

Monday 12th Dec. 2022.

Dear Sir or Madame,

I have recently received a new proposed development plan for Fenton.

This really surprised me as it was only a few years ago since we objected to the developments on the grounds it was completely unsustainable for our village and village.

I believe these objections remain the same today.

I recently tried to make an appointment to see my local doctor and have to wait for 6/7 weeks.

I also believe that the local school is full and needs space.

However my main objection to

The size and scale of the local roads leading into the village. All of which are narrow and difficult to negotiate with kerbs and limited passing places.

I live along the road leading from the station to Tolaten and the traffic using this road has increased considerably over the last few years with VERY LARGE containerised going road from the works at Tolawater plus traffic from the local garage and Tolaten. It is dangerous to walk along the road in places and whilst pushing my grandson over years back we nearly didn't make it!!

I also understand that the government is encouraging farmers to ride us more agriculturally sustainable and avoid flying in food from South America and Africa. The local council here is top Agricultural level. Please take these points into consideration. Yours faithfully
VALERIE OZKAN
