has been removed in the emerging Plan. This should be

reinstated. In order to deliver on the Plan's commitment to preserve and enhance the distinctive qualities of East Devon's glorious thriving natural environment... its principles that seek to protect our outstanding landscapes and wildlife...ensure that there is greater care of the natural world with biodiversity improvements, etc, I believe that the following amendments need to be made:

- In respect of the Seaton/Colyford Green Wedge, the land which has been designated for employment/recreational use but has remained undeveloped for over 25 years should have the designation removed. All land north and east of the Harepath Road industrial site which is earmarked for employment or housing in the emerging Plan should be re-designated Green Wedge.
- The Seaton/Beer Green Wedge should be extended to include the land between the built up area boundary and parish boundary to preserve Seaton's distinctive topography.

Only then can the town's unique natural environment be protected, conserved and enhanced; can flooding of the surrounding housing and Wetlands in which EDDC have made considerable investment be averted; can the town's future economy based on Natural Seaton be supported; and the town's infrastructure be sustainable and meet the needs of its current population.

5) FUTURE DEVELOPMENT

- The adopted Plan states: The Future: We will Restrict any further significant housing developments beyond the existing Built-up Area boundary Ensure that the integrity of the European wildlife and habitats sites adjoining and near the town are not compromised..... Extending the network of green links within the settlement and to surrounding countryside and settlements

Seaton will be supported in its role as an important visitor destination on the East Devon Coast, with the onus placed on conservation and enhancement of the surrounding natural environment. There will be limited housing development in the short term beyond that already proposed in the regeneration area. Note - housing in the

regeneration area is still to be completed along with development at Fosseway Court and the Hook & Parrot on the town's seafront.

- In contrast the emerging Local Plan states: The population and range of community facilities and services in Seaton make it an appropriate place to locate a relatively large amount of housing and employment development. But then goes on to say: The amount of development should be limited to an extent, as new residents will need to travel elsewhere to access some strategic facilities which are lacking in Seaton (train station, secondary school, swimming pool).....The environmental constraints around Seaton also limit its growth, with the River Axe and associated flood zone to the east, AONB also to the east, a rising landscape to the west, and sea to south, all limiting the realistic options for future development.

So whilst first stating in the emerging Plan that Seaton is an appropriate place to locate a relatively large amount of housing and employment development, it goes on to acknowledge that development should be limited with environmental constraints also limiting the town's growth. As previously stated, infrastructure has decreased since the adopted Local Plan; housing has exceeded that required in the adopted Plan with more still to be completed; and any additional housing will compromise the integrity of wildlife and habitat sites and is likely to lead to flooding of surrounding housing and the Wetlands. Therefore proposed development sites Seat_02, Seat_03, Seat_05 and Seat_09 should be removed from the emerging Plan.,

6) FLOODING

Seaton has increasingly experienced flooding east of Harepath Road and at Seaton Wetlands Nature Reserve. Any development on the Green Wedge would inevitably result in further flooding of the Reserve and would put its future as a significant tourist attraction at considerable risk.

Additional flooding risk comes from Stafford Brook which no longer follows its natural, low-lying route through its flood plain to the main river, and in places the water level in the Brook is now above the ground level of its flood plain at Stafford Marsh.

Any increase to the flow of water into the Brook, no matter how small, increases the risk of flooding at Seaton Wetlands, and will therefore impact on visitors to this National Nature Reserve and to users of the Stop Line Way (National Cycle Route 33) that passes through it.

This is further reason why the Green Wedges should be protected from development and extended to prevent flooding of the Wetlands. Because of the risk of surface water flooding, it has become critical that Seat_02, Seat_03, Seat_05 and Seat_09 as well as the newly proposed Seat_13a to the west of Axe View Road, are also included within the Green wedges and that the emerging Plan is amended to ensure future protection of this important site.

7) SOCIAL HOUSING

An area that could be used to provide housing for the town is the site at Seat_06 Former Depot, Colyford Road, Seaton, EX12 2DQ which is close to all amenities and within the town's built up area boundary. It was made derelict in 2013 with the intention of delivering work units. Loss of employment space is given as the reason for not allocating this land for housing but the case has never been made for more work units in Seaton with those at Riverside Workshops largely used for storage.

The emerging Local Plan states that a section of Seaton Marshes Local Nature Reserve is within the northern boundary of site Seat_06 but that is incorrect and this statement needs amending. To give it protection from development claiming that it is part of the Nature Reserve is false.

In short, the proposals in the emerging Plan are significant in respect of the town's Green Wedges and, if the Plan is approved, are likely to lead to uncontrolled building which will no longer provide protection, enhancement and conservation of Seaton's unique natural environment and will threaten the town's future economy based on Natural Seaton. It will lead to flooding of surrounding homes and of the Wetlands; to loss of biodiversity and rare wildlife; loss of prime agricultural land; would result in

coalescence of the settlements of Seaton and Colyford; and would change the character of this area from open rural to virtually continuous urbanised. As the Planning Inspector stated in upholding refusal of development at Harepath Road when it last came forward for development, “the housing shortfall although significant is - arguably - relatively short term, whereas the erosion of separation between Colyford and Seaton would be permanent”.

The proposals in the emerging Plan are unsustainable. Seaton's doctors, dentists and hospital facilities which have been much reduced over the last few years, are already struggling. They also serve the residents of surrounding towns and villages where further additional homes are being proposed. A development of over 70 new homes at Colyton is currently being built with another large site planned. Our infrastructure is insufficient for any new developments, in Seaton or outside.

To preserve Seaton's way of life and future, and to deliver on the emerging Plan's vision, now is the time for the site Seat_05 (Harepath Road), which for over 25 years has been allocated for mixed use employment/recreation, to be removed from the emerging Plan altogether and returned to Green Wedge so that the town can build on all the work that has been put in during that time into developing Seaton as a destination for green tourism. This land has remained undeveloped for years because without housing to support it, it is not viable. Removal of this site would also ensure that any future retail/employment is based close to the town centre to support the town centre and therefore meet Strategy SE06 which says: Tier two towns (Seaton) form focal points of activity in East Devon towns and will be the preferred location for the development of new retail, leisure and other uses that attract and are used by people for commercial or community activities....."Development proposals that would result in the loss of existing local shops and services will be resisted where it would result in the significant or absolute loss of that facility to the community." Town centre shops have almost unanimously expressed their concern at the prospect of out of town shopping facilities at Harepath Road and many believe their businesses won't survive if such development were to go ahead. This is borne out by the statement to them that Tesco would bring shoppers to the town centre, but that never happened - people shop at the store and go home. It's also borne out by significant evidence from SavetheHighStreet.org as well as acknowledged by the developer currently proposing retail warehouses at Harepath Road, that their development would have an adverse affect on Seaton town centre shops.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

So, as evidenced above, unless sites Seat_02, Seat_03, Seat_05 and Seat_09 are removed from the emerging Local Plan then EDDC's vision for and commitment to East Devon remains only aspirational for Seaton and can never be delivered for the town.

Full name: Martin Shaw

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Housing on sites 03 and 05 will contradict other policies of the plan. TR01 specifies wheeling cycling cycling and public transport as ‘first choice’ but wheeling and walking will not realistically be viable choice for most residents due to distance from centre. TR01 also specifies ‘high quality public transport’ but this will not be available. SP01 specifies development to match local needs but development on this site will inevitably be mainly larger detacheds which will attract incomers. HN01 specifies priority for affordable housing and young people but development on this site will inevitably be mainly non-affordable and attract older people. Seaton already has a large shortage of social housing and a huge population imbalance (almost 45% 65+) so any development should specify social housing only. OL01 protects important local landscapes and the council’s Landscape Architect as well as an Inspector have previously emphasised the detrimental effects of development on this site. Policies emphasise protecting landscape which is relevant to tourist attractions and the proximity of this site to the Wetlands should exclude it. Policies also emphasise prevention of settlement coalescence (Green Wedge) and the inclusion of this site will contribution to that. Altogether the inclusion of this site makes the plan as a whole incoherent as well as having detrimental effects on the local environment.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To make the local plan coherent, these sites should be deleted from the policy. The policy should also

include new paragraphs addressing Seaton's population imbalance and the specific need for social housing, in more central locations. Seaton does not need any more developments of larger detached houses (there have been several large developments of this kind in recent years) until this is addressed.

Full name: A.R. Smith

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I believe there are many reasons why the emerging local plan sites Seat_02, Seat_03 and Seat_05 should be deleted as candidate development sites. I therefore set out reasons why Seaton is totally unsuitable for consideration for any further housing development. The proposal to include three new development sites on the town's Green Wedges conflict with the following policies:

Strategic Policy OL01: Landscape features: East Devon's landscape, countryside and rural areas will be protected against harmful development. Development will only be permitted where the applicant is able to demonstrate through a proportionate Landscape Appraisal that it will protect and enhance valued landscape attributes and special features and qualities that contribute to the character of East Devon's landscapes, in particular where it would not harm the distinctive landscape, amenity and environmental qualities within which it is located.

Strategic Policy OL02: National Landscapes (Areas of Outstanding Natural Beauty): The highest level of protection will be given to the landscape and scenic beauty of the National Landscapes (NL's) in East Devon: Development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities, character and natural beauty of the NL (including the coastline, where relevant). Major development in a NL will only be permitted in exceptional circumstances and where it can be demonstrated to be in the public interest.

Strategy 46 of the currently adopted local plan gives general protection for landscapes of value. We are surrounded by the East Devon AONB which forms the setting for sites Seat_03 and Seat_05.

Policy OL05: Green wedges Within green wedges..... development will not be permitted if it would add to existing sporadic or isolated development, damage the individual character or identity of a settlement, or could lead to or encourage settlement coalescence, whether physical, visual, or intrinsic.

Paragraphs 142 to 144 of the National Planning Policy Framework (NPPF) address the protection of Green Belt Land, and Green Wedges have been interpreted to be included under this definition. Green Belt/Wedges are defined as serving the following purposes:

a) To check unrestricted sprawl of large built-up areas. b) To prevent neighbouring towns from merging into one another. c) To assist in safeguarding the countryside from encroachment. d) To preserve the setting and special character of historic towns, and. e) To assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

Of these at least a), b), and d) are applicable to Seat_05 because it is a buffer between Seaton and the Ancient Borough of Colyford.

The adopted plan in 2013 stated : ‘community facilities, school, health, social and cultural are seen as borderline or inadequate with no capacity to serve additional residents’.

The 2025 the emerging plan now states that ‘Seaton has a wide range of community facilities, with a variety of shops, sports facilities, a library, GP, Hospital, and regular bus services around the settlement’.

With reference to the adopted plan quotation, the emerging plan statement is clearly untrue and needs amending. These facilities have reduced considerably since 2013, e.g. closure of hospital in-patient beds.

There is also a threat to Seaton Wetlands. This is a very precious asset to Seaton where numbers of visitors have increased exponentially since it opened, and must be preserved at all costs. These sites all fall within the corridor for bat migration and foraging between the Beer Quarry caves and Seaton Wetlands and development will compromise their continued occupation of the Seaton area.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I believe the key to protecting Seaton from unsustainable and inappropriate development which will threaten so much of Seaton's way of life and future is to remove sites Seat_02, Seat_03 and Seat_05 from the emerging Local Plan.

I believe that the site at Harepath Road that has been allocated for mixed use Industrial/recreation should also be removed from the emerging plan and returned to the Green Wedge so that the town can build on all the work that has been put in during that time into developing Seaton as a 'destination for Green Tourism'. Removal of this site would also ensure that any future retail/employment is based closer to the town centre to support it and therefore meet strategy SE06.

I therefore request that the above mentioned sites be removed as potential development sites from the emerging Local Plan and return to Green Wedge status and that the Built-up Boundary be restored to that in the adopted 2013 plan.

Full name: Diane Smith

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

There are many reasons why the emerging local plan sites Seat_02, Seat_03 and Seat_05 should be deleted as candidate development sites. I therefore set out reasons why Seaton is totally unsuitable for consideration for any further housing development. I would like to start with infrastructure. Vitally important is the insufficient, infrastructure to support development of these sites. We have an old sewage system that would come under severe pressure. Local schools are full which begs the question of how far children would have to travel to fulfil their education. I discussed the potential for development of these sites with a local Medical Practice recently who have confirmed that, I quote - 'the Practice could not manage with present resources' should further housing development go ahead. Taking into account developments presently under construction at the Waterfront (30 properties), Seaton Quay (90 properties) and 72 houses under construction in Colyton, the GP Service position will be further exacerbated and will cause further disruption to an already stretched health service. We all know from recent news that Dental Services throughout the West of England are in crisis such that very few people are able to access NHS Dental care. There are few places left for the air ambulance to land and it is well to note this area is used as a landing area in an emergency, and has been used twice in the last few weeks. The adopted plan in 2013 stated : 'community facilities, school, health, social and cultural are seen as borderline or inadequate with no capacity to serve additional residents'. Despite these facilities having reduced considerably since 2013, in 2025 the emerging plan now states that 'Seaton has a wide range of community facilities, with a variety of shops, sports facilities, a library, GP, Hospital, and regular bus services around the settlement'. With reference to the first quotation of this paragraph this second statement is clearly untrue and needs amending. I emailed Richard Foord about my deep concerns regarding this development – I quote his reply of 15/8/24 'Your email raises very important points specific to that site, but also about development in general. Broadly speaking, I am in favour of more homes – as they are so desperately needed -

but at the correct price point and on appropriate sites. Building for profit, with no real appreciation or action regarding infrastructure is clearly wrong. Flooding is a factor that must always be given serious consideration now'. End quote There is also a threat to Seaton Wetlands. This is a very precious asset to Seaton where numbers of visitors have increased exponentially since it opened, and must be preserved at all costs. The disruption caused both during and after development would have an enormous impact on the wildlife at this very important site.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

I believe the key to protecting Seaton from unsustainable and inappropriate development which will threaten so much of Seaton's way of life and future is to remove sites Seat_02, Seat_03 and Seat_05 from the emerging Local Plan. I believe that the site at Harepath Road that has been allocated for mixed use Industrial/recreation should also be removed from the emerging plan and returned to the Green Wedge so that the town can build on all the work that has been put in during that time into developing Seaton as a 'destination for Green Tourism'. Removal of this site would also ensure that any future retail/employment is based closer to the town centre to support it and therefore meet strategy SE06. I therefore request that the above mentioned sites be removed as potential development sites from the emerging Local Plan and return to Green Wedge status.

Full name: John Vieth

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object strongly to further development to the North of Seaton, reducing the green wedge to Colyford.

A few years ago, similar proposals on this land were rejected after a great deal of investigation, review and cost. During these financially challenging times we cannot afford to 'go round the houses' again. It is a worthless exercise, the majority of the public don't want it and the area does not need it. It's a waste of money that we don't have.

This important green space forms a division between Seaton and Colyford. It provides a safe corridor for birds, bats and badgers. I have seen hares, deer, curlews, lapwings, egrets, foxes, rabbits, geese and pheasants on these fields. This important wildlife will disappear forever if these houses are built.

Please don't believe that there is a housing shortage in Seaton. This morning, on Rightmove, there are 248 properties for sale in Seaton. The prices range from £70k to £1m; the full spectrum.

Colyford cannot cope with any increase in traffic that this development will inevitably bring. Come and stand on Swan Hill (A3052), or at the junction with Harepath Road or Seaton Road by Colyford Post Office when 1100 pupils arrive at or depart the grammar school. You will witness the road being practically closed as they get on and off up to 15 buses twice a day. It's an accident waiting to happen.

Please do allow further development in this area, it is important for future generations and wildlife.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I've made some representations on this plan, but wish to add some pertinent points. These are comparing the existing site designation for land associated with Seaton 02 and 03 and refer to previous plans compiled by EDC

Then noting the current proposed plan regulation 19, the two proposals and statements are polarised. The first document states that great emphasis is placed on existing agriculture and farming in rural areas and the retention of green spaces and green wedges. Yet the regulation 19 has redesignated farming land and green wedges bring both into the proposed plan.

Security of land and land use as well as preservation of these special and rare spaces it crucial, in your own words, yet dismissed out of hand without discussion to anyone affected by these proposed changes and the considerable loss of amenity of these precious spaces.

Land designation is there to provide security to local populations knowing that it won't be built upon and wildlife, public view points etc are continued to be preserved for reasons set out historically and have remained so for many years.

I mention view points. The first document has two such points at the top of Barnards Hill Lane. One points east, which looks over the Axe valley to hills beyond, but view also looks south-east to the sea. This view point would look over Seat 02 and Seat 03 in the proposed plan, thus the statements to preserve these specific amenities, will be lost if

Seat 02 & 03 are built upon, robbing walkers and locals of a prime position above Seaton.

I urge EDC to seriously consider Seat 02 as not appropriate as it rejects all the previous land designation, rejects the positive needs of preserving view and vantage points, as well as rejecting the positive statements of preserving valuable farming land. I also draw on the other points I have made regarding loss of essential wildlife corridors, and increasing flooding to existing housing. This site should not be available for development.

Seat 03 is in conflict with much of the above so also should not be available to development.

