Full Responses

Response 1

Are you responding as a:: Resident near the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Appreciating nature , Walking, Meeting family or friends

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Agree

Please tell us if you have any comments on the above?:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Water Quality , Habitat , Protected Sites

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Water Quality (River) , Water Quality (Coast) , Development

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Development, industrial and housing, are antithetical to National Landscapes.

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: Achieved by reading around the subject.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Strongly Agree

Please tell us if you have any comments on the above:: Difficult to see how net zero is going to be achieved.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Ecosystem Services , Net Zero, Sustainable Transport

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Education , Decarbonise public transport , Planning reform to include renewable energy in local housing

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Solar needs to be on buildings not fields.

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Agree

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Nature Connection, Farming, Community

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Unlikely to be achieved given that most tourists travel by ICE vehicles.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: The proposal to build on National Landscape and for an access road to cut across a busy foot and cycleway is nonsensical and probably illegal.

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Disagree

Please tell us if you have any comments on the above: Would be OK if not for the proposal to build industrial units and a large housing estate on our National Landscape. Having an access road in this proposed development that cuts across an important amenity (foot/cycle path) would be dangerous and destroy the peace of this area. The claim that this would be ameliorated by creating a community hub at this intersection is a red herring.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 5

Please tell us if you have any comments on the above: : The main point is that East Devon District Council has a legal duty to conserve and enhance National Landscapes and does not have the right to propose an area of National Landscape for building. Many local residents are suspicious of the relationship between the landowner and the council. *** Personal details have been removed *** claims to be ecologically minded are contradicted by their wish to sell National Landscape land for building to make a large amount of money.

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : Absolutely not. Building on National Landscapes is entirely in opposition to the purpose of National Landscapes. There are no exceptional circumstances that justify building on National Landscapes. They are areas of outstanding natural beauty of national significance, as their title indicates. They are a vital part of the beauty of East Devon which attracts visitors to the area. There is no public interest in destroying them by building industrial units and large housing estates on them. In the case of Exmo_17, the houses will be expensive and bought by people from outside the area, especially retirees, putting pressure on an infrastructure which is already failing. There would be a significant rise in traffic and pollution with negative effects on the environment, nature and quality of life. We know from local experience that developers do not build the number of 'affordable houses' they promise at the outset; such houses as will be built will only be affordable to some people. The idea that industrial units would be built next to the main road is an incongruous way of creating employment. *** Personal details have been removed *** have land on the other side of the main road, which would connect to the Liverton Trading Estate without impinging on National Landscape. This land has (or has had) Coastal Preservation Area protection for good reason. For the council to remove this protection despite strong opposition by residents expressed in an earlier consultation is rather devious.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Conserve and enhance National Landscapes throughout East Devon. Defend our quality of life and local character that depends on the preservation of National Landscapes

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: :

Response 2

Are you responding as a: Resident in the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Physical exercise , Leisure activities , Walking, Enjoying the views , Visiting the coast, Appreciating nature

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above?: I am completely frustrated that in Exmouth there is a large areas within the East Devon National Landscape that has been put forward for development of 410 to 450 houses plus other uses. This is a area valued by the community and is a habitat for wildlife and has wonderful views. The land is owned by *** Personal details have been removed *** Estates with Bloor wanting to develop. This

completely disregards the protection and legislation aimed at protecting the national landscape.

Creating a Devon local nature recovery strategy is good, but not if it cannot protect the national landscape from development. The increase in sewage, loss of habitats, light pollution and increase in traffic goes against this protecting nature strategy which is needed. I agree people need access to nature and what we have at site 17 allows this to be the case. Why take away and purchase new land when we already have a site that needs protecting from housing development. It is the developer and landowner who are mainly pushing this through, even during the East Devon plan consultation.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Protected Sites , Habitat , Priority Habitat , Forestry , Species , Water Quality

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Water Quality (River) , Water Quality (Coast) , Habitat Degradation , Habitat Loss , Biodiversity Loss , Climate Change , Land-use Change, Development

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Stopping house developments in the national landscape.

In general terms, what is your current understanding of net zero and its implications?: Average

Please outline why you have given the answer you have:: a target of the amount of greenhouse gases produced by human activity, to be achieved by reducing emissions and implementing methods of absorbing carbon dioxide from the atmosphere. To build a large scale housing development site 17 in Exmouth national landscape goes completely against net zero.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Strongly Disagree

Please tell us if you have any comments on the above:: All new buildings need solar panels attached. Exmouth is being destroyed by over development. Site 17 if developed will severely impact on climate change. The fields already flood, this will only worsen with development. Loss of trees and loss of established habitats including hedgerows will impact on climate change if developed.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Net Zero, Renewable Energy, Ecosystem Services ,

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Tree planting , Rewilding , Habitat creation or enhancement

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Please include no development in the national landscape.

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above? -: Site 17 in Exmouth is used and accessed by anyone of all ages and disabilities. The path is suitable for wheelchair users, cyclists, families, runners, walkers etc. To destroy this with development will prevent access to what we have. Who wants to visit the national landscape when its in a built up area of houses, with no views and no countryside to see. Plus have a road with cars going past regularly stopping the safety of pedestrians and cyclists from cars. The area is seen from the south west coast path and is exposed to the weather. Its a lovely site and place valued by the community. There is huge anger towards the idea of development. The fields are also used by the local farms, supporting sustainability.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Access & Recreation , Nature Connection, Farming

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Allowing tourists to visit and enjoy without impacting hugely on local services such as sewage, pollution and the environment.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Please listen to the views of the community and protect our national landscape from development.

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above: I agree with the principles, but only if there is no development within the national landscape. Site 17 has far reaching views in Exmouth and yet these are not being protected from development. One of the Exmouth councilors did not even know the site was in the national landscape, so even councilors need educating.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 5

Please tell us if you have any comments on the above: : I have researched the national lanscape as well as be an ambassador. However I feel the council need education on the legislation protecting the sitesand not use the national landscape to meet its housing targets. One lost, it will be lost forever.

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 5

Please provide reasons for your answer: : No development especially large scale should be permitted in the national landscape. If site 17 in Exmouth is developed then it will open the door to further development in the national landscape and the impact this will have will be permanent loss and destruction on the local wildlife and habitats as well as community access to what we already have. Why destroy something that meets the national landscape needs and requirements.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: No development in the national landscape.

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Place , Nature , Climate, People

Response 3

Are you responding as a: Resident in the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Other (please specify)

Please specify: I live in it and enjoy all that it has to offer in terms of a beautiful landscape

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Agree

Please tell us if you have any comments on the above?:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Water Quality , Other (please specify by clicking the green pen below) , Restriction on inappropriate development, Habitat

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Water Quality (River) , Water Quality (Coast) , Soil Health & Erosion, Climate Change , Development , Land-use Change, Biodiversity Loss

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: I am very concerned with climate change, and read research papers. Not enough action is being taken, so that we will shortly reach the tipping point, from which I very much doubt there is any hope of return to 'normal'

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Neutral

Please tell us if you have any comments on the above:: We all need to do better, and work harder to try and reduce drastic climate change

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Net Zero, Sustainable Transport

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Education , Planning reform to include renewable energy in local housing , Awareness-raising

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Agree

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Farming

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Tourism that is not mass tourism, but helps the economy and communities, but does not use up all the water and other resources that we all rely on.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Neutral

Please tell us if you have any comments on the above: There should be better prevention of inappropriate new development, and stronger planning policies

How well do you understand the purposes of the National Landscape designation and Partnership? -: 5

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : I am unaware of any development conserving or enhancing the landscape. Some development is necessary for agriculture etc, but development and conserving natural beauty are direct opposites

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Better engagement with the planning process and local decision making would be good

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Climate, Nature , Place , People

Response 4

Response 5

Are you responding as a:: Resident near the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Other (please specify)

Please specify: live adjacent so most of my time is spent in and around the national landscape

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Neutral

Please tell us if you have any comments on the above?:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Protected Sites , Habitat , Priority Habitat

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Development , Habitat Loss , Land-use Change, overdevelopment

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Nature and biodiversity have sub divisions. For instance when considering biodiversity, a mature tree contributes a hundred times more biodiversity than a sapling. Net gain is a trick designed to statistically equate the two.

In general terms, what is your current understanding of net zero and its implications?: Excellent

Please outline why you have given the answer you have:: net zero is a nonsense used to get planning applications approved when in actual fact, once lost, biodiversity and carbon expenditure cannot be mitigated or reimbursed and carbon offsetting has now been discredited, as a means of preserving nature.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Disagree

Please tell us if you have any comments on the above:: The climate priorities are incompatible with allowing development on a national landscape. Climate is the overarching priority in any environmental matter as rainfall increasing has shown us. We cannot win against climate change and a firm line has to be drawn which will prevent further damage to our environment and climate breakdown.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Other (please specify by clicking the green pen below) , prevention of housing development within the NL

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): prevention of using NL land for housing development

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: There's no point fiddling at the edges with tiny grants and little projects if the NL administration allows huge housing developments. The Partnership may as well go home. The whole point of addressing climate change is acknowledging our duty to stop harming the environment in ways which cannot be mitigated.

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above? -: A driver for change being housing is completely wrong. There is no driver for using the NL as a resource to build housing when the housing can be sourced elsewhere in non NL areas. This is the case in East Devon.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : preventing development for housing

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: no changes of use towards residential or holiday accommodation as it becomes housing in time. Permission for bed and breakfast, farm shops, farm tourism, and permitted non-industrial tourism. Avoiding industrial tourism such as that seen at Ladram Bay and Devon Cliffs. How that has been allowed is beyond common sense.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Population growth does not affect the national landscape, the need for housing, if there is a need (not just a wish to make profit) can be satisfied by other sites outside the national landscape.

