Dear Sirs

I feel I must protest about the development proposed for Chardstock.

It is appalling to consider ruining the peace and tranquility of this beautiful rural village.

The lives of the mainly older population would be devastated by such disruption to their daily lives by extensive long term building works, not to mention the increase in traffic which would be unsustainable .

Consideration should also be given to local wildlife which would be destroyed by the removal of fields and hedgerow which form their habitat.

I ask that the council carefully consider the devastating impact on local people before moving forward with such an ill-considered plan.

Regards

Ian Crandon