I hope these observations are helpful in understanding my concerns and the proposed changes in land use that would permanently remove significant amenity benefits.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Seat

02 is proposed for 40 dwellings, with a wide buffer to the north and west. It is difficult to assess the density for his proposal as those properties in Mulberry Rise, Oakland close and Poplar Tree Drive (typo on the document corrected here), 40 houses would take up much of the site, and leave no wide buffer. The proposed size of this buffer is not specified in the document and therefore difficult to assess, but the available space and assuming similar density of building, would sensibly allow around 20 properties. The bat corridor is crucial and I predict a complete loss of this amenity if any houses are built on the site, let alone 20, but certainly not 40. This is an over optimistic number and will lead to over development of the site and a complete loss of the essential wildlife migration routes. By stating housing number in this policy, is dangerous, so since the corridor and buffer zones are vital, this allocated space must be set out clearly to avoid misunderstanding (at best), or high levels of abjections later when it becomes clear that the housing number takes priority over an interpretation of “buffer zones”. Access to Seat 02 is awkward unless the spur off Lime way is used. Otherwise Barnards Hill Lane will be a busy junction at the bottom and encourage more cars to use the lane to exit onto the A3052, much as they do now which is extremely dangerous and illegal. Such a proposal represents a significant loss to the area. Barnards Hill Lane is used by many local walkers as it provides a safe access to Holyford as well as a rare view over the to the Axe estuary and sea. If building work is granted, then it would need to be at maximum only the bottom half of the site only, to provide adequate bat migration, but also a sensible and appropriate gap between Seaton and the country side. The impact on the current flooding of this site would then be reduced allowing surface water to be diverted to Poplar Tree Drive and not towards Lime Way as it currently does. Single storey housing would be in keeping with the surrounding area and be more of desirable need to locals. It would reduce the visual impact of the development in its location. Developing this site (Seat 02), should be last resort bearing in mind the environmental impact in my view, and the suggestion of stating a buUer and reducing the available

building land to the southern half of the field, is a compromise providing environment issues can be overcome. Seat 03 is also affected by the bat corridor and I suspect both Seat 02 and 03 to come under very strong opposition from ecology reports. I object to any development on Seat 02, but if some have to be built, then this must be limited to the lower half of the field only to preserve wildlife corridors, essential agriculture, a demarcation between Seaton and the countryside, preserve a valuable viewpoint for many folk who walk up Barnards Hill Lane, and mitigate flooding into the properties below this site. It would be preferable to look elsewhere for building on existing brownfield sites first before losing this amenity for good. Seat 13a is a very sensitive site, and the Proposal states “Archaeological assessment through geophysical survey and field evaluation should be undertaken prior to the site being developed”. It should read “Archaeological assessment through geophysical survey and field evaluation should be undertaken to assess if a development is safe and practical without causing damage to Roman remains, prior to any progress with considering this site”. This is an area which has much historical amenity value, and would be lost if built over too near to it. I object strongly to the site being considered when other brownfield sites exist.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The purpose of this note concentrates on the local planning suggestions for Seaton and Colyford area, where the land identified as Seat 02, Seat 03 and Seat 13a have ignored the historic land designation set aside to differentiate Seaton from Colyford removing previous Green wedge designation, and serious impact to wildlife. I therefore object to the developments specifically Seat 02 and 13a but also Seat 03 for the obvious linking of Seaton to Colyford. The Regulation 19 plan sets out to provide statistics regarding the East Devon area, encompassing the entire district, but does not allocate statistics to individual areas; Seaton's demographic age group is much higher than the 30% quoted, and average earnings are therefore much less than the national average. Housing are mainly bungalows which represent a higher proportion of the housing type, mainly because of the age of the population, and as a consequence, employment in Seaton is much lower than the average, and thus distorts the overall statistics than needs to be considered in additional housing; Jobs attract people. No jobs means housing is not needed, or it simply promotes more commuter traffic to those parts where employment exists, clogging up roads increasing pollution. The statistics have placed value upon Historic Environments and Outstanding Natural Environments, which I welcome. Seaton is on the Jurassic Coast with very long links to the Roman times. There are many protected species, such as bats and bird migration to the Wetlands area, which makes the local plan for Seaton and that of Regulation 19 not only curious, but contrary to the proposed plans and ideals set out in the introduction. The proposal is to adopt this document and then local planning and developers to test conformity, but since this plan removes much of the objectives it sets out to preserve, and ignores key factors in planning (wildlife lost, currently used agricultural land, historic green spaces that separate housing areas, land known to excessive flooding, loss of agricultural land to name but some of the objections), then by allowing development to be adopted simply isn't good practice, and in fact is dangerous to local communities, wildlife, road and sewage treatment infrastructure, schooling, doctors, hospitals etc etc. Developers

should not be the people to test the policy and constraints of the land, it must be done at this strategic planning stage. I know that no one has undertaken flood risk assessments of Seat 02 and Seat 03; there have been no consultations with bat conservation, there have been no design checks on existing foul sewage disposal; the list could go on, but to set aside land is a failure to understand the land use and the local needs and constraints. There is already a sewage treatment plant in Seaton that cannot cope with the needs discharging waste into the sea, thus allowing a policy at this planning stage to building more homes will directly impact the coastal environment and is therefore negligent in this proposals. Blame will be pointed at South West Water, but in fact adopting a plan to allow building will be the cause, and this is East Devon's responsibility. At present there are a great number of vacant properties in Seaton. There are few local jobs and therefore to build will damage the environment, place excessive burdens on infrastructure. There are many properties that have been bought up as second homes, which damages the community, and the area, as it does not set out to achieve any of the perceived housing needs for locals.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: DEVELOPMENT IN THE TOWNS AND VILLAGES The Policies fail to address Objective 2 of The Vision, that is, tackling the climate emergency, Objective 6, high quality development, and Objective 9, encouraging walking & cycling. For Objective 2, it fails to recognise that Exeter is the major draw for employment and that most journeys will be made between there and the new housing areas. Placing all new development close to Exeter is essential to achieving Objective 2. Objective 6 will not be met by isolated developments on the peripheries of existing settlements. Only large-scale development can provide for high quality developments. The Cornish example of Nansledan shows what can be achieved towards Objectives 2, 6 and 9 through a comprehensive and carefully considered housing provision. East Devon District Council has the opportunity to demonstrate its abilities and commitments to truly delivering a world-beating vision through a major planned expansion through an enlarged proposed second new community, Policy SW01, rather than piecemeal relatively small-scale developments at the edges of existing communities. For Objective 9, permitting 'edge development sites' for new housing at existing communities fails to address the Objective. It is unrealistic to expect people to walk or cycle given the distances and the natural terrain. To give but one example, development on the edges of Ottery St Mary are too far for people to walk to the central shopping area (and other facilities) and the steep valleys further severely mitigate against foot and cycle travel for a number of the locations. Moreover, off-street vehicle parking in the central area is already used to capacity and your proposals fail to address the consequences or provide for any positive resolution. Policies should be radically redrafted to address such matters. In particular, it should advance the proposed second new community, WS01, as the solution and increase its size such that development on the edges of existing settlements are unnecessary.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Sadly I write this having witnessed EDDC's planning committees February 2025 meeting. It leaves me thinking that this consultation is an enormous waste of time and tax payers money. It appears to be a box ticking exercise. Unfortunately the planning committee came across as either incompetent or corrupt or a mixture of both. The area SEAT-05 was being considered for planning when it hadn't even reached this consultation process. The committee did not know the site and the officers advised against a site visit and steered the Chair to change his vote to one in favour of development. Honestly with officers like this running EDDC what chance is there of any of the consultations sent in actually being read or taken notice of?

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: 1; SEAT 05 This is on the green wedge separating the newly formed Colyford village parish from Seaton town. It is there for a reason, to stop coalescence. There is already a development proposal (comment above) on the land being consulted on. This means you already have the few arguments for and the many arguments against, including this land in this local plan. Interestingly one of the strongest objections comes from within EDDC, as well as Colyford PC and Seaton town council. The area is of huge environmental importance and the EDDC wetlands countryside team know what damage to wildlife will occur when habitat and bat flight routes are destroyed. Tax payers money, spent by EDDC making the area a magnet for green tourism, will be wasted.

Colyford Burgesses own Colyford common below SEAT05 and we do not want to be flooded or see Stafford brook polluted. There is no guarantee the SUDS will work especially if 2 weather events closely follow each other. Seaton road is not fit to see an increase in traffic and the Seaton road /A3052 junction certainly isn't.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Seat_03 and Seat_05: Consistent with the recommendations of the Site selection report, should pre-commencement archaeological survey be required at this site?

Seat_13a: The site is north of, and immediately adjacent to, a sizeable Scheduled Monument: Roman and earlier settlement at Honeyditches – a heritage asset of the highest significance according to the NPPF. The list entry states that the monument survives as below ground remains and slight earthworks which have been recorded by way of excavation and ground survey. Romano-British villas were extensive rural estates and consideration should therefore be given to the potential for associated archaeology to exist within the surrounding areas. Conservation of the remaining rural setting should also be a priority. The proposed site allocation has the potential to result in considerable harm to the significance of this heritage asset. It would break the clearly defined urban edge of Seaton, projecting out into land adjacent to the Scheduled Monument and impacting on views of the wider landscape. While we recognise that some land to the north contains caravans at present, these have an ephemeral quality in the view and are low rise, such that the landscape beyond remains readily visible. Furthermore, the presence of development that harms the setting does not justify further cumulative harm. As information on the archaeological potential of the land has not been provided in support of the site allocation, it is unclear whether a proposed capacity of 39 dwellings would be achievable. This site allocation is therefore unsound as it is not justified (based on proportionate evidence relating to archaeology and setting impacts), it is inconsistent with national policy, and it is not effective as there are questions around deliverability.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Seat_03 and Seat_05: Consider introducing requirement for pre-commencement archaeological survey.

Seat_13a: We recommend that this site allocation is removed from the Plan. Otherwise, as this site may contain significant archaeology, a desk-based assessment and potentially a site evaluation would be needed to justify a site allocation. Please refer to the Plan-making section of our guidance on Planning and Archaeology, in particular from p24. A more detailed understanding is also needed of potential impacts on the settings of heritage assets, and whether this could be minimised and mitigated.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Strategic Policy SD05 Seaton (87) Seat_02 / Seat_03 / Seat_05 Policy PB04 on the Beer Quarry and Caves SAC requires that adverse effect on all pinch points is avoided. The site selection reports for the above sites state, however, that they are within pinch points and that a significant adverse impact is likely. The HRA rules out an adverse effect on integrity. Beer Quarry and Caves SAC Guidance says this: “Pinch point has been identified in the landscape between Seaton and Colyford and Colyford and Colyton. Further urban growth in this area could significantly impact on the movement of LHBs and potentially have a likely significant effect on the SAC population. Dark flight lines need to be maintained through these Pinch Points to ensure uninhibited movement into their LCZ and between other key roosts in the region. GHBs that have been ringed at BQ& C have been found at a roost at Charmouth (Vincent Wildlife Trust Pers Comms 2011)” beer-quarry-and-caves-sac-hra-guidance.pdf. In view of this, the HRA is far from clear how the principle of major development within the Seaton / Colyford pinch point will avoid a significant adverse impact on a European protected species. Mitigation wording in the policy is of course useful, but not sufficient if the fundamental principle of development in a pinch point would have an adverse impact. The HRA should therefore revisit this issue and provide an assessment of how the sites interact with the pinch points. Seaton 13a Land west of Axeview Road Site 13a is within the bat sustenance zone for Beer Quarry and Caves SAC. In line with all other sites in the Local Plan in this area the policy should also contain text which requires a wide buffer to the western boundary with tree planting /landscaping boundary and the standard wording used through the plan ‘In order to ensure no adverse effect on the integrity of the Beer Quarry and Caves SAC and bat activities, suitable avoidance or mitigation measures will need to be identified and implemented.’

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: We disagree with proposed housing development allocations as follows -

Land west of Two Bridges Road, Sidmouth, (Side_06a) - We object to this site because -
(i) This is outside the built up boundary of Sidford (ii) Implies a loss of National Landscape (former AONB), (iii) Will cause an increased risk of flooding on the A375 by the 'Two Bridges' which already floods and can be blocked by run off from the fields above and to the west in heavy rain. (iv) Encroaches into the 'green wedge' between Sidford and Sidbury so will cause coalescence of the built up areas contrary to Policy 3 of the Sid Valley's Neighbourhood Plan 2018 - 2032.

Sidford – land by Windsor Mead and Burnscombe Lane (Side_31) - We object to this housing development site -

(i) This is outside the built up boundary of Sidford, (ii) Implies a loss of National Landscape (former AONB), (iii) Over development of site and poor access (iv) this is a late 2024 addition to the proposed development site in the Sid Valley which was previously listed as 'rejected' in the original version of the proposed Local Plan.

Furzehill, Sidbury (Side_34) - We object as - (i) Implies a loss of National Landscape (former AONB), (ii) Originally presented as sites 34a and 34b with preference just for

development of the lower and smaller site 34a leaving 34b untouched. (iii) Risk of flooding from rainwater run off on to the A375 as identified by the Environment Agency. (iv) this expanded site is a late 2024 addition to the proposed development site in the Sid Valley which was previously listed as the smaller site 34a in the original version of the proposed Local Plan with 34b rejected.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The proposed new housing development sites - Sidm_06a, Sidm_31 and Sidm_34 should be deleted from the proposed Local Plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This part is not sound as the proposed housing development sites have lacked - (1) adequate and effective public consultation. (2) housing development is proposed outside the settlement boundary in 'National landscape' (former AONB), (3) will cause an increased risk of flooding, and, (4) increase the risk of settlement coalescence between Sidford and Sidbury.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The proposed new housing development sites - Sidm_06a, Sidm_31 and Sidm_34 should be deleted from the proposed Local Plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: There has been inadequate public consultation with new 'previously rejected' sites being reintroduced to the Local Plan with no public consultation or approval.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To verbally represent the views of the Sid Vale Association - the almost 180 year old amenity society for the Sid valley with approaching 2,000 members.

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Whilst supporting the Plan in its proposed allocation of Land south-west of Woolbrook Road (Sidm_01), for the reasons set out at 4 (b), we believe that its effectiveness and therefore its soundness could be improved.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

South-West of Woolbrook Road", Sidmouth (Sidm_01).

Persimmon fully supports the intention to allocate this land for residential use and we can confirm that the site is available, for development. In addition, Persimmon has instructed a project team in order to bring the site forward for development as envisaged by the emerging Local Plan. This project team includes the following specialisms:

- Design/Master Planning
- Highways/Accessibility
- Drainage/Flood Risk Assessment

- Ecology
- Landscape and Visual Impact.

The work undertaken by Persimmon has further confirmed that the site is appropriate, achievable and deliverable for development and will deliver much needed new homes, including affordable. In addition, the site will also assist in delivering significant benefits and localised improvements for the wider area including in respect of enhancing sustainable travel modes and surface water flooding.

Notwithstanding Persimmon's support for the principle of allocating the site for development, we are concerned at the wording of Strategic Policy SD06 in that it states "This land is allocated for development of 127 new homes...".

We consider that this wording is both too definitive and inflexible in identifying specifically exactly "127 new homes" and, further, that it is likely to underestimate the true capacity of the site in terms of dwelling numbers.

It is important that planning policies, in allocating land for development, incorporate a degree of flexibility in prescribing the amount of development anticipated to come forward on a specific site if they are to be considered effective and positively prepared.

It is therefore common practice for allocation policies to include terms such as "approximately", "in the region of" and/or "around" when identifying levels of development that are likely to be delivered. The reason for such terminology is that the true capacity of the site is only likely to be understood at planning application stage once detailed survey and design work has been completed. A definitive figure of "127 new homes" runs the risk of being unnecessarily restrictive resulting in the Plan not making the best use of land.

It is noted that the emerging Local Plan adopts a less definitive approach in respect of many of its other proposed allocations. For example:

- Land to the south of Harepath Hill (Seat_03) - "This site is allocated for around 75 dwellings" (page 88)
- Land off Harepath Road (Seat_05) - "This site is allocated for around 130 dwellings" (page 88)
- Land west of Two Bridges Road, Sidford (Sidm_06a) - "This land is allocated for development to the north of Sidford to accommodate around 30 new homes." (page 89).

Other examples demonstrating this point exist throughout the emerging Plan and we therefore request that the same approach is used for Sidm_01 with suggested wording set out in response to 4 (c) below.

Perhaps more fundamentally, we are concerned that the emerging Local Plan fails to fully recognise the true capacity of the site at Woolbrook Road. This is currently considered to be 127 dwellings which is identical to the capacity set out at Regulations 18 stage. However, whilst the site boundary and land area remains identical, it should be noted that the Regulation 18 Plan, in addition to the 127 new homes also included a requirement for 0.5ha of employment development on the site.

The employment requirement has NOT been maintained into the Regulation 19 Plan which, logically, allows for a proportionate increase in the number of new homes to be provided by the allocation.

Persimmon has investigated the site capacity in detail and has concluded that the true capacity of the site, taking into account all known constraints, is approximately 160 dwellings.

The requested amendment to the capacity of the site should also be considered in the context of comments made on behalf of Persimmon in respect of Strategic Policy SP02: Levels of future housing development and, specifically, the stepped trajectory for the delivery of new homes. Persimmon is confident that the Sidm_01 site will be delivered in full during the first period of delivery set out in SP02; that is to say 2020/21 to 2031/32. It therefore follows that increasing the capacity of the site to that which can be reasonably accommodated would play an, albeit small, role in reducing the the level of change between the two delivery periods and reduce any criticism that may be made by others of the stepped approach.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Consistent with the comments set out in response to question 4 (b), and in order to ensure that the Plan is found to be positively prepared, effective and justified, we request that policy SD06 be amended to read (changes in capitals)

"Land south-west of Woolbrook Road (Sidm_01) This land is allocated for development of AROUND 160 new homes. In order to ensure no adverse effect on the integrity of the Beer Quarry and Caves SAC and bat activities, suitable avoidance or mitigation measures will need to be identified and implemented. The development will need to maximise opportunities for localised improvements/ contributions to enhance sustainable travel modes".

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Persimmon is a national house builder and has vast experience in delivering new homes across the country.

Persimmon also owns the Land south west of Woolbrook (Sidm_01) allocation which is intended to deliver the majority of new homes identified for the Town and it is therefore considered that Persimmon's participation at the Hearing Sessions would be useful for the appointed Inspector(s).

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I write to you regarding the above-mentioned site as part of the Regulation 19 Consultation. The site is also referred to Sidm_08_041B in some documentation. The site was also referred to as Sidm_27 in the HELAA 2022. The site has been put forward by my client for consideration for housing allocation, and evidence has been provided to the Local Authority as to the requirement for this. In addition to the original Call for Sites, further evidence was supplied to the LPA on 10th June 2022. At that time, the site was referred to under FS-Case-419961866. Further to this, a consultation response to the East Devon Local Plan was provided to the HELAA of November 2022, with the reference Sidm_27, and the Local Plan reference LP_Sidm08_041B. Further to this, additional evidence and a request was supplied to the Panel Members and to the Policy Team on 11th April 2024, related to a further request, moving forward, to change the allocation to housing.

2.0 Representation to the Consultation Local Plan We note that on page 4 of the Summary Site Selection Report, the site was sifted out of the process for selection for housing allocation. The site's extant approval 18/1094/MOUT is the cited reason for being sifted out. We identify why this should be reconsidered, we have previously supplied evidence as to why the change in allocation is required to support 2 employment investment at Alexandria Industrial Estate, and secure an attractive proposal for a housing allocation at Sidford. The evidence and request for the allocation seeks to support the ambition to deliver a new access at the Alexandria Industrial Estate, which requires investment release from the Sidford Employment site. My client, Messrs Ford, own both sites. They currently have 36 businesses occupying accommodation at the Alexandria Industrial Estate.