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above: This is atrocious, potentially allowing housing development within the NL. There is a conflict of interest, as CDE and Jurassic Coast Trust are run by CDE and *** Personal details have been removed *** is on the board of Natural England. The undue influence of a landowner when submitting sites within the NL for housing should be highlighted to the Secretary of State as undue influence and lack of oversight.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 5

Please tell us if you have any comments on the above: : Do YOU understand them? Because if you allow housing to be built over the NL you evidently don't. The statutory duty to conserve and enhance the national landscape appears to be being ignored in favour of allowing development of whole housing estates, by one of your partner organisations, against all common sense and legal requirement to preserve this landscape. *** Personal details have been removed *** is ONE partner but it runs the Jurassic Coast Trust and *** Personal details have been removed *** is on the Board of Natural England. Undue influence is happening to change the Draft Plan and the management of this NL to allowing it to be mined for profit.

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : No development at all should be permitted. The development section under "PLACE" says development to be allowed if "sensitively planned and delivered to the highest quality ensuring biodiversity net gain that enhances the natural beauty of the landscape" this is nonsense and it just paves the way for housing with a made-up, statistical (but not provable) "net gain" figure. Like carbon offsetting, net gain has been discredited as effective climate change, flooding, or habitat loss mitigation. For example, the loss of mature trees cannot be mitigated by planting new trees, as the biodiverse networks and habitat supported by mature trees is far in excess of what saplings provide. It takes decades for habitat to establish and "net gain" is a trick to get past planning departments with now discredited ideas of "plant a tree to replace a tree, damage done here can be mitigated there" when the whole point of the NL designation is to PRESERVE, ENHANCE, PROTECT, the NATURAL BEAUTY of a site, which cannot be done, ever, by allowing housing. You cannot put 450 houses on a national landscape, or even 200 houses, and say it enhances the natural beauty (beauty is a VISUAL characteristic and natural means NON ARTIFICIAL) of the designated site. No development can be allowed and giving permission for any housing, just means more and more of the site will be built upon in future as it will set precedent. Housing, no matter how high quality, does not enhance the natural beauty of anything.

3. Key Drivers say increasing population and housing development within the NL which is a nonsense, the migration into this area can be housed using other non designated areas such as Exmo_20 and other sites not within protected landscape. This NL designation does not permit housing and to change the Management Plan so that it does, with 3 of the partnership agencies under the control of the CEO of an organisation submitting planning applications to build on it, is a conflict of interest which invalidates the entire Plan. This objection will be taken to the Secretary of State as it is undue influence by one party, over the management of our NL area. CDE used to put stewardship as its purpose now that has gone and selling land to developers is its primary function in Exmouth. This Plan has been rewritten to facilitate that and smooth the way for housing development in a national landscape which is not correct, nor does it abide by statutory requirements. If NLs could be developed we would have none left.

4. It is notable that CDE, a partner has contributed (using grant money) to conservation of the Lower Otter and the Pebblebed Heaths, Those are all NL sites. However the NL site at Salterton Road Exmo_17 is being put forward by CDE as for development of high density housing and industrial units. Most of the housing here is bought by non locals due to high prices and it certainly will not enhance the NATURAL BEAUTY of the landscape as it would be required to do. This category "development" and the changes to "Place" are an open challenge to the designation as a whole and I object strongly to revisions which allow development, put forward as they are, by a body which has a conflict of interest, ie CDE. Houses to meet Govt targets can be built outside the NL with ease. There is no point having a NL designation unless you protect the landscape or enhance it, which housing does not do, it is a complete misnomer to talk about sensitive development, there is no such thing. Natural beauty is exactly that, housing does not fulfil the statutory objectives of NL management in enhancing the natural beauty of the landscape.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: There is a statutory duty to preserve and enhance the natural beauty of this landscape. Housing does

none of those things and must not be allowed. It is impossible to mitigate the visual, ecological and biodiversity harm of 450 houses or indeed any houses.

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Place , Climate, Nature , People

Response 6

Are you responding as a: Resident in the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Walking, Enjoying the views , Appreciating nature

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Neutral

Please tell us if you have any comments on the above?: I see the targets but I find it hard to believe they're genuine when so many parts of our national landscape are threatened by being destroyed to become housing estates.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Protected Sites , Water Quality , Habitat

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Land-use Change, Development , Water Quality (Coast)

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Brown field sites have been left derelict for years and should be compulsorily developed before national landscape is built on. Water companies need to start investing in proper infrastructure instead of paying themselves bonuses.

In general terms, what is your current understanding of net zero and its implications?: Average

Please outline why you have given the answer you have.: I see the need for tackling climate change but I don't think new technology necessarily offers a 'greener'

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Disagree

Please tell us if you have any comments on the above.: Every time targets get set the economy nose dives and then deadlines get extended or policies weakened. When will people realise money will be useless when half the world will be uninhabitable.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Renewable Energy, Ecosystem Services , Sustainable Transport

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Planning reform to include renewable energy in local housing , Education , Carbon-capture technology

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Neutral

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Tourism , Access & Recreation , Nature Connection

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this:

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Disagree

Please tell us if you have any comments on the above: I firmly believe ALL national landscape should stay protected and no more countryside lost to housing or commercial development.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 3

Please tell us if you have any comments on the above: : Plans talk about protecting the landscape but my personal experience is of seeing the most unsuitable sites chosen for potential development and gov policy over ruling environmental issues. The houses built in the most beautiful surroundings won't be affordable housing but top price luxury homes which local people cannot afford.

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : The minute you start bending

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Place , People, Nature , Climate

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above: This is atrocious, potentially allowing housing development within the NL. There is a conflict of interest, as CDE and Jurassic Coast Trust are run *** Personal details have been removed *** is on the board of Natural England. The undue influence of a landowner when submitting sites within the NL for housing should be highlighted to the Secretary of State as undue influence and lack of oversight.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 5

Please tell us if you have any comments on the above: : Do YOU understand them? Because if you allow housing to be built over the NL you evidently don't. The statutory duty to conserve and enhance the national landscape appears to be being ignored in favour of allowing development of whole housing estates, by one of your partner organisations, against all common sense and legal requirement to preserve this landscape. *** Personal details have been removed *** is ONE partner but it runs the Jurassic Coast Trust and *** Personal details have been removed *** is on the Board of Natural England. Undue influence is happening to change the Draft Plan and the management of this NL to allowing it to be mined for profit.

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : No development at all should be permitted. The development section under "PLACE" says development to be allowed if "sensitively planned and delivered to the highest quality ensuring biodiversity net gain that enhances the natural beauty of the landscape" this is nonsense and it just paves the way for housing with a made-up, statistical (but not provable) "net gain" figure. Like carbon offsetting, net gain has been discredited as effective climate change, flooding, or habitat loss mitigation. For example, the loss of mature trees cannot be mitigated by planting new trees, as the biodiverse networks and habitat supported by mature trees is far in excess of what saplings provide. It takes decades for habitat to establish and "net gain" is a trick to get past planning departments with now discredited ideas of "plant a tree to replace a tree, damage done here can be mitigated there" when the whole point of the NL designation is to PRESERVE, ENHANCE, PROTECT, the NATURAL BEAUTY of a site, which cannot be done, ever, by allowing housing. You cannot put 450 houses on a national landscape, or even 200 houses, and say it enhances the natural beauty (beauty is a VISUAL characteristic and natural means NON ARTIFICIAL) of the designated site. No development can be allowed and giving permission for any housing, just means more and more of the site will be built upon in future as it will set precedent. Housing, no matter how high quality, does not enhance the natural beauty of anything.

3. Key Drivers say increasing population and housing development within the NL which is a nonsense, the migration into this area can be housed using other non designated areas such as Exmo_20 and other sites not within protected landscape. This NL designation does not permit housing and to change the Management Plan so that it does, with 3 of the partnership agencies under the control of the CEO of an organisation submitting planning applications to build on it, is a conflict of interest which invalidates the entire Plan. This objection will be taken to the Secretary of State as it is undue influence by one party, over the management of our NL area. CDE used to put stewardship as its purpose now that has gone and selling land to developers is its primary function in Exmouth. This Plan has been rewritten to facilitate that and smooth the way for housing development in a national landscape which is not correct, nor does it abide by statutory requirements. If NLs could be developed we would have none left.

4. It is notable that CDE, a partner has contributed (using grant money) to conservation of

the Lower Otter and the Pebblebed Heaths, Those are all NL sites. However the NL site at Salterton Road Exmo_17 is being put forward by CDE as for development of high density housing and industrial units. Most of the housing here is bought by non locals due to high prices and it certainly will not enhance the NATURAL BEAUTY of the landscape as it would be required to do. This category "development" and the changes to "Place" are an open challenge to the designation as a whole and I object strongly to revisions which allow development, put forward as they are, by a body which has a conflict of interest, ie CDE. Houses to meet Govt targets can be built outside the NL with ease. There is no point having a NL designation unless you protect the landscape or enhance it, which housing does not do, it is a complete misnomer to talk about sensitive development, there is no such thing. Natural beauty is exactly that, housing does not fulfil the statutory objectives of NL management in enhancing the natural beauty of the landscape.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: There is a statutory duty to preserve and enhance the natural beauty of this landscape. Housing does none of those things and must not be allowed. It is impossible to mitigate the visual, ecological and biodiversity harm of 450 houses or indeed any houses.

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Place , Climate, Nature , People

Response 8

Are you responding as a: Resident near the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Appreciating nature , Enjoying the views , Walking

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Strongly Agree

Please tell us if you have any comments on the above?:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Habitat , Priority Habitat , Species

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Habitat Loss , Habitat Degradation , Biodiversity Loss

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?:

Please outline why you have given the answer you have::

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -:

Please tell us if you have any comments on the above::

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1:

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three):

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?:

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) :

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this:

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Strongly Agree

Please tell us if you have any comments on the above:

How well do you understand the purposes of the National Landscape designation and Partnership? -: 5

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : If there is a desire to increase the ednl area then a starting point should be to put a moratorium on all new building with the ednl, as a first requirement to increase its area.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: There is a consultation on a local plan for housing within east devon for the same 5years from 2025-2030. In this plan a site "Plan31" has been included for housing even though it is in the ednl.

