We object strongly to the inclusion of the sites to the North East of Exmouth (Exmo-04a, Lymp-09, Lymp10, Lymp-14) in the local plan which are not sustainable.

There is no point in promoting green issues and environment measures. All these must start with population control. Population must relate to natural and social availability. Without this you are just wasting your and everybody else's time.

At the moment it is nigh impossible to get an appointment with the doctor. You must be joking to put even more pressure on the system.

Population control should be at the forefront of all national and international discussions.

Andrew Ingham.