3.0 Why the shift in drive to deliver Alexandria Industrial Estate over Sidford: Until the availability of the Alexandria Industrial Estate ransom strip, the Sidford employment Site was promoted for the employment growth. The Sidford Site appeared in the Draft Local Plan in 2012. It was Adopted as the allocated site in 2015. An application was submitted in line with the allocation in 2016, and refused. A reduced scale scheme was submitted in 2018 – it was also refused. The applicant appealed the refusal, and the Appeal was allowed in Aug 2019. Conditions were discharged from 2019 to 2022, alongside Reserved Matters for Scale and Appearance. Significant development commenced, and approximately a third of the site has been remodelled, with significant level changes associated with drainage betterment and watercourse remodelling. The area has been relandscaped, meadow seeded, there are new enclosures, with drainage changes and the planting of 2500 trees and hedge plants. These works have been done in accordance with Approval 18/1094/MOUT. This work was ceased once the ransom strip at Alexandria Industrial Estate became available. The works mean that application 18/1094/MOUT is extant. Current spending on the Sidford site, most notably the two EIA's and extended planning battles, resulting in Public Inquiry have taken costs to the present day to £2.5 million. Historically, the Alexandria Industrial Estate had been stifled from an ability to secure intensified development due to inappropriate access provision. This had stifled intensification and improvement to the site for 30 years. The LPA is aware from evidence previously provided that a ransom strip that would have enabled better access, was overpriced at a £1m asking price. (Evidence on this point was the subject of debate, and evidence in the 2012 Local Plan Inquiry, alongside cost analysis for a road construction, which was priced between £750,000 and £1000,000, dependent on design options). Following the passing of a former owner, the ransom strip land became available at the Alexandria Site at a reasonable price. Unfortunately, this did not occur until after the consent was achieved and works had started at the Sidmouth Employment Site. The first opportunity to purchase the ransom strip at a reasonable price was grasped by my clients, and has enabled the principle of improved access to a large part of the Alexandria Industrial Estate. The ransom was secured by my clients' in 2021. My clients', who own both 3 sites (Sidford and Alexandria), had always hoped to redevelop the Alexandria site and were frustrated by the ransom strip. Having secured the ransom strip, they immediately developed an application to transform this site. This was submitted in Sept 2022 and approved in Nov 2023, with no material changes to the original submission. Landscaping was a Reserved Matter and is presently submitted. All other Prior Approval Conditions are submitted for determination, or are already approved. The present-day costs for securing the ransom strip and the approvals so far for the Alexandria Industrial Estate have exceeded £250,000. From the chronological history referred to above, it can be demonstrated that my clients have not stopped with their endeavours to secure new employment development, albeit there is now a change in focus. The focus is now to redevelop the Alexandria Site in accordance with its approved application 22/2063/MOUT once all

Conditions are determined (approved) and monies have been raised from the complete or partial disposure of the Sidford site for housing. Up until the ransom strip became available, it was my client's expectation that the Alexandria site would be sold, potentially for housing as a brownfield site. The ransom strip purchase changed the fortunes of this site, subject to being able to raise capital from Sidford.

4.0 Why is the allocation of Sidford (Sid-08) so important and desirable: In order to promote delivery of employment space, it is now important to secure some change to the allocation of the Sidford site. Correspondence issued in April 2024 highlighted the potential. Correspondence was received from the LPA from Cllr Todd Olive, who was chairing the Council's Strategic Development Panel at the time (a blend of Officers and Members with a focus on guiding development at a time where needs were not met by adopted policy). On behalf of the Panel, he identified that we needed to wait until the considered process of the Local Plan in terms of future allocations, and we were advised that the Panel was aware of our requirement to see a shift in the allocation for the Sidford Employment Site. As mentioned, all Reserved Matters and Prior Approval Conditions have been disposed of in the case of the Sidford site, and most Prior Approvals have also been discharged for the Alexandria Site (some are submitted but not yet determined, others are approved). Also, there has been significant investment in extant works at Sidford. My client has been out to construction tenders and is therefore well versed in the costs associated with both schemes. The highway provision alone for Sidford is expected at £950,000, and it is not dissimilar at the Alexandria Industrial Estate. Other costs related to remodelling levels, new drainage, new landscaping, and new buildings means the schemes exceed £4m in both cases, and exceed the demand for employment. It is important to note, the existing Local Plan 2013-2031(outgoing) never expected the increase in employment space at Alexandria Industrial Estate. It is impossible for both schemes to be delivered with the additional costs required for the wider infrastructure and 4 employment accommodation. My clients accommodate the largest share of employment in Sidmouth in the Alexandria Industrial Estate and on the High Street, as such they are clear that there is insufficient demand for both sites. Alexandria Industrial Estate largely has tired accommodation, and the approved application 22/2063/MOUT details the significant benefits it would bring, including environmentally, socially, aesthetically, to drainage, and employment space availability and employment space quality etc. There has also been overwhelming public support for this scheme. Conversely, at Sidford, we are painfully aware that there has been the public preference to switch this site for 100% housing, hence the delay in securing the approval for the employment scheme. My client would support 100% housing allocation. A 100% allocation could secure funds to deliver the Alexandria Industrial Estate's scheme, but at 75% housing, there would be capacity from a capital receipt to deliver a significant proportion of the Alexandria proposals. My client therefore seeks a minimum of 75% site coverage for housing (approx. 52 units). Without some shift from

the LPA, it will be impossible to lever investment, and I would like to return the LPA's memory to the knowledge that it was my clients' long held expectation that the Alexandria site would be sold as part of the delivery of the Sidford site. With significant employment uplift now potentially available for the Alexandria site, it would be desirable to see employment investment on this site, and to see all or part of the Sidford employment site allocated for housing. There are 36 businesses, which are detailed in the Alexandria application, that seek improved employment space and growth. These businesses' preferred location is the Alexandria Site, and a shift in policy position in the Emerging Plan could enable investment on this site and potentially a more publicly desired mix of use at the Sidford Site. I appreciate that the LPA may not naturally balance the financial arguments related to a single ownership of both sites, but unless the LPA can engage with the need to create financial viability for one site supporting delivery of the other, then the potential for much needed employment investment will be stifled. Plus, the additional housing is surely welcomed. The LPA recognised the need for financial viability, and needed to sell the Knowle Council Offices to secure investment for new Council Offices at Honiton, and this has created a delivery opportunity. My client's approvals are all in place, and we now need assistance to create the Alexandria scheme. In the Consultation Draft Local Plan, I note that there are other allocations for employment and housing at Sidford. Whilst my client has no objection in principle to these allocations, it remains that his site offers a greater volume of build capacity, and in our view, it is unwise to stifle this capacity on the basis of giving no reconsideration to the Sidford Site Sidm_08. It seems to us remarkable that only 6 sites were sifted out from consideration in Sidmouth (page 4 Summary Site Selection Aug 2024), and that the Sid_08 was one of them, given the expressed need for a switch in the use of the site from extant employment to a housing allocation. We feel the switch 5 would also better complement the expected housing allocation on the opposite side of the road. The existing works (extant works) at Sid_08 have cost a significant sum, and would equally contribute to the landscape amenity and drainage betterment of a housing scheme. The site details in the approval result in a Development area within FZ1, and as such, all the land is capable of providing good housing land. My clients therefore object to the exclusion of their site from the Emerging Local Plan with respect to any housing allocation. For your background information, I enclose again the masterplan for a housing solution, which was supplied in April 2024. This visualisation indicates how the site could be fully developed with housing. There would also be a potentially workable option for my clients to retain approximately a quarter of the site for employment purposes. If land for employment was retained, it would be in the northeast corner of the site and could be no more than 25% of the site if my clients are to obtain sufficient resource to make good headway in the delivery of the Alexandria scheme. There has been significant interest in the site Sid_08 from housing developers, and from nursing homes, but there has been no interest from separate employment providers other than the employment created by nursing care or major

food retail (none of which align with the present (outgoing) policy position). The rent roll information has been previously supplied and clarifies why revenue is insufficient to make a case for capital investment on both sites. The spend to date for both sites (£2.5 million and £250,000) and the future projected costs to see one of the sites delivered (in excess of £4 million for either site) is a factor in why both schemes are not viable. The investment at the Alexandria Site is dependent on a more joined up understanding of how the Alexandria and Sidford sites are linked in terms of investment. We hope, in memory of the Council's own need to upgrade its office site at the Knowle to a new location, that it will understand the importance of this representation and allocate the Sidford site for housing. If the Council cannot support this request for allocation, we would hope that evidence can be placed before the Inspector in order that the Inspector can scrutinise the points made above and previous background.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Bloor Homes control Land at Sidford High Street, Sidmouth as previously submitted to the Council during previous plan making stages. The land controlled by Bloor Homes amounts to some 19.34ha and has been assessed during the preparation of the Local Plan with reference numbers Sidm_02 and Sidm_35. This land to the North of Sidmouth could provide a net residential area of around 6.4ha and up to 200 new homes, including affordable housing. Development at this site could also contribute substantial Green Infrastructure, including new areas of public space, providing additional amenity for this part of the town and linking into the wider designated landscape in this part of East Devon. Strategic Policy SD06: Sidmouth and its development allocations [OBJECT]

2.9 There is clear potential for more development to be accommodated at Sidmouth to meet local needs, where the plan for East Devon could and should be doing more to deliver elevated levels of new housing, including affordable housing.

2.10 It is not clear that the status and potential for development at Sidmouth has been reflected in the policies and allocations in the plan, where other lower tier settlements are being proposed for higher levels of development. This includes having regard to Sidmouth as an existing centre of population, with the second highest resident population in the District (only behind Exmouth), specific pressures on affordability (and so the need for further affordable housing delivery) and with demographics skewed towards an ageing population (with additional pressures on housing supply and the ability to provide housing for economically active residents to support the health and vibrancy of the town). In this respect it is not clear that the spatial strategy has been followed and is effectively informing the policies and approach for the plan, as a whole.

2.11 The delivery of just 333 homes over the 15 years of the plan period at Sidmouth (as housing trajectory at Appendix 2 of HOU-001) is not a proportionate response to the role and function of Sidmouth as a key main centre within East Devon.

2.12 The Council has within the plan acknowledged that further land (located within designated landscapes, including the National Landscape) will need to be released for residential development. Sidmouth is a constrained settlement, surrounded by the designated National Landscape and other constraints (including Coastal Protection zones), with a lack of sufficient suitable development opportunities within the existing settlement, and/or on previously developed land. However, these constraints need to be balanced with the settlement's high sustainability credentials, it is therefore an area of suitable for additional growth, to support and in accordance with the spatial strategy at SP01.

2.13 The evidence that supports the plan has shown that development on greenfield sites at and around the town of Sidmouth (and in other locations) is necessary and justified in order to meet needs arising in the District during the plan period. This includes development on land within designated landscapes, including the National Landscape.

2.14 At Sidmouth the draft plan has chosen to allocate one larger and two smaller sites for new housing at the town (representing a total of 172 homes, at a capacity of 127, 30 and 15 homes respectively). A range of other sites have been discounted as being unsuitable, or less preferable, than those that have been selected.

2.15 The excluded sites include land being promoted by Bloor Homes to the North of the town (at Sidford High Street), comprising LP_Sidm_02 and LP_Sidm_35. The basis for the exclusion of this site, is not clear, on the basis that it is an otherwise suitable and deliverable site, and offers the opportunity for significant new strategic open space (as a public park), which would be an asset to the town and which would help to mitigate impacts that might otherwise occur in respect of the landscape in this area. This provision is not proposed or possible as part of development associated with the sites selected as part of the LP consultation.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To elaborate on issues raised and respond as appropriate during hearings.

Full name: Neill Chippett

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Not legal because it does not meet the necessary safety and access requirements.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The field on Burscombe Lane Sidm_31 needs to be removed from the plan

1. Extremely difficult to respond online.

2. Not legal, inadequate access to field.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Unsound because 1. The road Burscombe Lane is prone to subsidence. 2. Access too narrow. 3. No room for pavement. 4. Potential flooding issues.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.:

1. Failure to cooperate with Highways.

2. Failure to cooperate with residents.

3. Failure to cooperate with National Landscapes.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: It is vital to protect any areas that are AONB or National Landscape. Common sense and logic need to be voiced and not legal terms which many people find impossible to understand.

Full name: Gillian Croney

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: suggest this plan is not legal because using an online portal discriminates against the elderly who tend not to be computer savvy. This does not provide the right level of community involvement in an area where 37% of the population are aged over 60. Many of these residents would not have downloaded the East Devon App meaning their awareness of any local plan was already extremely unlikely and, if made aware, their options to respond are far too complicated and difficult to navigate. When looking at the plan on your website - although you show numerous comments of reply - there is no easy way to see which parts of the plan these replies relate to which also means you are not communicating the facts sufficiently enough to meet due diligence. I also believe the Sidmouth_31 part of the plan is not legal because you detail this development as one which “could be developed” which is a highly ambiguous statement lacking vital detail. You have not explained why previous rejections for this plot being developed have suddenly been overturned when nothing has changed, simply stating that you could be “squaring off the built edge”. This “built edge” dates back to housing built in the 1960s when regulations were different and the issues you should be considering are current environmental problems of building on today's National Landscape. The same issues that have resulted in you blocking many other developments within the National Landscape apply to this site and you have given no sound argument as to why they are being ignored. You also mention access concerns without offering any explanation of how these could be satisfactorily resolved - making this part of your plan very weak, lacking detail and not fit for progression.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy

or paragraph. Please be as precise as possible.: All residents should receive details of this plan by mail along with the option to respond by letter to ensure all opinions get voiced. The field on Burscombe Lane (Sidmouth-31) should be removed from the plan and and other sites (of which there are many) which fall outside of the National Landscape should be considered instead.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: To develop Sidmouth-31 (Land east of Burscombe Lane / west of Windsor Mead) you are choosing to ignore other much more suitable areas to build which have easier access and more cost effective development potential, that are outside of our precious National Landscape where building should only ever be considered as a last resort. Here are the main reasons why this site should continue to be rejected for development

Access - Access via Burscombe Lane has been refused for previous developments as this lane is very narrow allowing only single car access. The road is prone to subsidence and extremely dangerous to exit onto Sidford High Street with several blind spots also causing issues when turning into Burscombe Lane. Farm vehicles, tractors and trailers frequently cause disruption in Burscombe Lane which usually means that cars have to mount the pavement to pass in the narrow parts of this road. Obviously this is not ideal and dangerous practise. You mention Windsor Mead as an alternative entry route but this is also a very narrow road with the same problems of its junction onto Sidford High Street being very dangerous to navigate. Currently any entry route from Windsor Mead would have to be positioned on land which is private property as the existing houses completely block the perimeter of the field. If requiring compulsory purchase to access this land substantial cost gets added to the project along with considerable disruption to a small cul-de-sac.

Wildlife - Within this field there are bats, owls, dormice and many species of birds. The field is recognised as being part of the hunting zone for bats from Beer Quarry Caves and these should be protected. RSPB voice concerns about the reducing numbers of many bird species and removing this vibrant piece of countryside will make this situation even worse. Badgers are also a protected species and there are many families of badgers in this area. The area is ringed by Devon Hedges which also carry environmental protection orders.

Transport - Other potential sites in Sidmouth fall within easy access to public transport. Sidmouth_31 is a long walk to a bus stop where buses run twice a day meaning all house occupants would need cars adding to the pollution and traffic concerns mentioned.

Infrastructure - Schooling, and public health services are all over stretched and if new houses get built there must be a commitment agreed and in place to ensure additional services can be provided. Our local sewerage plant is extremely dated and unlikely to be able to cope with additional properties. We already see the pollution caused by sewerage spills on our coastline and, until steps have been taken to prevent this - extra building should not be allowed.

Drainage - there is a vast amount of water sent down the hill from Core Hill Woods - so much so that Burscombe lane becomes a river in heavy rainfall. The field of Sidmouth_31 is like a bog in the winter months acting as vital drainage for this water and - if built on - would potentially cause flooding wherever the water gets diverted to or on land beyond the development. NB A video can be supplied of water running down Burscombe lane to demonstrate this point.

Noise Pollution. You mention that the view might not be affected by this build (which I disagree with) but it is also important to consider noise pollution. Currently - all you can hear when standing in this field is birdsong. New housing comes with the required new technology of things like Heat Pumps which emit quite loud humming noises (like air conditioning units). This is another reason to avoid building on National Landscapes.

View - the existing houses at Windsor Mead and Corefields are over 50 years old and have well established screening of trees and hedgerows making them barely visible from higher up. They are also at the lowest point of the valley. New houses would be very noticeable and have a significant impact on a view much admired by people walking to East Hill Strips and Core Hill Woods.

Cost Effectiveness - The strongest message regarding new housing is the need for it to be affordable - but this plot offers the least cost effective solution. Any building on National Landscapes comes with substantial restrictions and these required planning restrictions of single storey dwellings, suitable choice of building materials, and rigid

rules about positioning of reflective surfaces etc add substantial cost to any building project at Sidmouth_31. This is another reason why other sites should be prioritised instead.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

I do not believe that it is possible to provide adequate modifications to make Sidmouth-31 a viable development. The only acceptable solution is to reject this site and focus on more suitable sites elsewhere. For just 15 houses - it makes much more sense to leave this field as National Landscape and build elsewhere. Otherwise once these 15 get built you'll then set a precedent to build some more next door and so on until the countryside is lost forever. Countryside which brings thousands of visitors to Sidmouth every year. We are meant to be protecting the local wildlife & countryside not destroying the delicate ecosystem that we currently enjoy.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: It is impossible to answer yes because I do not know who else you are cooperating with. I know that Highways have not even been consulted yet - who I firmly believe will reject the proposal. What other departments will be consulted and will they include environmental groups such as National Landscapes and CPRE (The Countryside Charity)

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I feel very strongly about the need to block this development and believe that I need to be at all hearing sessions to be fully knowledgeable about future developments and to feedback my concerns. There is mention of a protest group specific to Sidmouth-31 for which legal representation is being investigated - which I intend to join adding another reason to request participation.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I suggest this plan is not legal because using an online portal discriminates against the elderly who tend not to be computer savvy. This does not provide the right level of community involvement in an area where 37% of the population are aged over 60. Many of these residents would not have downloaded the East Devon App meaning their awareness of any local plan was already extremely unlikely and, if made aware, their options to respond are far too complicated and difficult to navigate. When looking at the plan on your website - although you show numerous comments of reply - there is no easy way to see which parts of the plan these replies relate to which also means you are not communicating the facts sufficiently enough to meet due diligence. I also believe the Sidmouth_31 part of the plan is not legal because you detail this development as one which “could be developed” which is a highly ambiguous statement lacking vital detail. You have not explained why previous rejections for this plot being developed have suddenly been overturned when nothing has changed, simply stating that you could be “squaring off the built edge”. This “built edge” dates back to housing built in the 1960s when regulations were different and the issues you should be considering are current environmental problems of building on today's National Landscape. The same issues that have resulted in you blocking many other developments within the National Landscape apply to this site and you have given no sound argument as to why they are being ignored. You also mention access concerns without offering any explanation of how these could be satisfactorily resolved - making this part of your plan very weak, lacking detail and not fit for progression.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy

or paragraph. Please be as precise as possible.: All residents should receive details of this plan by mail along with the option to respond by letter to ensure all opinions get voiced. The field on Burscombe Lane (Sidmouth-31) should be removed from the plan and and other sites (of which there are many) which fall outside of the National Landscape should be considered instead.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: To develop Sidmouth-31 (Land east of Burscombe Lane / west of Windsor Mead) you are choosing to ignore other much more suitable areas to build which have easier access and more cost effective development potential, that are outside of our precious National Landscape where building should only ever be considered as a last resort. Here are the main reasons why this site should continue to be rejected for development

Access - Access via Burscombe Lane has been refused for previous developments as this lane is very narrow allowing only single car access. The road is prone to subsidence and extremely dangerous to exit onto Sidford High Street with several blind spots also causing issues when turning into Burscombe Lane. You mention Windsor Mead as an alternative entry route but this is also a very narrow road with the same problems of its junction onto Sidford High Street being very dangerous to navigate. Currently any entry route from Windsor Mead would have to be positioned on land which is private property as the existing houses completely block the perimeter of the field. If requiring compulsory purchase to access this land substantial cost gets added to the project along with considerable disruption to a small cul-de-sac.