It is only a small site of 1 ha but will have ancient hedgerow degraded, ancient meadow lost and landscape degraded. Furthermore, the site is near an ancient monument and near a Woodland Trust priority habitat. Surely, the ednl partnership should not want to encourage this type of loss and should look at sites for building elsewhere.

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , Climate, Place , People

Response 9

Are you responding as a: Resident near the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Enjoying the views , Appreciating nature , Visiting the coast

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Strongly Agree

Please tell us if you have any comments on the above?:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Habitat , Water Quality , Species

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Land-use Change, Development , Water Quality (River)

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: Understand the concept but think it's unattainable largely because of its reliance on rare earth and other minerals largely controlled by China and which are limited/finite and so environmentally unfriendly to process.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Neutral

Please tell us if you have any comments on the above:: Would like to agree but think they're unattainable, especially sustainable transport and reliance on batteries which are so problematic environmentally, in access to materials, environmental and economic cost of production, life-limited . . .

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Ecosystem Services , Other (please specify by clicking the green pen below) , Ban further development because the area cannot support it

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Education , Wind Farms (onshore/offshore) , Awareness-raising

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: I think it's all 'pie in the sky', unattainable largely through public greed and unwillingness to accept that all need to adapt our way of life. Money will not solve it.

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Agree

Please tell us if you have any comments on the above? -: People need to be involved and helped to rally understand the issues. Think about what we're bequeathing to future generations if we don't take more personal responsibility for our actions.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Community , Other (please specify by clicking the green pen below) , Education, Nature Connection

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Tourism that is environmentally responsible, where profit/greed is not 'king', and that is of benefit to both the local community and visitors

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above: There should be NO MORE development, but protection and improvement of what there is. Especially in the west of the area the infrastructure cannot cope with what there already is.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 2

Please tell us if you have any comments on the above: : The designation, proposals, targets etc seem to be at odd's with each other, so contradictory that, to me, it reads like band-wagoning and unachievable

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : The infrastructure, especially roads and sewerage, cannot cope with either the residential or commercial environment now, so cannot possibly cope with more building. It threatens the future of tourism in the area, therefore its economic survival

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: National Landscape proposals and the development proposed for the same land east of Exmouth are totally incompatible . I think it's hypocritical to bring the two together in one document.

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Place , Nature , People, Climate

Response 10

Are you responding as a: Resident in the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Visiting local shops or restaurants , Meeting family or friends , Appreciating nature

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Agree

Please tell us if you have any comments on the above?:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Habitat , Protected Sites , Water Quality

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Water Quality (Coast) , Development , Climate Change

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Average

Please outline why you have given the answer you have:: I have an average understanding

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Neutral

Please tell us if you have any comments on the above:: I can't understand how the proposed developments around Exmouth fit in with proposals to cut reliance on cars, and they will increase problems with sewage and flooding. I see no evidence of investment to improve the local public transport network

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Ecosystem Services , Sustainable Transport, Net Zero

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Wind Farms (onshore/offshore) , Habitat creation or enhancement , Rewilding

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Neutral

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Farming, Nature Connection, Community

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Tourism that does not harm the place that the tourist has come to visit, or improves it in some way. Too often tourism changes the nature of a place, whether urban or rural.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Improve community environment, facilities, activities etc in the rural towns and villages in the area.

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above: There are large developments planned for the outskirts of Exmouth that I'm very unhappy about

How well do you understand the purposes of the National Landscape designation and Partnership? -: 3

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 2

Please provide reasons for your answer: : There is scope for redevelopment of commercial and residential property in towns and villages, but I'm alarmed at the large

scale developments planned for the outskirts of Exmouth, as there's no new facilities or shops planned, and school, GPs already stretched, extra strain on sewage system, flood risks, car reliance, and impact on neighbouring roads and landscape including Woodbury Common.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: -

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Appreciating nature , Visiting the coast, Walking

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Agree

Please tell us if you have any comments on the above?: I support the plans but I think the time frames are too long , action is needed with a 2030 rather than 2042 deadline. Also there are plenty of targets about what you want to acheive but I think you need to target also what we need to do less of to acheive this. How about targets and plans around reducing car use, decreasing untreated sewage spills , decreasing pollution and reducing plastic waste ? All these would help to acheive your aims, but I think the plan needs specific targets for these , if we stop damaging the landscape it will recover. It is difficult to see how it will recover unless we change the aspects of what we do that are causing the problems.

Response 13

Are you responding as a: Resident near the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Physical exercise , Leisure activities , Walking, Enjoying the views , Visiting the coast, Appreciating nature

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Strongly Agree

Please tell us if you have any comments on the above?: National Landscapes should be jealously protected. They are the lungs of our countryside and vital for nature. No housebuilding should ever take place on them. What is the point of designating these special areas if they are not protected?

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Water Quality , Priority Habitat , Species

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Habitat Loss , Development , Water Quality (Coast)

Do you have any feedback relating to this Nature chapter in the Management Plan?

For example, priorities or opportunities you believe have been missed.: Over development and lack of infrastructure is killing the whole area. In particular water resources and sewage treatment and disposal. If our rivers and seas die, so will we

In general terms, what is your current understanding of net zero and its implications?: Average

Please outline why you have given the answer you have:: There are mixed messages in the media so getting detailed unbiased information is difficult

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Strongly Disagree

Please tell us if you have any comments on the above:: We are not taking a balanced approach to climate change ameliorate. Many of the current renewable alternatives are not green when you deep dive. We are leaving ourselves at the mercy of other countries.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Ecosystem Services , Sustainable Transport, Other (please specify by clicking the green pen below) , Water quality Water quality Water quality!

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Tree planting , Habitat creation or enhancement , Education

Do you have any feedback relating to this Climate chapter in the Management Plan?

For example, priorities or opportunities you believe have been missed.: There is no such thing as sustainable development. All housebuilding comes as huge carbon cost. No-one is talking about that

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Neutral

Please tell us if you have any comments on the above? -: Population expansion happens when houses are built and draw in people from outside the area. We should be looking at organic growth, not fast growth driven by new housing

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Farming, Nature Connection, Community

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: I don't believe there is such a thing. This is greenwash. We should work to ameliorate the effects ecologically. We should also support existing businesses in order to try to be less reliant on tourists

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Neutral

Please tell us if you have any comments on the above:

How well do you understand the purposes of the National Landscape designation and Partnership? -: 3

Please tell us if you have any comments on the above: : There is a lot of impenetrable verbiage in the reports

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : It is utterly wrong on every level. We will, at this rate end up as an extension of the coastal development which is going on all along the south coast, thereby destroying the quality of life here, and for ever destroying natural habitat1

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , Climate, Place , People

Response 14

Are you responding as a: Resident near the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Walking, Enjoying the views , Appreciating nature

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above?: I deplore the very idea of building in a National Landscape. Crossing an important foot/cycle path. Especially without the necessary supporting infrastructure . Especially roads and sewerage treatment plants

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Protected Sites , Habitat , Water Quality

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Water Quality (Coast) , Biodiversity Loss , Habitat Loss

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Building in a National landscape will inevitably destroy countless species of flora and fauna and their habitat. And the sheer beauty of the area which has been protected for posterity by its designation.

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: Because I keep myself informed

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Agree

Please tell us if you have any comments on the above::

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Sustainable Transport, Ecosystem Services , Net Zero

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this:

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Neutral

Please tell us if you have any comments on the above:

How well do you understand the purposes of the National Landscape designation and Partnership? -: 4

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 3

Please provide reasons for your answer: :

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , People, Climate, Place

Response 16

Are you responding as a: Resident in the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Physical exercise , Walking, Other (please specify)

Please specify: Enjoying the peaceful location with many species of birds of the Norman Lockyer Observatory

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Agree

Please tell us if you have any comments on the above?: Would like to see EDDC promote and improve the Norman Lockyer Observatory. It has huge potential for heritage, culture, nature, science, wildlife - many rare toadstools for example. Heathland.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Water Quality

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Habitat Degradation , Development , Water Quality (Coast)

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: The land surrounding the Norman Lockyer Observatory is home to many species of birds and wildlife which is an underused resource. The picnic site could be used as an information point. It is a valuable outside space.

In general terms, what is your current understanding of net zero and its implications?: Average

Please outline why you have given the answer you have:: I wonder how electric cars and heatpumps fulfil the net zero aim.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Disagree

Please tell us if you have any comments on the above::

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Sustainable Transport

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Habitat creation or enhancement , Education , Tree planting

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Neutral

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Nature Connection, Access & Recreation , Farming

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Visitors need to have experiences that they may not otherwise have such as coast, farming, countryside in order to enhance their education and thus also take steps to help protect the planet. A science resource such as the Norman Lockyer Observatory could really help with this.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Neutral

Please tell us if you have any comments on the above:

How well do you understand the purposes of the National Landscape designation and Partnership? -: 3

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 3

Please provide reasons for your answer: : The new town of Cranbrook is a classic example of how not to do it - built on a flood plain, shops being built years after the houses, railway station quite a way from the town. The extensive new build around Exeter also is not in tandem with an increase in infrastructure. Nor Honiton.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Place , Nature , People, Climate

Response 17

Are you responding as a: Resident in the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Physical exercise , Walking, Enjoying the views , Visiting the coast, Appreciating nature

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Agree

Please tell us if you have any comments on the above?: Your targets and priorities are at odds with the council's housing development plans. What are you doing/ what powers do you have to influence these? If none, what is the point of your existence?