Wildlife - Within this field there are bats, owls, dormice and many species of birds. The field is recognised as being part of the hunting zone for bats from Beer Quarry Caves and these should be protected. RSPB voice concerns about the reducing numbers of many bird species and removing this vibrant piece of countryside will make this situation even worse. Badgers are also a protected species and there are many families of badgers in this area. The area is ringed by Devon Hedges which also carry environmental protection orders.

Transport - Other potential sites in Sidmouth fall within easy access to public transport. Sidmouth_31 is a long walk to a bus stop where buses run twice a day meaning all

house occupants would need cars adding to the pollution and traffic concerns mentioned.

Infrastructure - Schooling, and public health services are all over stretched and if new houses get built there must be a commitment agreed and in place to ensure additional services can be provided. Our local sewerage plant is extremely dated and unlikely to be able to cope with additional properties. We already see the pollution caused by sewerage spills on our coastline and, until steps have been taken to prevent this - extra building should not be allowed.

Drainage - there is a vast amount of water sent down the hill from Core Hill Woods - so much so that Burscombe lane becomes a river in heavy rainfall. The field of Sidmouth_31 is like a bog in the winter months acting as vital drainage for this water and - if built on - would potentially cause flooding wherever the water gets diverted to or on land beyond the development.

Noise Pollution. You mention that the view might not be affected by this build (which I disagree with) but it is also important to consider noise pollution. Currently - all you can hear when standing in this field is birdsong. New housing comes with the required new technology of things like Heat Pumps which emit quite loud humming noises (like air conditioning units). This is another reason to avoid building on National Landscapes.

View - the existing houses at Windsor Mead and Corefields are over 50 years old and have well established screening of trees and hedgerows making them barely visible from higher up. They are also at the lowest point of the valley. New houses would be very noticeable and have a significant impact on a view much admired by people walking to East Hill Strips and Core Hill Woods.

Cost Effectiveness - The strongest message regarding new housing is the need for it to be affordable - but this plot offers the least cost effective solution. Any building on National Landscapes comes with substantial restrictions and these required planning restrictions of single storey dwellings, suitable choice of building materials, and rigid rules about positioning of reflective surfaces etc add substantial cost to any building project at Sidmouth_31. This is another reason why other sites should be prioritised instead of this one.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

I do not believe that it is possible to provide adequate modifications to make Sidmouth-31 a viable development. The only acceptable solution is to reject this site and focus on more suitable sites elsewhere. For just 15 houses - it makes much more sense to leave this field as National Landscape and build elsewhere. Otherwise once these 15 get built you'll then set a precedent to build some more next door and so on until the countryside is lost forever. Countryside which brings thousands of visitors to Sidmouth every year.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.:

It is impossible to answer yes because I do not know who else you are cooperating with. I know that Highways have not even been consulted yet - who I firmly believe will reject the proposal. What other departments will be consulted and will they include environmental groups such as National Landscapes and CPRE (The Countryside Charity)

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I feel very strongly about the need to block this development and believe that I need to be at all hearing sessions to be fully knowledgeable about future developments and to feedback my concerns. There is mention of a protest group specific to Sidmouth-31 for which legal representation is being investigated - which I intend to join adding another reason to request participation.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Insufficient land allocated for housing (see comments for SD10)

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Allocate more land for housing

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: As for all my other comments

Full name: Richard John Eley

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: In respect of Sidmouth, I consider that the identification of the BUAB should have preceded site selection. I also do not think that the site either side of Fortescue Road should have had the area intended for community open space in The Byes deleted. This was undertaken without the consent or knowledge of the applicant, and I would like to see the legality of this procedure questioned and examined. The deletion arose from a mistake, as was conceded in a SPC document, but this mistake was then repeated. I very much doubt that this was legally compliant.

In the case of the Sidbury allocation at Furzehill, this site was selected by the SPC because it did not have an adequate access and would not therefore obtain planning consent. I do not believe this is a legitimate mechanism for site selection. Confirmation of this is available on Youtube.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The Fortescue Road site has never been scored or assessed and has therefore not been considered at all by the SPC. Instead, officers independently and without authorisation from the landowner/applicant, submitted a very different proposal which was much less attractive and deliverable.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

I think all submissions should be treated equally and fairly, and I think all mistakes, which are bound to occur, should be admitted rather than denied. They should then be corrected in order to allow all sites to come forward and be fairly considered.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The Fortescue Road site should be reconsidered as a matter of urgency by the Strategic Planning Committee, as should the Furzehill site. I do not think it is proper for sites to be allocated on the basis that they cannot be delivered.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: I think all submitted sites should be considered, and officers should not be allowed to unilaterally and very significantly, and without the knowledge, let alone agreement, of the applicant.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I would like the legality and fairness of the procedures adopted for Sidmouth and Sidbury to be explored.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.:

The use of an online portal discriminates against the elderly in an area where 37% of the population is aged over 60.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1) The site is within an area of National Landscape, with Beacon Hill local nature reserve, managed by the RSPB, with its Dartford Warblers and Nightjars and much other wildlife less than a mile away. Core Hill deciduous woods are much closer.

2) The junction of Burscombe Lane with the A3052 main road to Exeter is dangerous for large vehicles, and far from ideal for small vehicles limited visibility and tight corners. Burscombe Lane itself has a narrow single lane pinch point between boundary stone walls.

3) I am concerned about water runoff from the site during periods of heavy rain. I live in Corefields and get surface water running into the garden from the field and then forming a small stream down the path at the side of the house and across the front lawn during such periods, which happens several times a year. I dislike the situation as it is and certainly do not wish the situation to get worse building on the site will reduce its ability to absorb rainfall. I also understand that the local sewage system struggles with existing levels of demand.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

2) A redevelopment of the junction? Difficult in the extreme in such a tight space - 3) Substantial drainage works (increasing risk of flooding downstream?)

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.:

So I can more fully explain the issues with water runoff from the site.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The allocation of Sidm_31 and its access via Windsor Mead is based on a late, superficial and incomplete consideration by the Highway Authority (Devon County Council), which has not been subject to public consultation until this stage. The Highway Authority's justification for use of Windsor Mead ignores any consideration of the junction of Windsor Mead with the A3052, which does not meet the requisite standards set out in the Manual for Streets (DfT et al 2007) in respect of minor arm visibility splays, which are less than 10m.

I suggest this plan is not legal because using an online portal discriminates against the elderly who tend not to be computer savvy. This does not provide the right level of community involvement in an area where 37% of the population are aged over 60. Many of these residents would not have downloaded the East Devon App meaning their awareness of any local plan was already extremely unlikely and, if made aware, their options to respond are far too complicated and difficult to navigate. When looking at the plan on your website - although you show numerous comments of reply - there is no easy way to see which parts of the plan these replies relate to which also means you are not communicating the facts sufficiently enough to meet due diligence. I also believe the Sidmouth_31 part of the plan is not legal because you detail this development as one which "could be developed" which is a highly ambiguous statement lacking vital detail. You have not explained why previous rejections for this plot being developed have suddenly been overturned when nothing has changed, simply stating that you could be "squaring off the built edge". This "built edge" dates back to housing built in the 1960s when regulations were different and the issues you should be considering are

current environmental problems of building on today's National Landscape. The same issues that have resulted in you blocking many other developments within the National Landscape apply to this site and you have given no sound argument as to why they are being ignored. You also mention access concerns without offering any explanation of how these could be satisfactorily resolved - making this part of your plan very weak, lacking detail and not fit for progression.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Policy SD06 Sidm_31 should be removed from the Local Plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The recommendation to access Sidm_31 via Windsor Mead has ignored the poor (less than 10m) minor arm visibility splays, which do not meet the minimum criteria set out in Manual for Streets (ibid). A link between Sidm_31 and Windsor Mead cannot be achieved without the purchase of land from two Windsor Mead properties; if these plots cannot be secured by negotiation, the local authority would need to use its CPO powers on behalf of the developer.

To develop Sidmouth-31 (Land east of Burscombe Lane / west of Windsor Mead) you are choosing to ignore other much more suitable areas to build which have easier access and more cost effective development potential, that are outside of our precious National Landscape where building should only ever be considered as a last resort. Here are the main reasons why this site should continue to be rejected for development .

Access - Access via Burscombe Lane was quoted as a key reason (quite rightly) for the development being refused previously. This lane is very narrow allowing only single car access, is prone to subsidence and extremely dangerous to exit onto Sidford High Street. You mention Windsor Mead as an alternative entry route but this is also a very narrow road with the same problems of its junction onto Sidford High Street being very dangerous to navigate. Currently any entry route from Windsor Mead would have to be

positioned on land which is private property as the existing houses completely block the perimeter of the field. If requiring compulsory purchase to access this land substantial cost gets added to the project along with considerable disruption to a small cul-de-sac.

Wildlife - Within this field there are bats, owls, dormice and many species of birds. The field is recognised as being part of the hunting zone for bats from Beer Quarry Caves and these should be protected. RSPB voice concerns about the reducing numbers of many bird species and removing this vibrant piece of countryside will make this situation even worse. Badgers are also a protected species and there are many families of badgers in this area.

Transport - Other potential building sites in Sidmouth fall within easy access to public transport. Sidmouth_31 does not have bus stops close by meaning all house occupants would need cars adding to the pollution and traffic concerns mentioned.

Infrastructure - Schooling, and public health services are all over stretched and if new houses get built there must be a commitment agreed and in place to ensure additional services can be provided. Our local sewerage plant is extremely dated and unlikely to be able to cope with additional properties. We already see the pollution caused by sewerage spills on our coastline and, until steps have been taken to prevent this - extra building should not be allowed.

Drainage - there is a vast amount of water sent down the hill from Core Hill Woods - so much so that Burscombe lane becomes a river in heavy rainfall. The field of Sidmouth_31 is like a bog in the winter months acting as vital drainage for this water and - if built on - would potentially cause flooding wherever the water gets diverted to or on land beyond the development.

Noise Pollution. You mention that the view might not be affected by this build (which I disagree with) but it is also important to consider noise pollution. Currently - all you can hear when standing in this field is birdsong. New housing comes with the required new technology of things like Heat Pumps which emit quite loud humming noises (like air conditioning units). This is another reason to avoid building on National Landscapes.

View - the existing houses at Windsor Mead and Corefields are over 50 years old and have well established screening of trees and hedgerows making them barely visible from higher up. They are also at the lowest point of the valley. New houses would be very noticeable and have a significant impact on a view much admired by people walking to East Hill Strips and Core Hill Woods.

Cost Effectiveness - The strongest message regarding new housing is the need for it to be affordable - but this plot offers the least cost effective solution. Any building on National Landscapes comes with substantial restrictions and these required planning restrictions of single storey dwellings, suitable choice of building materials, and rigid rules about positioning of reflective surfaces etc add substantial cost to any building project at Sidmouth_31. This is another reason why other sites should be prioritised instead of this one.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Policy SD06 Sidm_31 should be removed from the Local Plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: Yes, but the recommendation to access Sidm_31 via Windsor Mead was inserted into the Regulation 19 Local Plan on the basis of an '11th-hour' email exchange between EDDC and DCC, which means it is not being subject to scrutiny until now. Not good.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Francesca Johnson

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: There has been very limited consultation with arbitrary decisions made on the choice on Housing and Employment sites. The original EDDC plan presented in 2022 showed proposed and rejected development sites in the Sid Valley. Subsequently in October 2024 and after, significant changes a new site was introduced without consultation as follows – Sid_31 – Sidford- adjacent to Windsor Mead – This was listed in the original plan as a ‘Rejected Site’ but then popped up without consultation as a new Housing site in September/ October, 2024. Sidm_31 – Sidford – land by Windsor Mead and Burnscombe Lane. This is outside the built up boundary of Sidford. This implies a loss of National Landscape (former AONB), and is an over development of a small site with poor access. because due process was not followed and proper consultation was not made - and also because many areas within Sidmouth that are close to amenities and not National Landscapewhere 15 houses could be built - this development should be removed from the plan.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Sidmouth_31 from the plan and focus on land close to Alexandria trading estate instead.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: For the same reasons as above. Proper consultation was not carried out.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Nobody locally was consulted - and property owners purchasing houses next to this site during 2024 were told the building proposal had been rejected.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: This build site will really destroy the area where I live.

Noise Pollution. You mention that the view might not be affected by this build (which I disagree with) but it is also important to consider noise pollution. Currently - all you can hear when standing in this field is birdsong. New housing comes with the required new technology of things like Heat Pumps which emit quite loud humming noises (like air conditioning units). This is another reason to avoid building on National Landscapes.

View - the existing houses at Windsor Mead and Corefields are over 50 years old and have well established screening of trees and hedgerows making them barely visible from higher up. They are also at the lowest point of the valley. New houses would be very noticeable and have a significant impact on a view much admired by people walking to East Hill Strips and Core Hill Woods.

Cost Effectiveness - The strongest message regarding new housing is the need for it to be affordable - but this plot offers the least cost effective solution. Any building on National Landscapes comes with substantial restrictions and these required planning restrictions of single storey dwellings, suitable choice of building materials, and rigid rules about positioning of reflective surfaces etc add substantial cost to any building project at Sidmouth_31. This is another reason why other sites should be prioritised instead of this one.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

I do not believe that it is possible to provide adequate modifications to make Sidmouth-31 a viable development. The only acceptable solution is to reject this site and focus on more suitable sites elsewhere. For just 15 houses - it makes much more sense to leave this field as National Landscape and build elsewhere. Otherwise once these 15 get built you'll then set a precedent to build some more next door and so on until the countryside is lost forever. Countryside which brings thousands of visitors to Sidmouth every year.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.:

It is impossible to answer yes because I do not know who else you are cooperating with. I know that Highways have not even been consulted yet - who I firmly believe will reject the proposal. What other departments will be consulted and will they include environmental groups such as National Landscapes and CPRE (The Countryside Charity)

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I feel very strongly about the need to block this development and believe that I need to be at all hearing sessions to be fully knowledgeable about future developments and to feedback my concerns. There is mention of a protest group specific to Sidmouth-31 for which legal representation is being investigated - which I intend to join adding another reason to request participation.

Full name: Julie Kent

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: There seems to have been little consultation with the residents of Sidford relating to the inclusion of this site for housing. The policy on National Landscape says that the boundaries are set by the Secretary of State and cannot be changed through the Local Plan process(12.7).

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of this site for housing is inconsistent with the policies set out in the draft plan. Those policies relating to National Landscape, Areas of Strategic Visual Importance and Flood risk management.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The site should be removed from the Plan.

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: There seems to have been little consideration of Transport and Infrastructure aspects relating to this site. Access unsuitable from Windsor Mead as the acquisition and destruction of two private gardens would be necessary. Access via Burscombe Lane is also unsuitable due to the narrow width of the lane. Both exit onto the busy A3052 at poorly constructed junctions. Assessment of Infrastructure has

not been carried out - footpath and pedestrian access is inadequate, sewage and flood risk has not been taken into account. Environmental degradation would occur through the destruction of a section of Devon hedge, excavation on site, lighting and pollution of the dark skies. Visual impacts would be negative as views from Trow Hill, Salcombe Hill of housing on this site would be affected. The protection of the landscape and biodiversity within the Sid Valley would be adversely impacted by development on this site which is on rising land within the National Landscape.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I suggest this plan is not legal because using an online portal discriminates against the elderly who tend not to be computer savvy. This does not provide the right level of community involvement in an area where 37% of the population are aged over 60. Many of these residents would not have downloaded the East Devon App meaning their awareness of any local plan was already extremely unlikely and, if made aware, their options to respond are far too complicated and difficult to navigate. When looking at the plan on your website - although you show numerous comments of reply - there is no easy way to see which parts of the plan these replies relate to which also means you are not communicating the facts sufficiently enough to meet due diligence. I also believe the Sidmouth_31 part of the plan is not legal because you detail this development as one which “could be developed” which is a highly ambiguous statement lacking vital detail. You have not explained why previous rejections for this plot being developed have suddenly been overturned when nothing has changed, simply stating that you could be “squaring off the built edge”. This “built edge” dates back to housing built in the 1960s when regulations were different and the issues you should be considering are current environmental problems of building on today's National Landscape. The same issues that have resulted in you blocking many other developments within the National Landscape apply to this site and you have given no sound argument as to why they are being ignored. You also mention access concerns without offering any explanation of how these could be satisfactorily resolved - making this part of your plan very weak, lacking detail and not fit for progression.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy

or paragraph. Please be as precise as possible.: All residents should receive details of this plan by mail along with the option to respond by letter to ensure all opinions get voiced. The field on Burscombe Lane (Sidmouth-31) should be removed from the plan and and other sites (of which there are many) which fall outside of the National Landscape should be considered instead.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: To develop Sidmouth-31 (Land east of Burscombe Lane / west of Windsor Mead) you are choosing to ignore other much more suitable areas to build which have easier access and more cost effective development potential, that are outside of our precious National Landscape where building should only ever be considered as a last resort. Here are the main reasons why this site should continue to be rejected for development . Access - Access via Burscombe Lane has been refused for previous developments as this lane is very narrow allowing only single car access. The road is prone to subsidence and extremely dangerous to exit onto Sidford High Street with several blind spots also causing issues when turning into Burscombe Lane. Farm vehicles, tractors and trailers frequently cause disruption in Burscombe Lane which usually means that cars have to mount the pavement to pass in the narrow parts of this road. Obviously this is not ideal and dangerous practise. You mention Windsor Mead as an alternative entry route but this is also a very narrow road with the same problems of its junction onto Sidford High Street being very dangerous to navigate. Currently any entry route from Windsor Mead would have to be positioned on land which is private property as the existing houses completely block the perimeter of the field. If requiring compulsory purchase to access this land substantial cost gets added to the project along with considerable disruption to a small cul-de-sac. Wildlife - Within this field there are bats, owls, dormice and many species of birds. The field is recognised as being part of the hunting zone for bats from Beer Quarry Caves and these should be protected. RSPB voice concerns about the reducing numbers of many bird species and removing this vibrant piece of countryside will make this situation even worse. Badgers are also a protected species and there are many families of badgers in this area. The area is ringed by Devon Hedges which also carry environmental protection orders. Transport - Other potential sites in Sidmouth fall within easy access to public transport. Sidmouth_31 is a long walk to a bus stop where buses run twice a day meaning all house occupants would need cars adding to the pollution and traffic concerns mentioned. Infrastructure - Schooling, and public health services are all over stretched and if new houses get built there must be a commitment agreed and in place to ensure additional services can be provided. Our local sewerage plant is extremely dated and unlikely to be able to cope with additional properties. We already see the pollution caused by sewerage spills on our coastline and, until steps

have been take to prevent this - extra building should not be allowed. Drainage - there is a vast amount of water sent down the hill from Core Hill Woods - so much so that Burscombe lane becomes a river in heavy rainfall. The field of Sidmouth_31 is like a bog in the winter months acting as vital drainage for this water and - if built on - would potentially cause flooding wherever the water gets diverted to or on land beyond the development. NB A video can be supplied of water running down Burscombe lane to demonstrate this point. Noise Pollution. You mention that the view might not be affected by this build (which I disagree with) but it is also important to consider noise pollution. Currently - all you can hear when standing in this field is birdsong. New housing comes with the required new technology of things like Heat Pumps which emit quite loud humming noises (like air conditioning units). This is another reason to avoid building on National Landscapes. View - the existing houses at Windsor Mead and Corefields are over 50 years old and have well established screening of trees and hedgerows making them barely visible from higher up. They are also at the lowest point of the valley. New houses would be very noticeable and have a significant impact on a view much admired by people walking to East Hill Strips and Core Hill Woods. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Specifically re section 14 Site selection Sidm_31.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

1. I live at Windsor Mead, in one of the houses previously built in the 1960's/70s on an adjacent piece of land and appreciate the wide ranging views from my property across the Sidbury/Sidford non coalescence area. Any new building on site 31 would not drastically impact on those views and would afford similar views to newly built properties.

2. If properties were built in keeping with the low rise nature of existing properties this would reduce any impact on the area.

3. I note Highways have yet to be consulted. Burscombe Lane is the most direct route to any new development, which already has extended access to the A 3052 in the form of a triangle to manage access and egress.

4. There is a suggestion that access could also be via Windsor Mead, which makes far less sense driving vehicles on quiet, narrow, residential streets to reach the end of a culdesac with no current way through to the site. The strip of land that would need to be crossed is, I believe, owned by 14 and 13 Windsor Mead.

5. The egress from Windsor Mead onto the A3052 is tricky. High hedges make it difficult to see out, visibility isn't clear as cars and lorries come quickly around the corner from the right & we often have to edge forward then quickly reverse back up the hill to avoid traffic speeding around the corner on the right. Visibility of cars coming from the left up the hill isn't great either. In order to turn left larger cars are prone to swing out into the opposite lane. There are often cars parked on the roadside at Windsor Mead, near the

junction, which causes more problems with cars turning into Windsor Mead. Additional traffic use of Windsor Mead to access 15 new homes would only exacerbate these issues. Additionally the width of Winsor Mead at the junction with the A3052 is inadequate for 2 cars to safely turn in and out of WM together.

6. As a local resident I am aware that drainage from the site is poor. During times of high rainfall there is a large amount of water that finds its way off the field in question, across the garden of 14 Windsor Mead, causing large torrents of water to flood down the road.

Full name: Alistair Rice & Nita Patel

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The allocation of Sidm_31 and its access via Windsor Mead is based on a late, superficial and incomplete consideration by the Highway Authority (Devon County Council), which has not been subject to public consultation until this stage. The Highway Authority's justification for use of Windsor Mead ignores any consideration of the junction of Windsor Mead with the A3052, which does not meet the requisite standards set out in the Manual for Streets (Off et al 2007) in respect of minor arm visibility splays, which are less than 10m.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Policy SD06 Sidm_31 should be removed from the Local Plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The recommendation to access Sidm_31 via Windsor Mead has ignored the poor (less than 10m) minor arm visibility splays, which do not meet the minimum criteria set out in Manual for Streets (ibid). A link between Sidm_31 and Windsor Mead cannot be achieved without the purchase of land from two Windsor Mead properties; if these plots cannot be secured by negotiation, the local authority would need to use its CPO powers on behalf of the developer

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Policy SD06 Sidm_31 should be removed from the Local Plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: Yes, but the recommendation to access Sidm_31 via Windsor Mead was inserted into the Regulation 19 Local Plan on the basis of an '11th-hour' email exchange between EDDC and DCC, which means it is not being subject to scrutiny until now. Not good.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Martin & Pam Perfect

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: As residents requiring vehicular and pedestrian access via Windsor Mead to Sidford High Street, we understand that Devon County Council has recommended that a proposed development of 15 homes under the emerging Local Plan designated for the horse field between Burscombe Lane and Windsor Mead should be granted access via Windsor Mead, in preference to providing access via Burscombe Lane.

We would make the following observations re suitability of Windsor Mead to take extra traffic:

1. Windsor Mead is a thin estate road with awkward/substandard junctions serving its various offshoots, as well as providing access to the rear of Sidford High Street.
2. Vehicular passage is often impaired by inconsiderate parking on or near to its various junctions, and the lower part is regularly used for parking by residents of nearby Sidford High Street, visitors, delivery trucks and contractors working locally.
3. Access from Windsor Mead onto Sidford High Street westwards can be quite dangerous as there is an absence of visibility splay down the hill (to the East) due to a high bank. This means vehicles need to edge into the main road to see if the road is clear before they can proceed onto Sidford High Street up the hill in a westerly direction - this is a potentially a dangerous junction, especially as adherence to the 30mph limit is not exactly universal.
4. Similarly, vehicles trying to access Windsor Mead from Sidford High Street (from either direction) cannot proceed safely if there is a vehicle approaching the junction down Windsor Mead - again this is potentially dangerous. Vehicles parked in close proximity to the bottom of Windsor Mead can pose an additional hazard.

5. Adding extra traffic movements emanating from 15 additional homes would, in our opinion, potentially exacerbate these current access problems.

6. The junction at the bottom of Burscombe Lane appears much wider, does not appear to have impaired visibility splay onto the main road in either direction, and currently provides access to far fewer residential properties than the Windsor Mead estate. Please take these observations into consideration in determining this part of the Local Plan, and confirm receipt.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing concerning the plans for policy Sidmouth_31 and the access for this proposal. The access from Burscombe Lane and the alternative Windsor Mead are both narrow with very poor visibility and though the traffic speed is at 30 mph the narrowness of Sidford high street and speed and quantity of traffic let alone heavy goods vehicles means safety would be compromised and cause further congestion in this restricted area. Also sewage facilities in this area are an unknown quantity (SW water have no record of drains) which are old and barely cover this area let alone more housing. Access to the field is very restricted through private property or a single thoroughfare and the building encroaches on an area of national beauty. There are other sites more suitable and with better access and facilities Thank you for your consideration of these points. I would be interested in being at the hearings discussing this plan

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Local Plan Sidmouth 31 – Land Off Burscombe Lane The application is for building in a zone designated as a protected zone known as “Natural Landscapes”, previously AONB. These areas should only be built on as a last resort when all other areas not part of “Natural Landscapes” have been considered. Some would argue that they should not be built on at all. Most landscapes are made by humans but nature does not have straight lines or have regular blocks. To make the site look more uniform by filling in to make a more regular block is a very poor argument and rather it would make the site look less natural. Also it will increase the likelihood of extending the building line in the future beyond the public footpath and in to the next field. The field in question has probably not been ploughed since the 2nd World War and could well be classed as an ancient meadow. Since it is private land and has been heavily grazed, it is difficult to examine but could well be rich in flora. The two hedge lines, one next to the public footpath and the other along Burscombe Lane both have the criteria needed to qualify for protected status. They are both very old but more importantly, they contain a very diverse flora. The hedgerow along Burscombe Lane contains the plant Dog`s Mercury which is recognised as a marker for identifying an ancient hedgerow. Access to the site would most likely damage this hedgerow.

2. The access and exit to the site from Burscombe Lane is only just one vehicle wide at one point, and is narrow along the whole length of the field to be built on. There is no public footpath and to be able to create these would damage the hedgerow and create an “urban” feeling in a rural site. Access to the A3052 from Burscombe Lane is already difficult and would be exacerbated by the increased travel.

3. Although not as steep as land further down Burscombe Lane, the hard landscaping on the site will add a large amount of water in to the brooks feeding the River Sid and increase the risk of flooding in the town. The grassland in the field will currently hold water which will mitigate against flooding.

4. The height of the proposed buildings is not in keeping with the mostly single storey bungalows in the adjacent areas and they are inappropriate for an area within the “Natural Landscapes”.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: DEVELOPMENT IN THE TOWNS AND VILLAGES The Policies fail to address Objective 2 of The Vision, that is, tackling the climate emergency, Objective 6, high quality development, and Objective 9, encouraging walking & cycling. For Objective 2, it fails to recognise that Exeter is the major draw for employment and that most journeys will be made between there and the new housing areas. Placing all new development close to Exeter is essential to achieving Objective 2. Objective 6 will not be met by isolated developments on the peripheries of existing settlements. Only large-scale development can provide for high quality developments. The Cornish example of Nansledan shows what can be achieved towards Objectives 2, 6 and 9 through a comprehensive and carefully considered housing provision. East Devon District Council has the opportunity to demonstrate its abilities and commitments to truly delivering a world-beating vision through a major planned expansion through an enlarged proposed second new community, Policy SW01, rather than piecemeal relatively small-scale developments at the edges of existing communities. For Objective 9, permitting 'edge development sites' for new housing at existing communities fails to address the Objective. It is unrealistic to expect people to walk or cycle given the distances and the natural terrain. To give but one example, development on the edges of Ottery St Mary are too far for people to walk to the central shopping area (and other facilities) and the steep valleys further severely mitigate against foot and cycle travel for a number of the locations. Moreover, off-street vehicle parking in the central area is already used to capacity and your proposals fail to address the consequences or provide for any positive resolution. Policies should be radically redrafted to address such matters. In particular, it should advance the proposed second new community, WS01, as the solution and increase its size such that development on the edges of existing settlements are unnecessary.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Land West of Whimble Road, Broadclyst – Brcl_12 Broadclyst contains a wide range of key everyday facilities including primary (Broadclyst Community) and secondary (Clyst Community College) schools, two pubs (New Inn and Red Lion), social club, a local shop and post office (Broadclyst Stores), doctor's surgery, church (St John the Baptist), village hall (Victory) and the Broadclyst Sports Centre. All of these facilities are accessible from the proposed site. The site has limited constraints for development and the technical work undertaken to date has not identified any significant issues that would preclude the site from development, and the technical team has prepared evidence to underpin the proposed masterplan. The proposed masterplan for the site seeks to deliver a mixed-use development of up to 145 dwellings (including affordable and self or custom build units), 0.6ha of land providing offices and light industrial employment space (Use Class E), extensive open space and ecological enhancements, along with the proposed new highway, site entrances and supporting infrastructure. The residential development will likely comprise a mix of 1, 2, 3 and 4 bedroom properties of varying styles, ranging from a small block of apartments to detached dwellings. Development will both be front-on and side-on to Whimble Road, and it is anticipated that the design would be more traditional in appearance and utilise materials found in the local area. The employment areas proposed are located within the east of the site on the former Winter Gardens land, and are proposed to be designed to adopt a barn like style to assimilate them into the more rural environment, as opposed to converting

the existing buildings. Two accesses are proposed to be taken from Whimble Road approximately 90m apart – this is to provide separate access for the employment and residential uses. It is anticipated that pedestrian and cycle connections will be made to the existing Public Right of Way (PRoW) network on Town End and Green Tree Lane. 51% (5.55 hectares) of the site is provided as formal public open space for both existing and future residents. This includes a community parkland with junior grass football pitch to the north, ecological areas, a new play area, and allotments. Furthermore, informal public open space is proposed including a central green spine running north-south through the centre of the site. Drainage in the form of two attenuation basins are proposed within the north and centre of the site, to hold surface water runoff before discharging it at a greenfield run-off rate into an existing ditch. The benefits of the scheme are wide-ranging and substantial, and include the following:

- Provision of affordable housing
- Provision of market housing
- Provision of custom and self-build homes
- Delivery of an employment allocation
- New public open space and a community parkland, in excess of the policy requirements
- Biodiversity Net Gain in excess of the Government's 10% target
- Improvements to Whimble Road
- Jobs in construction We have also examined other technical matters including highways safety, flood risk and drainage, ecology, landscape, heritage, trees, air quality, and health, and have identified no adverse effects would outweigh the benefits of the scheme. The masterplan, therefore, responds to the constraints and opportunities of the site, and seeks to provide a generous landscaped edge to the north of the site to ensure a suitable transition to the rural hinterland beyond. Furthermore, it is clear that the development is deliverable, and provides a highquality, well-balanced, sustainable community. We will also seek clarification with planning policy officers regarding the proposed allocations map including the areas of Green Space shown. Conclusion We support the emerging Spatial Strategy and welcome the site's (ref. Brcl_12) inclusion as a draft allocation to help meet the identified housing and employment needs. We do, however, ask that the Council carefully considers the constructive comments provided in relation to endeavouring to meet the full housing need for the district at this stage, and other more specific policy requirements. It has also been demonstrated and is recognised by East Devon District Council that Land west of Whimble Road, Broadclyst (ref. Brcl_12) is a suitable, sustainable, accessible and deliverable site for residential and employment development. Furthermore, it is anticipated that an outline planning

application, with all matters reserved except for access, will be submitted in April 2025. Based on the details provided within these and previous representations, we, therefore, hope to see the allocation for the site maintained – once the Local Plan Examination begins, a planning application will be before the Council, which will demonstrate the site's deliverability to the Planning Inspectorate to underpin the allocation of this land.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: TO RESPOND, AS REQUIRED, TO ANY QUESTIONS IN RELATION TO POLICY SD07 AND IN PARTICULAR SITE BRCL_12.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Strategic Policy SD07 sets out the development allocations at Broadclyst. This states the following: “The sites/areas listed below, as identified on the Policies Map, are allocated for development. Land west of Whimble Road, Broadclyst (Brcl_12) combined with Land to east of Town End, Broadclyst (Brcl_29) Development of these two sites, on the eastern side of the village, will need to come forward to an agreed Masterplan that provides for a comprehensive development scheme for both land areas. Vehicle access to the combined sites will need to be from Whimble Road with vehicle and pedestrian access from Brcl_12 linking through and into Brcl_29.” While we generally support this approach to development across the two land parcels given the relationship between the two sites and the facilities within the wider settlement, LVA currently only has control over Land west of Whimble Road (ref. Brcl_12). Notwithstanding, the proposed masterplan for the site has carefully considered the link between both sites and how they could complement each other. It also includes an indicative suggestion of how Land to east of Town End (re. Brcl_29) could come forward alongside the wider Brcl_12 site, to ensure they dovetail together and the development of Land west of Whimble Road (ref. Brcl_12) does not fetter proposals coming forward on the adjacent Brcl_29 land. LVA is generally supportive of this and would be willing to work with the adjacent landowner to allow for vehicular access for Brcl_29 to be delivered via the LVA site. LVA has a positive track record of working collaboratively with other stakeholders and always seeks to enable the best possible spatial planning solution. Strategic Policy SD07 goes on to state that: Area Brcl_12 – is to accommodate around 100 new homes and 0.6 hectares of employment land. Built form shall be focused on the land to the

north west of Winter Gardens and south of Lake Farm with lower density development forming a frontage onto the road from Burrows Cross within the field to the north west of Winter Gardens. To the north of Brcl_12 there is scope to provide open space and habitat and other open space areas. We support the general provisions of this policy for Land west of Whimble Road, Broadclyst (ref. Brcl_12), including built form being focused on the land to the north west of Winter Gardens and south of Lake Farm, with lower density development forming a frontage onto the road from Burrows Cross within the field to the north west of Winter Gardens, and the provision of open space, habitat and other open space areas to the north of Brcl_12. These are elements that are featured and met through our proposed masterplan for the site. Notwithstanding, as set out and demonstrated in previously representations to the Local Plan, we consider that the site can deliver up to 145 dwellings (including affordable housing and custom-self build plots), while still accommodating the other required and important aspects of the scheme. These include 0.6 hectares of employment land, access from Whimble Road, as well as a community play area. Significant areas of public open space are also included that are well in excess of what would be required by policy and will in effect deliver a large area of publicly accessible parkland for the whole village to enjoy. This has been informed by technical work including highways, ecology, landscape, heritage and drainage work, all of which underpin the masterplan design. Furthermore, Highways Officers have confirmed that the access design is sufficient to accommodate this number of homes and the employment provision. We, therefore, consider that this is the optimal solution for the delivery of housing at Broadclyst that would see a multitude of benefits being realised without harm being caused. We, therefore, respectfully ask for the number of homes to be accommodated on the Brcl_12 site to be increased to 145 dwellings, particularly given the Council is only planning for 80% of the district's overall housing requirement, and this would assist the Council in getting closer to delivering the full requirement now rather than in the future and would assist in providing a degree of contingency should other allocations not come forward or achieve a lower quantum of development.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: TO RESPOND, AS REQUIRED, TO ANY QUESTIONS IN RELATION TO POLICY SD07 AND IN PARTICULAR SITE BRCL_12.

Full name: Michelle Bailey

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: This area, combined with others which were put forward in the Local Plan for development within Broadclyst would see an increase in the housing population by approx. 15%. This is far in excess of the housing needs put forward just a couple of years ago, when the Parish were first putting together their Neighbourhood Plan. I believe at that time there was a request to consider where 30 houses could be sited and after lengthy consultation through the Neighbourhood Plan suitable areas were identified and others discounted. This particular area was strongly opposed by local residents as an area for housing development due to its location and the impact on the local environment. This proposal seems to be at odds with the Neighbourhood Plan by showing very little consideration to the work the Parish has already done with regards to local consultation which has now spanned several years. I would implore EDDC to review this and ensure any proposals are not at odds with this – after all the Neighbourhood Plan is the voice of the village!

If you look at feedback within the previous Local Plan consultation (where many provided their feedback) you will note:

Broadclyst - Increasing boundary by 50% will change character of village Proposed sites in Broadclyst are beyond settlement boundaries The BUA boundary for Broadclyst in the Broadclyst Neighbourhood Development Plan and the adopted EDLP does not include the preferred sites LP_Brcl_09, LP_Brcl_29 and LP_Brcl_12, but the proposed EDLP seems to have redrawn the boundary (now referred to as a Settlement Boundary) to include these sites. There is no justification to this redrawing and it is misleading and intended to deceive so as to provide justification for development on these 3 preferred

sites in accordance with paragraph 3.75 of the proposed EDLP. The original BUA boundary for Broadclyst should be retained when considering development.

Grade 1 Agricultural Land The land in question is Grade 1 agricultural land which by definition should be the most productive type of land for farming and needs to be protected as such. The land is currently used for a mixture of animal grazing and market gardening. By putting this forward as an area for development, are EDDC saying that this is no longer important? This does seem at odds with the EDDC Development Policy which states that such developments are not in the interest of food security into the future. Once sold for housing, it's gone.