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Protected Sites , Water Quality

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Water Quality (Coast) , Development , Habitat Loss

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: I read in-depth articles from reputable sources

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Agree

Please tell us if you have any comments on the above::

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Renewable Energy, Sustainable Transport, Other (please specify by clicking the green pen below) , Reducing waste

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Planning reform to include renewable energy in local housing , Increase public grants for domestic renewable energy , Awareness-raising

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Neutral

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Farming, Nature Connection, Community

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Balancing the needs of local communities and tourism eg housing availability. Encouraging less use of cars (electric cars are not innocent of all environmental consequences!)
Resolving water supply and waste disposal issues responsibly to cope with peak visitor seasons and increasingly extreme weather conditions.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Neutral

Please tell us if you have any comments on the above:

How well do you understand the purposes of the National Landscape designation and Partnership? -: 3

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 2

Please provide reasons for your answer: : Housing development plans as they currently exist provide a majority of houses beyond the means of local people and are bought by people moving into the area or for second homes/ holiday lets. The plans need to be revisited. Only homes that will actually ease the existing local shortages should be developed and brown/grey sites should be targeted as these are also most likely to have access to transport links etc

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Our areas are built around tourism yet people who work in our service industries can no longer afford to live here. This in turn means our businesses struggle to meet the needs of tourists - a vicious circle.

We also neglect the need for productive farmland. Responsibly managed farmland enhances the area whilst producing uk grown food reducing the need for environmentally damaging foreign exports . Giving up productive farmland for housing is deeply irresponsible economically, environmentally and politically in these troubled times.

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: :

How well do you understand the purposes of the National Landscape designation and Partnership? -: 2

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : Exmouth is full. We are already suffering from lack of infrastructure. No more houses should be built without sewage treatment, proper roads, schools , doctors ,public transport. We need building that treats the area and environment with respect not profit.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , Climate, Place , People

Response 19

Are you responding as a:: Resident near the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Physical exercise

Please specify: I am an artist, belong to a very active group of working artists, use nature as a resource resource and a healing/calming environment. I have lost the frogs, toads, sand lizards and grass snakes from my garden over the last few years - most residents have paved

over their gardens for car parks-wild-life and water drainage are affected, biological chains are disrupted, more species fail.

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Neutral

Please tell us if you have any comments on the above?: Action needs to be taken now. Restoration should aim to restore to previous levels- not just hang on to present depleted levels. Eco-systems are interdependent- it all needs to be brought along together to succeed. Leaving areas undisturbed for perpetuity is good- mitigation efforts often fail as they do not relate to the bigger picture.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Priority Habitat , Protected Sites , Other(please specify by clicking the green pen below) , All of it. We have already lost too much. Once lost, a habitat cannot be replaced- complex networks of inter-dependent factors make preservation and restoration of vital importance.

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Development , Habitat Loss , Other (please specify by clicking the green pen below), The infrastructure needs to be put in place before any more development is allowed. South West Water need to put much more in to our local area, where the sewage pollution has caused problems on river, beach, in homes and streets - yet more homes are planned without addressing the current issues. It affects river and sea . Mitigation efforts need follow up; we had rare grassed moved in our area, I cannot see them any more where they were moved to- a place where a lot of people walk on everything. Paving over gardens needs more control, soak away has been affected.

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Reducing agricultural chemicals is key to preserving pollinator/bee health with implications for insectivorous species. Once lost, an environment cannot be replaced- places of quiet, stillness, fresh air and calm are vital to our health. Areas should be accessible to all. Money is not the most important thing- but it rules at the moment. Development of real council owned rentable homes is desirable. Developments selling off to big business who then rent back , or second homes, hard bakes many problems into the system without solving the housing crisis.

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: I studied post grad environmental studies 45 years ago and have kept informed and sometimes actively joined in local campaigns. It troubles me to see the same issues on the table as 45 years ago- it needs action now. We can all do our bit by not littering, going organic/allotment/gardening etc.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Agree

Please tell us if you have any comments on the above:: It is all moving in the right direction- we need more now, not too little too late. A very commendable effort but it needs to be action. Loss of any more protected areas of outstanding natural beauty (can't remember the new name) is about more than the view. It is about nature corridors, mental health, tourism and the future of the planet for future generations. I know no one who says " I just had a beautiful walk in the new housing estate ." S.W.W. pollution issues have adversely affected local businesses, beach use, river life, sea life, bird life, hotels and shops. It is not NIMBY ism to wish to keep the little areas of a few acres here and there to prevent further loss , rain wash off etc.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Ecosystem Services

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Tree planting , Planning reform to include renewable energy in local housing , Habitat creation or enhancement

Do you have any feedback relating to this Climate chapter in the Management Plan?

For example, priorities or opportunities you believe have been missed.: Air travel is expanding- alternative fuels need to be developed. More computer use means more electricity. This needs to be factored in. Over consumption is evidenced in our tips and recycling centres. It is desirable that this reduces - this is also about paying people properly. Litter is avoidable and deplorable. More posters, bins and pressure to stop this is desirable.

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Strongly Agree

Please tell us if you have any comments on the above? -: It should start in primary school .Children who engage first hand with playing in nature usually really value it. Road safety and other fears mean children are not walking to school and playing out as they used to- car rides and screen time have taken over due to commercial pressure. This balance needs to be restored- not just by a bit of forest school but by making sure schools have nature study, nature reserves, nature playgrounds. The Eden project shows how good this can be.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Access & Recreation , Nature Connection, Community

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Money spent by tourists should enhance the local area and not go to big corporations , who buy pre-packed foodstuffs from big providers. This localism is ideal and not always practical. Companies clearing up their own litter- pizza boxes, litter, bottles. A count could be made of stuff on the beach and companies charged. I'm old enough to remember when there was no litter. Exmouth beach after a sunny bank holiday is a rubbish tip of plastic and litter. A small surcharge on visitors might be used to fund nature protection.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: It boils down to education and awareness, feeling responsible for our own actions.

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Neutral

Please tell us if you have any comments on the above: It is vague. A clever planner can work around all of it. "Ensuring bio-diversity net gain delivery" for example- only an expert could assess this and only experts could approve it or not. In my own garden I have lost grass snakes, frogs and toads, all of which bred freely around my ponds. Sand lizards used to be common near the sea front- all gone. We need more than just trying to save a bit here and there- the losses need to be made good as well. I just don't have any confidence that planning will be informed enough or sensitive enough to prevent further damage- mitigation schemes are hit and miss and need monitoring to make sure they are kept in place.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 4

Please tell us if you have any comments on the above: : I understand and just hope it isn't just one big easy speak p.r. exercise that smooths the way for more devastation which can never be put right.

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 2

Please provide reasons for your answer: : If it was truly council owned rentable homes then I would be behind some of it. If it more private development of smart houses for the well off , who already have a home and fancy a move, or a second home, or a development to be purchased by , for example, Black Rock, to rent back out then NO MORE. It does nothing to help solve the current housing crisis. What is needed is more affordable , council owned, rentable maisonettes, flats and houses , to stay in ownership of council or social housing group, never be sold on the open market. Genuine,genuine solutions to the housing crisis.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: As above. The huge gap between what planning is in the pipeline and solving the housing crisis.

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , Climate, People, Place

Response 20

Are you responding as a:: Resident in the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Walking, Appreciating nature , Other (please specify)

Please specify: I live and work in Budleigh Salterton

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Agree

Please tell us if you have any comments on the above?:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Water Quality , Habitat , Protected Sites

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Water Quality (River) , Water Quality (Coast) , Development

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: More pressure on SWW to stop raw sewage spills into the River Otter and into the sea.

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: I am a director of Budleigh Salterton Information Centre who have won a sustainability award for their recycling policies, water refill facility , energy saving practices, encouraging sustainable tourism by promoting public transport , walking, cycling and supporting plastic free Budleigh. The Info centre is an ambassador for EDNL and a passport stamping centre for the SW coast path.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Agree

Please tell us if you have any comments on the above::

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Net Zero, Renewable Energy, Sustainable Transport

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Education , Habitat creation or enhancement , Increase public grants for domestic renewable energy

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Agree

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Farming, Tourism , Access & Recreation

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Promoting access to the area using public transport, cycles or EV's . Encouraging use of recycling services in East Devon. Taking your litter back with you after visiting a site. Using local shops and amenities instead of buying from out of town chain stores or the internet. Making use of leisure interests such as walking , horse riding, cycling , skateboarding, kayaking , paddle boarding , swimming , kite surfing, golf etc. that don't rely on burning fossil fuels.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Encouraging more EV charging points available in public car parks, particularly Limekiln car park which is really busy in the summer months and only currently has 4 charging points.

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Agree

Please tell us if you have any comments on the above:

How well do you understand the purposes of the National Landscape designation and Partnership? -: 3

Please tell us if you have any comments on the above: : I'm unsure as to the nature of the partnerships with local organisations such as EDDC , local landowners such as CDE and the Environment Agency , who have a controlling influence on what happens within the EDNL area.

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 2

Please provide reasons for your answer: : I understand the need for building more housing, particularly affordable housing for young local people rather than large 4 bed homes or retirement flats which don't help the housing crisis and only encourage people from outside the area to move in and put an extra strain on resources. . I recognise the allocated building site proposed for Budleigh which falls within the EDNL area, but I think the proposed site at EXMO 17 is far too large , it cuts across the existing cycle path, marks a dangerous precedent in filling in the gap between Budleigh and Exmouth and until the infrastructure is in place regarding sewage , medical care and schooling this proposal is untenable. A site of over 400 homes and commercial development on Grade 1 farmland, on an area designated within the EDNL boundary doesn't chime with your vision of sustainable nature-based solutions to balance local needs with national nature recovery.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: I would

like to see evidence that EDNL have been working collaboratively with other stakeholders to find sustainable nature-based solutions to balance local needs.