Much of the lower lying land in question is prone to flooding and with a high-water table is building on this land really suitable? It is very likely to cause further flooding in the surrounding areas and for nearby properties particularly as parts of the land in question are higher than these properties. Whilst the proposal suggests the site is flat, this is simply not true.

There is a lack of provision for waste water and sewerage in the vicinity and without significant investment the current pumping station which often backs up will not cope with any additional burden. There have been multiple occasions where even with little rainfall South West Water have had to intervene to clear the ditch leading pumping station for several hours at a time. Increasing the levels of sewerage increases the risks associated with releasing nasty phosphates into the surrounding area and will have a direct impact on the River Clyst and its wildlife inhabitants as the villages waste water heads out of the village.

Loss of habitats and wildlife Before any development goes ahead a full and comprehensive review of the habitats and wildlife in the area needs to be done to determine its impact. There are red listed birds, foxes, rabbits, a number of small mammals and insects, protected news (great crested newts are known and reported to be within the pond area within the development area but also in the surrounding properties) as well as bats all living within the fields being put forward for development. The loss of the fields and hedgerows will have a devastating effect on these. There is a pond area within the proposed development site next to this one (not owned by the Winter Gardens land owner or the National Trust) which must be protected, along with their surrounding territory and routes and evidence to demonstrate this is being considered by the developer should be requested.

Some of the fields adjacent to the development are used for farming by others, such as for grazing sheep. The development is likely to have an adverse impact on the ability for these fields to be used for such purposes therefore further impacting local farming. Noise, light pollution as well as an increase in rubbish is a very real concern for the welfare of these animals in these fields.

Adverse impact on the historical setting of Broadclyst Broadclyst as a village is home to a number of listed buildings and has conservation areas (as highlighted in the rejection of other proposed housing calls for land also put forward as part of the Local Plan consultation).

Surrounding the Winter Gardens site itself, there are a number of listed buildings and the curtilage for some of these properties is adjacent to the proposed development. Besides Lake House and College Cottage which were highlighted by EDDC, there is Lake Farm, Markers Cottage, Symes Cottage, Hackworthy Cottage and Heath Gardens all of which have had very strict planning constraints put in place to restrict development to them. It is imperative that the Listed Building Conservation Team are consulted as part of these proposals to ensure the historic nature of these properties are protected. As highlighted previously, some of the proposed site for development, particularly the area near the surrounding properties is much higher up thereby likely to have an adverse impact on their outlook. In the Local Plan feedback it was noted 'Heritage commentary - Site is 20m from a grade II listed building which would need to be considered'.

Besides the listed buildings, many houses within this area of the village are of a more rustic and unique appearance given their age and it is important the development if permitted is sympathetic to this.

The houses within the Maple Road area have many restrictive covenants in place due to them being built on National Trust land. Can the same level of covenants be applied to this development to ensure future proofing against unrestricted changes to the area?

Part of the appeal for residents within this area of the village was the rural / countryside views, low levels of light and noise pollution. This will all disappear and devalue many of the surrounding houses. No more starry nights!

Highways and traffic One of the fundamental concerns is highways and the ability for the local roads to cope with an increase in traffic. A development of this size is likely to see in excess of 350 cars being used on the surrounding roads. Roads that simply can't cope as they are. Given the proposed location this will very likely have a direct impact on the Whimple Road leading towards and through either Station Road (past Clyst Vale) towards Cranbrook, or through Dog Village. Given the daily chaos at school drop off and pick up times this will only get worse. Unless the developers and highways can come up with a better highway's solution then there will likely be further delays for traffic in the area as well as a much-increased risk for residents and local schools' pupil's safety. Added to this there will be an increased level of pollution.

It is with interest that I note on the LVA's consultation that they suggest that the current public footpath could be used as a combined cycle path. This is a nonsense. The public footpath goes into a private track before joining onto Town End - there is no lighting. The track is solely maintained by the residents who live along the track. The track outflows into Town End where if you turn left you head into the built up hedge, single track lane without any lighting. If you turn right, there is a single track and a light several metres down the road before there are no further lights. There are no adequate footpaths. This is a dangerous proposal and needs to be challenged. Using Town End for people or bikes should not even be considered or encouraged. Increased footfall is of real concern for the pond area which will pose a significant threat to the great crested newts and other wildlife.

Parking and traffic congestion pinch points There will be an increase in demand for parking in the village as the Winter Gardens development's location is likely to see residents driving into the village to either access the local services or the primary or secondary school due to the lack of pathways from the area and on the surrounding roads. There are currently many residents living within the village boundary driving to the primary and secondary school for school drop off and pick up because of the lack of pathways or where they have very young children or need to get off to work or off to after school activities promptly. The current parking most days is very dangerous, causes delays and much stress to parents who use the narrower areas of Town Hill and Town End as a cut through to avoid the congestion around Dog Village. This is likely to mean more parents will be forced into Dog Village.

Increased demand and lack of transport links The local buses are struggling to cope with current demand where buses are irregular and over full at peak times, the burden on this service is likely to increase. How will these issues be mitigated? The bus stops are currently along the main B3181 which are a reasonable walk from the proposed site but again without better pathways to facilitate access to these this may prevent people from using them. There are no alternative transport links e.g. railway within easy walking distance of the site. People will therefore be largely forced to drive to neighbouring villages to access these links.

Resident and Pupil Safety Whilst alluded to above, the Winter Gardens development location, poses a real challenge in terms of road safety for pedestrians as there is a lack of pathways along the Whimble Road, along Woodbury View and Town End. Town End is currently accessed via a narrow single track lane with high hedging so without removing this there is no room for pathways. Along Town End most houses front onto the roadway and there is a lack of space to incorporate pathways without narrowing the road even further. Given the current issues with parking along the road, pedestrians are already at high risk walking along this road due to its narrowness and the number of school parents parking along it for drop off and pick up. Woodbury View and Whimble Road face similar challenges with on road parking from residents and a lack of pathways. At present, emergency services or delivery lorries struggle to access properties at peak traffic times.

There are significant challenges within close vicinity of the Clyst Vale Community College and Broadclyst Community Primary School due to the current levels of traffic and lack of pathways; this development would only add to that. It is worth noting much of this area is not covered with street lighting at present particularly along the Whimble Road and Town End, so provision needs to be made for this.

The likely increase in traffic and lack of adequate and safe cycle paths is a cause for concern. Unless some assurances can be made to improve the provision within the area there is a real risk of an accident happening and we are likely to see the use of bikes reducing.

The surrounding area sees a number of livery yards so again there will be an increased risk to local horse riders accessing local roads to exercise their animals.

After much resident debate, the exercising of dogs on the village playing field has been banned, with dog walkers being encouraged to access wider areas surrounding the village. Many therefore walk away from the village centre to access one of the designated walking areas by crossing the Whimble Road onto an unpathed roadway (Elbury Lane). There is a local bike park within this area too; therefore increasing traffic in this area will further endanger any young people who wish to use it. There is currently a public footpath which runs through the proposed site and needs to be retained. The proposal to use the adjacent field for recreation purposes is of significant concerns given the terrestrial habits of the great crested newts present on the site.

Demand for local services Both the current Primary and Secondary schools are at capacity. The Primary school is oversubscribed and with its Outstanding Ofsted rating this is likely to continue. This is likely to mean that new residents to the area are likely to be unable to obtain places immediately in either school and will be forced to access other schools in the surrounding area thereby increasing traffic leaving the village and burdening outlying schools.

In the Local Plan feedback DCC Education confirmed: 'Broadclyst Primary School is very popular and fills up with out of area children. Development within Broadclyst would mean that there would be a push back to other schools. The current primary school could not support the level of development proposed -36.8 ha, and could not be extended further. Additional new secondary provision required to support any development'

The Broadclyst doctors' surgery is overfull and is currently being forced to take patients from both Whimble and Cranbrook due to the lack of services in those locations. Unless something is done to improve the situation within those areas, this situation will only get worse. There is no scope to extend the current surgery building.

Whilst there are some youth services in the village, there have been some challenges in Broadclyst with regards to youth behaviour and vandalism perhaps in part driven by the lack of youth services. The local sports centre post Covid is certainly not back to its pre Covid offer of activities and is running without a receptionist. What investment will be developer provide to improve these services to help keep our young people engaged? A playpark and a field which have been suggested by the LVA is not sufficient.

What provisions and support will the developers provide to support an increased need for elderly residents? Will any of the housing being proposed be suitable for the elderly? Currently much of the work done locally to support the elderly through Clyst Caring is managed by volunteers which are often hard to recruit. As above, the lack of pathways from this area will pose a real challenge to any new elderly residents accessing the centre of the village where this centre is managed.

The village currently has a small provision of amenities such as a local shop with post office, hairdresser, takeaway, charity shop and social club, however, whilst on paper this sounds attractive and sufficient to support more housing, the reality is that these can be hard to access as parking currently for any is at a premium. Often the village car park is overfull, resulting in the surrounding roads being parked in hindering access for residents to their homes or places such as the doctors' surgery being inaccessible.

Whilst the proposal may have bring benefits in terms of increased footfall to the New Inn public house adjacent to the site; it is likely to inhibit their ability to put on 'noisier' events particularly of an evening which many current residents enjoy without upsetting and getting complaints from residents in the area. One of the appeals of this pub currently is its rural location and that it is slightly more 'countrified'. When larger events are put on, parking becomes a challenge and people park on the Whimple Road. With an estate being built opposite, this problem, will quickly become the their problem and cars will inevitably park within this new estate. I understand the public house do not support this development.

Housing density and green spaces The proposed development seems very ambitious in terms of its scale and the density of housing proposed when added to the neighbouring proposal (site 12). Looking at developments in outlying villages and towns, many now face significant challenges due to being crammed in and the lack of provision made for simple things such as parking. How will EDDC satisfy themselves that this is being considered?

There is one central play park for the village which can only be accessed by limited pathways from this proposed area. It would be prudent to ensure sufficient green spaces / play areas are developed within the site.

In summary Fundamentally, without significant investment in the area surrounding the proposed site, it is not suitable for development. If it goes ahead, who will pay for these improvements? What guarantees will there be to ensure this happens knowing how it has failed in other developments locally? Will allowing this development set a precedent for further development in the village in the future?

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Removal of the sites in entirety would be the best outcome; failing that a significant reduction in the number of houses being proposed for the area and significantly greater recognition that habitats will need to be protected with substantive mitigation put in place to protect the protected species within the site e.g great crested newts. Additional protection of the historic landscape with consultation through the Conservation team ensuring that any development is in keeping with the surrounding area and recognition any development should not be to the detriment of Lake House or Lake Farm which are within 20m of the proposed development. Recognition and mitigation of the significant burden the development will have on the surrounding infrastructure and services which will not cope with the volume of house being proposed.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Julie Chance

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The following material considerations apply: Impact on Amenity - Noise from construction and traffic whilst constructing. Noise from occupation and traffic would impact on the environment and the right to enjoy the habitat. 100+ dwellings would lead to many more occupants with the ownership of vehicles. Environmental Considerations - the construct and habitation from the development would lead to a loss of biodiversity and should be surveyed by an appropriate body. The area is situated within a flood risk. An appropriate survey should be carried out. At the parish council meeting it was advised that properties in this area could not get adequate insurance. This would disadvantage inhabitants. The construct would lead to greater flooding. The air and water quality should be appropriately surveyed as the increased burden could contaminate the water quality, such as sewage. The air quality would suffer with the increased traffic during construct and habitation. The biodiversity would suffer in regards to the songbird population and wildlife that has had the benefit of using this land and the loss of there habitation. Increased traffic from sewage demand. Highway Safety and Transport - the road access would lead to safety concerns in that the road to Whimple would need considerable upgrade with speed monitoring. There are no footpaths on this road. Increased risk of heavy lorries being on the roads during construct and for sewage plant.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The site is not fit for for purpose. It

needs a Flood risk assessment and and environmental impact assessment including air quality.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: It appears not to be sound as there hasn't been the necessary checks and balances for this site. The parish council do not seem to be listening to the parish. The recent parish council meeting suggested that we had no choice but to accept this development was happening.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Full assessment in respect of flooding, air and environmental impact. Impact on Infrastructure. Impact on schools, surgeries, and quality of life.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The councillors at the recent 13 March 2025 public consultation meeting seemed to start from a position of bias, claiming that the development was 90% going to happen. The meeting minutes are not yet available but the chairman appeared unwilling to capture and/or feedback legitimate material considerations back to EDDC. 1 councillor has a conflict of interest owning land which they would benefit from planning permission in this locale. 1 councillor was concerned with social equity should the build go ahead but seemed to suggest that there was no inclusion

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: These development areas were investigated as part of the 'Neighbourhood Plan' And were overwhelmingly rejected.

This development will destroy the habitat for the protected Great Crested Newt population of the pond at the centre of the site.

This development will destroy yet more 'Grade 1' agricultural land, reducing the countries food security.

Developing this elevated, flood prone site, will cause flooding and problems in the surrounding lower lying population areas.

This development will be directly in-front of the historic Grade 2 listed 'Lake House'. Views of and from this important village landmark, will be obscured by development on the proposed site due to its elevation with respect to Lake House.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy

or paragraph. Please be as precise as possible.: Prioritise development on 'Brown Field' sites NOT Grade 1 Agricultural land.

Protect the Great Crested Newt population by NOT building near it.

Do not develop flood prone sites as developments of this type cause flooding issues in other areas not previously affected. This site has a VERY high winter water table.

Any developments should not have a detrimental effect on the existing historic character of the village.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The Broadclyst population have been asked to comment / provide feedback over and over again regarding this unwanted large scale development.

The entire consultation has been designed to put off people from commenting by ignoring all their previous comments and asking them to provide feedback time and time again.

All the comments from the MANY previous consultations MUST be looked at and included in this and any future requests for 'feedback' on this proposal.

The 'Legal' type wording of this feedback form is again designed to be off-putting to the majority of the residents of Broadclyst. This results in a skewed view of residents true opinions.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: James Gaisford

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I have wish to bring to you attention Material Considerations in respect of the draft policy on Strategic Policy SD07: Development allocations at Broadclyst.

And in particular, my comments relate to Land west of Whimple Road, Broadclyst (Brcl_12) combined with Land to east of Town End, Broadclyst (Brcl_29).

Infrastructure and Services

The current sewage arrangements do not cater for the village at the moment. In the period Floodmapper has records for, 2021-2023, raw sewage has been discharged in, or near (~3mi.), Broadclyst 178 time(s) and into the River Clyst. In addition the pumping station near Lowdens in the village spills multiple times a year. The proposed development would need to provide a solution to upgrade the capacity.

The GP Surgery is currently full and it has taken me two weeks to obtain an appointment. The proposed development would need to address how the extra residents would have access to healthcare.

The Junior school is also full and is unable to absorb any new Pupils

Environmental Considerations

The water table in the land under proposed development is very high and in the winter there is lying water on the ground. The proposed development would need to address where this water goes to.

Highway safety and transport.

There is a traffic logjam every day at the school and a pinch point on Station Road where it meets Slaparse lane. The road here is a single car wide and you have all the schoolchildren leaving Cyst Vale Community College. The development will need to take into account the increased traffic in this area and the safety of the children.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The methodology for identifying and selected housing development sites at Broadclyst has caused real concern and worry for residents. There were 370 unhappy or dissatisfied comments in the initial consultation process regarding site LP Brcl 12 and 246 for LP Brcl 29. For context, for LP Brcl 12 this was five times the number of objections than the next most unpopular site (Whimble 11). LP Brcl 12 had twice the number of objections than even the proposed new town near Clyst Honiton. Despite this, the initial report following the ‘sifting of sites’ process by EDDC, following the public consultation, stated that had been enthusiasm from council officers for development at these sites, and not a single mention that so many objections had been raised by members of the public. EDDC has since faced public criticism for holding closed doors meetings when making their initial site selections. I criticised this part of the process in one of their public meetings and was subsequently berated by the chair of the council. Councillor Rylance told me immediately after my representation that what I had said was “not cool”. We have since complained about her completely unprofessional behaviour. Residents continue to feel that the initial part of the process was lacking in transparency. How can so many people raise concerns and yet officers of the council can be “enthusiastic” about development about these very same sites? Was the public consultation simply a box ticking exercise for EDDC we wondered? We felt that we were being deliberately ignored. Plans to build almost 124 homes on the combined sites at LP_Brcl_29 and LP_Brcl_12 represents significant over-development of the village. We feel that without substantial mitigation, which might not actually be possible in many instances, these sites cannot contribute to sustainability. Inadequate pavements, high quality agricultural land, heritage concerns, single track roads, insufficient highway capacity, oversubscribed doctors and schools, flooding- all of these concerns have been raised about the sites in Broadclyst, and these very same factors were cited as reasons for EDDC rejecting development at other sites. This made no sense to residents in Broadclyst. The initial EDDC summary assessment made no mention of overhead

power lines, or the existing severe traffic bottle necks at either end of our village onto the B3181, waterlogged roads in winter that are impassable or a GP surgery that cannot expand its current premises. I have witnessed raw sewage overspill onto the fields at Heath cross pumping station which is adjacent to these sites. I have photographic evidence of this. I also understand that there is no plan to upgrade the existing Victorian sewage infrastructure. When I questioned one of the engineers from Southwest water about the prospect of 124 new houses, when he was dealing with the latest one, his comment to me was “The pipes will never cope – it would need a serious amount of new infrastructure.” Residents in Town End in Broadclyst have seen flash floods in recent years, and this too is adjacent to Broadclyst 29. I have video footage of surface water gushing into our property and flooding it. This is a huge concern for us if development at this scale goes ahead. We recognise that Broadclyst is a particularly attractive village when considering housing development but we still dispute that the scale of what is being proposed meets The National Planning Framework requirement for delivering sustainable development.

The below supporting text, together with images, provides evidence of the severe congestion regarding traffic and lack of footpaths. In our opinion, the volume of traffic generated by the sites cannot be accommodated on the local highway network without detriment to road safety. There are two access points from the B3181 into Broadclyst village. To the west of the village, it is single track country lanes which access the village, and the latter is the proposed sites for development. In our opinion, there is no sustainable access because there are no formal footpaths. Maintaining Supply and Delivery Broadclyst is also on the edge of the electricity supply network for the area. With the new planning laws requiring low carbon heating and provision of EV charging, the required electricity demand for a development of this size is unlikely to be readily available in such a rural location and the distribution network would need significant reinforcement to be able to meet the needs of the development. There are also overhead power cables in the Southern section of LP_Brcl_12. Supporting a prosperous rural economy Broadclyst itself is surrounded by country roads, many of which are single track in places and often waterlogged or impassable in Winter. We think it is essential that pedestrian access to both schools is significantly improved although we are worried that in some places, there is no room for pavements. At present there is a lack of pavements connecting LP_Brcl_29 and LP_Brcl_12 to both of the schools and the bus stop, and similarly there is insufficient pedestrian access connecting LP_Brcl_09 to Clyst Vale College and the bus stop. Unless people feel safe walking to school or to catch the bus, it's far more likely that they will drive. This is currently what is happening already with many of the children who attend the schools, even when parents live within the village itself. In the most recent edition of our Parish magazine, there was an article about PC Tim Walsh's visit to Town Hill to observe traffic around the Primary school and

understand the challenges presented by “a very busy primary school run”. It also states that he has written a report outlining his concerns to DCC’s Highways Department and asking for a site meeting. School collection times result in congestion because the local roads were never designed to cope with current traffic volumes. Again, some of the roads going towards the schools are single track, for example the country lane between Town End leading to Burrow Road. The existing lanes often flood in Winter and many are very badly rutted. Adding more cars will make this situation much worse and will not contribute to building a more sustainable community. Improvements to the roads to help cyclists must happen if development is to be sustainable. There are no cycle lanes in the village itself to the main commuter routes to Exeter, and no cycle lane provision on Station Road whatsoever. As mentioned, many of the current lanes are single track, so there is already a conflict between cyclists and cars. There is a joint cycle lane/pedestrian pavement on the B3181 between Broadclyst and Exeter but it is poorly maintained and often so overgrown it forces cyclists onto the main road whenever they encounter branches or people walking.

Sustainable Development in Rural Areas One of the biggest concerns of residents is that increasing the size of the village will put intolerable pressure on already struggling local services. We feel that development on this scale, far from enhancing the vitality of our community, is likely to be detrimental. Without remedial action, a swell in population will be especially difficult for the local primary and secondary schools, and the GP surgery. We believe it’s critical to engage both schools in discussion around their capacity issues and have a plan for where the extra children will go prior to approving the proposed development sites. What assurances can we be given that the local surgery will receive the funding it needs to accommodate all the extra patients in Broadclyst village and that developers will engage appropriately with what needs to be delivered? **Flood risk** Many residents are concerned that part of site LP_Brcl_12 is in a flood risk zone. During periods of very heavy rain, water saturates these fields making them particularly boggy underfoot. In line with sections 159 and 160 of The National Planning Policy Framework we would like to see an assessment of whether the run-off from surface water, if this site were developed, could potentially increase flood risk of neighbouring properties in Town End and on roads leading up to Burrow Farm. These properties are already prone to flooding and residents are worried that development at this site will make their situation worse. In Autumn 2023 a flash flood caused the length of Town End to be flooded with water entering properties. Development adjacent to this road is bound to make this phenomenon more common in future. **Achieving well-designed places** Broadclyst is a beautiful village, surrounded by National Trust Land. We are concerned that development on this scale could be detrimental to the intrinsic character of the village, particularly the historic Eastern side of Broadclyst, abutting the proposed sites. This part of the village has many listed and thatched buildings. In

particular, with reference to site LP_Brcl_29, any development here would have a direct impact on Lake House which is Grade 2 Listed. The land proposed is also on an elevation that could dominate the surrounding environment. If development is allowed to go ahead, we suggest it must be in keeping with the historic setting and adhere strictly to the design codes set out in The Parish Neighbourhood Plan. Habitats and Biodiversity In line with National Planning Policy Statement 180, we believe that any residential development in the countryside often has a harmful impact on biodiversity. Residents are concerned that development at sites LP_Brcl_29 and LP_Brcl_12 would be on grade 1 agricultural land. Also on sites LP_Brcl_29 and LP_Brcl_12 there are a number of red and amber listed bird species, some specific to farmland habitat such as skylark and linnet. Bats also use the hedgerows to navigate and the dark skies as cover from predators. Any development at these sites will be detrimental to these species by removing specific habitat, removing their navigation method and increasing the ambient light.

There is a pond on site LP_Brcl_12, the loss of which would be detrimental to wildlife. We would like to see this feature maintained. One of the nearby cottages is a designated site for Great Crested Newts. In the Cylst Vale Regional Park consultation document there was specific mention of the Winter Gardens site (LP_Brcl_12) as being an important habitat for invertebrates. We therefore would like to see a full environmental and biodiversity impact assessment, commissioned prior to development being agreed, and a proper plan for mitigation if development is allowed to go ahead. There are a number of significant habitats near the proposed sites including Ashclyst Forest and Elbury Farm, the first is nationally important for butterflies and the second for rare fungi and Barn Owls. We also feel that given the numbers of bats that have been seen in the Town End area, a survey focussing on this species in particular would be beneficial. In 2023, Land Vale Alliance instructed Grassroots Planning (a private consultancy firm) to provide an opinion on whether an "Environmental Impact Assessment" was necessary ahead of LP_Brcl_12 going to the planning application stage. They came to the conclusion that no such assessment was necessary. We wonder how such an opinion can ever be considered to be unbiased, when its the company that stands to cash in, instructing and paying the fee for another firm to conduct such an assessment? They made the following points which we completely disagree with;

- no highway safety issues
- sufficient capacity to accommodate extra traffic
- good provision of walking and cycling routes to and from the site to public transport and schools (not unless they are prepared to put in a pavement and cycle lane

the length of Whimble Road and also acknowledge the local schools are both way over their capacity)

- no anticipated issues with regard to flood risk
- no significant environmental impact on landscape and visual resources Thy went on to comment that "The existing facilities within Broadclyst may experience some increase in usage but this is unlikely to be significant given the scale of the development...and is likely to benefit the local economy through increased use of existing services". They don't live here. We do. We cannot understand how any such statement could be made and they have clearly not consulted with residents about the existing pressures on services and infrastructure .

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: see pdf file

Full name: Simon Mills

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

When my wife and I first moved to the village five years ago, one of the first things we did was attend the village fete and thought it was brilliant that the Broadclyst Neighbourhood Plan was on display and we had a democratic say on the plan. It is my opinion that East Devon District Council (EDDC) has failed in the duty to respect the Broadclyst Neighbourhood Plan, particularly in relation to housing allocations.

The Parish has already met its housing commitments through significant development at Tithebarn and West Clyst, as outlined in our Neighbourhood Plan, which was designed to reflect the needs and wishes of the community. Despite this, EDDC has proceeded to allocate an additional 100 houses at Wintergardens, contrary to the principles of localism and in disregard of the carefully considered planning framework established by our Neighbourhood Plan.

This action is flawed for the following reasons:

- **Community Planning Efforts:** The Neighbourhood Plan represents the voice of our community and should be a key document in local planning decisions.
- **Sustainable Development:** The Parish cannot sustainably support additional housing developments without overwhelming local infrastructure and amenities. Pinhoe and Broadclyst surgery cannot cope with the current significant increase in patient list size. Broadclyst is at capacity and cannot cope with this further increase.

- **Overloading Parish Infrastructure:** The decision to allocate 100 additional houses at Wintergardens places undue strain on local infrastructure, schools, healthcare services, and roads.
- **Undermines Public Trust:** The allocation disregards community consultation and compromises the trust between Broadclyst Parish Council, its residents, and EDDC.
- **Neglects Community Engagement:** The community's concerns and the Parish Council's objections have been ignored, eroding public trust in the planning process.
- **Failed to Respect the Broadclyst Neighbourhood Plan:** EDDC has disregarded the established housing allocations for Broadclyst Parish, undermining the local democratic process.
- **Contains misleading statements:** I think that your statement that "some support for the site to be allocated is evident" is completely misleading. You make no reference to EDDC public consultation process on this site, where over 300 people said they were dissatisfied or unhappy about development here. Please know that this plan is hugely contentious and unpopular amongst local residents.
- **Flawed rationale:**
 - o It seems only EDDC strategic planning committee, the owner of the land and LVA are in support of this development, the former to meet housing targets and the latter to make money.
 - o EDDC officers originally recommended 70 dwellings at Broadclyst 12a, as anything bigger would be "detrimental" to the village more generally. Any further development in Broadclyst will put an unsustainable strain on roads, services and schools. There isn't anyone in the village who would dispute this.
 - o Parish housing needs have been met several times over in the past decade with developments at Cranbrook, Tithebarn and Westcyst. Therefore these houses are superfluous to requirements, and it is purely for profit.
- **Bio-diversity impact:** how can building 140+ homes on green fields, result in a 10% increase in bio-diversity? Building houses here will adversely affect the local bat population which use this area. It will also affect the rookery that is opposite this site. This is a farmland area with bio-diversity, that needs to remain as it is. You can significantly increase the bio-diversity by taking positive action on the current site, as it exists, without adding unnecessary buildings to the site.
- **Increased flood risk:** Flooding is a major concern of residents living adjacent to the proposed site. These fields are frequently saturated, and often flooded, during the autumn and winter period. The fear is that adding more concrete and tarmac to the area will only increase the risk of flooding on the site and to the local community if this plan is approved.

- Increased risk of serious injury: adding more traffic to the Whimble Road, without sufficient walkways has the potential to significantly increase the risk of accident or injury to people who have to walk the lane.
- Covenants: There are local covenants on what residents can and cannot do to their properties, and need to seek permission when they do make certain changes to maintain the integrity of the village. Building these houses do not maintain this integrity and will have a significant detrimental impact.

For these reason's East Devon District Council should immediately reverse the allocation of 100+ houses at Wintergardens, and recommit to honouring the democratic process with the Broadclyst Neighbourhood Plan in all future planning decisions.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: When my wife and I first moved to the village five years ago, one of the first things we did was attend the village fete and thought it was brilliant that the Broadclyst Neighbourhood Plan was on display and we had a democratic say on the plan. It is my opinion that East Devon District Council (EDDC) has failed in the duty to respect the Broadclyst Neighbourhood Plan, particularly in relation to housing allocations.

The Parish has already met its housing commitments through significant development at Tithebarn and West Clyst, as outlined in our Neighbourhood Plan, which was designed to reflect the needs and wishes of the community. Despite this, EDDC has proceeded to allocate an additional 100 houses at Wintergardens, contrary to the principles of localism and in disregard of the carefully considered planning framework established by our Neighbourhood Plan.

This action is flawed for the following reasons:

- **Community Planning Efforts:** The Neighbourhood Plan represents the voice of our community and should be a key document in local planning decisions.

Building these houses do not maintain this integrity and will have a significant detrimental impact. For these reasons East Devon District Council should immediately reverse the allocation of 100+ houses at Wintergardens, and recommit to honouring the democratic process with the Broadclyst Neighbourhood Plan in all future planning decisions.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: This action is flawed for the following reasons:

- **Community Planning Efforts:** The Neighbourhood Plan represents the voice of our community and should be a key document in local planning decisions.
- **Sustainable Development:** The Parish cannot sustainably support additional housing developments without overwhelming local infrastructure and amenities. Pinhoe and Broadclyst surgery cannot cope with the current significant increase in patient list size. Broadclyst is at capacity and cannot cope with this further increase.

- **Overloading Parish Infrastructure:** The decision to allocate 100 additional houses at Wintergardens places undue strain on local infrastructure, schools, healthcare services, and roads.
- **Undermines Public Trust:** The allocation disregards community consultation and compromises the trust between Broadclyst Parish Council, its residents, and EDDC.
- **Neglects Community Engagement:** The community's concerns and the Parish Council's objections have been ignored, eroding public trust in the planning process.
- **Failed to Respect the Broadclyst Neighbourhood Plan:** EDDC has disregarded the established housing allocations for Broadclyst Parish, undermining the local democratic process.
- **Contains misleading statements:** I think that your statement that "some support for the site to be allocated is evident" is completely misleading. You make no reference to EDDC public consultation process on this site, where over 300 people said they were dissatisfied or unhappy about development here. Please know that this plan is hugely contentious and unpopular amongst local residents.
- **Flawed rationale:**
 - o It seems only EDDC strategic planning committee, the owner of the land and LVA are in support of this development, the former to meet housing targets and the latter to make money.
 - o EDDC officers originally recommended 70 dwellings at Broadclyst 12a, as anything bigger would be "detrimental" to the village more generally. Any further development in Broadclyst will put an unsustainable strain on roads, services and schools. There isn't anyone in the village who would dispute this.
 - o Parish housing needs have been met several times over in the past decade with developments at Cranbrook, Tithebarn and Westcyst. Therefore these houses are superfluous to requirements, and it is purely for profit.
- **Bio-diversity impact:** how can building 140+ homes on green fields, result in a 10% increase in bio-diversity? Building houses here will adversely affect the local bat population which use this area. It will also affect the rookery that is opposite this site. This is a farmland area with bio-diversity, that needs to remain as it is. You can significantly increase the bio-diversity by taking positive action on the current site, as it exists, without adding unnecessary buildings to the site.
- **Increased flood risk:** Flooding is a major concern of residents living adjacent to the proposed site. These fields are frequently saturated, and often flooded, during the autumn and winter period. The fear is that adding more concrete and tarmac to the area will only increase the risk of flooding on the site and to the local community if this plan is approved.

- Increased risk of serious injury: adding more traffic to the Whimble Road, without sufficient walkways has the potential to significantly increase the risk of accident or injury to people who have to walk the lane.
- Covenants: There are local covenants on what residents can and cannot do to their properties, and need to seek permission when they do make certain changes to maintain the integrity of the village. Building these houses do not maintain this integrity and will have a significant detrimental impact.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Too many homes for the size of village: Broadclyst should not be considered a Tier 3 settlement.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Introduction chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Broadclyst should not be considered a Tier 3 settlement.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Broadclyst cannot support a development of this size. Key issues: * Doctors surgery cannot cope with any additional patients as it is already at capacity. * Primary school is oversubscribed and cannot take additional students. Any children from this development will either have to travel further afield, or it will push other children from nearby areas into other schools which also do not have space. * Access routes to this development are along small roads. In particular the access to here from the A30 would be via a very small back lane to Cranbrook which is not well maintained, has a significant number of potholes and very few passing places. * This land often floods or is waterlogged over winter * The sewage system cannot fully cope with existing housing without adding additional. * There are no footpaths from here to either primary, or

secondary schools. The route to the secondary school in particular is alongside a dangerous road which is unlit.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Broadclyst cannot support a development of this size. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Strategic Policy 07 is unsound for the following reasons. It ignores the Neighbourhood Plan, agreed by a majority (88%) of Broadclyst residents. The Neighbourhood Plan included new housing development commensurate with the size of the village, but SD07 goes way beyond this and is not appropriate for a village the size of Broadclyst. Although it has been suggested that Broadclyst must take some development, Broadclyst has already had huge development, specifically the settlements of West Clyst and Tithebarn, creating new centres of population. SD07 proposes further development alongside the main part of the village that would increase its size by about a third. EDDC stated that development above 70 homes would be “detrimental,” yet the current plan is for twice this number.

There are major traffic concerns. Development of this scale will bring a large number of cars, which the roads cannot cope with. The main route for Exeter or northward on the B3181 goes past Clyst Vale Community College, where there is a bottleneck. There is a section of road with no pavement which students have to walk along on their way to school, already it is dangerous and with increased traffic it will be more so, particularly at peak school/commuting times. The main route to London Road (for the Science Park, Exeter Airport, Honiton and M5) is Station Road; this is already crowded, with bottlenecks at Clyst Vale Community College and the bridge at Broadclyst Station, made worse by buses and the large number of haulage lorries. The route to Cranbrook is Crannaford Lane, which is narrow and mostly only a single lane, yet is already busy with large numbers of cars going between Broadclyst and Cranbrook, often at high speed. All access roads to the proposed site are thus stretched beyond capacity, and cannot take an increase in the number of cars. Also, the entrance to the site would be from Whimble Road, which is narrow and cannot, in its present state, accommodate large construction vehicles turning in.

The SD07 site already suffers significant flooding, and development will exacerbate this problem. The problem of flooding in this area has been getting worse every year, and given the climate crisis, this trend may be expected to accelerate. Even if measures are taken to protect the site itself from flooding, it is likely that surrounding areas, particularly Town End, will be affected.

The village infrastructure cannot cope with development on this scale. The doctor's surgery is overbooked - it is extremely difficult to get an appointment with a doctor in the village, and there is no space for enlargement of the present facility. The primary school is full. Sewage is a major concern. There have been frequent leakages from the pumping station near Winter Gardens, and when there is flooding in winter it is common to see tanker lorries lined up to take away the sewage that threatens to overwhelm the sewerage system. The sewerage cannot cope as it is - more housing at this site would be completely unsustainable. It should also be pointed out that leakage will eventually find its way into the local watercourses; recent citizen science initiatives studying the River Clyst and the Crannybrook have shown high levels of phosphates (data from Westcountry Rivers Trust), and it is reasonable to assume that leaking sewage is at least partially to blame.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Modifications that would go some way to making the plan sound are:

Measures to address the traffic concerns, including but not limited to traffic calming measures on Whimble Road and Crannaford Lane, increased passing spaces on Crannaford Lane, a pavement on the stretch of Whimble Road by Clyst Vale Community College for children walking to school, a wide splay at the entrance to the site on Whimble Road to allow construction vehicles to enter safely.

Flood prevention measures, particularly to ensure that there is no effect on existing dwellings.

The sewerage must be upgraded to cope with the extra development. The sewerage is insufficient at present, and any new development must include a plan for an upgrade that will guarantee that the sewerage will be able to cope with the scale of the development.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wish to object to the possible planning permission which will be sort by LVA for farmland on the East side of the village of Broadclyst. The Neighbourhood Plan, which cost a lot of money to prepare, did not include Winter Gardens as suitable for residential building so was not earmarked for residential building by Broadclyst Parish Council but it has been Identified by speculators (LVA) who have little interest in local needs but more of how much money they can make. There are better places to build and have been built in Broadclyst Parish which have been more than enough for the quota that EDDC wants. The area and number of houses proposed would be detrimental to the village of Broadclyst which is already struggling to cope with sewerage, flooding, traffic, schooling and healthcare. The land at Winter Gardens is productive farmland and is home to healthy biodiversity and if so many houses and ancillary buildings are built on it for car dependant people these things will be lost.

1. Sewerage; I have experienced lorries pumping sewerage out several times. Several villagers have had problems with sewerage backing up into their properties.

2. Flooding; There have been floods around Winter Gardens making adjacent roads impassable and on the land making the footpath difficult to negotiate. Also there is flooding every time it rains in Green Tree Lane making insurance difficult for some houses there. As I write there is standing water on a nearby road even though it has not rained for some time. 3. Roads; Planners don't know how many walkers (dog walkers and school children) and mobility scooters use the road between Woodland Road and Elbury Cross. More housing will make it even more busy and precarious than it is now even though there is a 30 mph speed limit. Already there is a big problem, particularly during term time, at the road junction onto Station Road by the secondary school and

between there and the B Exeter/Cullompton road where it is very narrow which will be even worse when the building for 15 houses is completed on Whimple Road
23/1537/MOUT

4. Schools and healthcare.; Both the primary and secondary schools are full and there is no room for expansion. It is difficult to get an appointment with a doctor and no room for expansion nor money for more doctors and healthcare staff.

God save our farmland remembering that it will be more and more difficult to grow food if we covered it with concrete and tarmac. Please don't let our village be ruined.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: To whom it may concern

I write to you today as a very concerned resident of Broadclyst Village. I have been living in the village since 2011 and i am extremely worried about the pending development at the Winter Gardens .