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Place , People, Nature , Climate

Response 21

Are you responding as a: Resident in the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Enjoying the views , Appreciating nature , Physical exercise

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Agree

Please tell us if you have any comments on the above?:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Protected Sites , Habitat , Water Quality

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Development , Habitat Loss , Land-use Change

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Terrible

Please outline why you have given the answer you have:: its a terrible concept and should not be pursued. How is building all these homes also in line with net zero - its just ludicrous

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Strongly Disagree

Please tell us if you have any comments on the above:: there are so many ways we can improve our living standards which will reduce waste, increase use of public transport (it was increased and more regular etc)

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Sustainable Transport

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Tree planting , Rewilding , Habitat creation or enhancement

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Agree

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Farming, Nature Connection, Tourism

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Tourism that does not exploit and destroy natural landscapes, that takes into account waste disposal, water usage, power usage and access by as much public transport as possible

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above: I strongly disagree on any building of new housing/industrial developments in areas designated as NL. The current proposal to build over 410 houses in EXMO17 and 700 houses in EXMO20 are totally incompatible with all aspects of EDNL plan. To agree to any development in the NL will set a cascade of future developments in NL areas and the very reason residents live here and tourists visit here is for the green calming spaces.

The principle that 'any development and infrastructure affecting the NL is sensitively planned' is not what is being planned at the moment in the two above mentioned EMXO developments. Exmouth and surrounding area need time for its two newest developments to settle in ie Goodmores and Plumb park - both which have caused severe disruption to the town and surrounding area

How well do you understand the purposes of the National Landscape designation and Partnership? -: 3

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : The developments that are being proposed are not in keeping with the what EDNL is setting out to achieve. What is the point in having this

plan if the next minute over 1100 homes are planned that will concrete over the very land that the plan is stating to protect and restore?

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: The residents need clarification on this stark contradiction on EDNL plan vs the proposed unsympathetic developments planned in and around Exmouth

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , Climate, Place , People

Response 22

Response 23

Are you responding as a: Resident in the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Enjoying the views , Appreciating nature , Other (please specify)

Please specify: Living in a semi rural town near the beach

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Strongly Agree

Please tell us if you have any comments on the above?: This is unachievable when most of the countryside in east Devon which is supposed to be protected is going to have houses built on it for people living outside of east Devon to purchase

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Water Quality , Protected Sites , Habitat

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Water Quality (Coast) , Land-use Change, Development

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Building houses will make it impossible to achieve your targets. Once the countryside is built on you've lost farmland and habitat that cannot be replaced. Stop the building and you might have half a chance
Water pollution is already killing wildlife more houses is going to damage everything east

Devon stands for. Beautiful countryside and lovely beaches which we are now hesitant to use. It will damage tourism and therefore businesses that rely on visitors. The character of the county will be lost along with the wildlife and natural habitat

In general terms, what is your current understanding of net zero and its implications?: Average

Please outline why you have given the answer you have:: The knowledge held by govt should have been used for decades to put solar panels on every new build but instead we are now getting solar farms
A lot of the things we are advised to do are just money making for disreputable builders who make money from the granted do a poor job.
The heat source pumps are expensive to use and not very efficient if you don't live in a well insulated bungalow, we need a better system

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Agree

Please tell us if you have any comments on the above::

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Other (please specify by clicking the green pen below) , Preserve the land we have and stop the building

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Other (please specify by clicking the green pen below)

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Stop the building then concentrate on maintaining it

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Neutral

Please tell us if you have any comments on the above? -: Bringing more people to this area cannot be levelled out with any of your suggestions

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Access & Recreation , Tourism , Farming

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Preserving the countryside and beaches that we have. Not creating more sewage, not building more houses and destroying what the tourists come here to enjoy

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Agree

Please tell us if you have any comments on the above:

How well do you understand the purposes of the National Landscape designation and Partnership? -: 3

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : It will destroy tourism and further exacerbate the sewage problems we already have

We are going to lose a family dairy farm and all the natural habitat for animals and birds.

Further down the line we lose another farm. Our pleasant countryside will disappear under concrete

If building is really required can't pods like they are installing in Tiverton be put in several small areas rather than smothering the countryside with posh houses for non residents to purchase. The ones in Tiverton are within current housing estates replacing original prefab houses with double the number of pods. I presume these would be affordable for locals to purchase

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Place , People, Nature , Climate

How well do you understand the purposes of the National Landscape designation and Partnership? -: 4

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 3

Please provide reasons for your answer: : Some is necessary because the government need it and more modern dwelling are more efficient usually.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Place , Nature , Climate, People

Response 32

Are you responding as a: Resident near the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Walking, Appreciating nature , Leisure activities

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Agree

Please tell us if you have any comments on the above?: But I just don't see the point if despite all the thinking and consultation developers still can build on these important and vital spaces

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Protected Sites , Water Quality , Priority Habitat

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Water Quality (River) , Water Quality (Coast) , Development

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Building houses with no supporting infrastructure- in particular sewage - on sites that are suppose to be protected

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: I have a degree in Physics

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Strongly Disagree

Please tell us if you have any comments on the above:: The implementation is overly aggressive and the government is making very poor choices. We saw how previous governments urged people to buy Diesel cars. They simply don't understand science. We have installations that cant connect to the grid and have no local customers for energy. The result is crippling energy costs. Why is the railway line not electrified?

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Sustainable Transport, Other (please specify by clicking the green pen below) , Electrified Railway and bus systems that actually integrate.

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Decarbonise public transport , Other (please specify by clicking the green pen below), Getting people to understand the issues through the lifecycle of a product. For an EV its not just emissions from driving, its mining the materials (esp lithium) making the car, the lifetime of the car

and then disposal/reuse/recycling. If it becomes a write off due to being uneconomic to repair at 5 yrs that's a major issue that most people ignore.

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: The simple fact that a complete achievement of net zero across the UK (which is an impossible target) has zero effect on the Earth as a whole.

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above? -: The largest effect would be obtained by having fewer people.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Other (please specify by clicking the green pen below) , Birst rate and immigration

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Its a false term. Tourism is a luxury, not an essential activity. If we really are killing the planet it needs to stop.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above: The designations have become meaningless.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 4

Please tell us if you have any comments on the above: : Its a great idea and we have all wasted time and energy (and caused carbon emissions) attending meetings producing plans, commenting on plans which are now totally meaningless.

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : because that was the whole purpose of designating them.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: The form of the questionnaire seems slanted to get specific answers.

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , Place , People, Climate

Response 33

Are you responding as a: Resident near the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Appreciating nature , Work, Walking

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above?: This area should not be built on. It is essentially the "green belt of Exmouth. If approved there is not much to stop development continuing on to knowle. Exmouth's infrastructure is already overstretched. There will be no open green spaces for generations to come to enjoy.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Forestry , Protected Sites , Habitat

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Water Quality (Coast) , Development , Land-use Change

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Excellent

Please outline why you have given the answer you have.:

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Strongly Disagree

Please tell us if you have any comments on the above.: Trees are the best way to net zero. Not building yet more homes. Removing green spaces and replacing with homes is not the way. Infrastructure is already stretched leading to sewage in the sea and roads that cannot cope.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Ecosystem Services

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Tree planting , Rewilding , Planning reform to include renewable energy in local housing

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Nature Connection, Tourism , Farming

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: If we continue to build new homes and ruin green spaces there is no incentive to visit Exmouth. This will kill the town as it is just another dead seaside town. Tourism via green spaces should be encouraged. What are people coming to visit and see if there is no countryside in the west country.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above:

How well do you understand the purposes of the National Landscape designation and Partnership? -: 5

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : This should be used entirely as a green space. No need for more homes and businesses in this area.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , Climate, Place , People

Please specify: I live here

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Neutral

Please tell us if you have any comments on the above?:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Water Quality , Protected Sites , Habitat

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Water Quality (River) , Water Quality (Coast) , Soil Health & Erosion, Land-use Change, Development

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Excellent

Please outline why you have given the answer you have::

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Neutral

Please tell us if you have any comments on the above::

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Preservation of farmland and natural spaces

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Rewilding , Tree planting

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Neutral

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Farming, Nature Connection

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Allowing Allowing tourism to be better duplied with mass public transit.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?:

Please tell us if you have any comments on the above:

How well do you understand the purposes of the National Landscape designation and Partnership? -: 4

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : Once land is developed it is lost forever. This is a green and pleasant land and I should like to keep it that way. Developments always seem to be pushed through regardless of public opinion as the developers and government have too much to say.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Development, especially mass housing should not be permitted. The houses are always of terrible quality, sold extortionately and are never for local people. A degree of separatism would be greatly appreciated. Outsiders cannot comprehend what it means to have been born in the countryside and their extensive gentrification and development programmes are unacceptable. It's about time the councils listened to the people, grew a backbone and just said no. Devon is Hevon.

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , Place , Climate, People

Response 35

Are you responding as a:: Resident near the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three):

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above?: We do not need any more houses in the area, we are overrun with building already.

The town cannot manage with the poor infrastructure as it is, more houses, is not the issue. Fix the problems we already have before giving permission to build adding more problems to the ones we already have!

This is EDDC, turning a blind eye to the issues and the damage it will cause to our landscape as well as wildlife, all for the sake of greed and money.

The only people that want more homes are the council.
Residents that are already here are crying out for investment in roads, doctors, schools, water pipes. Everything, more building is not the answer.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Other (please specify by clicking the green pen below) , All of the above are a concern not just one!!! Don't make people choose when you know they are all a concern!!!

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Again all of the above and the same answer as previous!

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Terrible

Please outline why you have given the answer you have::

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Strongly Disagree

How well do you understand the purposes of the National Landscape designation and Partnership? :- 4

Please tell us if you have any comments on the above: :-

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : We don't have the infrastructure in place to cope with more houses, our sewage is being pumped into the sea on a regular basis. We are losing our green spaces around our town. I live here for the green spaces and am devastated by the Goodmores Estate, the loss of the landscape here is awful. To think more houses are to be built fills me with dread, extra traffic, the loss of habitat, the houses will not be built with green credentials.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:- -

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: :-

Please specify: -

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Strongly Agree

Please tell us if you have any comments on the above?: Nothing should change, they're protected for a reason. No houses in the NL

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Habitat

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Habitat Loss , Development

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: -

In general terms, what is your current understanding of net zero and its implications?: Excellent

Please outline why you have given the answer you have:: Very clued up on this, and monitoring all policies very carefully.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Strongly Disagree

Please tell us if you have any comments on the above:: -

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Other (please specify by clicking the green pen below) , Not building on green landscapes which helps with "net zero"

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Tree planting , Rewilding , Habitat creation or enhancement

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Definitely don't be stupid enough to cover fields in solar panels or wind farms

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above? -: -

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Farming

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Ensuring we don't build more houses allowing people to flood down here !!

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: -

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: -

Please tell us if you have any comments on the above: -

How well do you understand the purposes of the National Landscape designation and Partnership? -: 5

Please tell us if you have any comments on the above: : -

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : It's just obvious. Build on grey/ brown sites

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: -

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , Place , Climate, People

Response 43

Are you responding as a: Resident near the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Enjoying the views , Appreciating nature , Physical exercise

Please specify: -

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above?: There seems to be no mention of removing areas from the NL under the local planning rules. There seems to be a conflict of interest having the NL run by the same organisation that puts it under threat. The Authority seems to be taking measures restricted to the Minister.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): The priority must be to preserve the Area itself. It will die by a thousand cuts if EDDC simply allow building on the designated landscape without concerted resistance.

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Development , Land-use Change, Water Quality (River)

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Preserving the Area of the NL itself.

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: I can read?

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Strongly Disagree

Please tell us if you have any comments on the above:: There is no restriction to the Net Zero/Climate action to the NL area only.
Without that the whole of the NL could simply become one big solar panel system.

All sections should ONLY deal with the NL area. No other issues outside the NL can be considered under the act - Section 5 and Section 11, 11a.

The renewable section should be very small and proportion to the population WITHIN the area.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Net Zero, Ecosystem Services , Other (please specify by clicking the green pen below) , Protecting the Landscape, including the views.

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Tree planting , Rewilding , Increase public grants for domestic renewable energy , Wind and Solar farms are too big. The energy must be used for the benefit of the NL only.

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: The section is not restricting the proposals to those pertaining to the NL.
If one tries to accomodate the whole of the UKs renewable energy within the NL there will be no NL left.

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above? -: The social drivers are nothing to do with the NL.

The NL must be protected against:

- 1)Increasing population and need for housing - not an NL remit under the Act the idea was to STOP destruction of the NL by over development.
- 2)Local authority funding, revenue and asset - not the NLs problem
- 3)The cost-of-living crisis - not an NL remit under the Act

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Other (please specify by clicking the green pen below) , Conserving or enhancing the Natural Beauty

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Conserving or enhancing the Natural Beauty by reducing the effects of tourism.

Spain (esp Canaries) is ruined by tourism.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:
Concertrate on Conserving or enhancing the Natural Beauty

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Strongly Disagree

Please tell us if you have any comments on the above: The NL needs to be conserved or enhanced, NOT BUILT ON.

increasing population and housing development should not happen in the NL that's the whole point of the job!

Affordability and demographics is a national issue. You will end up building on everything.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 1

Please tell us if you have any comments on the above: : Fail to see proper reflection of the principles of the Act in the documents produced by the Partnership.

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : Anything else than no development does not meet the principles of the Act - to CONSERVE or ENHANCE

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: You are liable to be sued for breaking the principles of the Act by bringing in issues that are not provided for within it.

The next "closing question assumes" I am happy with the idea that the themes should have a greater priority over the principles of the Act.

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , Climate, People, Place

Response 44

Please tell us if you have any comments on the above?: -

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Habitat , Species

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Water Quality (Coast) , Climate Change , Biodiversity Loss

**Do you have any feedback relating to this Nature chapter in the Management Plan?
For example, priorities or opportunities you believe have been missed.:** -

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: -

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Strongly Agree

Please tell us if you have any comments on the above:: -

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Net Zero, Sustainable Transport

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Education , Habitat creation or enhancement , Decarbonise public transport

**Do you have any feedback relating to this Climate chapter in the Management Plan?
For example, priorities or opportunities you believe have been missed.:** -

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Agree

Please tell us if you have any comments on the above? -: -

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Nature Connection, Community

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: tourism that protects/is beneficial to the local environment and communities

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: -

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Strongly Agree

Please tell us if you have any comments on the above: -

How well do you understand the purposes of the National Landscape designation and Partnership? -: 3

Please tell us if you have any comments on the above: : -

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 3

Please provide reasons for your answer: : carefully controlled and of benefit to the local communities. new housing prioritised for local residents

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: -

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Climate, Nature , People, Place

Response 45

Are you responding as a: Other (please specify below)

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Physical exercise , Leisure activities , Appreciating nature , Enjoying the views , Visiting local shops or restaurants , Visiting the coast, Meeting family or friends

Please specify: -

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Neutral

Please tell us if you have any comments on the above?: -

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): -

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): -

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: -

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: -

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Agree

Please tell us if you have any comments on the above:: -

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Sustainable Transport

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): -

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: The reference to "cycle-lanes" is misleading as it implies adding defined cycle markings onto existing roads. This example should be changed to "Green Lanes and off-road cycle routes". There are examples in Devon CC recently published LCWIP of proposed schemes.

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Agree

Please tell us if you have any comments on the above? :- -

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Access & Recreation

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Sustainable tourism is tourism that is not dependant on cars for access. This includes walking, cycling and bus travel.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: It is positive that the plan includes green infrastructure and sustainable public transport options.

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: -

Please tell us if you have any comments on the above: -

How well do you understand the purposes of the National Landscape designation and Partnership? :- -

How well do you understand the purposes of the National Landscape designation and Partnership? -: 4

Please tell us if you have any comments on the above: : -

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 2

Please provide reasons for your answer: : The area around Exmouth is over developed and with little infrastructure. Land south of Littleham is in, what was called area of outstanding natural beauty and should be enhanced, not built on. I despair that if it is it will form a precedent for further building on this land and spoiling its natural landscape which people from the area use to access nature as it is, (no enhancement needed).5

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: -

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: -

Response 52

Are you responding as a: Resident in the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three):

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?:

Please tell us if you have any comments on the above?:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three):

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three):

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: I have a strong background in the natural sciences and, although my working life was mainly as a research worker on various physics and chemistry related projects, since retirement I have taken a keen amateur interest in all matters environmental and ecological.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Agree

Please tell us if you have any comments on the above:: Your principles are good but to what extent are they achievable, particularly in the current economic climate?

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Renewable Energy, Sustainable Transport, Ecosystem Services

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Planning reform to include renewable energy in local housing , Habitat creation or enhancement , Education

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Agree

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Tourism , Nature Connection, Community

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Tourism not overly based on private transport and making use of local produce, local heritage. and local amenities. It means a reliable income stream for the indigenous population who, in the provision of their services, should as far as possible work with carbon neutrality strongly in mind.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Agree

Please tell us if you have any comments on the above: Cultural Heritage, Coast, and the overseeing of sympathetic development are essential to most of your aims.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 4

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 3

Please provide reasons for your answer: : Affordable housing (and not just in the legal definition of affordable which still leaves housing costs beyond the means of many) is needed for the indigenous population but second-homes and holiday homes should be strongly discouraged.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , Climate, Place , People

Response 53

Are you responding as a: Resident near the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Appreciating nature , Enjoying the views , Walking

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Agree

Please tell us if you have any comments on the above?: Water shapes the landscape, transports soil to the sea, can nourish the surrounding habitat. However if water courses are divorced from their flood plains and use their erosive power to cut into their river beds then the water table is lowered and the surrounding habitat is less resilient in times of drought. Management of water is fundamental to promoting biodiversity. Water has to be retained on the land for longer and natural flood management schemes supported. EDNL has a number of small attractive valleys such as the Sid and these should not be neglected. At present your statement of intent reads "improve water quality in KEY catchments". It should read improve water quality in ALL catchments within the NL. There are numerous WRT CSI projects across the area. You say you are going to work collaboratively re WQ improvement. It would be a good idea to contact the groups working in the area who may

have a good understanding of problems within their catchments and have data which supplement that of the EA.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Water Quality , Habitat , Forestry , Other (please specify by clicking the green pen below) , Soil monitoring and improvement - this is fundamental to reducing run off, erosion, flooding and enhancing biodiversity.

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Water Quality (River) , Soil Health & Erosion, Biodiversity Loss , By improving the 3 I've highlighted you create climate resilience -also a key issue.

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: At the risk of repetition - soil improvement is an opportunity not to be missed. This would involve monitoring soil health [infiltration, earth worm density, colour texture, root depth for example] and support remediation. This could be mutually beneficial to landmanagers, improve climate resilience and support increased biodiversity.

In general terms, what is your current understanding of net zero and its implications?: Average

Please outline why you have given the answer you have.: Because it is probably average possibly good.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Agree

Please tell us if you have any comments on the above.: You talk of habitat creation and restoration as a key way to sequester carbon but the most effective way to sequester carbon would be to improve soil health. Well managed soils can sequester large amounts of carbon. To that end you should include support for regenerative farmers within the EDNL.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Ecosystem Services , Net Zero, This is a caveat to renewable energy - large wind turbines and fields of solar panels are not suitable for what I hope will remain an area of outstanding natural beauty.

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): support for regenerative farming and encourage microhydro schemes for energy generation, Decarbonise public transport , Planning reform to include renewable energy in local housing , Habitat creation or enhancement

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Micro hydro schemes may have potential for small scale energy generation.

Healthy soil can sequester large amounts of carbon and to support land managers who can demonstrate that they are improving their soils is an opportunity not to be missed.