The village is situated in a very small historic location and I am horrified that this location has been put forward for potential development.

And here are my reasons....

The whole site and surrounding area is susceptible to immense flooding which already causes many problems and angst to the residents of the village trying to navigate their day today living. (please see photographic evidence provided)

The number of houses proposed will be extremely detrimental to an over stretch infrastructure . The Doctors surgery is not able to cope with the amount of people in the village already (some of the residents are very elderly are heavily reliant on this service and struggle to get an appointment) The schools are full and residents are having to send their children else where outside the village .

The situation of the proposed site is surrounded by small country lanes with no pavements which is already extremely hazardous for the residents to navigate especially small children walking to school. And the lanes are used by disabled residents in mobility scooters, cyclists, horse riders, dog walkers and farm machinery and delivery vans making it ALREADY difficult to access and get around particularly around Dog Village which is a bottle neck nightmare .

There has already been planning passed for 15 houses (23/1537/MOUT) which is already going to be difficult for a weak infrastructure to cope with .

SEWAGE SEWAGE SEWAGE !!!

I would also like to inform you that our sewage is up to max capacity with lorries pumping sewage out regularly and not coping at all !

The sewage problem will only be exacerbated . SEWAGE mixing with FLOODWATER will be a monumental environment disaster for the community .

I implore you to give very careful consideration to not pass this plan as this village is already struggling to survive as it is.

The points i have raised are very valuable points indeed and our elderly residents and parents of young children are seriously frightened and anxious and peoples mental health is being compromised !

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: To whom it may concern,

As extremely concerned neighbouring residents and business owners at Little Loxbrook Farm, Broadclyst there are some very serious and worrying environmental and safety issues regards the proposal of 142 homes to be built at Winter Gardens. Firstly I would like to thank you for the opportunity to share our views and as we have lived at Little Loxbrook Farm since 2012. Since moving to Broadclyst and building a very successful equine business we have seen many things change and had to adjust to the increased flood risk and wreckless traffic speeds on the road between Cranbrook school and Little Loxbrook Farm. As you will see from the pictures and videos I have attached with a Google map screenshot also highlighting the fields and the stretches of road which fully flood due to our ever changing climate and more extreme wet weather events happening more frequently we are becoming more unviable. (You say you want local businesses to be successful and benefit?) The water levels rise so quickly in the river and are getting worse by the year with the water table barely 1 meter below ground level in a dry summer. I have two serious concerns which need very important consideration, firstly having been in the groundworks and building trade for over 25 years I know that the area proposed at Winter Gardens for 142 homes will have to have a huge rain water drainage provision with the volumes we have experienced getting worse especially the huge amount in a short period of time. Where is this RAIN WATER going to be dispersed without overflowing and mixing with the already stretched SEWAGE infrastructure that services Broadclyst which may I point out is already being pumped out by tankers probably because of the water table issue which can never be changed. The pressure 142 homes will put on local wildlife, Surrounding land, Existing residents and also the New Homes proposed will be disastrous and totally wreckless. In regards to traffic I recently had a security camera system fitted which is set off by passing cars on a

weekday roughly 900 times a day, its a country lane where I've seen walkers, cyclists, horseriders and other motorists run off the road by the speeds and pure ignorance and total disregard for the local people of Broadclyst and the businesses that support the historic village. It's become so dangerous we have personally had injuries caused by drivers and its only getting worse. There are also not many days now where there isn't a high speed police chase that passes our doors and one day soon I am extremely concerned there will be a fatality. The road conditions are horrific with potholes with no access for any pedestrian, cyclist, horserider or motorist to avoid a speeding driver. The roads around Broadclyst Secondary school and primary school can be at a standstill at school start and finish times with roads blocked, children dodging traffic and impatient rat run users (soon to be an accident with the lack of pavements and parking for both the schools) I put this to you that any houses built at Winter Gardens will destroy Broadclyst, its surrounding environment and the ground itself is not capable of taking the increased pressure from RAINWATER and EXTRA SEWAGE let alone the TRAFFIC and PUBLIC SAFETY.

[There are additional video file which could not be uploaded to commonplace which can be found in the Local plan inbox if required, they are videos of flooding in the area.]

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Land west of Whimble Road, Broadclyst (Brcl_12) combined with Land to east of Town End, Broadclyst (Brcl_29) This policy identifies land to the east of Town End (Brcl_29) for 24 new homes and 0.1 hectares of employment land. This site is owned by the National Trust as investment land that was donated specifically to fund conservation work on the Killerton Estate. At Reg 18 stage, the National Trust commented on the proposed allocations and suggested that there should be a policy requirement for a holistic masterplan which incorporates both sites, to ensure the design and layout of this area is comprehensively planned. The National Trust is therefore pleased to see that site allocations Land west of Whimble Road, Broadclyst (Brcl_12) and Land to east of Town End, Broadclyst (Brcl_29), have been combined under Strategic Policy SD07 (Development allocations at Broadclyst), and that a site Masterplan is a requirement of the policy. However, the National Trust considers that further amendment to the policy should be considered to combine the housing and employment requirements of the site, to reflect the Masterplanned approach. Currently, the requirements for employment land are set out separately for each area. Area Brcl_12 is set out to accommodate approx. 0.6 hectares of employment land, and Area Brcl_29 is set out to accommodate approx. 0.1 hectares of employment land. In a Masterplanned approach, it is likely that the required employment land would be combined and delivered in one location within the wider site. Therefore, it is considered that the policy should clearly reflect this, rather than separating the requirement. It is noted that the policy requires a pedestrian access to Green Tree Lane and/or Town End to be delivered. It is considered that this combined allocation should facilitate active transport links, including cycle connectivity, and therefore consideration should be given to updating the policy wording to support appropriate cycle connections through the site, to the village, and onward to wider sustainable links to green infrastructure such as the Clyst Valley Regional Park, and ensuring cycle/pedestrian priority.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of 100 dwellings in Broadclyst, as outlined in the East Devon District Council (EDDC) Regulation 19 Local Plan, raises significant concerns regarding the adequacy of local infrastructure. The National Planning Policy Framework (NPPF) (2023) emphasises the need for local planning authorities to ensure that necessary infrastructure is in place to support new development. Paragraph 20 of the NPPF states that strategic policies should set out an overall strategy for the pattern, scale, and quality of development, and make sufficient provision for infrastructure, including transport, education, health, and community facilities.

4.1. Healthcare Provision The proposed development is likely to exert considerable pressure on local healthcare services. Broadclyst and surrounding areas currently experience strain in accessing primary healthcare services, with existing GP practices operating at or near capacity. The NPPF (paragraph 92) stipulates that planning policies and decisions should provide social, recreational, and cultural facilities and services that the community needs, including ensuring an integrated approach to considering the location of housing, economic uses, and community facilities and services. Without clear commitments to expanding healthcare facilities, the allocation of additional housing poses a risk of exacerbating waiting times and reducing accessibility for residents.

4.2. Education Capacity The demand for school places in Broadclyst has steadily increased due to ongoing development. The Broadclyst Neighbourhood Plan (2023) highlights concerns regarding school capacity, particularly at Broadclyst Primary School, which is already under pressure. The NPPF (paragraph 95) asserts that local authorities should plan for sufficient school places and work proactively with education providers. However, there is currently no clear evidence that sufficient investment is planned to expand educational facilities to accommodate the additional pupils that

would result from the proposed housing allocation. Without such assurances, there is a significant risk that children will need to travel outside the parish for education, placing further strain on transport infrastructure.

4.3. Transport and Highways Infrastructure. Broadclyst's road network, particularly along Station Road and the B3181, already faces congestion issues. The addition of 100 dwellings is likely to increase vehicular traffic, compounding congestion and road safety concerns. The NPPF (paragraph 110) requires that developments ensure safe and suitable access for all users and that opportunities to promote sustainable transport modes are maximised.

4.3.1. Strategic Policy SD07 of the Regulation 19 Local Plan sets out a Masterplan-led approach for the proposed development at Broadclyst. This approach is essential to ensuring comprehensive and sustainable infrastructure planning. The policy states that development should come forward only as part of an agreed Masterplan for the allocated sites, which must incorporate necessary highway and transport improvements. Without a robust Masterplan, there is a risk of piecemeal development that does not adequately address cumulative transport impacts.

4.3.2. The Broadclyst Neighbourhood Plan identifies the need for improved pedestrian and cycling infrastructure, yet there is no indication that necessary upgrades will be delivered alongside the proposed housing. Additionally, public transport services in the area are limited, further reinforcing car dependency and increasing carbon emissions, which contradicts the sustainability objectives outlined in the NPPF (paragraph 104). It is therefore critical that the Masterplan includes:

4.3.3. Strategic improvements to road infrastructure to mitigate increased congestion.

4.3.4. Enhanced pedestrian and cycle connectivity to align with the sustainable transport objectives of the Local Plan.

4.3.5. Expansion of public transport options to ensure residents can access essential services without reliance on private vehicles. Failure to adhere to the Masterplan approach outlined in SD07 could result in severe infrastructure deficiencies, reducing the quality of life for both new and existing residents.

4.4. Sewerage Infrastructure and Capacity Issues

4.4.1. A significant concern for the Winter Gardens site allocation and any future strategic housing development in Broadclyst is the capacity and resilience of the existing sewerage system. There are known issues and a history related to blockages and an overall lack of capacity; Broadclyst Parish Council has been given to understand that South West Water / Pennon Water has expressed no inclination to upgrade the existing system, some of which is Victorian. Given the anticipated additional volume

from 100 new homes, any new development must incorporate robust sewerage infrastructure improvements.

4.4.2. In line with NPPF paragraph 20(b), which requires strategic policies to plan for water supply and wastewater infrastructure, any site allocations must demonstrate that they will not exacerbate existing deficiencies. Additionally, NPPF paragraph 169 states that sustainable drainage systems should be incorporated to reduce flood risk and manage wastewater effectively. Therefore, all major housing developments should be required to provide site-specific wastewater and drainage strategies that ensure capacity enhancements are in place before occupation.

4.5. Chapter 4: Conclusion and Recommendations Ensuring the delivery of genuinely affordable housing is central to Broadclyst Parish’s vision for a sustainable and inclusive community. Rising house prices and increasing demand have made it difficult for many local residents—particularly young families, key workers, and those on lower incomes—to secure housing within the parish. Without intervention, there is a risk of long-standing residents being displaced, undermining the strong community identity that defines Broadclyst. The Broadclyst Neighbourhood Plan (NP) sets out ambitious but locally focused policies to address this challenge. By requiring a higher proportion of affordable homes in new developments and prioritising local occupancy, the Broadclyst NP seeks to ensure that housing remains accessible to those with strong ties to the parish. These homes will be integrated within well-designed, mixed-tenure developments, supporting social cohesion and enhancing Broadclyst Parish’s character. The plan also promotes rural exception sites, self-build opportunities, and adaptable housing to cater to the diverse needs of the community, including older residents and those requiring accessible accommodation. However, for development in Broadclyst to be truly sustainable, as required by the National Planning Policy Framework (NPPF), it is essential that housing delivery is infrastructure-led and community-focused. The Parish Council urges East Devon District Council (EDDC) to ensure that all housing allocations are accompanied by appropriate investment in infrastructure and public services. This includes:

4.5.1. Expansion of healthcare services, including additional GP capacity, to accommodate the growing population.

4.5.2. Investment in local schools to ensure sufficient capacity for new residents.

4.5.3. Enhancement of road infrastructure and sustainable transport options, including improved cycle routes and public transport connectivity, in line with the Masterplan approach set out in Policy SD07.

4.5.4. Adequate wastewater and sewerage provision, particularly for developments such as Winter Gardens, to prevent further strain on an already overburdened system. Furthermore, policies should fully integrate NPPF guidance to ensure sustainable, well-

balanced growth. The Devon County Council Local Cycling and Walking Infrastructure Plan (LCWIP) should be embedded into all new housing allocations to promote sustainable travel options from the outset. By aligning with the broader East Devon Local Plan while reinforcing local priorities, Broadclyst Parish is committed to delivering high-quality, affordable housing that supports its long-term sustainability. Without these infrastructure commitments, the proposed allocation of 100 dwellings risks placing an unsustainable burden on local services, contradicting the principles of sustainable development set out in national policy. Through proactive planning and ongoing community engagement, these policies aim to create a future where housing remains accessible, well-supported, and environmentally sustainable, ensuring that Broadclyst Parish continues to thrive as a place where people of all backgrounds can find a secure and affordable home.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Introduction Broadclyst Parish Council welcomes the opportunity to respond to the housing allocation policies set out in the East Devon Local Plan 2020-2042 (Regulation 19). We recognise the need for well-planned, sustainable housing development that meets local needs while protecting the parish's distinctive rural character, heritage, and natural environment. Our response is framed within the principles of sustainable development as set out in the National Planning Policy Framework (NPPF, 2023), particularly paragraphs 7-14, which outline the presumption in favour of sustainable development.

We note that significant growth is focused on the West End, including Broadclyst Parish. While we support planned growth, there must be guarantees that infrastructure—including roads, public transport, education, healthcare, and green spaces—keeps pace with housing delivery. NPPF paragraph 20 emphasizes the need for strategic policies to provide an integrated approach to housing and infrastructure planning, ensuring that developments are viable and deliverable.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

BrcL_12 and BrcL_29: Due to a number of grade II listed buildings and a conservation area in close proximity to the site allocation, we consider it important that development is sympathetic to local character and conserves and enhances the settings of designated heritage assets.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: BrcL_12 and BrcL_29:

Suggested additional policy text: “Through its layout, design and landscaping, development should respond sympathetically to the rural and historic character of the village, and should conserve and enhance the settings of designated heritage assets.”

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Strategic Policy SD08: Development at Budleigh Salterton proposes to allocate the site – Land at Barn Close, Budleigh Salterton (Budl_02) – for residential development of 35 new homes

Our client fully supports the allocation.

Budleigh Salterton is classified as a Local Centre containing all 11 of the local facilities and services and three of the eight strategic facilities and services categorised by the Council. The Town has good range of services and facilities, notably more than any other Local Centre settlement and has strategic significance as a location for higher levels of future housing development. This makes it ideally placed to support additional residential development and a development of 35 dwellings, and the associated infrastructure would be fairly modest in scale and nature in terms of the Town as a whole and the scheme would be in scale with Budleigh's role and function.

The proposal is not considered to be 'major development in the National Landscape' for the purposes of NPPF 2024 para 190. The Cornwall South Coast Central AONB Management Plan outlines key indicators for determining whether a development is 'major' in its impact on the landscape. These include factors such as visual harm to the AONB/NL's scenic quality, erosion of its special qualities, incompatibility with the surroundings, and conflicts with the local community's economic and social needs. A Landscape and Visual Impact Assessment (LVIA) has been conducted to evaluate the

proposed development's impact. The site, visually well-contained by its topography, existing built form, and mature vegetation, is expected to have only minor adverse visual effects on surrounding areas. The development layout and mitigation measures, such as increased planting and buffers, are designed to soften the visual impact and blend the new dwellings with the existing settlement, particularly over time as vegetation matures.

The development, located within Budleigh Salterton, a Local Centre with a good range of services, would provide 35 new homes, including 12 affordable units. The proposal is in scale with the town's needs and would not cause significant harm to the surrounding landscape or National Landscape Designation. The development is compatible with its surroundings, with careful consideration of building materials and design to reduce visual intrusion. In addition to addressing the housing crisis in East Devon, the scheme would provide economic benefits, including job creation and increased local spending. Overall, the proposal meets the requirements of the Development Plan, and it is concluded that the development does not constitute a "major development" as defined in paragraph 190.

DELIVERABILITY

The site is subject to a live planning application in full detail for 35 new homes. This demonstrates that the allocation is fully deliverable with a willing developer able to bring the site forward early as part of the Council's Five Year Housing Supply.

At the time of writing no technical issues have been identified through the consultation process that would prohibit delivery of the site, including no objections from County Highways to the proposed vehicular access arrangements.

Following a meeting with the Town Council the application is proposed to be amended to include provision of a footway connection across the front of the adjoining site to provide pedestrian and cycle connections to the Town and its facilities.

In terms of potential sensitive impacts on Heritage and the National Landscape (NL) the application is supported by both an Archaeological and Heritage Assessment (AHA) and a Landscape Visual Impact Assessment (LVIA).

HERITAGE IMPACTS

No particular archaeological potential or designated heritage assets are identified within the site.

The closest heritage asset to the site is the post-medieval Grade II* Tidwell Manor to the north east and the AHA concludes that, even in winter, trees on the edge of the site will screen it from views from the north east. Further the orientation of the Manor house is away from the site, focussed south eastwards along a shallow valley which historically contained a formal landscape. The site visit confirmed this orientation away from the site, as well as more recent trees surrounding the main house and that the site's development would not affect its significance.

Other Grade II listed buildings lie at a greater distance or are screened by surrounding structures and topography and none would be affected by change within the site.

The AHA concludes there would no adverse heritage impacts arising from the proposal.

NATIONAL LANDSCAPE IMPACTS

As set out above an LVIA has been completed to assess how the proposed development could potentially affect landscape and/or visual amenity and also identifies features of the proposals which will assist in mitigating adverse landscape and visual impacts.

From a visual perspective, the site is visually well-contained due to the nature of the surrounding topography, the presence of built form to the west and south, and mature boundary vegetation to the eastern boundary. Where the site is visible, it is observed within the context of existing settlement of Budleigh Salterton with housing abutting the site to the south and further houses partially under construction to the west.

The site layout (see page 5 of the attached document) shows an increased set back of development from the northern boundary of the site which has allowed for an increase in open space and opportunity for further tree planting to aid in filtering views of the site from the wider NL landscape to the north.

A retained buffer to the western boundary and increased buffer to the eastern boundary ensures the retention of the existing mature vegetation and creates the opportunity to enhance these boundaries with increased planting which will also particularly assist in filtering views of the site. The landscape study concludes that:

“Visual effects have been assessed as no higher than Minor Adverse at Year 1 and Year 15 from those receptors on adjacent road routes (B3178), East Budleigh Footpath 4 and users of Bear Lane (a ‘other route with permitted access’). At Year 15, after maturation of the proposed mitigation planting, would soften the appearance of built form and help assimilate the Proposed Development into its settlement edge context.

"Views from private residential dwellings have not been tested in the field and therefore this LVIA has provided a commentary on the predicted magnitude of change as a result of the Proposed Development. The greatest change is expected to be experienced by those adjacent to the boundary of the main development area (dwellings at Hooker Close to the direct south of the Site, and dwellings at Evans Field to the direct west of the Site) who will experience a Moderate change.

"Regarding the East Devon National Landscape, the extremely limited spread of landscape and visual effects identified within the LVIA and summarised above would result in a negligible effect (emphasis added) upon the National Landscape Designation whilst the relevant special qualities would also be unaffected as a result of the Proposed Development."