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Agree

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Nature Connection, Farming, Access & Recreation

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Tourism that don't put too much demand on our infrastructure - roads and our waste water system. Tourists that don't drop litter, pick up after their dogs , support local businesses and don't put inappropriate cleaning products into septic tanks.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:-

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Agree

Please tell us if you have any comments on the above: -

How well do you understand the purposes of the National Landscape designation and Partnership? -: 3

Please tell us if you have any comments on the above: : -

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 2

Please provide reasons for your answer: : For National Landscapes read nature based landscapes or areas of outstanding NATURAL beauty. Although all our landscape in ED has been managed since neolithic settlement, countryside is the most important element enabling support for Nature and reduction of carbonb emissions. A very small amount of development enabling local young people to remain in the area seems desirable but not larger housing developments.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , Place , Climate, People

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Neutral

Please tell us if you have any comments on the above: The term National Landscape is very vague - if it includes areas of outstanding national beauty (AONB) then I feel very strongly that these should remain for people to enjoy and nature to flourish without housing development.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 1

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : Please see my comment above.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: :

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : People, Nature , Climate, Place

Response 56

Are you responding as a:: Resident in the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Enjoying the views , Appreciating nature , Walking

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Strongly Agree

Please tell us if you have any comments on the above?: Those of us lucky enough to live in East Devon have access to a rich variety of landscapes and natural settings. It is very apparent to me that the pressures on ED have increased considerably in the 40 years I have been a resident. What we have here is precious and I would want to do all I can to preserve the heritage we have all around us.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Habitat , Species , Water Quality

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Climate Change , Development , Habitat Loss

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: A holistic approach will be needed to tackle the issues outlined. To my mind of all the priorities outlined I feel the one that is missing is public engagement. The only way in which we will have to bulk of the public behind these changes is by involving as many local people as possible in achieving these priorities. This through schools, local councils, churches, groups such as cycling clubs, walking groups, U3A, charities etc. Involvement should be as wide as possible and community involvement through voluntary work, school visits and consultation events could get the local community behind these priorities.

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: I fully support any initiative that is aiming to address climate breakdown but feel it is only part of the solution. Education is vital if the blizzard of misinformation about climate is to be addressed

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Strongly Agree

Please tell us if you have any comments on the above:: No opportunity should be lost to educate all local residents about the impact of the climate crisis while stressing the positive benefits for all in tackling it at the local level.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Sustainable Transport, Net Zero, Ecosystem Services

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Education , Planning reform to include renewable energy in local housing , Rewilding

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Local community involvement in tracking and monitoring the impacts of climate change on our local environment

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Agree

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Access & Recreation , Farming, Community

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: The potential in East Devon offered by sustainable tourism is considerable. The old railway lines from Feniton and Axminster could easily become the central focus for the future along with the obvious bucket and spade holidays. Both start at intercity railway stations and could connect to the fantastically successful Exe Trail to create a network celebrating all the natural treasures of the area

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: If Nature has an economic potential then sustainable tourism could be the main driver along with enhanced leisure facilities for our local communities.

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Agree

Please tell us if you have any comments on the above: I would like to see more thought given to how future housing developments are planned. More housing is going to happen but I feel that this area does not need the usual one size fits all approach to development. The type of housing and the travel links connecting them with the rest of ED needs to be central tech new estate. Again local communities should be fully involved in planning decisions not necessarily that they happen but how they happen

How well do you understand the purposes of the National Landscape designation and Partnership? -: 5

Please tell us if you have any comments on the above: : All residents of ED need to be aware about living in or near EDNL area and it should be central to how they view where they live

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 4

Please provide reasons for your answer: : Development will need to happen local jobs and community cohesion depend on it but it must be the right development for the area and change must have local support

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: We need to recognise what makes East Devon special and we need to make sure that the vision for the area is shared by the vast majority of local people.

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : People, Climate, Nature , Place

Response 57

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three):

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Average

Please outline why you have given the answer you have:: Net zero is about mitigating carbon use with renewables

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Neutral

Please tell us if you have any comments on the above:: Infeasible but a nice idea

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Ecosystem Services

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Other (please specify by clicking the green pen below), Stop building on green spaces. It is pointless having this plan if you are about to concret over existing free land over , Education , Awareness-raising, Tree planting

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Don't allow planning to put 100s of new houses on free land surrounding Exmouth

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Neutral

Please tell us if you have any comments on the above? -: Don't know what it is

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Nature Connection, Farming, Other (please specify by clicking the green pen below) , Maintaining and allowing outdoor recreation bridlepaths for horse riders not closing them like you have in lumpstobe and Venn ottery

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this:

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Neutral

Please tell us if you have any comments on the above: Don't know what it is

How well do you understand the purposes of the National Landscape designation and Partnership? -: 1

Please tell us if you have any comments on the above: : Don't know what it is

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 1

Please provide reasons for your answer: : Stop building massive developments on green space like the proposed development around Littleham

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: If this is the building homes section it's ridiculous to even suggest EDDC care at all about environment and nature plus you are over ridding an agreement with the Church of England all for greedy profit

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , Climate, People, Place

Response 67

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , People, Climate, Place

Response 68

Are you responding as a:: Resident in the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Physical exercise , Leisure activities , Walking, Enjoying the views , Visiting the coast, Visiting local shops or restaurants , Meeting family or friends , Appreciating nature

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Strongly Agree

Please tell us if you have any comments on the above?: The aspirations are completely logical, even laudible but as far as I can see, there is no measurement proposed to capture the failure to achieve any of the Plan's timescales or goals because of direct impact either by conflicting government initiatives (eg. new housing targets over-riding AONB considerations) or unco-operative commercial enterprises (eg. water companies failing to stop sewerage spills).

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three): Water Quality , Protected Sites

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three): Water Quality (River) , Water Quality (Coast) , Development , Biodiversity Loss , Litter

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Average

Please outline why you have given the answer you have:: Only conversant with the subject through press articles.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Agree

Please tell us if you have any comments on the above::

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Sustainable Transport, Net Zero, Renewable Energy

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Tree planting , Education , Awareness-raising, Habitat creation or enhancement , Rewilding , Planning reform to include renewable energy in local housing , Decarbonise public transport , Wind Farms (onshore/offshore) , Solar Farms

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Farming, Access & Recreation , Community

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: EDDC being the driver of a 'Best in Class' authority and flagging - moving even more swiftly towards 100% green public transport, encouraging local councils to sponsor more Farmers' Markets using only local producers with 25 miles of each market; such steps towards sustainability benefit tourism and the local community

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Strongly Agree

Please tell us if you have any comments on the above:

How well do you understand the purposes of the National Landscape designation and Partnership? -: 4

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 2

Please provide reasons for your answer: : Realistically speaking, NLs are not going to be immune to central government dictats on national housing targets therefore some (legally binding) rules should be put in place to allow small, (eg. 10-12max properties of 2/3 beds, for local residents), green credentialled and architecturally sensitive enlargements to existing villages within the EDNL, where other considerations (eg . local SSSI) permit. No 'new towns'.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three):

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: Net zero has implications for my work, so it is a topic I am required to have/have developed an understanding off in recent years.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Agree

Please tell us if you have any comments on the above:: The plan appears to suggest proposals for addressing this matter which should be achievable and realistic.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Renewable Energy, Ecosystem Services , Sustainable Transport

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Tree planting , Habitat creation or enhancement , Awareness-raising, Rewilding , Education , Planning reform to include renewable energy in local housing

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Agree

Please tell us if you have any comments on the above? -: Whilst the targets are possibly ambitious, it is vital that people feel connected to, even a sense of ownership of, the EDNL. The targets, even if not all achieved, will contribute to this, hopefully to the benefit of people and the EDNL.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Access & Recreation , Nature Connection, Tourism , Farming, Community

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: There are two key elements of sustainable tourism. Firstly, it is how visitors travel to/from and around the area. Secondly, whether their accommodation is sustainable, in terms of using renewable energy or using locally sourced products, service and foods where reasonably possible. That way, tourism can be both environmentally and economically sustainable.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Whilst the western part of the EDNL is blessed with large areas of open access land (such as the Pebblebeds, Mutters Moor, Fire Beacon and East Hill), this is much less prevalent in the northern and eastern parts of the EDNL. Accepting that there is a greater amount of agricultural land in the northern and eastern parts of the EDNL, there are some areas of common and woodland which don't benefit from the same levels of access we are fortunate enough to enjoy in the western part of the EDNL. If there is a way to open up more suitable areas of open access land in the northern and eastern parts of the EDNL, this may help to provide a better feeling of connection for residents of, and visitors to, those parts of the EDNL.

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Agree

Please tell us if you have any comments on the above: The targets and priorities for this section appear reasonable and realistic. However, the bathing water target is a difficult matter for you to control, as that will partly be in the control of other organisations, such as SWW.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 3

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 5

Please provide reasons for your answer: : The right development in the right place can make a positive contribution to the EDNL - either through providing well designed and appropriate residential development, or creating opportunities for economically or environmentally beneficial development. Additionally, any development which requires planning permission, and is not exempt, will provide BGN enhancements. Clearly, though, development will need to be in accordance with the Local Plan and other relevant policy, and will need to be of a scale which is suitable for, and not detrimental to, the EDNL. It must also not be detrimental all those who live, work or visit the EDNL.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: :

Response 77

Are you responding as a: Business/organisation in East Devon National Landscape (please tell us the name of your business or organisation below)

What are your main reasons for visiting East Devon National Landscape? (please select your top three):

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?:

Please tell us if you have any comments on the above?:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three):

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three):

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: I believe I have a good understanding of what net zero is, how it can impact us as individuals and businesses.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Agree

Please tell us if you have any comments on the above:: All the sub-themes and measurements seem sensible

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1:

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three):

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?:

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) :

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this:

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Agree

Please tell us if you have any comments on the above: The targets and priorities appear good - my concern would be about the balance across all the themes and how you balance, for example, the enhancement of cultural heritage with the successful farming business and with improving biodiversity and planting trees.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 4

Please tell us if you have any comments on the above: : They are very well defined in the document

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 3

Please provide reasons for your answer: : Development is essential but needs to be in the right place and sensitive to all themes

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , Place , People, Climate

Response 78

Are you responding as a: Visitor to East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three):

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?:

Please tell us if you have any comments on the above?:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three):

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Average

Please outline why you have given the answer you have:: Don't know enough about the cost of this and worry about the implications for the poorer in society who can not afford to replce items such as cars and heating in order to comply

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Disagree

Please tell us if you have any comments on the above:: I think it it too much to soon and the emphasis should be on the countries that are really contributing to the effects of climate change. If we go to net zero what effect will that have on the world - very little I feel - and it will be at a great cost to us

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Ecosystem Services , Sustainable Transport

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Tree planting , Education , Habitat creation or enhancement , Planning reform to include renewable energy in local housing , Awareness-raising, Increase public grants for domestic renewable energy

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Neutral

Please tell us if you have any comments on the above? -: Seems to a little of everything

In general terms, what is your current understanding of net zero and its implications?: Average

Please outline why you have given the answer you have:: I know what it is, but not sure how we are going to get there

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Strongly Agree

Please tell us if you have any comments on the above::

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Ecosystem Services , Net Zero, Renewable Energy

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Planning reform to include renewable energy in local housing

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Rewilding can cause displacement problems in other less developed countries that have much better biodiversity. If we grow less of our own food then it has to be grown elsewhere leading to much greater habitat destruction. That is why we are losing so much of the rain forest etc.

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Agree

Please tell us if you have any comments on the above? -:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Farming, Community

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Usually low key and minimal impact. Oposite of mass tourism as seen in parts of Devon and Cornwall.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Agree

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: Sustainable tourism is more than just "green tourism" - the tourism offering needs to be sustainable in its own right, in that the overall offering (attractions, accomodation, pubs, cafes, experiences) need to be of high enough quality and in sensible enough quantities to ensure that people continue to visit from both within the County and further afield.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 5

Please tell us if you have any comments on the above: :

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 4

Please provide reasons for your answer: : I don't believe there should be a blanket ban. BUT development should be in line with the needs of the local community - if housing is being built, there needs to be more allowances made for genuinely affordable housing, these should be built to the highest standards in terms of insulation, on site power generation/ storage etc. Scale is key - thousands of houses in one place is unlikely to be sustainable, or to be able to be supported by existing infrastructure. I don't think any of us want to see the entire countryside covered in solar panels, but better harvesting of rainfall and surface run off, a mixed approach to power generation and storage - looking at villages and hamlets as a stand alone entity in terms of power to determine what reasonable developments could be made to make their usage more sustainable.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: : Nature , People, Climate, Place

Response 89

Are you responding as a: Resident near the East Devon National Landscape

What are your main reasons for visiting East Devon National Landscape? (please select your top three):

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?:

Please tell us if you have any comments on the above?:

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three):

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three):

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Excellent

Please outline why you have given the answer you have:: Taking the question to mean what is my understanding rather than the quality of any policy which would elicit a very different answer, because I spend a lot of time researching aspects of the current situation and proposed actions.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Strongly Agree

Please tell us if you have any comments on the above:: I question the word targets because hardly any of your boxes contain a measurable target.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1: Ecosystem Services , supporting farmers to increase sustainable practices

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three): Planning reform to include renewable energy in local housing , Education , Awareness-raising

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: You will not have the resources nor power to work effectively on most of the listed targets, your biggest impact is probably going to be by building even stronger relationships with local farmers.

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Strongly Agree

Please tell us if you have any comments on the above? -: I am looking for the motherhood and apple pie box to make your utopia complete. Sorry to be negative but it really is a waste of time setting yourself targets that are beyond the scope of your resources and powers.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Access & Recreation , Nature Connection, Farming

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: It is an oxymoron, if you don't want to have a negative impact on a particular site then stay at home and watch webcams, try going for walks around your local neighbourhood.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Strongly Agree

Please tell us if you have any comments on the above: As a wish list wonderful, but I refer you to my previous answers.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 3

Please tell us if you have any comments on the above: : The change of name has undermined my understanding of your purpose, you might have noticed that I am very cynical, I suspect ulterior motives from people above the East Devon level of decision making.

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? : 3

Please provide reasons for your answer: : Too vague a question, there has to be some but it has to be on a case by case answer depending on the balance between the benefits and the negative impacts.

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Please rank the following strategic themes in order of priority (1 highest to 4 lowest) for the next 5-year period: :

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: I am aware through books, articles, the news and broadcasts of the perilous direction that the climate, wildlife numbers and bio-diversity is heading towards. All thanks to the damage caused by world wide industrialisation of everything from the food chain, through transport to manufacturing. There are international agreements between countries not burying their heads in the sand that the reduction of carbon dioxide in the atmosphere to the balanced measure of net zero will contribute towards reversing this trend.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -:

Please tell us if you have any comments on the above::

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1:

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Neutral

Please tell us if you have any comments on the above? -: I have no barriers to accessing the EDNL where permitted although I realise others may have, so I am unaware of how much of an issue this is and how much resources it could consume in a time when public funding has to be considered carefully.

The target of 1% of land managers adopting nature friendly farming practices is woefully low. They are the ones in the position to make substantial improvements in bio-diversity and flora and fauna habitat. Therefore the five year target should be in the order of 10%.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) :

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this:

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Disagree

Please tell us if you have any comments on the above: It is extremely disappointing that there is no commitment to retain the border of the EDNL where it currently is and therefore ensure the highest level of protection to the landscape within the boundary.

It is also remarkable that a document that purports to protect the EDNL has contains no reference to the National Planning Policy Framework (NPPF) which is the document that clearly states that National Landscapes come under the highest level of protection against unwarranted development.

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Disagree

Please tell us if you have any comments on the above? -: The current situation regarding sewage is disgusting and I see no evidence of it getting better. The town is awash with litter. Bus routes have been changed and this has caused all sorts of issues for people who rely on them. There are barbers, nail shops, 'international shops' that look like they belong in an inner city not a sea side town. Businesses seem to be closing at an alarming rate. What are plans for supporting small, local businesses?

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Infrastructure

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: A town that is clean, thriving small businesses, clean beaches where children can play and people can swim. Not constant road works and constant construction going on on the seafront. A town that people actually might want to visit. Fewer pot holes.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.: Constant development on the seafront doesn't seem to have provided family friendly, affordable activities like the ones my family had the good fortune to enjoy when my children were small. There is no thriving nightlife. Pubs and restaurants are struggling. There is nothing for young people.

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Disagree

Please tell us if you have any comments on the above: Sorting the sewage issue should take absolute priority. The constant road works and the potholes are a nightmare. Traffic getting into Exeter is terrible. Proposed developments are only going to make this ten times worse.

Response 101

Are you responding as a: Other (please specify below)

What are your main reasons for visiting East Devon National Landscape? (please select your top three): Walking, Physical exercise , Appreciating nature

Please specify:

Overall, to what extent do you agree or disagree with the proposed Nature targets and priorities?: Neutral

Please tell us if you have any comments on the above?: I thought the document was very wordy and long on emotional talk of 'crisis' when I would have preferred specific proposals to improve and protect the countryside.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three):

What in your opinion are the main environmental issues currently impacting, or going to impact, East Devon National Landscape over the next 5 years (please select your top three):

Do you have any feedback relating to this Nature chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

In general terms, what is your current understanding of net zero and its implications?: Good

Please outline why you have given the answer you have:: I have a reasonable understanding of the issue of climate change, arising from my general interest in the subject, and participation in local matters which are impacted.

Overall, to what extent do you agree or disagree with the proposed Climate targets and priorities? -: Disagree

Please tell us if you have any comments on the above:: It is fine to have ambitious targets, but they must be defined and focussed, not lofty and an exercise in box-ticking.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three).1:

What in your opinion are the main solutions for addressing climate change within East Devon National Landscape (please select your top three):

Do you have any feedback relating to this Climate chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed People targets and priorities?: Disagree

Please tell us if you have any comments on the above? -: I would like to see specific proposals and clear plans rather than emotional grandstanding.

Of the sub-themes, which should be the main priorities for action across East Devon National Landscape (please select your top three) : Access & Recreation , Tourism , Farming

What does sustainable tourism mean to you? Please comment in the box below and provide your reasons for this: I am a strong supporter of tourism generally and sustainable or green tourism in particular. I especially believe that walking has huge tourism potential in East Devon, so it is disappointing to see our footpaths often in poor condition, and very little effort being made to encourage walking generally and walking tourism in particular. Instead, our local authorities very much focus upon cycling. I am a cyclist and I am happy to see cycling promoted and encouraged. but this is done at the expense of walking, which is very much the junior partner in the 'walking and cycling' agenda. We have a wonderful footpath network, but we fail abysmally to promote it. This is not just a tourism issue, we also need to promote walking for the health, wellbeing and educational benefits. We need to lobby much harder to ensure that DCC maintain and improve our footpaths, and above all, we need to identify walking routes and sign them. the Sid Valley Ring, a 16 mile signed route around the Sid Valley, which has been remarkably successful. a Round East Devon route called the RED Route (for Round East Devon, but also to evoke our red soils and red cliffs) but thus far without success. It is 100 miles in length, and would be big boost to tourism and health and wellbeing. 250,000 people live within a mile of the RED Route. It would cost around Â£35,000 to get up and running. This sort of initiative is what we need to do. As I have stated elsewhere, we need to do things, and be much more positive and proactive, rather than polishing our halos.

Do you have any further feedback relating to this People chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:

Overall, to what extent do you agree or disagree with the proposed Place targets and priorities?: Disagree

Please tell us if you have any comments on the above: Please see earlier comments. I would prefer a much more positive and purposeful approach with specific proposals, and measurable targets.

How well do you understand the purposes of the National Landscape designation and Partnership? -: 3

Please tell us if you have any comments on the above: : I think I understood the purposes of the AONB, but I am perhaps less clear with the National Landscape, which seems to have a new and more vague approach.

Where do you stand on development (either residential or commercial) being permitted within National Landscapes? :

Please provide reasons for your answer: :

Do you have any further feedback relating to this Place chapter in the Management Plan? For example, priorities or opportunities you believe have been missed.:
